

Bhaktapur district HRRP introductory meeting

Date: 08 02 2017

Time: 10:00 AM

Location: District NRA office, Sallaghari Bhaktapur

Participant Organizations: HRRP (Housing Recovery and Reconstruction Platform), NSET (National Society for Earthquake Technology), TI (Transparency International), NRCS (Nepal Red Cross Society), MoUD (Ministry of Urban Development), MoFALD (Ministry of Federal Affairs and Local Development), EHRP (Earthquake Housing Reconstruction Project), DTO (District Technical Office), NRA (National Reconstruction Authority).

Agendas

1. Welcome, attendance and introduction
2. Brief work update from partner organizations
3. A few words from NRA
4. Way forward

1. Welcome, attendance and Introduction

The meeting was facilitated by Kathmandu valley HRRP coordinator Mr. Rupak Risal. Representatives of partner organizations, MoUD, MoFALD, DTO and NRA officials attended the meeting. The purpose of the meeting was to restart the coordination and build rapport between partner organizations and government offices mainly NRA officials that had stopped for a while.

2. Brief work update from partner organizations

- NRCS: Red Cross is involved in Shelter, livelihood, Health and WASH activities in the district, especially in Nagarkkot, Changunarayan and some wards of Anantalingeshwor municipalities. NRs twenty thousand is to be distributed to thirty one hundred vulnerable families in the district to support them in their livestock, agriculture and small enterprise related activities. Beneficiaries were selected from a panel involving ward civil forum, Red Cross, District Development Committee etc. Two hundred and thirty seven masons have been trained in Bhaktapur. Approximately forty private toilets are in plan to be constructed. Eighteen drinking water plants are in plan to be renovated.
- TI: No reconstruction is possible in Bhaktapur without the approval of NRA. Engineers have been in the district for nearly ten months but they have no work as no reconstruction activity is going on in the district.

3. A few words from NRA

- In Bhaktapur district, reconstruction is not being done following the maps released by the authority. Many partner organizations are said to have been present in the district but are not reporting to the district NRA office.
- HRRP has agreed to coordinate to bring all partner organizations working in the district in contact with NRA.

4. Way forward

There were some challenges that were raised in the meeting, which can be seen in the list below,

- a. There are not many people who are interested in trainings, because they only want to reconstruct their own houses, not of others.
- b. Many houses are already reconstructed but without inspection, hence are not likely to receive the cash grant from the government. Many house owners are coming asking for cash grant which can't be given as they didn't inspect their house.
- c. Twenty seven engineers in Bhaktapur district, three each in all municipalities to inspect whether the reconstructed buildings have followed building guidelines or not. But there are issues such as, different stages are not monitored in time. There is lack of coordination among house owners and municipalities.
- d. There are also challenges in distributing the second tranche, for which the amount of NRs. Two hundred and eighty million, have already been received.
- e. HRRP has been requested to urge partner organizations to focus primarily on trainings and technical assistance activities rather than providing housing grants to beneficiaries directly.
