

HRRP District Technical Coordination Meeting Minutes

Program/Area:	<i>Hotel RK, Dhading Besi, Dhading</i>
Meeting Purpose:	<i>HRRP Technical Coordination Meeting</i>
Meeting Date:	<i>22nd June 2017</i>
Meeting Time:	<i>10:00 am - 12:00 pm</i>
Meeting Location:	<i>Hotel RK, Besi, Dhading</i>
Meeting Facilitator:	<i>Sachin Sapkota, Prabin Gautam, Chandrakant Karn</i>
Minutes Taken By:	<i>HRRP-Dhading Team</i>

Discussion: (Items/Knowledge Shared)

Agenda:-

1. Introduction and Welcome

HRRP Technical coordination meeting was started by welcoming the participant and with the short introduction of them. HRRP-Dhading conducted Technical Coordination meeting in chairmanship of DUDBC Chief **Dilip Bhandari** and Chief Guest NRA-Dhading chief **Er. Rabichandra Pajiyar**. All participants from various organizations introduced themselves in the meeting.

2. Surakshit Ghar Application

The objectives of Surakshit Ghar Apps was shared with PO's and government agency. An android application for mobile has been developed by Build Change that can guide the beneficiaries to construct earthquake resilience houses. The application is available at google play store and is user friendly. Furthermore, as there is increasing number of mobile users, it will guide all users through simple pictorial presentation and help in understanding technical aspects in simpler way.

Key points/Main Features

- How to get government subsidy
- Contact for technical assistance
- DUDBC Catalogues
- Good Construction Practices
- Work Site Safety
- Trained Masons
- Push Notifications ie NRA Newsfeeds □ Important news and Notices □ Informative Videos
- Features of the app □ Safe Construction detail

3. Lead Mason Training Directives

An overview on the Mason training in the district was provided to the participants. Total number of Short training conducted in the dhading district was provided to each participant and partners. The total number of mason who has got short training in the district is 5284 up to this date and expecting more in the future.

The three Key points discussed in this topics that everyone should follow after training are

- Follow up Mechanism
- Refreshment Orientation
- Mobile technical assistance (Door to Door assistance)

4. Design Catalogue of reconstruction of earthquake resistant house-Vol II

The POs were provided with the information on the 12 alternative construction materials and technologies covered in the design catalogue. For more information PO's were requested to visit DUDBC's website and soft copy of the catalogue was shared with some POs.

5. Information of design and detailing of 11 typical non complaint cases on RCC structure

Information on design and detailing of 11 typical non complaint cases on RCC structure was shared with PO's and they were requested to visit MOUD-CLPIU's website for more information and soft copy of these cases was shared with some POs.

Following are the Lists of Type Designs

- 1 bay x 4 bay Building
- 1 bay x 3 bay Building
- 1 bay x 2 bay Building
- Building having Cantilever projection 1.5 m
- Building having Grid spacing 1.5 m c/c
- Building with Four Number of Columns, all eccentric
- Building having foundations at differential level
- Building having column size 9" x 12"
- Building with a Missing Column
- Building having Grid Size 4.5m x 4.5m
- Building having Grid size 3.5m x 5.5m

Limitation

- Can reflect only these design & drawing at field
- Detail structural analysis required for the building, if the dimension of the building differ from these designs.

6. Information on correction and exception manual

The objectives and limitation of correction and exception manual was shared with PO's. Participants were also informed that the 10 categories of inspection form are supported by correction and exception manual. Due to the complexity of correction measures Partners raised some queries to facilitate/manage the training for masons in the VDC level. Some of the Non-Complaint cases in dhading district are listed below (RCC & Load bearing structures)s

Non Complaint Cases in RCC Structure in Dhading District

- Plan and Elevation Irregularities
- Less Reinforcement in Column, Beam ie Less than 8 nos
- Room area greater than 13.5 Sqm
- One bay Building
- Column size less than (12 x 12) inch
- Insufficient foundation size
- Aspect Ratio
- Missing Grid Column
- Insufficient Lap
- Insufficient Anchorage bonding
- Hapazhard lapping in beam and column

Non Complaint Cases in Load Bearing in Dhading District

- Structural span more than 4.5 mts
- Missing band ie horizontal band, Vertical band, sill band, Lintel band, Plinth band, roof band etc.
- Insufficient foundation size
- Lack of through stone

Discussion: (Items/Knowledge Shared)

7. Coverage of Technical Assistance in the district

An overview on the technical assistance in the district was provided to the participants. Partners were requested to focus more on Six Technical Assistance i.e.

- Short training (Seven days)
- Vocational training (On the job training) – 50 days
- Orientation – (Build Back Better)
- Mobile technical team
- Help Desk
- Demonstration/Model House

Miscellaneous Items / AOB:

- POs discussed on Alternative construction material technologies or Catalogue-II which is as per POs is not much applicable in VDCs since locally available materials like stone is preferred than other construction material.
- As per POs Correction /exception manual may create confusion in community due to the change in some parameter i.e. size of steel bar for construction complete house and under construction.

Decisions Made: (What, Why, Impacts)

- Conduct Technical Co-ordination meeting as well as Orientation program at district Level for all partner organizations frequently.
- Regular follow up Mechanism to those mason who have got short training, refreshment orientation if necessary and focus on door to door assistance.
- The issues/challenges will be addressed in coming days by all relevant government bodies of Dhading.
