

Reconstruction with Compressed Stabilized Earth Bricks

Build up Nepal

We are a team of engineers, social entrepreneurs and builders dedicated to rural reconstruction.

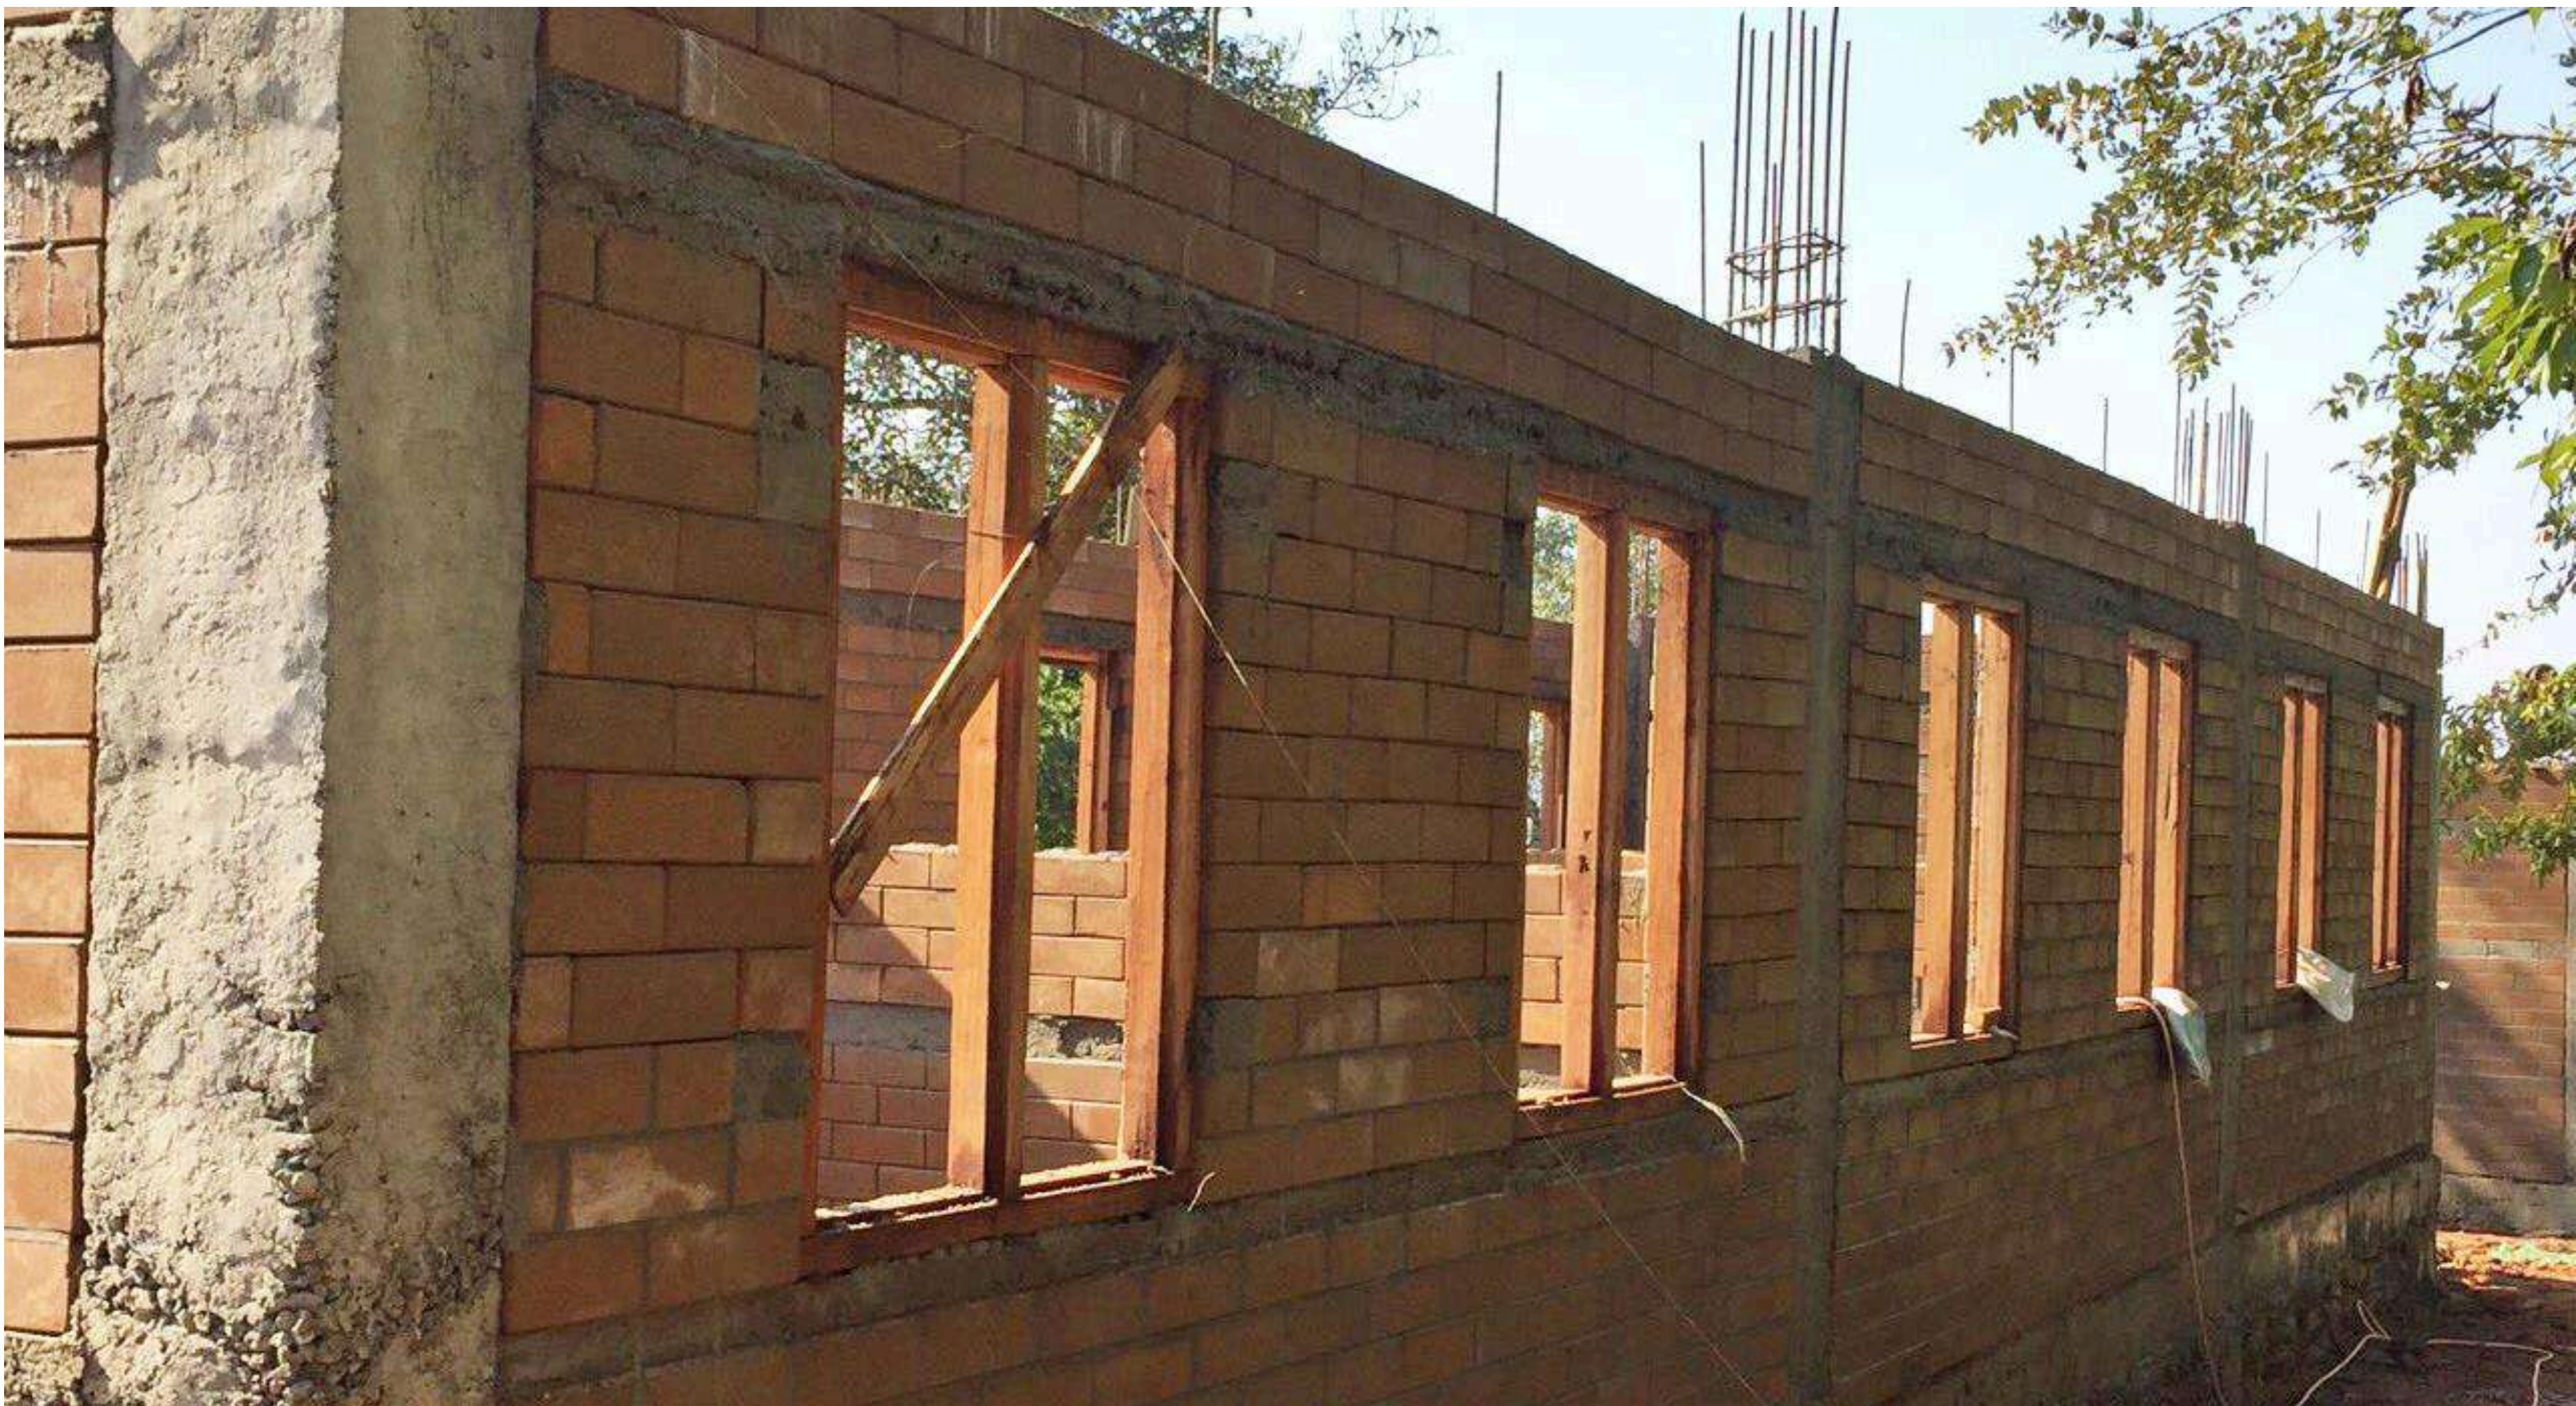

We work as training & implementation partner for organisations and communities for Earth Brick reconstruction.

Why Earth Bricks?

Made in the village from sand, soil & cement

High quality construction at affordable cost

Creating jobs and opportunities for local
entrepreneurs

Soil and feasibility

Machine & training

Community driven reconstruction

Cost analysis

30x15x10 cm CSEB

Cement: 20 rs

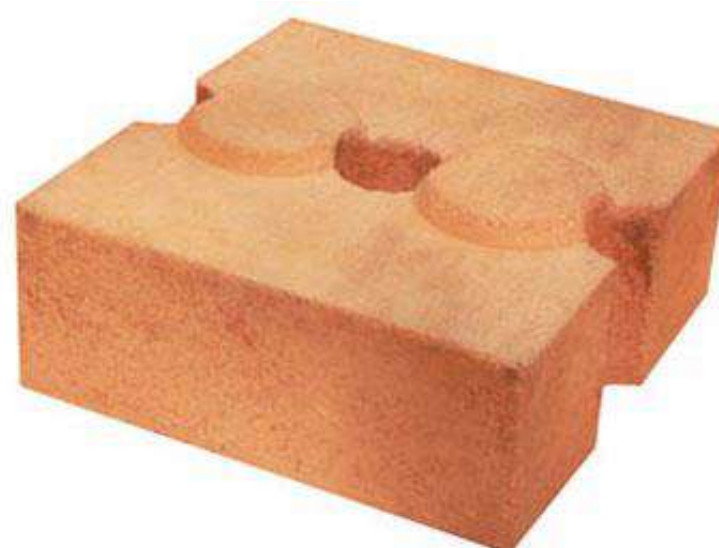

Sand: 3 rs

Labor: 17 rs

Total: 40 rs

1m wall: 34 bricks

1m² wall = 1360 rs

25x25x10 cm CSEB

Cement: 24 rs

Sand: 4 rs

Labor: 18 rs

Total: 46 rs

1m wall: 40 bricks

1m² wall = 1840 rs

22x11x5,5 cm Fired brick

Total: 12-20 rs

1m wall: 144 bricks

1m² wall = 1728 – 2880 rs

A background photograph of a construction worker in a red and blue jacket laying a brick on a wall. The worker is focused on the task, and the background shows stacks of bricks and construction materials.

Cost savings

- Less transportation & wastage
- Less mortar
- Less labour for wall building
- No plaster
- Can reduce cost by labor contribution

Small Interlocking Earth brick machine

Auram heavy duty Earth brick machine

Earth Bricks

Empowers rural communities to
rebuild their homes in high quality at
an affordable cost.
