WEEKLY BULLETIN

22 January 2018

During a cabinet meeting on Wednesday, 17 January, provincial capitals were allocated for all states, and provincial governors were appointed. Source: Nepal in Data

Highlights

- [2015 Nepal Earthquake: Open Data Portal](#) developed by [Kathmandu Living Labs](#) under the guidance of [National Planning Commission](#), with support from DFID's Evidence for Development Programme. The portal provides access to [Central Bureau of Statistics](#) household level data from the damage assessment.
- MoFALD CLPIU Notice to Urban and Rural Municipalities in 31 EQ Affected Districts, Identification of Vulnerable Households ([Nepali](#), [Unofficial English Translation](#))
- NRA Technical Committee Meeting, 17 January: recommend minimum size for one room house may be reduced to 11.15 sq.m. (instead of 13.5 sq.m.) and review progress by technical working group on timber framed structures.
- [‘Study on the Microinsurance Industry in Nepal’, Sakchyam Access to Finance](#)
- 20th Earthquake Safety Day (ESD), [Nepali](#) and [Unofficial English Translation](#)
- [HRRP technical assistance coverage maps](#) as of 25 December 2017. **Only 4.2% of VDCs are receiving the minimum package of TA support as recommended by HRRP and NRA.** With many Partner Organisations (POs) coming to the end of two year recovery programmes, and reconstruction support required across 31 districts not just 14, serious consideration needs to be given to stretching existing support to cover more areas, and to better supporting GoN field staff in their TA roles.

UPDATES & REQUESTS

National

MoFALD CLPIU Enrolment Data, as of 17 January ([Nepali](#) and [Unofficial English Translation](#)):

	27 December	5 January	17 January
Total No. Eligible HHs	767,704	767,704	771,220
HHs Enrolled	676,849 (88.1%)	678,097 (88.3%)	683,475 (88.6%)
HHs Received 1 st Tranche	665,872 (86.7%)	666,977 (86.9%)	669,542 (86.8%)
HHs Received 2 nd Tranche	119,004 (15.5%)	129,668 (16.9%)	150,798 (19.6%)
HHs Received 3 rd Tranche	28,897 (3.8%)	31,535 (4.1%)	37,662 (4.9%)

Kathmandu, Bhugol Park, 20th Earthquake Safety Day (ESD) ([Nepali](#), [Unofficial English Translation](#)): on 16 January ESD commemorated the Great Nepal-Bihar Earthquake of 1934. The main event was inaugurated by Prime Minister and Home Minister, Mr. Sher Bahadur Deuba. NRA CEO Mr. Yuvraj Bhusal highlighted that to alleviate the effects of earthquakes, activities such as preparedness, response, relief and rescue and other Disaster Risk Reduction activities need to be extensively accelerated.

MoFALD CLPIU Notice to Urban and Rural Municipalities in 31 EQ Affected Districts, Identification of Vulnerable Households ([Nepali](#), [Unofficial English Translation](#)): the municipalities have been requested to submit details of all households eligible for the GoN housing reconstruction grant that fall into four categories; “1. Single women – over 60 years helpless single women, 2. elderly citizen – over 75 years elderly people, 3. children – below 16 years helpless children, and 4. Differently able person – persons holding red identity card”. Households falling into these categories, but where there is another person between 16 and 60 years of age living in the house should not be included in the list of vulnerable households. The information collected will support distribution of additional support to vulnerable households to help to speed up the reconstruction of their homes.

NRA Technical Committee Meeting, 17 January: conducted under the chairmanship of Dr. Hariram Parajuli, NRA Executive Member, the meeting participants included representatives from NRA, DUDBC, MoUD CLPIU, MoUD, MoFALD CLPIU, IOE/TU, JICA, NSET, WB, and HRRP.

- During the meeting, the committee discussed the minimum size for one room, one-storey houses. MoUD CLPIU shared results of feedback on this topic collected from DLPIUs, local bodies, and other stakeholders. DUDBC suggested that the NBC provisions must be considered when taking a decision (NBC 206-1994 provisions are for 2mx2m for living use and 2mx1.8m for kitchen). It was also recommended that the different needs of groups that may be building one room houses need to be considered, e.g. single women, elderly people, etc. The committee has proposed that all the minimum requirements will be the same except that the minimum internal room area can be 120.q.ft. (i.e. 11.15 sq. m. instead of 13.50 sq.m.). The NRA Executive Committee will take an official decision very soon on this.
- The committee also reviewed the progress by the technical working group on timber framed buildings. The working group has determined that timber buildings can be sorted into three categories; moment resisting bare frame, moment resisting frame with infill wall and hybrid structure. The group is planning to complete the development of minimum requirements and inspection forms for these structures by the end of March 2017. NRA and MoUD CLPIU requested the group to complete the work as soon as possible as there are an estimated 40,000 timber framed buildings awaiting decision in the districts.

NRA Directs Concerned Bodies to Supply Suitable Timber for Reconstruction of National Heritage Sites: limited access to suitable timber has stalled reconstruction of national heritage sites. To address this, the NRA has recently directed timber suppliers to make the requires timber available as soon as possible in order to avoid further delays in the reconstruction process.

China-UNDP Partnership for Post-Flood Recovery in Terai: the Government of the People's Republic of China has partnered with UNDP Nepal to provide 4 million USD to support flood recovery efforts in the Terai. The assistance will reach 31,800 households across Sunsari, Saptari, Sarlahi, Dhanusha, Mahottari, Rautahat, and Parsa districts of Provinces 1 and 2.

International Seminar on Japanese Technologies for Preservation of EQ Damaged Cultural Heritage Sites, 14 January: KUMONOS cooperation, working with Geotech Solutions International, Sanepa, has launched the use of 3D technologies for the mapping of historical sites preservation and urban development. The technology has also been used for the study of renovation and repair planning of Tri-Chandra campus of Tribhuvan University. For more information please contact Dr. Manita Timilsina, Executive Manager, Geotech Solutions International, manitatimilsina@gmail.com / info@gsi.com.np, +977-1-5536165 / +977-1-5536174.

Participants in the international seminar.

Districts

[HRRP District Coordination Team Dhading, Weekly District Report, 11 - 18 Jan 2018](#)

Katunje-05, Netrawati Rural Municipality: one storey load bearing structure constructed using stone masonry with cement mortar. The home owner has received the second tranche of the GoN housing reconstruction grant and has been approved for the third tranche.

[HRRP District Coordination Team Kavre, Weekly District Report, 11 - 18 Jan 2018](#)

Bhumlu Rural Municipality (formerly Bhumlutar VDC): the house has been constructed using brick masonry with cement mortar and RCC bands. The owner has received the second tranche of the GoN housing reconstruction grant and the house has been inspected for the third tranche.

HRRP District Coordination Team Makwanpur, Weekly District Report, 11 - 18 Jan 2018

IndraSarowar Rural Municipality-4: this stone and mud mortar masonry house with timber banding and flexible roof has been inspected and approved for the second and third tranche of the GoN housing reconstruction grant. The tentative cost of this building is 1.5 lakhs, excluding the home owner's contribution and the cost of local material used. Such one room, one-storey houses present potential issues for home owners in that they do not meet living requirements for families used to residing in larger, multi-storey houses.

Dolakha, GI Wire Containment Technology, Comprehensive Disaster Risk Management Programme

(CDRMP)/UNDP: the technology, which has been included in the [DUDBC Design Catalogue Volume II](#), costs approximately 60,000 to 70,000 NPRs for the construction of a two room stone and mud mortar masonry house. The technology does not require steel reinforcement or cement and houses using this technology can be built within 25 days.

NRA Acting Chief monitoring a building being constructed using GI Wire Containment as part of a 50 days On the Job Training programme for masons. These houses have received second tranche and have been recommended for the third tranche. The local Community is replicating this technology in Boch, Lakuridanda, Katakuti, Magapauwa and Phasku and more than 30 houses are being re-built following this technique.

Requests for Partner Support

ReSource Award, Entrepreneurial Solutions for Resilience in Water Management, Swiss Re Foundation: the award acknowledges social entrepreneurial initiatives aimed at prototyping or scaling up new approaches for resolving existing social and/or ecological issues related to sustainable water management practices. The prize combines financial and non-financial contributions (coaching/expert advice) and the winning organisation will be supported (USD 75 000 + coaching) during the following three years in further developing, prototyping, or scaling up its social entrepreneurial initiative. More details on the application process are available [here](#).

South Asian Conference on Sanitation (SACOSAN), 10-13 April 2018, Islamabad, Pakistan: a government led biennial convention intended to develop a regional agenda on sanitation, enabling learning from the past experiences and setting actions for the future. Interested participants can register to attend the event [here](#).

Rural Water Supply Network (RSWN), online course on 'Professional Management of Water Well Drilling Projects and Programmes – an Overview: the course, which runs from 5 March to 14 April 2018, provides participants with an understanding of the following key elements: groundwater information, siting, costing and pricing, procurement and contract management, borehole drilling and supervision and how professional drilling is affected by the wider institutional environment. More information is available [here](#).

Request for Proposal for Development of GIS Based Risk Information Platform, Voluntary Service Overseas (VSO): the procurement is for a registered firm or an independent consultant having expertise in Geographical Information System (GIS), remote sensing, web based system development, and mobile application development to design and develop an interactive web based platform for two municipalities – Changuarayan and Shankrapur. The development of the web based platforms for the municipalities is part of the PRAGATI (Promoting Resilient and Sustainable Urban Growth by Augmenting Disaster Risk Reduction Capacity of Local Authorities through Active Private Sector Involvement) programme. The deadline for submission of proposals is 25 January 2018.

DOCUMENTS & PRODUCTS

Government of Nepal

2015 Nepal Earthquake: Open Data Portal: developed by [Kathmandu Living Labs](#) under the guidance of [National Planning Commission](#), with support from DFID's Evidence for Development Programme. The portal provides access to the data collected by the [Central Bureau of Statistics](#) for the 'Household Registration for Housing Reconstruction Programme'. Users can explore patterns in the data, generate demographic and earthquake damage profiles for particular districts/municipalities, and download raw data. Currently the portal provides data only for 11 earthquake affected districts.

HRRP

Technical Assistance Coverage Maps: based on the latest round of HRRP 4W data, as of 25 December 2017. The data shows that 80% of VDCs in the 14 most affected districts are receiving four or less TA activities, 21% of VDCs are receiving zero TA support, and only 4.2% of VDCs are receiving the [minimum package of TA support as recommended by HRRP and NRA](#). With many Partner Organisations (POs) coming to the end of two year recovery programmes, and the support to the 17 districts becoming more urgent, serious consideration needs to be given to stretching existing support to cover more areas, and to better supporting GoN field staff in their TA roles. It is also important to note that in August / September 2015, that the 61 POs who responded to a Shelter Cluster recovery and reconstruction survey already had [funding of more than 200 million USD in place specifically for housing recovery and reconstruction](#). Based on Shelter Cluster estimates, this funding from POs could have been used to deliver the minimum TA package across all 31 districts and there would have been a significant pot of money left over.

Partners

'Study on the Microinsurance Industry in Nepal', Sakchyam Access to Finance: Microinsurance is specially designed to protect low-income households from the risks they face in their daily lives. In addition to a lower premium amount, microinsurance should be simple in design and have minimal exclusion, simple and easy documentation, and an easy and quick claim settlement to accommodate the needs of low-income households. This report includes results of surveys undertaken to assess the supply and demand for microinsurance in Nepal, as well as the current challenges and way forward. The report also reviews the players in the sector and the microinsurance products on offer. There is also an examination of the risks faced by low-income households, their coping mechanisms, and their general awareness of the insurance products.

Local Humanitarian Action in Practice, Case studies and Reflections of Local Humanitarian Actors, Humanitarian Leadership Academy: The [case studies](#) highlight the experiences of 10 national and local humanitarian organizations across Central and South Africa, the Horn of Africa, the Middle East, and South and South-East Asia that have led or managed humanitarian response. These local actors operate in areas that are highly vulnerable to recurrent natural and climate-induced disasters, instability, civil conflict, and other emergencies. The publication affirms what is being recognised by international and local organizations, that locally-led responses have critical

advantages. These include better access to and deeper connections with affected people and local structures; greater understanding of the relevant geopolitical and cultural context; and a clearer view of what needs to be done in response to a crisis.

Sustainable Development Goals Academy: an online portal which provides free and interactive, graduate-level courses on sustainable development for students around the world. Some of the topics covered include [natural resources for sustainability](#), [globalisation](#), [human rights](#), and [climate change](#).

Menstrual Health and Hygiene Management in Nepal, 2017 Scoping Review and Preliminary Mapping, Population Services International (PSI) and Maverick Collective: this review and mapping exercise is one of the first of its kind in Nepal and it provides an in-depth insight into MHM in Nepal, and the bottlenecks and opportunities for the way forward.

Nepal Fact Sheet, 'Safaa Paani' (WASH Recovery) Programme, USAID: the project, which is being implemented in 14 VDCs in Dolakha and 20 VDCs in Sindhupalchowk, aims to repair damaged water supply systems or build new water supply schemes for previously unreached populations, improve access to sanitation in public areas, and promote improved hygiene behaviors.

Milijuli Nepali, BBC Media Action, Episode 846: this episode was recorded in Tadi Rural Municipality, Nuwakot. The presenter talked to the residents who have been relocated from Urleni to Budeniphath after being displaced by the earthquake. The chairman of ward no 1, Tadi Rural Municipality explained how they are managing the land to relocate the displaced people. An engineer from Oxfam explained the government criteria to relocate people to safe areas.

Baliyo Ghar TV Programme, Episode 87: this week's episode is focused on heritage reconstruction in Basantapur.
