NATIONAL UPDATES

Nepal's National Consultation Workshop Strengthens Multi-Hazard Early Warning Systems and aligns with Global #EW4All Initiative

Two-day national consultation workshop was organized from 21 -22 September 2023 in Kathmandu with a focus to scale up the current Multi-hazard Early Warning System initiatives in Nepal under the leadership of NDRRMA. The objectives of the workshop were stakeholders identification to strengthen the early warning systems, take stakeholders commitment and to connect the collaborative efforts of all concerned stakeholders and their efforts from national up to local level for building resilience and enhancements.

Early Warnings for All (#EW4All) is a global initiative to ensure that everyone on Earth is protected by early warnings by 2027, emphasizing the urgent need to support the most vulnerable first. The Government of Nepal (GoN) is at the final stage of finalizing the Multi-Hazard Early Warning System; the NDRRMA is leading and coordinating the Task Team.

The discussions in the workshop were encircled around the four foundations pillars of early warning systems that includes - i) disaster risk knowledge; ii) observations and Forecasting; iii) dissemination and communication; iv) preparedness and response. The two days national consultation on #EW4All has been instrumental in initiating a comprehensive assessment of Nepal's existing early warning systems and evaluating advancements in the implementation of the four key components of #EW4All. Discussions focused on how to improve understanding of the #EW4All initiative among relevant government and non-government agencies, academic institutions, and the private sector, and forge broader consensus and awareness on the national coordination mechanism.

This national consultation was led by NDRRMA, and co-organized together with the United Nations Office for Disaster Risk Reduction (UNDRR), World Meteorological Organization (WMO), International Telecommunication Union (ITU), and International Federation of Red Cross and Red Crescent Societies (IFRC) as Global Pillar leads of the #EW4All initiative, as well as with other UN agencies in Nepal and the Association of International non-governmental organizations (NGOs) working in Nepal (AIN). NDRRMA and the concerned cooperating stakeholders are seeking to boost momentum and collectively boost the achievement of the EW4All Action Plan by 2027. Read detail news: [National Consultation on #EW4All \(Nep version\)](#) [News \(Eng version\)](#)

Exploring flood resilient housing and early warning systems: Learning visit by Nepal team in Vietnam

The authorities of NDRRMA and Ministry of Home Affairs/GoN completed an exposure visit to working areas of Vietnam Disaster and Dyke Management Authority (VDDMA) in Vietnam from 6 -11 September 2023. The main goal of this visit was to establish the relationship between Nepal's NDRRMA and Vietnam's VDDMA for disaster risk reduction and post disaster recovery, particularly focusing on flood resilience techniques and Early Warning System (EWS).

The team from NDRRMA, led by Chief Executive, Mr. Anil Pokhrel Nepal shared the key highlights of involvement of NDRRMA in disaster management and recovery and good practices in the safe housing for disaster affected people. The officials of VDDMA shared the efforts made by Vietnam in disaster risk reduction, along with elaboration especially in flood risk reduction and early warning system. The Nepali delegation team also visited the area of Thua Thien-Hue province, outside of capital Hanoi and observed the good practices in the flood-affected areas. The Nepal team observed the model houses that can be protected from floods, the operation of reservoirs and the early warning system established with the help of JICA -Vietnam.

The visit by the Nepal team was useful in terms of learning and gaining insights on priority implementation activities related to flood resilient housing solutions and early warning systems that are equally potential to pilot or implement in Nepal. The visit has offered a

great opportunity for the disaster risk reduction authorities of both countries to engage in discussions, foster partnerships and identify potential areas of collaboration.

The visit was arranged and coordinated through the technical support of NHSRP and EMPOWER Asia project of CRS Nepal. Read news : [Visit to VDDMA by Nepal team \(Nep version\)](#) and for more information, contact Mr. Rijan Gajurel, National Technical Coordinator- Government Coordination/NHSRP. Call for ambitious action to safeguard climate and cryosphere crisis by policymakers and experts

Second Hindu Kush Himalaya Science-Policy Forum: Climate and Cryosphere Crisis was held in ICIMOD, Kathmandu on 21-22 September 2023 and jointly organized by the Ministry of Forests and Environment (MoFE)/GoN. With scientists worldwide warning of the catastrophic global impacts of this year's record-breaking losses of snow and ice, policymakers and experts representing one of the world's most climate vulnerable regions

gathered in the policy forum to call for an urgent acceleration of climate action and ambition. The event sets out to acquaint key decision-makers across the region with the latest science, identify gaps in knowledge, and discuss and accelerate the ambition of national policies and plans. The two-day symposium zeroes in on the critical risks accelerating and irreversible cryosphere changes pose to water, nature and people across the eight countries of the Hindu Kush Himalayan region.

At the forum, ICIMOD's member countries discussed their current national policies related to the cryosphere. Through collaborative efforts, the forum aims to review existing knowledge and policies, identify gaps, and discuss innovative solutions to tackle challenges facing the region. The forum was supported by the Swiss Development Cooperation (SDC), Foreign, Commonwealth & Development Office (FCDO) -funded Himalayan Resilience Enabling Action Programme (HI-REAP) under the Climate Action for a Resilient Asia (CARA) programme. Bamboo Brilliance: Marking World Bamboo Day with sustainable solutions in Nepal

World Bamboo Day is marked annually on September 18, which was established through the efforts of the World Bamboo Organization, a non-profit organization that was founded in 2005. Bamboo is a type of grass that grows rapidly and is known for its strength, flexibility and eco-friendliness and to celebrate the many uses and benefits of this versatile and sustainable resource, World Bamboo Day is observed annually. The day serves as a platform for not just raising awareness about the importance of bamboo but also promoting its role in sustainable development, poverty alleviation, environmental conservation and cultural preservation.

Habitat For Humanity Nepal (HfH) is championing the use of bamboo in its programs.

Currently, through collaboration with the Hilti Foundation, the GoN, the private sector partner - Green Bamboo Creation, local farmers, and implementing partners, Habitat Nepal is promoting to pioneer cement bamboo frame technology as the disaster-resistant and eco-friendly nature-based construction materials. The Department of Urban Development and Building Construction (DUDBC) is in the process of creating a National Bamboo Guideline for Housing Construction in Nepal, and Habitat Nepal is fully supportive of this initiative.

PARTNERS' UPDATES

Tomorrow's Cities: Efforts to ensure Future Rapti City is disaster resilient

Validation Workshop on Visioning Scenarios for Tomorrow's Rapti City was held in Rapti, Dang district on 14-15 September 2023. The Provincial Infrastructure Development Authority (PIDA), Lumbini has collaborated with Tomorrow's Cities, a UK Research and Innovation (UKRI) Global Challenges Research Fund (GCRF) research project to ensure the future Rapti City (the Lumbini Provincial Capital City) to build its resilience to disasters. The local governments from Rapti and Gadhawa Rural Municipalities (Dang district) and Sitganga Municipality (Arghakhanchi district) are the key stakeholders of the collaboration. The aim of the workshop was to jointly incorporate Tomorrow's Cities Decision Support Environment (TCDSE) into the development of Rapti City.

The collaboration is implementing effective strategies and measures that will contribute to the overall resilience and sustainability of the Capital City in the face of potential hazards and challenges. Tomorrow's Cities embodies the essence of disaster risk reduction, forging a path toward future cities in a risk-informed manner. Shaping visioning scenarios for future cities is one of the key milestones of the TCDSE process.

The various stakeholders groups from local communities along with the local government authorities and planners have jointly participated in group discussions, exercises and contributed to shape visioning scenarios for their own city. The workshop was segmented in various parts: Discussion on Land Use Plan (LUP) for Future Rapti City, Discussion on

Trade Off and Equity Check, Hazard Impact Brainstorming, Impact Priority Exercise and Policy Discussion. Read news: [Rapti joins as tomorrow's cities hub](#). For more information, contact: Mr. Bibek Manandhar, Program Manager & Research Associate -Tomorrow Cities Rapti at NSET. Email: vibekmanandhar@nset.org.np

Swift response and recovery efforts for disaster affected households in Maiwakhola Rural Municipality

Relentless rain in June 2023 wreaked havoc in Maiwakhola Rural Municipality (Taplejung district), affecting both public and private structures. Triggered by the monsoon, landslides and floods hit around 65 households in Ward no. 3. In response, the REACT Project, led by CRS Nepal and supported by NSET, Volunteers Corps Nepal (VCN) and NHSRP, swiftly sprang into action after receiving funding from START Fund Nepal.

The project joined hands with Maiwakhola RM that overall led to conduct assessment to identify safer locations by providing the land to undertake construction of transitional shelters for affected households. The formal handover of these shelters by the local government in presence of community groups was completed on 25 September, marking a remarkable achievement in disaster response in just 60 days. The

municipal body has also stepped in the process of beneficiary's survey for their enrollment in housing reconstruction grant under NDRRMA's procedures. Read news: [Temporary shelters for disaster-hit families](#). For more information, contact Mr. Rijan Gajurel, National

Technical Coordinator- Government Coordination/NHSRP. Email:
rijan.gajurel@hrrpnepal.org

Building Resilience: On-the-Job mason training for earthquake and flood-resistant housings in Banke

On-the-job (OJT) mason and carpenters training at Rapti Sonari and Rural Municipalities (Banke district) is ongoing on Safer Building Construction supported by Homes and Communities Project/CRS Nepal and implemented by local partner- Caritas Nepal together with Department of Urban Development and Building Construction (DUDBC) Banke district. The 40-day OJT has objectives to enable local masons from Rapti Sonari and Duduwa Rural

Municipalities (Banke district) to learn techniques to construct stone cement masonry and

brick cement masonry houses that are intended to be resistant to earthquakes and floods. During the training, the masons also received insights on wood-work joinery techniques to withstand floods and earthquakes. This training provided skills to carpenters in connecting building elements to withstand floods and earthquakes.

Carpenters and masons in the field training are now using this knowledge and constructing demo-community houses for flood prone areas of project rural municipalities in Banke. The building will also undergo testing of lime-stabilized soil wall plasters and floor screeds. For more information, contact: Mr. Rupesh Shrestha, Technical Coordinator-Flood Resilient Housing Solutions/CRS. Email: rupesh.shrestha@crs.org

Highlighting progress and gathering insights from initiatives of Sajag-Nepal

Multi-hazard Risk Sharing Workshop was organized by Sajag-Nepal project on 11 September in Kathmandu to showcase key findings and outcomes from its project initiatives, to collect feedback and guidance from stakeholders and to provide a platform for early-career researchers across the project. The presentations, sharing and panel discussions in the workshop marked a significant milestone in the UK-funded multidisciplinary research Sajag-Nepal project's efforts research initiatives on multi-hazard impacts in Nepal.

The workshop showcased the key findings of its research interventions to a wide array of stakeholders, while actively engaging them in gathering valuable feedback and guidance to shape the project's future direction in the final fifteen months. The project collaborates with a diverse team of researchers and practitioners from Nepal, UK, New Zealand, and Canada, including Government of Nepal (NDRRMA/MoHA), IFRC, Tribhuvan University, NSET, Social Science Baha, BBC Media Actions and the UN Resident Coordinator's Office in Nepal. The project's primary goal is to enhance decision-making processes and reduce systemic risks associated with multi-hazards, benefiting residents, government entities, and the international community.

Strengthening disaster resilience through functional simulation exercise

A 4-days long Forecast-based Action and Shock Responsive Social Protection Functional Simulation was completed and organized from 26-29 September at Sindhupalchowk district, under the leadership of Bhotekoshi Rural Municipality in coordination with EU Civil Protection & Humanitarian Aid supported by Pratibaddha project by involving the relevant stakeholders from the wards, municipality, district, and central level, including communities at risk of flash floods and landslides.

The simulation exercise has helped in supporting decision-making by simulating different scenarios or processes. As part of simulation exercises, teams and local partner organizations were tested on their emergency response operational capabilities, coordination, communication, and collaboration, strengths, gaps, and opportunities for improvement were identified so that the disaster management system can be enhanced. Such simulations have contributed to the enhanced capacities of local levels and communities at large in emergency response mechanisms. The project is led by People in Need (PIN) in partnership with Community Self Reliance Center (CSRC), Save the Children Nepal and Scott Wilson Nepal Pvt. Ltd (SWN).

Geohazard risk management partners consultation meeting and way forward

A partners consultation meeting on geohazard risk management was conducted on 13 September at NHSRP Office for a half-day consultation to discuss the existing challenges, mitigation measures, and way forward for the collective action to manage the geohazard risk management in Nepal. The meeting was attended by USAID Tayar Nepal, People in Need (PIN), CRS, Institute of Himalayan Risk Reduction (IHRR), Caritas Nepal, Mercy Corps

Nepal, and NHSRP. The meeting laid a foundation for a platform of agencies working in geohazard risk management in Nepal. The discussions emphasized the need for forming the Technical Working Group (TWG) with key stakeholders from government agencies such as NDRRMA, the Department of Hydrology and Meteorology, and the Department of Mines and Geology. Private sector and Academics are also in the list to be included later as they can provide valuable inputs based on science. Furthermore, the meeting focused on addressing the monsoon triggered landslides through mitigation measures, early warning systems, landslide mapping, and database management. For more information, contact Ms. Rasna Dhakal, National Technical Advisor-NHSRP. Email: rasna.dhakal@hrrpnepal.org

Strengthening frontline resilience through capacity enhancement

Two-days capacity building training on Emergency Operation Centre (EOC) was organized in Hetauda on 13-14 September through collaborative efforts between PIN, CSRC and SWN as part of the Pratibadhha Project. The primary goal of this training was to augment the knowledge, skills, and capabilities of frontliners and teams operating the EOCs.

The training aimed to equip the participants with knowledge and skills on necessary tools of EOCs operating to coordinate emergency response and management activities effectively and efficiently during times of crisis or disaster. Comprehensive overview of the NDRRMA RMIS tool and the BIPAD portal, emphasizing their significance in facilitating decision-making for DRRM, was provided by the NHSRP Madhesh

team. Participants were guided through the step-by-step process of obtaining their BIPAD portal login ID and password. Participants were also oriented on how to effectively report incidents, add contacts, documents, and capacity resources using the BIPAD portal.

NHSRP's PROVINCIAL ENGAGEMENTS

UPDATES FROM BAGMATI

Successful completion of Bagmati province's DPRP Validation Workshop in Hetauda

Validation Workshop on Disaster Preparedness and Response Plan (DPRP) 2080 (2023 AD) of Bagmati province completed in Hetauda, Bagmati Province on 26 September. The workshop aimed to validate and refine the DPRP along with collecting inputs from concerned stakeholders in its implementation mechanisms. The Chief Minister of Bagmati province, Mr. Shalikram Jamkattel expressed sincere thanks to NHSRP for their valuable technical support from preparation, consultation and compilation of the contents in the document throughout. The Chief Minister further added that the plan is essential for ensuring effectiveness in disaster preparedness and response activities at provincial level.. A total of 114 participants actively attended the event including representatives from different government agencies, development organizations, media and security forces.

Strengthening resilience of district and local stakeholders of Rasuwa

A discussion program on 'Progress Review of Disaster Management' completed in Dhunche (Rasuwa district) on 29 September. The program was led by the Ministry of Internal Affairs and Law (MoIAL) in coordination with the District Coordination Committee (DCC) Rasuwa. The NHSRP Bagmati team facilitated technical support for conducting orientation on NDRRMA's Reconstruction Guidelines and Reconstruction MIS. The program was attended by 43 participants including local officials of five local bodies,

personnels from District Administration Office and other district government agencies and stakeholders. The program has helped in familiarizing the stakeholders and frontliners towards disaster affected housing reconstruction, preparedness and disaster management efforts.

UPDATES FROM GANDAKI

Enhancing capacities of stakeholders and frontlines in building code implementation

Provincial-level sharing workshop on Disaster Risk Reduction and Building Code Implementation (BCI) was organized in Pokhara (Kaski district) on 28 September. The participants were mainly the technical staff (engineers, sub-engineers, assistant sub-er) from the nine municipal bodies of nine districts as well as personnels from provincial level partner organizations. The primary focus of this workshop centered around sharing experiences and insights regarding the implementation practices and plans related to BCI.

The workshop was chaired by Mr. Badri Prasad Adhikari, Secretary of the Office of the Chief Minister and Council of Ministers in Gandaki Province overseeing the Internal Affairs and Communication Division and also attended by Under Secretary Mr. Suran Prasad Sharma Paudel and DRR Focal Person. Municipal technical personnels shared their experiences of program components in BCI at the municipal level. Additionally, partners working at the provincial level also shared their experiences of current DRRM approaches and ongoing activities. The NHSRP Gandaki team provided technical support to conduct the program, which was held under the Homes and Communities program of CRS-Nepal and implemented by Rural Community Development Centre (RCDC) Lamjung. During the workshop, RCDC-Lamjung shared its achievements and successful approaches in the realm of house reconstruction mechanisms, as well as accomplishments from Besisahar Municipality.

UPDATES FROM LUMBINI

Empowering local stakeholders in disaster risk management

The joint sharing workshop on Disaster Risk Management and Anticipatory Action completed on 11 September under the lead of the Ministry of Home Affairs, Lumbini Province with coordination support from NRCS, UNICEF, NHSRP, Danish RedCross, District Administration Office Dang and local governments of Bardiya district. The workshop prioritized discussions on humanitarian actions and the collaborations to enhance disaster risk reduction capabilities of local stakeholders at local level by engaging in the risk assessment, planning, and implementing various activities for DRRM and anticipatory actions. The discussion in this workshop also highlighted the importance and necessity of establishing a provincial-level Community of Practice (CoP) platform.

Strategic collaboration in the provincial shelter contingency plan

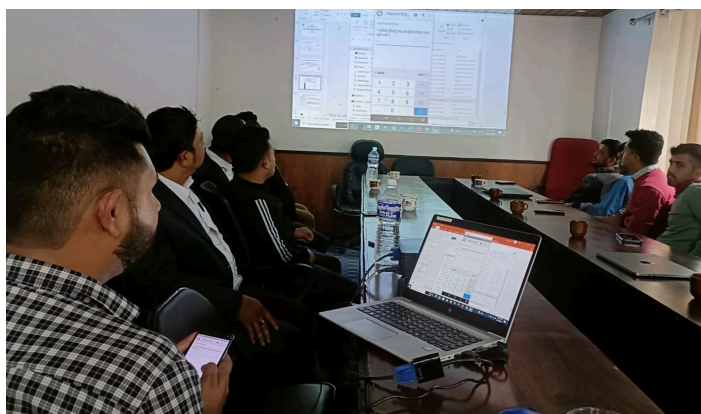

Planning meeting of Provincial Shelter Contingency was conducted on 25 September under the leadership of the Ministry of Infrastructure Development (Lumbini Province) with the technical Support of SUPER Project/UNICEF. Draft document of the Contingency Plan was shared in the meeting. Eight-member technical working group is formed by the provincial ministry in which NHSRP is one of the key members for updating procedures of the Provincial Shelter Contingency Plan. The program was attended by concerned government agencies, stakeholders and representatives of partner organizations.

UPDATES FROM KOSHI

Strengthening capacities of local governments in housing reconstruction

As a part of capacity enhancement in disaster housing reconstruction, a one-day orientation program on the NDRRMA's Reconstruction Guideline, Reconstruction MIS and Kobocollect/BIPAD App Survey Tool was conducted in Okhaldhunga and Tehrathum districts on 11 September and 4 September respectively. The technical assistance to conduct the orientation was provided by the NHSRP Koshi team in coordination with respective District Administration Offices. The event brought together key officials and technical frontliners mainly to strengthen technical coordination and capacity for DRRM and the provincial team carried out discussion and conducted technical sessions for the participants.

On 5 September, the provincial team facilitated a consultation meeting at Sangurigadhi Rural Municipality (Dhankuta district) by involving local elected head, admin and technical; officials. The meeting focused on discussion over the ongoing issues and challenges faced by communities due to monsoon-induced disaster. The municipality has been facing challenges to relocate households that are at risk from a landslide that occurred three years back, as well as those impacted by landslides during the last monsoon season. Additionally, a quick orientation session was conducted to familiarize participants with the NDRRMA Reconstruction Guidelines, RMIS tool and beneficiary survey tools.

UPDATES FROM MADHESH

Fostering resilience and localization by BIPAD Portal training

BIPAD Portal localization training was organized by NRCS from 1-3 September in coordination with Sarlahi District Administrative Office, NDRRMA, UNFPA and NHSRP. The program was attended by a total of 54 representatives and officials of ten local levels of Sarlahi district. The training was focused to enhance the capacity of IT officers and technical staff to view, edit and update the data from the municipal bodies, partner organizations and from District Emergency Operation Center (DEOC) in the Portal.

Technical support was extended by the NHSRP Madhesh team. The training aimed to familiarize participants with the DRRM portal and its benefits, as well as provide guidance on effective communication using the data in the portal through managing and maintaining DRM information. The BIPAD Portal training has contributed to the localization of the disaster database and system, facilitating more informed decision-making in times of disaster.

Technical support for DRRM system effectiveness to municipal bodies

The NHSRP Madhesh team coordinated with the Ministry of Home, Communication and Law (MoHCL) to complete Post-Disaster Housing Guidelines Assessment of Kamala Municipality (Dhanusha district) on 21 September. The purpose of conducting assessment by utilizing Key Informants Interview (KIIs) and semi-structured questionnaires was to evaluate the current status of guideline implementation and gather stakeholders' feedback on its effectiveness. Similarly, by using various virtual mediums, the Madhesh provincial team laid technical information management support to municipal bodies and district agencies mainly in addressing the enrollment of verified beneficiaries' data and creation of Reconstruction MIS account.

UPDATES FROM SUDURPASCHIM

Strengthening capacities of local governments in housing reconstruction

The NDRRMA organized an orientation program focusing on Reconstruction Guidelines, RMIS and Kobocollect survey tool in Darchula district on 4 September, in which the NHSRP Sudurpaschim team extended technical support and coordination with DAO Darchula. The aim was to capacitate frontliners from R/municipalities and DEOC Darchula. The event saw active participation from key district agencies and the local officials from R/municipalities. Various organizations, such as APF, District Police Office, NRCS and DAO Darchula were actively involved. Additionally, the local heads of Shailya Shikhar Municipality and Dunhu Rural Municipality (Darchula district) and Chief District Officer of DAO Darchula addressed the orientation program with their remarks.

Similarly, a field visit was conducted in Aalital Rural Municipality (Dadeldhura district) by NDRRMA team that observed the temporary settlements of 22 landslide affected households in Ward-1, along with need assessment. These affected households have been proposed for resettlement and reconstruction by the local government. The visit team was also accompanied by the local government officials too.

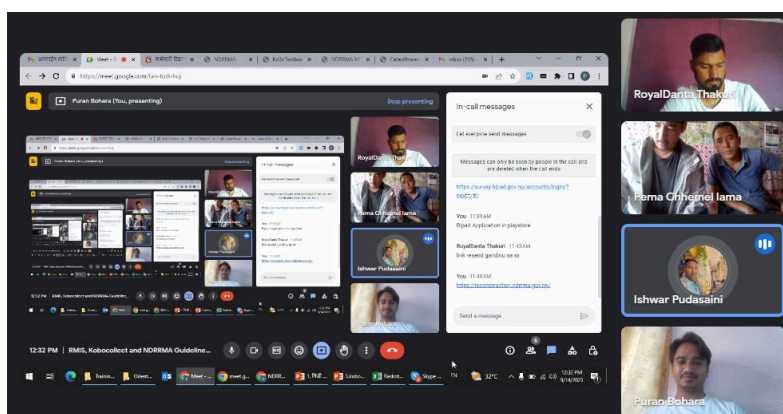

UPDATES FROM KARNALI

Technical support for strengthening capacities in DRRM system effectiveness

National Housing and Settlements Resilience Platform, Nepal

The NHSRP Karnali team used various virtual mediums to assist local governments and district administration offices in enrolling disaster affected households in the housing reconstruction grant receiving system as per NDRRMA guidelines. The support also includes systematic document uploads of verified and approved beneficiaries, data verification, RMIS user account creation and other relevant technical support.

One of the technical support includes the facilitation of virtual orientation regarding NDRRMA's Reconstruction Guidelines, Reconstruction MIS and Kobocollect survey tool to the frontliner technical staff of Namkha Rural Municipality (Humla district) on 14 September. The virtual assistance saw active involvement from frontline technical personnel. The orientation contributed to familiarizing the participants with the government procedures of taking forward disaster affected housing reconstruction. NHSRP team laid smooth technical execution of virtual sessions, enabling the participants to gain useful knowledge and skills related to the reconstruction efforts.

 INTERNATIONAL DAY FOR DISASTER RISK REDUCTION	International Day for Disaster Risk Reduction (IDDRR) 2023
	13 October 2023
	In 2023, the International Day will look at the reciprocal relationship between disasters and inequality. Inequality and disaster vulnerability are two sides of the same coin: unequal access to services, such as finance and insurance, leaves the most at risk exposed to the danger of disasters; while disaster impacts exacerbate inequalities and push the most at risk further into poverty.
	Find out more: https://iddrr.undrr.org/
 World Tsunami Awareness Day 2023 #GetToHighGround #TsunamiDay Fighting inequality for a resilient future	World Tsunami Awareness Day 2023: Fighting inequality for a resilient future
	5 November 2023
	The theme of 2023 World Tsunami Awareness Day (WTAD) will mirror the theme of the International Day of Disaster Reduction: fighting inequality for a resilient future. WTAD 2023 activities will focus on raising awareness about the underlying disaster risk drivers – poverty, inequality and vulnerability – that make tsunamis more deadly for those most at risk.
