

Nepal : Flood and Landslides

HRRP and Shelter Cluster Bagmati Province Situation Report No. 1

(as of June 16, 2021)

This Situation report is produced by Shelter Cluster Nepal, Bagmati Province in collaboration with Housing Recovery and Reconstruction Platform (HRRP) primarily funded by CRS-Nepal and UKaid. It covers the situation of Sindhupalchowk district affected by flood and landslides due to incessant rainfall of June 15 onwards.

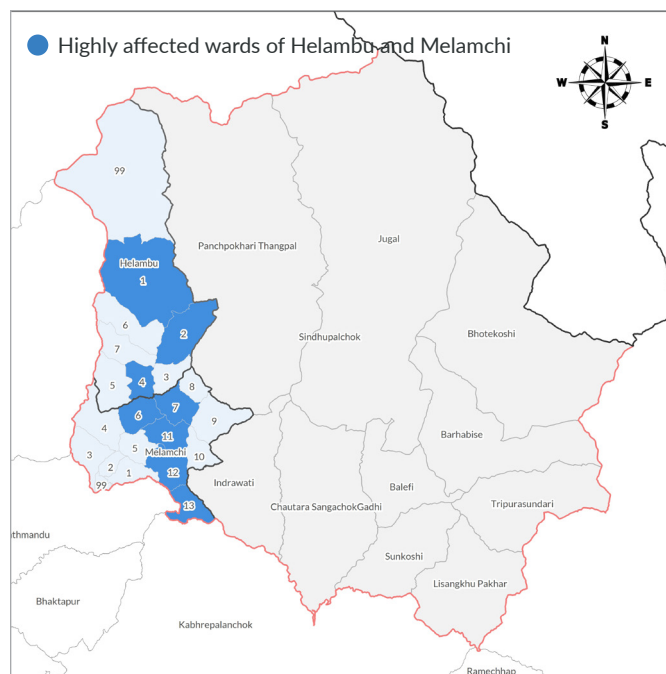

Highlights

1. **350** houses have been submerged by the flood in Melamchi Municipality and Helambu Rural Municipality.
2. **280** households are displaced.
3. **200** Houses fully damaged and **110** partially damaged.
4. **60** temporary shelters in the Bus park area of Melamchi Municipality were completely damaged. As a result, these households have lost their livelihood opportunities.
5. A total of **700** people have been relocated to safe locations in an Indreshwar Secondary School, army barrack and their relative houses in Melamchi Municipality.
6. Help desk has been created for information collection and rescue operational information
7. **10** houses need to be relocated from Tamarang market.
8. **4** bridges totally collapsed and **2** bridges are at risk (Connectivity between Panch Pokhari & Thangpal village will be lost if the bridges at risk are washed away).

Situation Overview

On **15 June 2021**, there was a massive flood induced by incessant rain in Helambu Rural Municipality and Melamchi Municipality area that reportedly swept away houses, bridges and roads.

According to the preliminary source of information from the District Administration Office (DAO), approximately **350** houses were submerged by the flood, **60** temporary shelters were collapsed, and **700** people relocated to a safe location at Indreshwori Secondary School in Melamchi Municipality. Major public infrastructures have been affected damaging bridges and road networks while major market areas have been inundated. The penetration of flood in market areas have caused panic. There is a risk of major humanitarian damage in the area. A rescue team of Nepal Army (NA), Armed Police Force (APF) and Nepal Police (NP) have reached the flood-hit Melamchi and Helambu area of Sindhupalchowk district this morning, Wednesday, **16 June 2021** for rescue and situation assessment. While the Initial Rapid Assessment (IRA) of the loss and damage is ongoing by the local governments with the support of Nepal Security forces, there is an urgent need of tents, non-food items (NFI), food rations, blankets, clothes, medical supplies including personal health and hygiene kits. The monsoon has begun and it is estimated that this year monsoon is going to be much higher than expected according to the Department of Hydrology and Meteorology (DHM), Weather Forecasting Division. The pre-started monsoon has already been heavy and continues to rain consistently throughout Nepal. The impact has been greater in Sindhupalchowk because of the fragile landmass weakened by the 2015 Nepal earthquake and the recent Lamjung earthquake in May 2021 that has seriously impacted Sindhupalchowk due to which **4** bridges totally collapsed **2** bridge are at risk of being collapsed if flood situation deteriorates further losing the connectivity between Panchpokhari and Thangpal villages. People in the Melamchi area at risk of probable flood impact have been evacuated to safe locations.

Loss and Damage

Based on the information collected by Shelter Cluster in Bagmati Province through local ward representatives District administration office, the detail of damage and loss is reflected in the following table:

Districts	Missing Persons	Fully damaged houses	Partially damaged houses	Death	Displaced Households
Sindhupalchok (Melamchi and Helambu Rural/ Municipality)	7	200	110	1	250
Pancha Pokhari Rural Municipality					15
Indrawati Rural municipality					15
Total	7	200	110	1	280

(Data Source: Local representative, Ward Chairperson, DAO and CARE Nepal)

Current Needs and Priorities

These needs are projected based on the initial information available from local authorities to appeal for the emergency assistance. More detailed data is to be updated after the Initial Rapid Assessment conducted by the Government.

Sector	Immediate Needs	Requirement
Shelter	Tarpaulins+Tents	200 HHs
WASH	Basic Hygiene, Sanitation Kits	700 people
Food items	Ready to eat foods and relief packages	700 people
Non-food items	Clothes + Blankets + Sleeping Mats	700 people
Health	COVID Safety Kits and Emergency Health Support	700 people

Rescue and Response

On the morning of 16 June 2021, a rescue team of Nepal Army (NA), Armed Police Force (APF) and Nepal Police (NP) reached the flood-hit Melamchi and Helambu areas of Sindhupalchowk district for preliminary assessment of the situation including search and rescue operation. The NA reportedly rescued **60 persons** who were trapped inside their houses by the flood. The local governments including Nepal Red Cross Society (NRCS) are doing initial rapid assessment and the findings are yet to arrive.

Appeal from Jugal Rural Municipality

Last year in August 2020, there was a massive landslide in Lidi and Jugal Rural Municipalities, where at least 11 people were reportedly killed. Accordingly, the demographic assessment was done of the landslide affected population using Kobo App and the findings have been submitted to concerned government agencies to enroll them into the housing reconstruction grant list. As the procedural guideline is taking longer in the government system, the landslide affected households need to improve their transitional shelter. There is an urgent need of supporting these affected households for which Jugal Municipality has appealed to all partner organizations to extend support in the transitional shelter construction of a total 45 vulnerable households affected by last year's landslide. The Rural Municipality intends to complete the transitional shelter reconstruction within 15 days with the technical assistance of district based NA, APF and local people subject to availability of these requested construction materials mentioned hereunder.

Tentative construction material requested for the purpose of constructing 45 transitional shelter of the landslide affected households are as follows:

S.No.	Item	Quantity
1	CGI Sheet of 26 gaze 9 feet	250 bundles
2	Iron rods for truss	27 tons
3	Cement blocks	8000 pieces
4	Cement	500 sacks
5	Sand, stone and aggregates	Locally available

Note: The Jugal Rural Municipality has made a public appeal & all support is expected in kind rather than cash.
