

HRRP BULLETIN

2 April 2018

Notice

For the month of April, we will be publishing the HRRP bulletin only every second Monday. This follows recommendations in the recent [Partner Satisfaction Survey](#) to reduce the frequency of the bulletin, and also reflects decreasing readership numbers. This is a trial just for the month of April and we are keen to get feedback and suggestions to info@hrrpnepal.org. If a significant portion of the mailing list would prefer that the bulletin continues to be issued weekly, we will revert to this from May.

Sisneri, Ward No. 9, Lamatar Area, Mahalaxmi Municipality, Lalitpur: a one room, one storey, brick and cement mortar masonry house with CGI roof which is part of an ever-increasing trend of building tiny houses to access the GoN housing reconstruction grant but the houses do not meet families living requirements. The house owner has did get the drawings for the house approved by the municipality and they have received the second tranche. During a recent joint monitoring visit by HRRP and MoUD CLPIU, the monitoring team identified difficulties getting into the house due to its small size.

Jhyangajhiti, Ward no. 1, Chandragiri Municipality, Kathmandu: stone and cement mortar masonry house with CGI roof. This one room, one story house is another example of the trend of constructing tiny houses just to access the

GoN housing reconstruction grant within the tranche deadline. The home owner has been requested to replace the gable wall with a lightweight material such as CGI in order to receive the second tranche.

Highlights

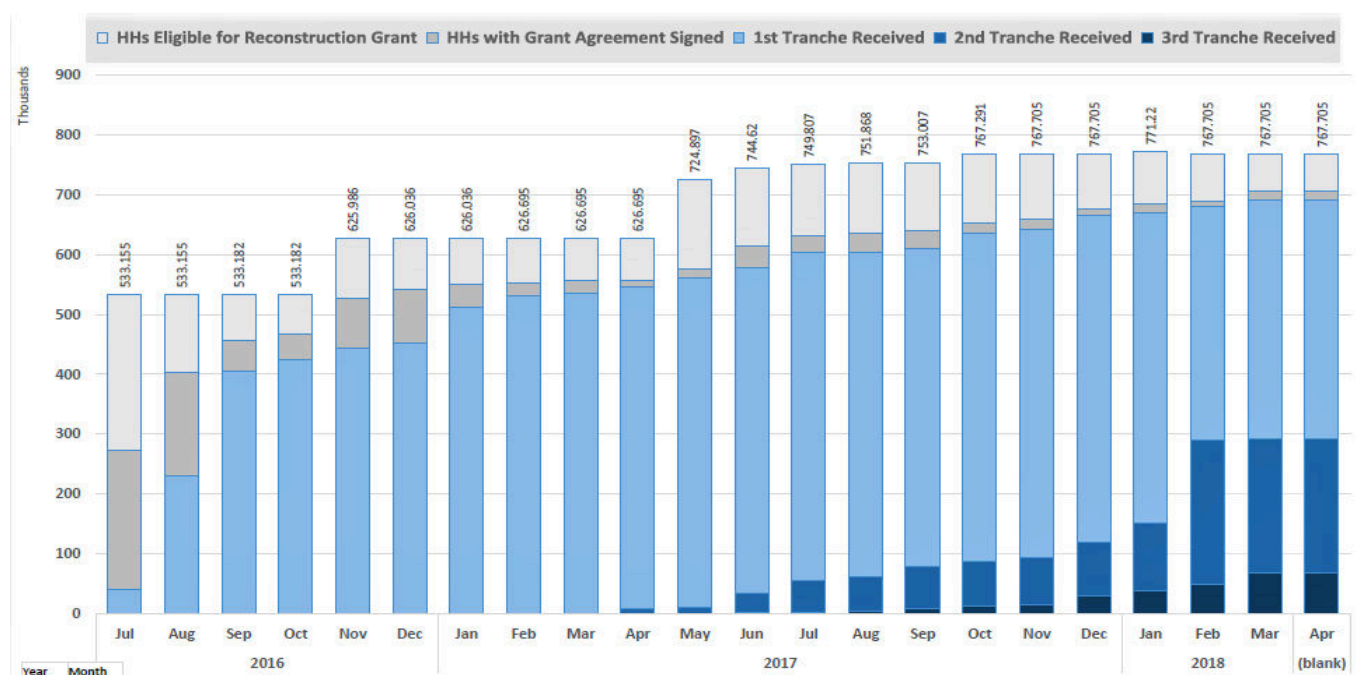

- A new [HRRP Facebook group](#) has been established with the objective of having an interactive space for sharing experiences and information, and to have FAQs addressed. This is a closed group so you have to request to join and then will be approved. We encourage everyone to join and engage with the group!
- HRRP Notice Regarding Masons Training
- Resources from [session on 'Landslide research following the 2015 Gorkha earthquake: Implications for reconstruction and future preparedness', 29 March](#)
- [Session on 'Introduction of a Professional Title for Engineers in Nepal & Staff Development Opportunities through Internship and Graduate Programmes', Tuesday 17 April, 3-5pm, HRRP Office, Jwagal](#)
-

UPDATES & REQUESTS

National

MoFALD CLPIU Enrolment Data, as of 1st April 2018 ([Nepali](#) and [Unofficial English Translation](#)):

	15 March	23 March	1 st April
Total No. Eligible HHs	767,705	767,685	767,705
HHs Enrolled	697,635	704,388	705,616
HHs Received 1st Tranche	685,969	679,442	691,107
HHs Applied for 2nd Tranche	290,302	265,784	274,781
HHs Received 2nd Tranche	259,282	255,082	292,595
HHs Applied for 3rd Tranche	76,020	66,091	70,643
HHs Received 3rd Tranche	60,003	54,373	68,167

Housing reconstruction progress based on MoFALD CLPIU enrolment data from July 2016 to April 2018.

DFID Donor Coordination Meeting was organized on 27 March at DFID to discuss status of the reconstruction process and as well as to identify the potential solution for the issues on the current reconstruction process. The meeting discussed on the Vulnerability criteria of GoN and chances of leaving behind the neediest communities if only those criteria are taken into consideration in the disaster hit region. The meeting also discussed on the Geo-Hazard risk, resettlement and Landless issues and the different ways the Development partners can support NRA in the Geotechnical assessments. The restructuring of the NRA in the new administrative structure of the country was as major point of discussion during the meeting.

Session on 'Landslide research following the 2015 Gorkha earthquake: Implications for reconstruction and future preparedness', 29 March: the event included presentations from Durham University and NSET on findings from the *Earthquakes without Frontiers* project, and an ongoing research project funded by DFID as part of the *Science for Humanitarian Emergencies and Resilience* programme. There was also a presentation on the NRA's work to date on the geo-hazard risk assessment and potential mitigation strategies for at risk areas. The resource documents shared during the event, as well as some additional reference documents, are available as follows:

- **Landslide mapping:** Satellite-based emergency mapping using optical imagery: experience and reflections from the 2015 Nepal earthquakes. [Natural Hazards and Earth System Sciences, 18\(1\), 185-205 Rapid post-earthquake modelling of coseismic landslide intensity and distribution for emergency response decision support](#)
- **The use of science in disaster risk reduction and response:** [The role of scientific evidence during the 2015 Nepal earthquake relief effort](#). ODI Working Paper, March 2018. London: Overseas Development Institute. [Earthquake science in disaster risk reduction policy and practice in Nepal. ODI Report, June 2016](#). London: Overseas Development Institute.
- **Community-based disaster risk reduction:** [Review of the Nine Minimum Characteristics of a Disaster Resilient Community in Nepal. Research Report for the Ministry of Federal Affairs and Local Development, Government of Nepal and the Nepal Risk Reduction Consortium](#) ; [Towards disaster resilience: A scenario-based approach to co-producing and integrating hazard and risk knowledge. International Journal of Disaster Risk Reduction](#)
- **Disaster risk governance in Nepal:** [Governance struggles and policy processes in disaster risk reduction: A case study from Nepal. Geoforum](#) ; [A comparison of the governance landscape of earthquake risk reduction in Nepal and the Indian State of Bihar. International Journal of Disaster Risk Reduction](#)
- **Economic development, livelihoods and resilience:** [Economic Development, Livelihoods and Resilience in Nepal](#). Policy Brief. Earthquakes without Frontiers project. December 2016: [Building liberal resilience? A critical review from developing rural Asia. Global Environmental Change](#) 32: [Between a rock and a hard place: vulnerability and precarity in rural Nepal. Geoforum](#) 76: 63-74. (Please email k.j.oven@dur.ac.uk if you would like a copy of this paper).
- **Other references that participants may find useful:** [The size, distribution, and mobility of landslides caused by the 2015 Mw7. 8 Gorkha earthquake, Nepal. Geomorphology](#)

If you were not able to attend you can watch the event on the HRRP Facebook page [here](#).

NRA Gender Equality and Social Inclusion (GESI) and Livelihoods sector meeting:

NRA Gender Equality and Social Inclusion (GESI) and Livelihoods sector meeting was hosted by NRA on 27 March 2018 at NRA Prefab Hall. The objective of meeting was to update the progress of NRA and other partner organizations in GESI and livelihood sector. On behalf of NRA, Joint-secretary Mr. Netra Subedi shared key activities that NRA is doing in livelihood sector. After that Ms. Archana Tamang, NRA GESI Advisor shared Triangulate Model that NRA has drafted for GESI strategy. After her sharing, all POs shared the progress and plan of their organization/project in GESI and livelihood sectors. Livelihood Experts from NRA also shared their experience of agriculture and livelihood sector. At last Dr. Bishnu Bhandari- Executive Member of NRA (who was also facilitating the meeting) gave thanks to all organizations for their wonderful work in reconstruction. He also requested all to target the project and activities for most affected Households and population. He also encouraged to do effective communications among partner organizations and NRA to bring synergetic impact.

HRRP Notice Regarding Masons Training: in light of the continued investment in masons training, we would like to highlight the following:

- Masons training in the 14 districts has effectively reached saturation point.
- There has been very limited masons training in the 18 moderately affected districts.
- Many houses are being built by masons from outside of the 14 districts who have not received any training.
- Investment in masons training has limited impact if it is not accompanied by on-going door-to-door technical assistance.
- There are major issues with quality of training being provided, for example
 - 7-day mason training being provided people that had not been working as masons previously
 - Female participants working as labourers / assistants during the training instead of being treated as full participants
 - Training participants not being able to take part in all the practical parts of the training due to there not being enough materials for everyone
 - Insufficient number of trainers, e.g. one trainer for 40 participants

DFID Vacancy, Deputy Programme Manager, Post-Earthquake Reconstruction Team: closing date for applications is 8 April.

Districts & Municipalities

HRRP District and Municipal Coordination Meetings, 26 – 31 March: during this period district coordination meetings took place in Kavrepalanchok (26 March), Dhading (28 March), Bhaktapur (29 March), Gorkha (29 March), Nuwakot (29 March), Rasuwa (29 March) and Okhaldhunga (30 March). Municipal level meetings took place in Makwanpurgadhi Rural Municipality, Makwanpur (27 March). Some of the highlights from these meetings include:

In Kavrepalanchok, NRA Chief informed that the results of Resurvey and Reverification will be published only after reverification from the expert team at NRA which will take a while. In addition, the grievances figures collected after Mangshir 2074 have been forwarded to NRA. The list of Wards that have not carried out the resurvey and

reverification have been sent to NRA. DUDBC/DLPIU has been receiving high numbers of files of one roomed structures that have been constructed widely in the district. These files are on hold and are under close examination. These files will be forwarded to MoFALD by end of Chaitra 2074 provided that the minimum space requirements are met along with the cost estimate meeting NPR 3 lakhs. DLPIU has been providing engineers in those areas where there have been human resource gap and upon requests from Gaupalika/Nagarpalika. However, DLPIU may face challenge of meeting increased request for engineers. DUDBC Arso Nepal and HRRP Kavre have been supporting staffs for the data entry resulting in significant increase in tranche figures. The support needs to be extended till Asadh 2075.

In Dhading, in Wards 8 and 9 of Nilkantha, 35 beneficiaries who have already received the first tranche from the Government are now being supported by OXFAM to construct their houses. The details of these beneficiaries have been shared with MoFALD-DLPIU and DUDBC to avoid duplication in receiving further Government grant. District level exhibition on housing reconstruction will be held on **18 April 2018** to mark the Third Anniversary of April 2015 earthquake.

In Bhaktapur, NRA Bhaktapur will request NRA Central for providing orientation on Retrofitting Guidelines to DLPIU deployed engineers working in Bhaktapur district. NRA Bhaktapur will coordinate with Municipalities to look into the building drawing of the houses and will also coordinate with local representatives to engage them to expedite the reconstruction process. NRA Bhaktapur suggested to increase the monitoring visits from all concerned stakeholders to track reconstruction efforts. Kathmandu valley exhibition on housing reconstruction will be held on **13 April 2018** to mark the Third Anniversary of April 2015 earthquake.

In Gorkha, many single room houses have completed DPC but do not meet the requirements of Nepal building code. It was also reported that there is lack of technical human resources in some of the wards. OXFAM will be closing its shelter program in the district so, there might be gap in the door to door technical assistance. NRA Gorkha suggested to continue palika level meetings in remaining Gaupalika/Nagarpalika. District level exhibition on housing reconstruction will be held on **17 April 2018** to mark the Third Anniversary of April 2015 earthquake.

In Nuwakot, there is still lack of clarity on the structural requirements of building houses since some beneficiaries from Okharpauwa, Kakani have used concrete pillars for one roomed house. POs have raised concerns regarding delay in cash disbursement to the beneficiaries by the banks. This issue has been conveyed to DCC and MoUD. Concerns were raised regarding delay in addressing grievances.

In Rasuwa, land certificates were distributed to 116 beneficiaries who were eligible to land grant. Some of the beneficiaries have already started constructing the houses on the new land provided by the Government. Reconstruction Skills Project of HELVETAS has ended in March 2018. The project provided 50 days vocational training to 680 masons from most disadvantaged groups including women in the district. Some concerns were raised regarding duplication, since some beneficiaries had their houses retrofitted with support from Build Change but later constructed a house in another place and received the second grant from the Government. District level exhibition on housing reconstruction will be held on **18 April 2018** to mark the Third Anniversary of April 2015 earthquake.

In Okhaldhunga, the meeting discussed on the problem with regards to grievance response. For example, some of the beneficiaries who have had partnership agreement with NRA have been listed as beneficiaries again in Grade 4 damage level. NRA Chief suggested HELVETAS to work in Khijidemba, Molung, Champadevi and Likhu Rural Municipalities for their new project as per approval from Central NRA. District level exhibition on housing reconstruction will be held on **11 April 2018** to mark the third anniversary of April 2015 earthquake.

In Ward No. 8 Budhichaur, Makwanpurgadhi RM, Makwanpur, overall, the reconstruction is progressing well with increased number of construction with higher proportion of compliance with the building code. The local representatives are happy with the technicians for conducting regular site visits, timely inspection and submission of forms to DLPIU. However, the local representatives showed concerns as to how to motivate those beneficiaries

who have received the first tranche and not yet started construction since the deadline for receiving the second tranche is end of Chaitra 2074.

[HRRP District Coordination Team DOLAKHA, Weekly District Report, 23 – 29 Mar 2018](#)

Ward No. 1, Kalinchowk Rural Municipality, Dolakha: a single storey, dry stone masonry house with sloping roofs constructed with light weight CGI sheet. The sloping roofs are designed to keep off the snow during snowfall in winter. The home owner has received all three tranches of the GoN housing reconstruction grant.

[HRRP District Coordination Team GORKHA, Weekly District Report, 23 – 29 Mar 2018](#)

Simjung, Ward No. 4, Ajirkot Rural Municipality, Gorkha: RCC frame house under construction. The home owner has received first tranche and has been approved for the second tranche of the GoN housing reconstruction grant.

[HRRP District Coordination Team MAKWANPUR, Weekly District Report, 23 – 29 Mar 2018](#)

Budhicahur, Ward No.8, Makwanpur Gadhi Rural Municipality, Makwanpur: a single storey, two roomed, stone in mud mortar masonry house with RCC band. All horizontal and vertical elements have been provided. The home owner has received the second tranche and has been approved for the third tranche. The total estimated cost of constructing the house is 600,000 NPRs.

[HRRP District Coordination Team RAMECHHAP, Weekly District Report, 23 – 29 Mar 2018](#)

Lakhanpur, Ward No.7, Dorumba Rural Municipality, Ramechhap: Stone in cement mortar masonry house with RCC band. The home owner has received all three tranches of the GoN housing reconstruction grant. The total cost of constructing the house was 11,00,000 NPRs.

Requests for Partner Support

Researching Barriers and Drivers for Reconstruction, Request to Partners to Share Existing Datasets and Reports: there is an enormous amount of work in this area that has been completed by partners, or is being done regularly. HRRP would like to request partners to make all relevant datasets and reports available to the greatest extent possible. HRRP can support with pulling together data in ways that manages any confidentiality restraints that partners have. Building a strong knowledge base will improve all reconstruction actors' understanding of the reconstruction context and what can be improved. Partners interested to share data / reports may contact Siobhan Kennedy, HRRP Recovery Advisor, siobhan@hrrpnepal.org, with any questions, or may directly upload materials to the HRRP Google Drive [here](#).

Intrepid Solutions Lecture Series, Nepal Engineers' Association, Tuesday, 5pm: supported by UNOPS and Build Change, this lecture series provides an opportunity to connect with national and international experts to explore innovative solutions for improving construction practices. The next lecture will take place on Tuesday, 26 March and will be delivered by Bryce Neuman, Miyamoto International Inc., on 'Historical Preservation and Structural Intervention at the Reconstruction of Gaddi Baithak in Kathmandu Durbar Square'. The lecture schedule will be as follows:

- 3 April 2018- Automation of Retrofitting Design with Data Flow and 3D Modeling by Adam McDonald, New Frontier Technology Architect, Build Change.
- 10 April 2018- Challenges and Opportunities of Confined Masonry Construction by Liva Shrestha, Lead Structural Engineer, Build Change.
- 17 April 2018- Application of Non-Linear Capacity Analysis to Determine the Safety Level of Heritage Buildings in Nepal: The Case Study of the Gopinath Temple in Kathmandu Durbar Square by Carlos Andres Arce, UNESCO Nepal.

Session on 'Introduction of a Professional Title for Engineers in Nepal & Staff Development Opportunities through Internship and Graduate Programmes', Tuesday 17 April, 3-5pm, HRRP Office, Jwagal

HRRP Event to Mark the Third Anniversary of the 2015 Earthquake: we are planning to hold a district exhibition and general meeting (similar to the event on 13 December) on 23 April at the [Bougainvillea Banquet](#). It would be great to hear from partners if you have plans to mark the anniversary and / or if you have suggestions for how to make the HRRP event as useful as possible. Sufi Mohamed Faiz, HRRP District Management Team-Coordinator, dmt.coord@hrrpnepal.org, is the focal point for this.

Milijuli Nepali, BBC Media Action, Episode 909: This episode focuses on an interview with NRA's Executive Member Hari Ram Parajuli who talks about his recent travel to different villages of Gorkha district. He also talks about how the government is working to relocate earthquake affected people to safe and secure places. He also shared how the government is addressing a problem like a delay in the release of the tranche money despite some people have already completed building their houses. The episode also includes stories from Gorkha and Makwanpur. The episode focuses on community members concerns related to lack of access to trained masons and people who have acquired masonry training also do not show up to the work.

Baliyo Ghar TV Programme, Episode No. 97: this week's episode will be focusing on the procedure 2074 pertaining to identifying vulnerable category of the earthquake affected beneficiary issued by National Reconstruction Authority (NRA) and gender equality and social inclusion (GESI) in the reconstruction. To include households and community who have not been able to participate in this campaign of reconstruction for various reasons and who and how will the questions related to their livelihood be addressed is the theme of discussion in the Baliyo Ghar program. The program airs each Monday in Kantipur TV @7:00PM, News24 TV on Wed @8:00AM and Avenues TV on Sat @8:30AM, with twice repeats from each.
