

7th HRRP GENERAL MEETING**Date: 12 05 2016****Time: 2:00 – 3:30 p.m.****Location: DUDBC Hall, Babarmahal****Focal Point: Arshad Rashid / Jennifer Duyne****Participants Organizations:**

Navjyoti Centre, Helvatas, Samaritarian Purse, Isra AID, JICA TPIS- ERP, London School of Economics, IFRC, UNICEF, World Vision , Caritas Germany, AIN, JICA, Hands For Humanity International - Nepal, AWO International , UNOPS, Chaudhary Foundation, Cordaid, GOAL, Lumanti, HRRP, Welthungerhilfe, Medair, ASF Nepal, Build Change, LWR, NSET, ISET- N, DFID, SRC, REACH, CRS, IOM, Habitat for Humanity, Handicap International , CARE, UVN, WHH, ROTARY , Tear Fund, SOSCV, ACTED, OXFAM, UNRCO, PIN Nepal, Save the Children, OM Nepal, Sansthaagat Bikas Sanjal, Red R India, Help e.V., Johanniter, UNDP, KRMEF

Agendas

- 1. Enrollment Update - UNOPS / SDC**
- 2. HRRP Review Findings and Recommendations**
- 3. Technical Working Group (TWG) Workplan**
- 4. Presentation on Reach Assessment – Shelter Cluster**
- 5. Additional Activities of HRRP**
- 6. Information Management Update**
- 7. Discussions**
- 8. AOB**

The meeting opened at 2 p.m. with the welcome note of Dr. Jennifer Duyne (Technical Team Leader, HRRP) on behalf of HRRP, acknowledging all the Partner Organizations (POs) for their continuous support and involvement in the reconstruction process. She then briefly shared the agenda of the meeting.

1. Enrollment Update- UNOPS / SDCUpdate from UNOPS

Dominic W. Grant from UNOPS informed about the UNOPS engagement to assist NRA in the enrollment process targeted in 575 VDCs within the 14 Earthquake (EQ) affected districts. He briefed that UNOPS would be providing some limited operational support in specific areas. UNOPS assistance plan envisions maximum utilization of the limited fund in critical areas which includes providing human resources (4 person per VDC), enrollment kits, printing materials (including different forms, booklets and guidelines), transportation facilities and communication and training (including media advertisement).

He further informed that NRA has shown interest to receive proposals from POs to support pre-enrollment and enrollment with coverage of specific districts, according to the POs interest and capacity. He encouraged the POs to seek to engage with NRA to support them

in pre-enrollment activities. PO's were suggested to work in coordination to avoid any duplication and overlapping of services.

Update from SDC

Ivan Vuarambon from SDC informed that SDC has been supporting the district wide enrollment process in Ramechhap, in response to the request from local DDC. He explained that SDC has been hiring and mobilizing own staffs and volunteers to support enrollment process in Ramechhap. He encouraged the exchange of reports containing valuable information and experiences of pilot enrollment among POs, stating that such coordination would help in reaching out to the beneficiaries and supporting them. He shared SDCs initiative of broadcasting information jingles in all the FM stations in Ramechhap to inform about the enrollment process and to remind the beneficiaries about the required documents for enrollment process.

SDC also presented their expected assistance to support enrollment in the form of human resources, logistics and cost and coordination mechanisms.

Arshad Rashid (National Coordinator, HRRP) informed that the operational presence of HRRP does not cover all the EQ affected VDCs currently in the enrollment process. But, HRRP is continuously allocating support from POs in other affected VDCs, in consultation with NRA and with the support from POs and donors. It was clarified that HRRP has been working with NRA to make the optimal utilization of POs efforts and resources. He further stated that he would be conveying the POs messages and queries raised, in the weekly meeting with NRA and thereafter would get back with the response to the POs.

2. HRRP Review Findings and Recommendations

HRRP review was conducted on the basis of online survey from 36 POs, bilateral and/or small focus group interviews with HRRP national and district teams, Coordination Support Group (CSG), POs, donors and NRA. Also, there was a review workshop held on 7 April. The key findings of the review were the recommendations for improvement in the 5 core areas which are summarized below:

2.1 Strategic approach

It was advised to be more proactive in communicating between NRA and POs and in providing guidance and leadership in strategic issues.

2.2 Technical Support

It was suggested that POs be well-informed by HRRP regarding the areas where HRRP could provide technical support mobilizing its active TWGs.

2.3 Advocacy and Communications

POs noticed there needs to be improved communication and advocacy mechanisms through HRRP for the better understanding of HRRP activities and timelier update.

2.4 Coordination

The need for improved coordination among HRRP, NRA, POs and donors was envisioned for better understanding of the overall context and for the timely service delivery.

2.5 Information Management

Recommendations were made to strengthen dissemination mechanism, explore a more proactive role in the data management and analysis in light of the upcoming enrollment and reconstruction process.

It was notified that the review summary paper would be shared with POs following the meeting and later be uploaded in the website for the detailed information on the review. POs were requested to provide any feedback and comments further on the summary paper.

The news was updated regarding the reformed institutional framework wherein CSG has been dissolved and Strategic Advisory Group (SAG) currently serves as a platform for strategic support. It was notified that the membership of SAG was opened to other organizations as well, who are willing to give continuity and active engagement. The institutionalized weekly meeting of SAG representative with NRA every Friday on relevant issues of reconstruction was established, POs are informed regarding updated schedules of all TWG workplans.

Jennifer Duyne stated that HRRP is currently working on developing a long term strategy beyond June 2016 which would be based on the recommendation of the review summary paper and in consultation with NRA, POs, donors and SAG members. The strategy concept would be presented to the donors by the 20th of May, and the plans and proposals would be later shared with the POs.

3. TWG Workplans

The information and work plans of various active TWGs under HRRP was provided along with the info of the focal point, current members, expected outputs and the meeting schedules of each TWGs.

TWG on Social Mobilization:

It was updated that the TWG on Social Mobilization (SM) is about to complete the training module for social mobilizers containing 3 modules, which has already been pilot tested in the field level at Dhading, with the support from POs and the NRA. It was informed that SM TWG has been engaging strongly with NRA and the training module produced are being considered by NRA as their official training material.

TWG on Technical Training:

The projected output of TWG on Technical Training was highlighted. Those included training curricula review, preparation of recommendations, training needs assessment in collaboration with NRA, training delivery strategy, developing format for monitoring and reporting training etc. Information regarding the TWG Google drive was shared wherein different documents, work in progress and meeting minutes could be located.

TWG on Housing Standards:

The expected outputs of TWG on Housing Standards were shared which included preparing guidelines for alternative materials and construction technologies for sustainable housing and settlements, updating key messages for housing reconstruction based on different

housing typologies, preparing supervision methodologies and key messages for reuse of salvage materials etc.

It was made aware that the TWG on Housing Standards was further divided into sub-groups, working on specific areas.

TWG on Communication:

It was explained that the TWG on Communication has been working in close collaboration with the NRA in many key activities. Further it was informed that this TWG is currently engaged in drafting design on various communication materials and messages. Similarly, other activities included producing and publishing communication products, developing communication dissemination plan and consolidating various communication products.

It was notified that there was a meeting called by NRA to discuss on communications specific to enrollment on May 13. Further, any interested partner willing to support the NRA in pre-enrollment on communication were requested to contact HRRP.

4. Presentation on Reach Assessment – Shelter Cluster

Reach/Shelter Cluster presented on 'Nepal Monsoon Preparedness Assessment'.

Shelter Cluster/REACH are under process of planning an assessment on identifying the shelter needs in preparedness of monsoon.

The geographic scope of the assessment covers 33 districts, including 22 terai districts and 11 EQ affected priority districts (excluding Kathmandu Valley).

The objective of the assessment is to assess the potential needs in light of the upcoming monsoon and map out the vulnerabilities in accordance with monsoon-related hazards. At the first phase, the assessment would try to identify the VDCs that are in high risk of monsoon-related hazards by overlaying different data sources.

At the second phase, the VDCs would be divided into homogeneous groups according to their common type of disaster. Further, a case study would be conducted of each type of identified risk factors (sample VDC) through collection of primary data using focus group discussion, market assessment and key informant surveys.

Due to the limitation of time, financial and human resources, a representative sampling strategy would be adopted.

At the third phase, based on the consolidation of secondary data review and primary data findings a workshop will be conducted to review the assessment findings to further consolidate the information and recommendations for pre-monsoon planning. A report would be made and be accessible to all after the workshop.

It was announced that the list of vulnerable VDCs, identified through mapping, and the ToR of the assessment would be circulated with the POs. Feedback and suggestions from POs on ToR, datasets and case studies of the survey are to be sent to elisabeth.vikman@reach-initiative.org. POs that are interested in providing support on human recourses, transportation are also to contact REACH/Shelter Cluster.

5. Additional Activities of HRRP

Proposed additional activities for HRRP were presented, including the following:

5.1 Understanding vulnerability to define 'top-up' policy

It was explained that HRRP plans to assist the NRA in better identifying the vulnerable criteria for top-up policy.

This would be done by collecting and assessing previous data, assessment and research etc. carried on the vulnerability aspect. The vulnerable groups, vulnerable areas and level of possible support from POs would be mapped that could portray the gaps and thereby help in selecting the vulnerability criteria for top-ups.

A meeting has been planned to consolidate and identify range of support for vulnerable households under different categories.

5.2 Consolidation of Knowledge on POs Technical Assistance

It was informed that HRRP was consolidating the knowledge on POs on technical assistance, updating information relating to cost and technical assistance activities realizing the need to be updated about various causes and link that to concrete support that the POs are able to give to the government. It was communicated that HRRP plans to document the experiences gained so far in terms of providing technical assistance which includes both qualitative and quantitative information on demo construction report, training report, mobile technical assistance report, etc.

5.3 Guidelines for Community Participation in Urban Recovery and Reconstruction

It was informed that Lumanti had organized a week long workshop on 'Rebuilding Settlements with Communities, where group of architects supported two communities to develop a master-plan and to identify ways to move forward. NRA recognized the participatory planning initiative of Lumanti and has further requested to come up with guidelines to be replicated to move forward in participatory settlement planning in urban areas.

5.4 Meeting on "Supporting vulnerable communities to access and manage financial services for housing reconstruction", Wednesday 18.05.2016, HRRP 3-5 pm

District coordination and technical team had identified the difficulties for vulnerable families to have access to bank accounts (logistic issue, challenge in getting to know and being habituated to the whole bank procedures). It was recognized that this area required POs support. It was requested that the POs who has concern about social inclusion and want to support vulnerable people could plan further and participate in finding the solutions on means to assist the most vulnerable. The need to make the banking procedure efficient and easy for the vulnerable groups was highlighted so that they could withdraw the money at times of need rather than just random.

A meeting to be held on discussing the key issues and challenges related to grant delivery so as to ascertain support needed from POs for smooth access to banks, and to explore possibilities for effective communication to make the best use of grant support.

Meeting confirmed to be held at HRRP Office on 18 May to identify ways to support.

6. Information Management Update

Zhu Ying, IM officer at HRRP presented and discussed the maps on different sectors such as NRA Sub-regional Office, Operational Presence, vulnerability mapping E.G.

Concentration of Disadvantaged Groups etc.

She reported that according to the latest dataset (the 4W collection Matrix), there are 376 VDCs where POs have operational presence.

The matrixes used by various organizations in defining and mapping vulnerability were described such as:

- Severity Index (OCHA)
Overlay of 3 sets of indicators; earthquake impact, physical vulnerability and socio-economic vulnerabilities
- Concentration of Disadvantaged Groups (DACA/UNICEF, LGCDP/UNDP)
Overlay of 7 different indicators; food, insufficiency, marginalized groups, condition of primary school, condition of health posts, participation of marginalized groups in decision making and prevalence of gender discrimination.
- Displacement Tracking Matrix (CCCM/IOM)
Includes indicator for identifying vulnerable groups, especially the IDPs living in camps
- Distribution of Shelter Materials (Shelter Cluster 4W)
Allows to see what shelter materials has been distributed to which area
- 2011 Census (CBS)
Documents the population, the house type (walls type, roof type) etc.
- REACH Shelter Assessment
Provides useful insight on vulnerability like mapping of disadvantaged group

The hard copy of maps were provided at the end of the meeting. (NRA Sub-regional Office, Operational Presence, E.G. Concentration of Disadvantaged Groups)

7. Discussions and Question-Answers

- **Prabin Man Singh from Oxfam inquired regarding the Action Point of the last General Meeting to form a separate sub-group on land within the TWG.**
Jennifer Duyne responded that the formation of sub-group on land was still an agenda of consideration, and meanwhile it has been postponed due to the other issues. She added that the issue would be addressed according to relevancy and especially when HRRP has the capacity to execute the framework of the planned sub-group. She also expressed that POs would be engaged when there is capacity to move forward.
- **Lorraine Bramwell from CRS raised her concern that, there is very less representation of National NGO's compared to INGOs in SAG, currently in the ratio of 2:8. She encouraged the National NGOs to put forward their presence and input in SAG.**
HRRP acknowledged the issue and informed that the SAG membership was open to all the interested POs that are willing to actively engage and provide strategic input. HRRP also

stated that the SAG membership would be maintained to a limited size for efficient decision making.

- **Lajana Manandhar for Lumanti raised the question that Kathmandu valley was excluded in the Reach/Shelter Cluster 'Monsoon Preparedness Assessment'. She explained that vulnerability should be measured not only in terms as EQ victims but those living in old houses should be brought under the scope too.**

Shelter Cluster/REACH responded to the question by stating that Kathmandu is located centrally and is more of different context in terms of vulnerability.

Shelter Cluster acknowledges that there are vulnerable communities in the valley, the selection was based on the constitutive workshop decision. However, the assessment includes the IDP sites of valley as well.

In regard to this, a participant shared that each district has a 'District Disaster Management Plan', which could be a great source of data in identifying the vulnerable VDCs in terms of monsoon effects.

Additional information was provided by another attendee that the Government of Nepal led by Ministry of Home Affairs and Humanitarian Community have agreed to have an emergency preparedness plan and district profiling of the 33 districts on monsoon effects, and Kathmandu Valley as well has been listed in that initiative.

- **Ivan Vuarambon from SDC inquired if a map could be produced portraying the progress in enrollment being collected at district level which could also reflect information on common grievances types. He had his view that these kind of maps would be extremely useful in locating the gap.**

Zhu Ying replied that such maps was possible if the data is available. She also specified that currently HRRP has a system set up that is possible to have everything in a single map in an interactive forum that even includes the information on the number of enrollment and grievances.

- **One of the participants inquired on the information regarding the Communication Strategy on enrollment, so it would be easier to mobilize staffs and prepare accordingly.**

The representative from UNOPS responded that 'the discussion on communication strategy' was being deliberated with NRA, and the query would be further put forward for discussion. He drew the attention that meanwhile in Ramechhap, UNOPS has been working in parallel to NRA where information has been disseminated at district level, been managed by LDO and DDC. He also expressed that NRA is expecting POs to come forward with the methodologies and areas of work to support the NRA.

- Oxfam notified that the Central Department of Population Studies at T.U. has conducted socio-economic demographic survey of the EQ affected district which could be useful when defining vulnerability.

- Lumanti noted that the interest of International POs is seen to be very minimal in urban areas.

8. AOB

The update by NRA was not delivered as Mr. Dwarika Shrestha (enrollment coordinator – NRA) could not attend the meeting due to some other commitments.

Action Points

1. POs interested in supporting the enrollment process to submit a 2-3 page proposal to NRA, either individually or in consortia
2. IM Team to follow up with NRA regarding CBS damage figure, mapping out the progress on enrollment

The meeting ended with the closing remarks from Mr. Arshad Rashid, along with the announcement of next PO forum meeting on 26 May.

Next Meeting

The next PO Forum meeting will be held on 26 May from 2:00 p.m. in DUDBC Hall. Led by HRRP, can be contacted by Arshad Rashid / Jennifer Duyne
