

Gorkha HRRP Coordination Meeting

Date: 26th July 2016

Time: 1:00 PM

Location: HRRP Office, Hotel Gorkha Inn

Participants: WVIN, CARE, CRS, JICA, UN Women, UNDP, OXFAM, SCI, PIN, Goreto, Helvitas, IOM, Red Cross, SDSC, CARITAS-N, ECO-Nepal, INF-Nepal

Agendas

1. Introduction
2. POs Update
3. Discussion and Planning on strengthening communication and coordination between POs and DLPIU(engineers)
4. Collaboration and Cooperation approach/TWGs
5. Social Mobilization Trainings
6. AOB

1. Introduction

HRRP coordination meeting was facilitated by HRRP district coordinator Minar Thapa Magar. Representatives from 19 POs attended the meeting. The meeting was focused on challenges of reconstruction and strengthening communication and coordination among POs and DLPIU engineers.

2. POs updates and current challenges

Representative of all partners present in the meeting updated about their activities and planning and shared some current challenges.

- POs updated and informed about their planned and completed housing activities such as skilled (masons, carpenters, electricians etc.) trainings, vocational trainings, BBS messaging, demonstration constructions, communication outreach etc.
- UN Women, INF-Nepal updated about their approaches for inclusion and accessibility in reconstruction and recovery and they also mentioned about the importance of inclusive and accessible shelters and human friendly structures achieved through integrated approach in every activities. Care and CRS integrated HI's tools and brief sessions on inclusive and accessible shelters in their 7 days of skilled mason trainings.
- POs secured approval for building houses and selected beneficiaries as per their proposals with coordination with NRA sub regional office and DDC, gorkha. No top up grant has been approved over government subsidy of 2 lakh rupees. POs selected enrolled beneficiaries and prepared to provide first tranche of subsidy with coordination with NRA and DDC, Gorkha.

Challenges:

- Access and safety was identified as major challenges by POs due to continuous rainfall as result in worst road condition and middle and northern part of gorkha is always prone to landslides.
- Challenge in changing traditional mindset and perception towards female interest and participation in construction activities and importance of PWD/User friendly structures.
- Need to secure layers of approval from government at different levels, which is time consuming and delaying housing interventions. Chances of exclusion from different types of loan advantages provided by government to earthquake victims after getting housing construction support from POs.
- POs also informed that many houses have been already reconstructed in different regions of Gorkha district with similar and traditional construction techniques and to support them to reconstruct and retrofit to make structures earthquake resistance would be a tough challenge for POs and government.
- Lack of uniform technical understanding and adherence to same building code between DLPIU and I/NGO engineers.
- Different new construction techniques have been introduced in various area and demo panels and trainings must be focused according to the context of construction in that particular area.

Presentation by HRRP, Gorkha

- HRRP updated about importance of visibility of both INGOs and NGO as partner and implementing partner and updated about the gap in 4W where POs were confused about partner organization, implementing partner and funding organization.
- HRRP also presented rough analysis on estimation of skilled manpower required for reconstruction, repair and retrofit for gorkha district which is 11410 manpower in total based on analysis done in technical report prepared by TWG at central level.
- Planned VS reached bar chart was presented for four major activities (i.e. skill training, vocational training, BBS messaging and demo constructions) as per latest update in 4W.
- HRRP presented about different types of reconstruction that is already happening at this phase with even new technology like blocks and some constructions with mixed technology. There is huge need for information regarding building typology, rate and quality of constructions.
- HRRP also requested POs to support in data collection through their staff in respective working VDCs as these information are required for targeting and analyzing nature of reconstruction and recovery process.
- Care informed that they already conducted base line survey to collect information on types of reconstruction, process and rate of reconstruction and agreed to share assessment sheet and analyzed result with HRRP and HRRP will circulate assessment sheet for feedback from POs and requested POs to collect similar type of information.

3. Strengthening coordination and communication between POs and DLPIU engineers

- HRRP, Gorkha presented about importance of communication and coordination among POs and DLPIU engineers as they are also one of the key actor to supervise and monitor housing reconstruction. POs are interested to support government in technical guidance through door to door assistance, engineering help desk, skill trainings, demo constructions, BBS messaging

etc. then there is great need of relation building and frequent interaction between DLPIU engineers and POs technical team

- HRRP asked POs to provide their views and suggestions on organizing short workshops where POs will do presentation and work together in group so that DLPIU engineers will also know what POs is doing to support government and earthquake victims for reconstruction and also to involve them in shelter activities like trainings, demo constructions etc.
- HRRP also requested POs to suggest different approaches through which we can strengthen our relationship with DLPIU engineers and make our coordination strong.
- POs suggested to engage DLPIU engineers in different technical working groups, trainings and workshop for their capacity building and mutual understanding and relationship building with POs. JICA updated about their planning to provide 7 days TOT for all deployed 224 DLPIU's engineers, sub engineers and assistant sub engineers from 29th July, 2016.
- HRRP will organized another coordination meeting chaired by DLPIU chief next week which will be more focused on relation building with DLPIU engineers.

4. Collaboration and Cooperation approach/TWG

- HRRP digitized and named a joint collaboration and cooperative approach to resolve issues of duplication and gap filling and to maintain uniformity in response. Objectives were agreed by POs through several meetings and HRRP facilitated to compile all those objectives as working documents which will be modified and improvised accordingly.
- HRRP requested POs to provide their feedback and suggestions on concert approach and to identify other issues which are not enlisted in that document.

TWG (Technical Working Group)

- To make TWG more effective and efficient, HRRP proposed to make district level TWG active by organizing workshops, trainings etc. depending on need. It can be discussion regarding NRA guidelines and policies, capacity building trainings, strategy and coordination workshop etc.
- POs suggested HRRP to invite DLPIU's engineers in TWG for better partnership and collaboration approach.

5. Social Mobilization Trainings

- HRRP planned to organize 3 days social mobilization training in august whose curriculum will be designed according to PO's need in Gorkha district. POs provided their valuable suggestions for the curriculum of social mobilization training package.
