

Stronger communities and safer habitat: Promoting self-recovery

SHELTER PROGRAM

GEOGRAPHICAL COVERAGE and Scale of support

Programme VDCs

- Gorkha- Palungtar Municipality, Sulikot Gaupalika, Dharche Gaupalika, Siranchowk Gaupalika, Ajirkot Gaupalika
- Sindhupalchowk - Panchpokhari Thangpal Gaupalika and Melamchi Municipality
- Dhading: Ganga Jamuna Gaupalika, Tripurasundari Gaupalika.

Vulnerable Hhs support Planning

CARE

Gorkha	190 HHs
Dhading	165 HHs
Sindhu	152 HHs
Total	507 HHs

<http://nra.gov.np/news/details/x84Ad6U28qW0bC7wIWh3A1kxMiX1fEwhXHGnuT8wAYo>

An aerial photograph of a densely populated mountain village. The houses are packed closely together, many with blue corrugated metal roofs. The village is built on a steep slope, with terraced agricultural fields visible on the right side of the hill. The surrounding landscape is rugged and mountainous.

CURRENT FOCUS

Enable ultra-poor HHs to access GON housing grant.

Overview of approach and strategy

The synopsis of Guideline

Selection Criteria

- Families with houses totally destroyed and loss of belongings (NRA classification of eligible HHs)
- Highly vulnerable (poor, vulnerable and socially excluded) HHs : **Single women, widows, senior citizens having no caring member, children headed HHs, People with Disabilities**
- Landless, ethnic minorities, indigenous groups, endangered and Dalits identified through the process of Underlying Causes of Poverty, Vulnerability and Social Injustice Analysis (UCPVA) synchronizing with government's vulnerability and social security criteria.
- People Living with HIV
- Families with no/low coping capacities
- Gender: CARE Nepal's main programme impact groups are marginalized women and adolescent girls

जोखिम वर्गमा पर्ने भूकम्पबाट प्रभावित लाभग्राही पहिचान सम्बन्धी कार्यविधि, २०७४

मिति २०७२ वैशाख १२ गतेको विनाशकारी भूकम्प तथा त्यसपछिका पराकम्पका कारणबाट जोखिम वर्गमा पर्ने लाभग्राहीहरूलाई क्षतिग्रस्त निजी आवास पुनर्निर्माण गर्ने क्रममा विशेष व्यवस्था गरी निजहरूको आवास पुनर्निर्माणमा तीव्रता दिन वाञ्छनीय भएकोले भूकम्पबाट प्रभावित संरचनाको पुनर्निर्माण सम्बन्धी ऐन, २०७२ को दफा ३१ ले दिएको अधिकार प्रयोग गरी राष्ट्रिय पुनर्निर्माण प्राधिकरणको कार्यकारी समितिले यो कार्यविधि बनाएको छ ।

१. संक्षिप्त नाम र प्रारम्भ :

(१) यस कार्यविधिको नाम “जोखिम वर्गमा पर्ने भूकम्पबाट प्रभावित लाभग्राही पहिचान सम्बन्धी कार्यविधि, २०७४” रहेको छ ।

(२) यो कार्यविधि स्वीकृत गरेको मितिदेखि लागू हुनेछ ।

3. Prepare a list of destitute and disabled earthquake-affected vulnerable beneficiaries:

(1) List of earthquake-affected vulnerable beneficiaries shall be prepared as per below:

- (a) Single woman above 65 years
- (b) Elderly above 70 years
- (c) Orphan children below 16 years
- (d) Disabled person who have received a disability card (only red and blue) from the GoN.

(2) To be eligible for the beneficiary list pursuant to sub section (1), there should not be one or more abled person between the age of 16 to 70 in the single family.

4. Method of identifying earthquake-affected vulnerable beneficiaries:

Pursuant to section 3, such beneficiaries shall be identified as per the recommendation from the local body as well as application from the beneficiary themselves. Such beneficiary list of vulnerable groups shall be used after re-verification from the local level and community.

Criteria for Selection of Vulnerable HHs and Weightage of Marks

S. No.	Criteria	Weightage of Marks	Marks Obtained
1.	Social Aspects	50 percent	
1.1	Ethnicity:	15	
1.1.1	Dalits, Endangered	15	
1.1.2	Highly Marginalized, Marginalized Ethnicity:	10	
1.1.3	Advanced Ethnic	2	
1.2	Disability:	15	
1.2.1	Complete Disability with Classification of “A” Category (holder of a card written with golden letters on red background and certified by an authorized officer or a family with a chronically ill member in the family or a person rendered completely disabled by the earthquake)	15	
1.2.2	Severe Disability with Classification of “B” Category (holder of a card written with golden letters on blue background and certified by an authorized officer or a person rendered severely disabled by the earthquake)	10	
1.2.3	Moderate Disability with Classification of “C” Category (holder of a card written with blue letters on yellow background and certified by an authorized officer or a person rendered moderately disabled by the earthquake)	6	
1.2.4	Mild Disability with Classification of “D” Category (holder of a card written with black letters on white background and certified by an authorized officer or a person rendered mildly disabled by the earthquake)	2	
1.3	Analysis of Age Group (Dependency Ratio)	10	
1.3.1	Dependency Ratio (if the number is 1 or more than 1 when the total population below 19 years and 60 years and above is divided by the total population between 19 years and 60 years in age)	10	
1.3.2	Dependency Ratio (if the number is 0.5-1 when the total population below 19 years and 60 years and above is divided by the total population between 19 years and 60 years in age)	5	
1.3.3	Dependency Ratio (if the number is less than 0.5 when the total population below 19 years and 60 years and above is divided by the total population between 19 years and 60 years in age)	0	
1.4	Family composition and status:	10	
1.4.1	Single woman or elderly woman (above 60) or HH headed by a child	10	
1.4.2.	Person affected by violence or loss of life due to earthquake: Social Violence- Anybody in the family suffering from incidence of violence of severe nature such as allegation of witchcraft, untouchability, collective beating, torture due to dowry, rape, sexual exploitation, trafficking, forced prostitution etc. Physical Violence: This includes persons who are suffering due to beating, forced abortion, burning and acid attack or loss of life in the family due to the earthquake. If such members are 5 marks, otherwise 0	5	
2	Economic aspects	40 percent	
2.1	Immovable property (land):	20	
2.1.1	Person with a site for construction of house only	20	
2.1.2	Person with a site for construction of house and some unirrigated land (up to 5 ropanis)	15	
2.1.3	Person with a site for construction of house and unirrigated land (up to 5 Ropanis) and some irrigated land (up to 2 Ropanis)	7	
2.1.4	Person with, in addition to the site for construction of house, land that can be sold out	0	
2.2.	Sources of income:	15	
2.2.1	With annual income of less Rs. 15,000.-	15	
2.2.2	With annual income of Rs. 16,000/- to Rs. 35,000.-	10	
2.2.3	With annual income of Rs. 36,000. - to Rs. 60,000.-	5	
2.2.4	With annual income of more than Rs. 60,000.- and having regular sources of income	0	
2.3	Loan:	5	
2.3.1	If loan is taken for management of basic household expenses	5	
2.3.2	If loan is taken for the purposes other than the management of basic household expenses or loan is not taken at all or if income generation activities are being carried out by taking loan	0	
3	Utilization of the amount received as government grant:	7 Percent	
3.1.	If the whole amount of the government grant is kept as saving	7	
3.2	If the government grant amount from Rs. 30,000.- up to Rs. 50,000.- is kept as saving even after spending for emergency expenses	4	
3.3.	If the government grant amount is spent for basic needs (medical treatment, education, food) and less than Rs. Rs. 30,000.- is as saving	2	
3.4	If the government grant amount is not saved at all or spent unnecessarily	0	

Social Mobilization (Transformative Social Mobilization)

- Promote an owner driven approach in coordination with local government and NRA.
- Central to this approach is that the whole community will benefit. The community itself becomes the driver of the process, responsible for ensuring that no one is left behind.
- Formation of alliance of skills masons, carpenters, community mobilisers under local government and mobilized as 'shelter champions' or brigade.
- Making local government and stakeholders responsible and accountable
- Mobilization of local groups, youth and neighbors, and encourage practice of exchanging labor in rotation (*PARMA*)
- Support households to have access to the second installment of the GoN grants
- Provide support for families that cannot register for the GoN grant, or who choose not to, to ensure their homes are built to an acceptable level of safety commensurate with their means.
- House warming ceremony will be organized in participation with local stakeholders, local vendors, community members, neighbors.
- Develop the **synergy** between existing **livelihood** and **WASH** programme. WASH programming will ensure water and sanitation facilities to newly built houses. Some income of vulnerable households from livelihood activities will be contributed to rebuild their houses.
- Support⁵ all families with the reconstruction of their houses – this will ensure that the entire community benefits and that no one is left behind.

Emergency support for vulnerable Households: Leave no one behind

Step – 1:

Consultation meeting with local level elected body and other stakeholder

- Criteria and process formulation.
- Share criteria and process with other stakeholders.
- Share commonly agreed criteria and process with DDRC, DCC, NRA, Ward, Gaupalika.
- Endorsement.

Step – 2:

Vulnerable Household Selection

- Conduct UCPVA.
- Prioritization of most vulnerable HHs and Endorsement at Rural/Municipality.
- Disclose the list of selected HHs collect compliant and grievances
- Conduct Public hearing and finalize the list.
- Sharing the final list of selected HHs with DDRC, DCC, NRA, DUDBC.

Step – 3:

Design, estimate and agreement

- Finalization of design, estimate and contribution.
- Finalization role and responsibilities.
- Approval from Rural/Municipality, NRA and DUDBC.
- Agreement with HHs, CRC and Ward /Rural/Municipality.

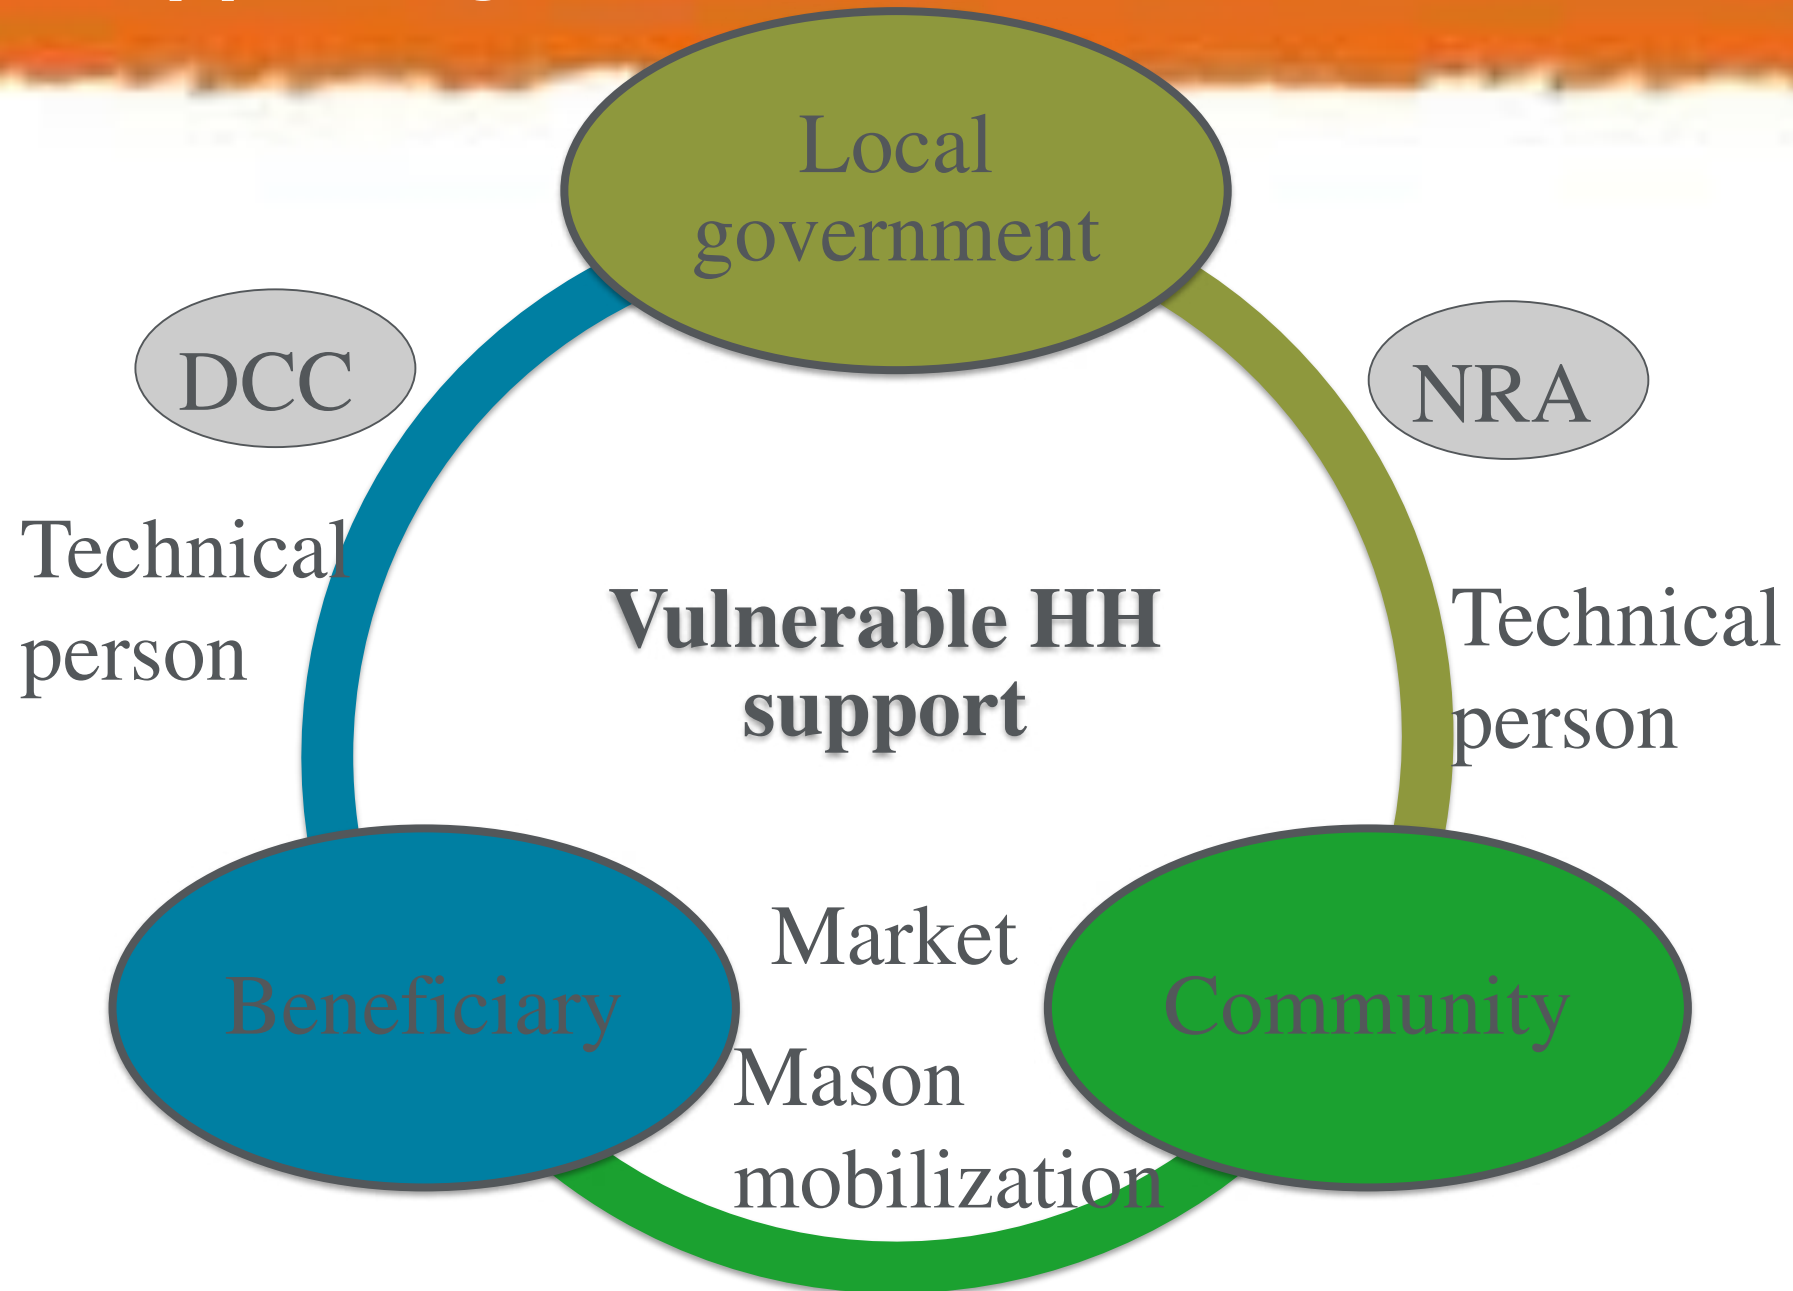

Step – 4: Implementation

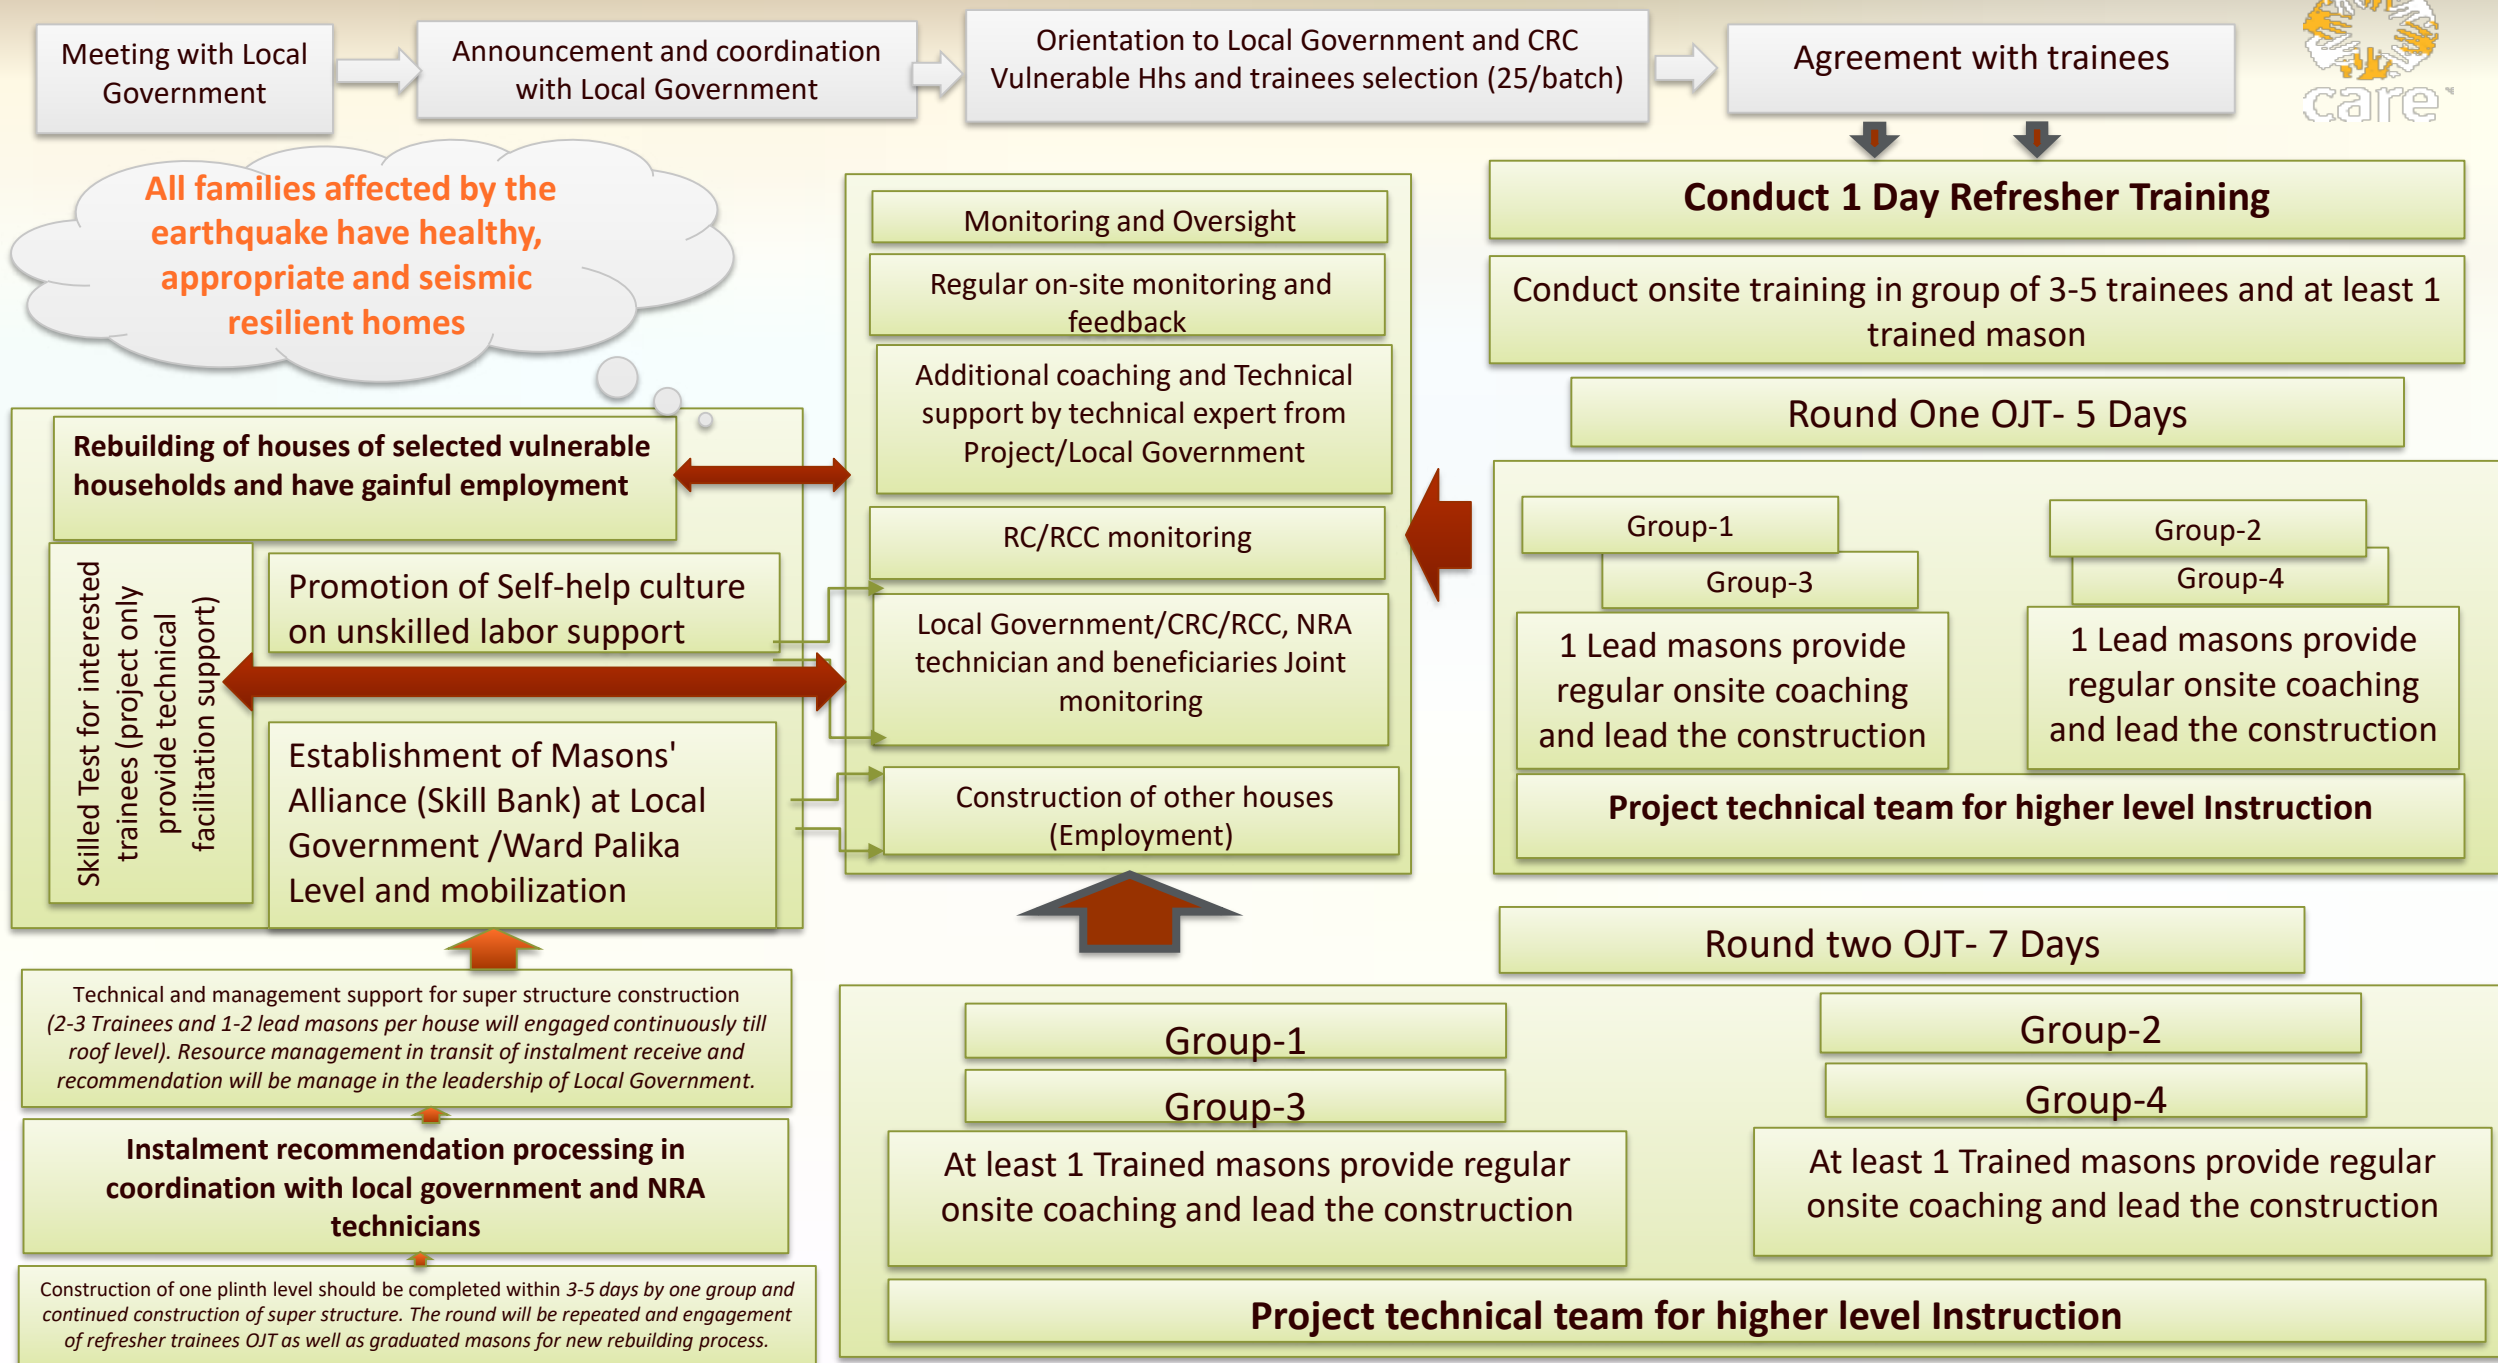

- Conduct Mason training/refresher and mobilized in On the job training (OJT).
- Technical supervision, Joint monitoring.
- Facilitate the process to make vulnerable/left out houses eligible to receive remaining installments.
- Socio-Technical Assistance to complete the houses and support NRA engineer for verification and releasing installment of grant.
- Conduct public audit.

Step – 5: Documentation and reporting:

- Document the process and learning of initiatives.
- Disseminate process and learning to the relevant stakeholders for scaling up.

Supporting Mechanism

Ultra-poor support (Case study)

Inputs

- Up to 50,000 kind and OJT support (Range of Input NPR-31,831 to 49,992)
- Rigorous selection process
- Adequate involvement of local government in the selection and in deciding the support
- Support depending on the requirements

Bhimmaya Tamang

Bhotang, Paschoptari Thangpa Rural Municipality-3

10 years ago my husband suddenly fell sick while constructing a water tank in Laddak, India. He started having some problem with the nerves and there was a burning sensation all over his body. We thought it was of the cold while working but slowly his hands and legs stopped functioning. We went to Delhi for cure but it didn't go well. We even tried curing from traditional wizards but it didn't work. He often expresses how he wants to help me but his body has been restricting him.

The first installment that we received was spent while clearing the debris of the old house and we had no money left. We didn't want to construct an unsafe house like before and I had no way out as it was impossible to start the house without receiving the second installment. It was a great moment for us when the organization agreed to help us construct the house by providing us material and masonry support. I have already submitted an application to the ward for the second installment.

Progress:

- 276 Hhs has supported with construction up to plinth and STA for superstructure till date
- target households have qualified to receive further installments from government

Phulmaya Tamang

Malamohi Municipality-7

The first installment money that I received from the government was all spent in my son's funeral and while following all the rituals, I was even burdened with loan. The market doesn't trust me for any construction material as I have no source of income and I can't work as all my limbs are feeble and weak. Representatives from the ward and the organization visited me to see if I actually required help for construction. As I am old and a single lady, taking care of grandchildren, I was selected for the support. I plan to rear goats and cow in the future and use the money for educating my grandchildren.

Pyauli Lamichhane

Daryentar, Tripunatundar Rural Municipality-1

My husband took away the grant I received from the government and we had to have the foundation of the house laid to claim for the second installment. With my sources of income mostly dependent on wage, I had no guts to construct a house. But with the support received, I constructed a house and I have also received a goat as livelihood support. Soon, it will be giving birth which I look forward to sell for living.

Rodanbabu Pariyar

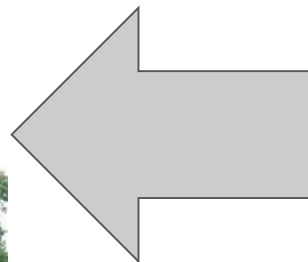

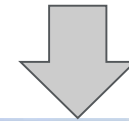

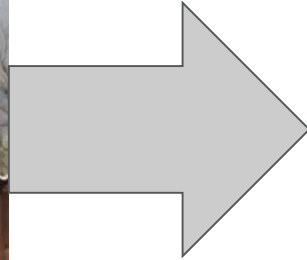

Granchowk Rural Municipality-8

Two days refresher training was organized for eight masons while constructing Pashupati's house. As she is old and is suffering from a disease, she was unable to work and her son too isn't very reliable. As she had no resources to buy construction materials without receiving the second installment, she was provided with material and technical support for construction of the house. After she received the second installment, we continued constructing her house. We are very happy that they will be able to stay safely in their own house.

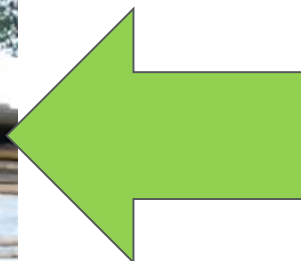

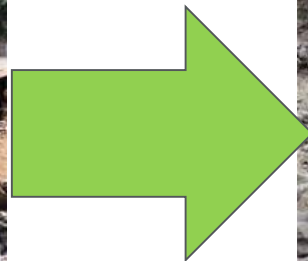

Sushma Baniya

Pashupati Shrestha
