

ALNAP
Lessons Paper:
Responding to
earthquakes

Agenda

1. Today's objectives

2. Methodology

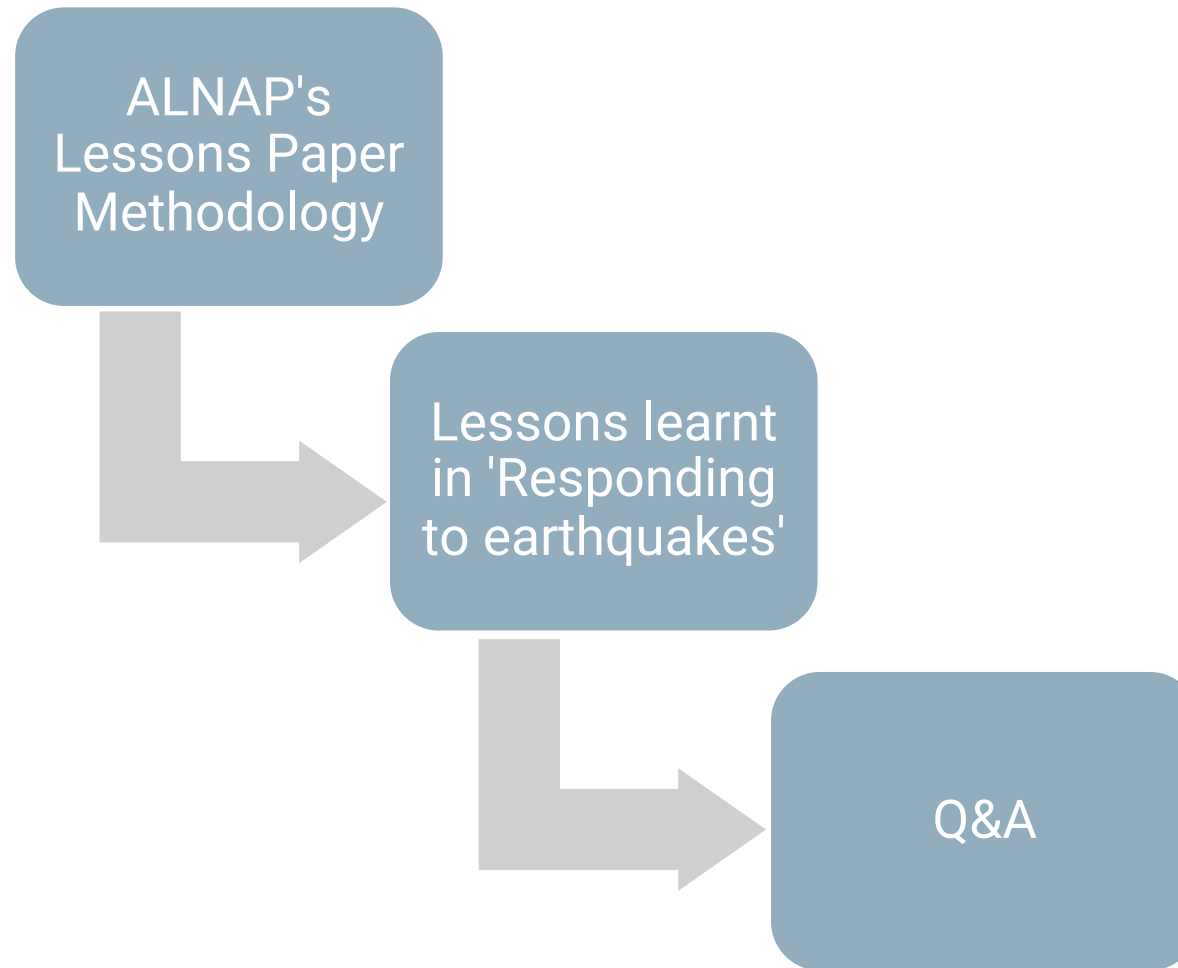

3. Lessons learnt:

- Across the project cycle
- Assessment and analysis
- Strategic planning
- Resource mobilization
- Implementation
- Monitoring, evaluation, accountability and learning (MEAL)
- Coordination

4. Findings

5. Discussion

1. Today's objectives

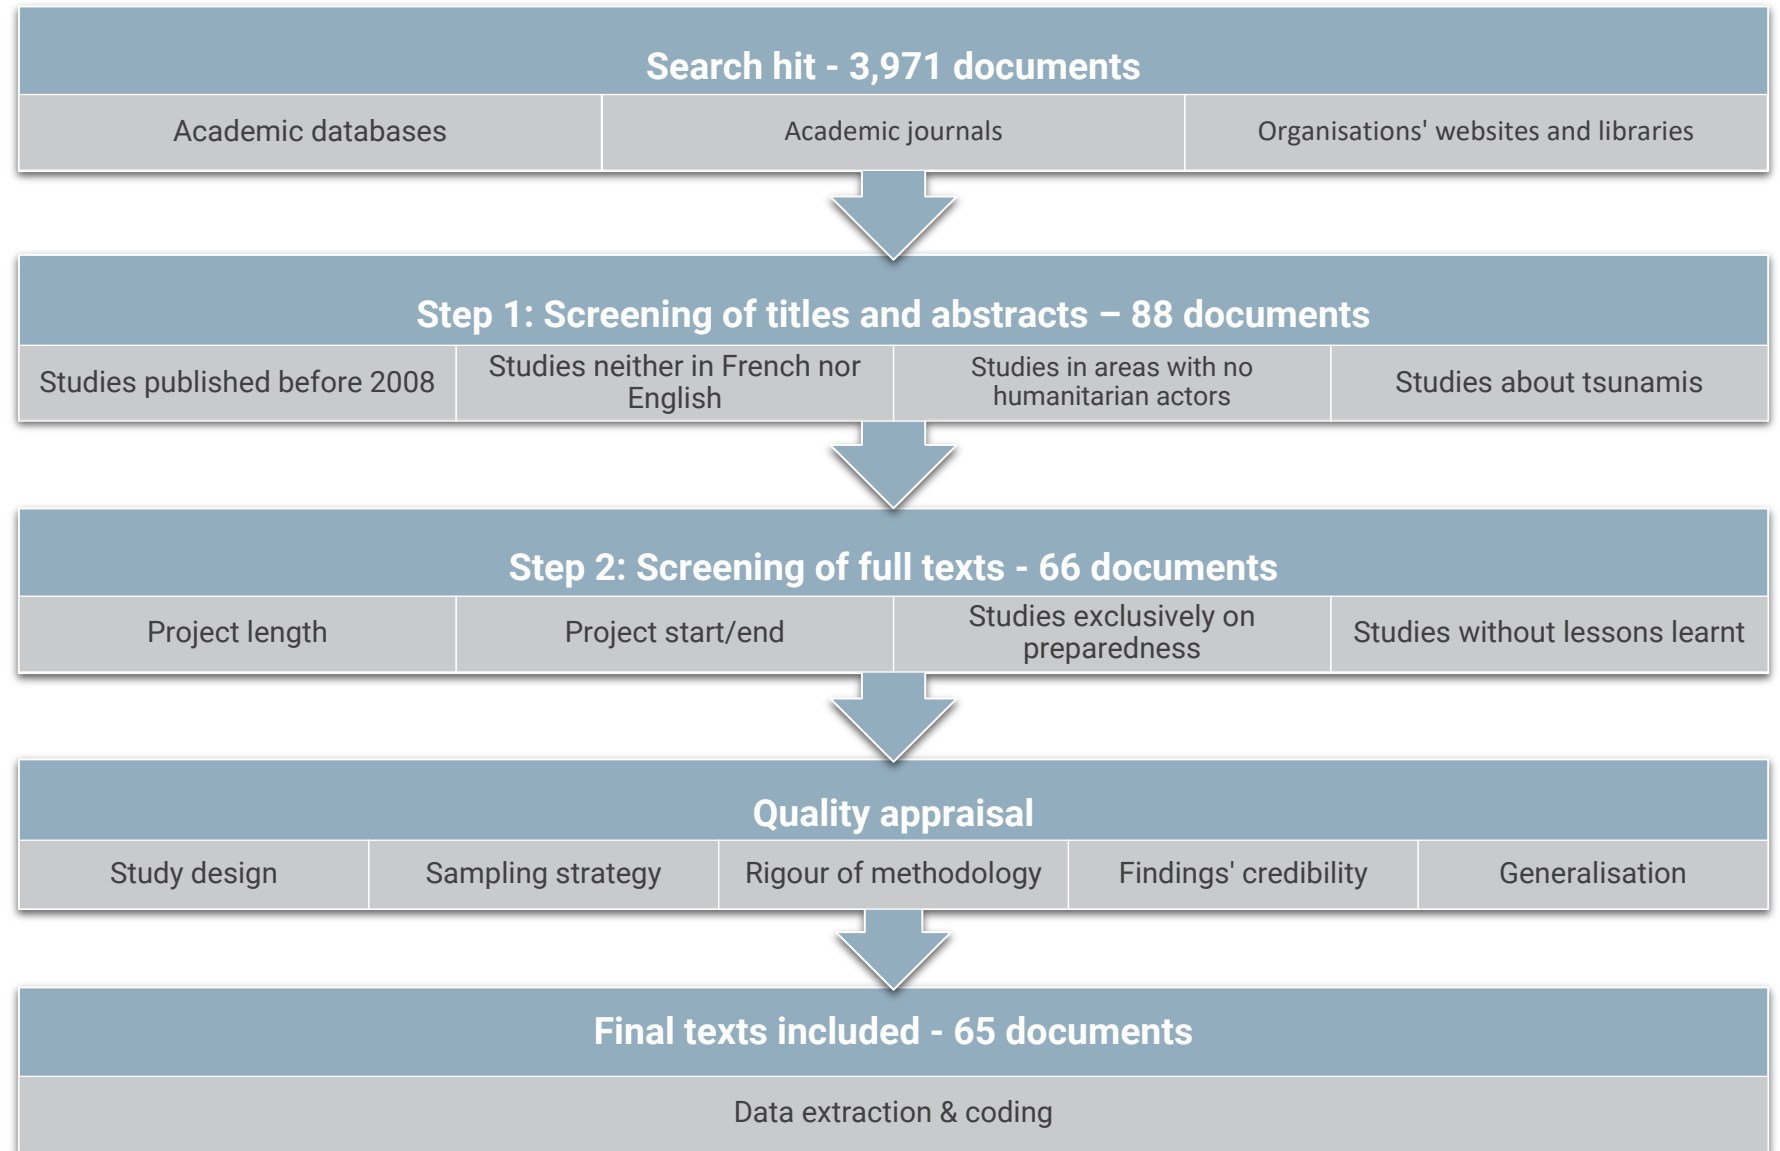

2. Methodology

Scope and
inclusion criteria:

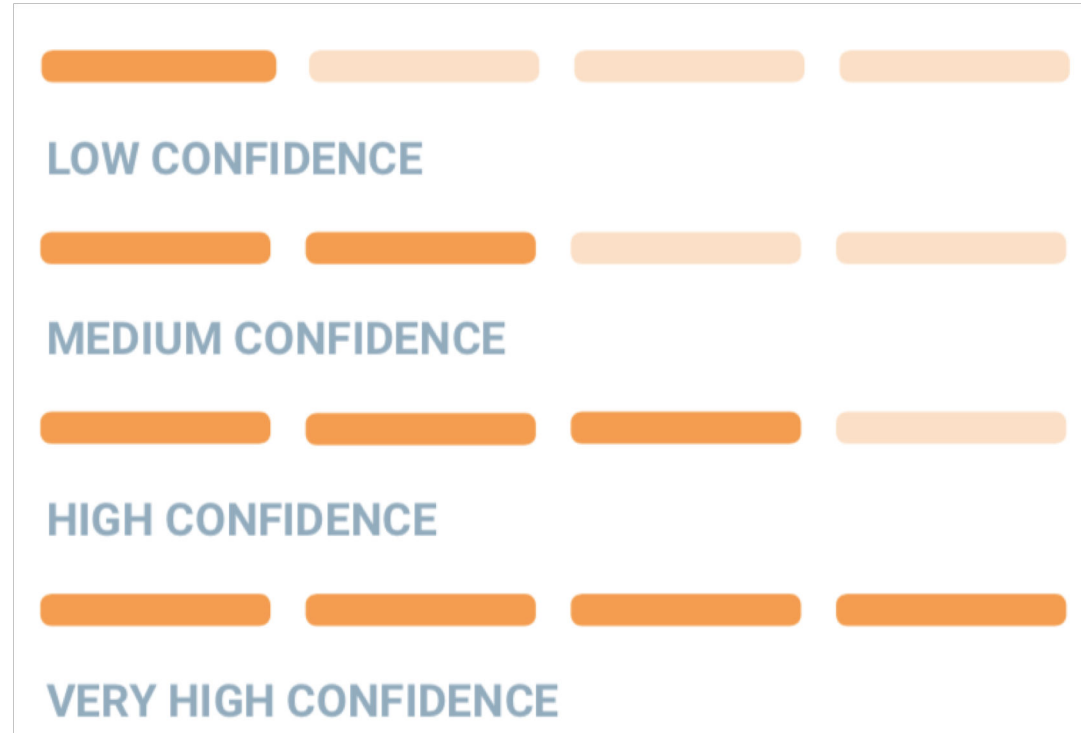

Key Terms	Timeframe
• Earthquake; • Humanitarian responses.	2008 - 2018
Type of populations and contexts	Type of response
• All earthquake affected populations (direct or indirect)	• Sectoral and multi-sectoral earthquake responses
Type of outcomes	Type of studies
• No restriction on the type of outcome measured, way outcome was measured etc.	• Qualitative; • Quantitative; • Mixed-method

Key steps of the search

Confidence rating

Scoring based on the 'average quality score of each document in the lesson, the number of documents the lesson draws from and the deviation of that lesson as compared to the mean...'

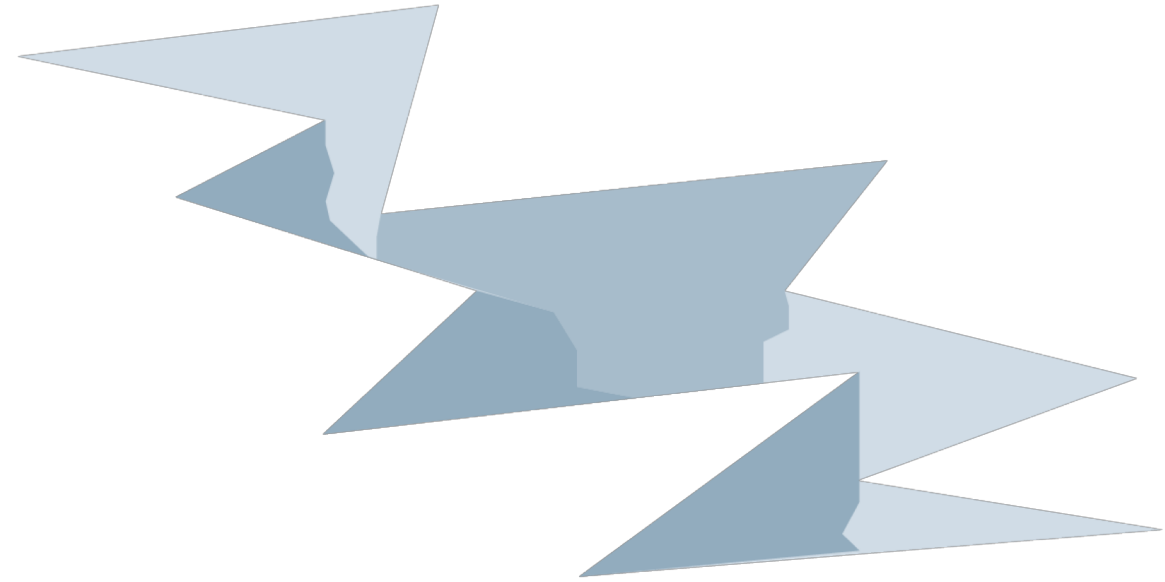

Lessons learnt: Across the project cycle

Lesson 1: Engage broadly and rapidly with local and national actors – even the most affected communities and authorities have some level of capacity after an earthquake.

HIGH CONFIDENCE

Lessons learnt: Across the project cycle

Lesson 2: Acknowledge and do not undermine the work of private sector entities to ensure business continuity following an earthquake.

HIGH CONFIDENCE

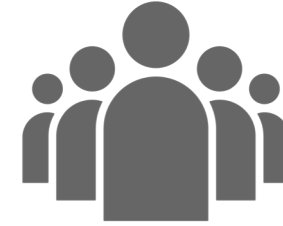

Lessons learnt: Across the project cycle

Lesson 3: Do not let infrastructure and access challenges get in the way of communication, especially with isolated communities.

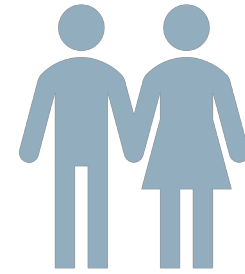

HIGH CONFIDENCE

Lessons learnt: Across the project cycle

Lesson 4: Ensure that cross-cutting issues such as gender, security and the environment are incorporated at all stages of the response.

MEDIUM CONFIDENCE

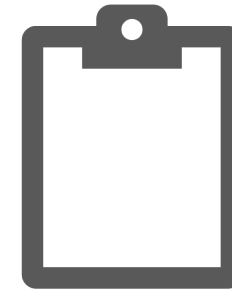

Lessons learnt: Assessment and analysis

Lesson 5: Conduct thorough assessments which recognise and identify the distinct ways earthquakes affect different populations.

HIGH CONFIDENCE

Lessons learnt: Assessment and analysis

Lesson 6: Follow established good practice for needs assessments, recognising the specific challenges of doing so in urban areas.

MEDIUM CONFIDENCE

Lessons learnt: Assessment and analysis

Lesson 7: Conduct assessments in ways that avoid exacerbating tensions between host communities and internally displaced persons.

LOW CONFIDENCE

Lessons learnt: Strategic planning

Lesson 8: Locate spaces to store debris and, if appropriate, use short-term conditional assistance to clear it.

HIGH CONFIDENCE

Lessons learnt: Strategic planning

Lesson 9: Anticipate issues related to lack of documentation and complex land tenure.

HIGH CONFIDENCE

Lessons learnt: Resource mobilisation

Lesson 10: Mobilise sufficient and appropriate surge capacities.

MEDIUM CONFIDENCE

Lessons learnt: Implementation

Lesson 11: Account for quickly evolving health needs in post-earthquake contexts. Be aware that epidemics can happen.

HIGH CONFIDENCE

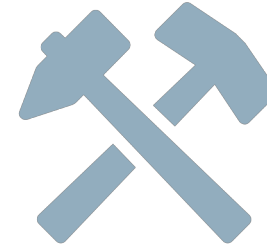

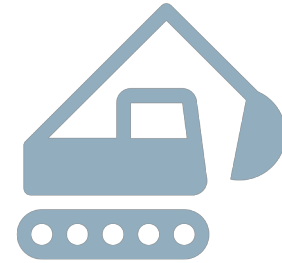

Lessons learnt: Implementation

Lesson 12: Prioritise the repair of existing structures, support owner-driven reconstruction, preserve architectural heritage and use relocation and resettlement only as a last resort.

HIGH CONFIDENCE

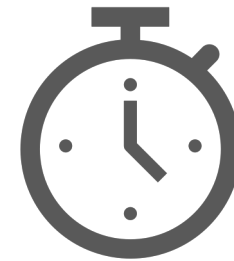

Lessons learnt: Implementation

Lesson 13: Be cautious with setting up transitional shelters, which may hinder longer-term reconstruction.

HIGH CONFIDENCE

Lessons learnt: Implementation

Lesson 14: Address long-term as well as immediate education needs.

HIGH CONFIDENCE

4. Findings: MEAL

Lesson 15: Recognise the value of MEAL and push through obstacles

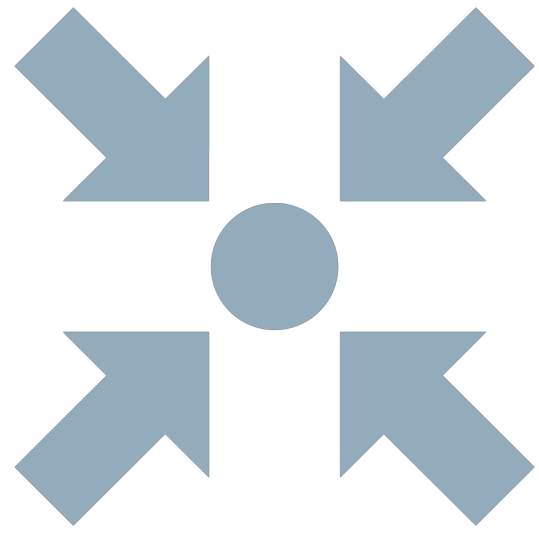

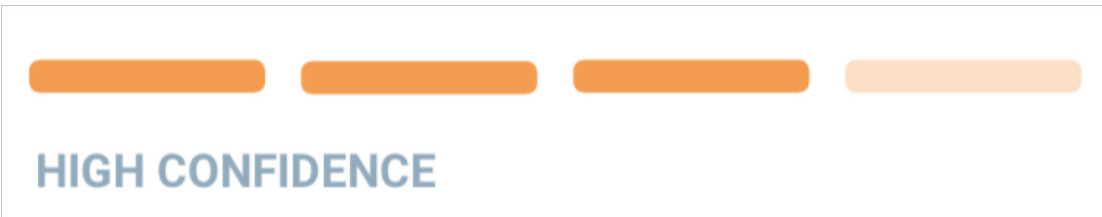

HIGH CONFIDENCE

Findings: Coordination

Lesson 16: Put time and effort into coordination to avoid negative impacts on the response
