

Activity Report

Orientation on Confined masonry, Dry stone and Wood & Timber Treatment process

[08-21-2017]

Activity Date:	08/21/2017
Report Prepared By:	Aarju Basnet and Manisha Rai
Facilitator	Manisha Rai

Discussion:

Welcome and Introduction:

- Manisha Rai, HRRP Sindhupalchok welcomed all the participants in the Orientation on Confined masonry, Dry stone masonry and Timber treatment process. The orientation was mainly focused for technical people from Partner Organizations. All the participants gave their introductions and without much delay, the program was started.

Confined Masonry Construction (By Aarju Basnet)

- This presentation was focused on introduction of confined masonry, its construction processes, guidelines, possible causes of failure.

Dry Stone Masonry (By Laxmi Bhatta)

- Dry Stone masonry construction is being practiced in some northern parts of Sindhupalchok. The engineer from OXFAM/GMSP working in Tatopani VDC where such construction is being practiced also discussed the scenario there. This presentation mainly briefed about reason behind adopting stone masonry, its construction technology in dressed stone and random rubble stone masonry with GI wire mesh.

Timber and Bamboo Treatment Process (By Aarju Basnet)

- Timber and bamboo treatment session was mainly focused on steps involved in the chemical treatment of timber and bamboo to prolong its life. Chemicals like mixture of bitumen and kerosene for timber, boric-borax solution and Tim-bor solution for bamboo treatment. Boric-borax solution is being used in houses supported by Helvetas. Similarly, UNDP used Mobil and kerosene for demo/model houses.

M&E Process (Roshan Kumar Kesari)

- This presentation was focused on monitoring and evaluation process, its objectives, outcomes and the vision that CLPIU has taken regarding reconstruction.

Closing Remarks

- Manisha Rai thanked all the participants for attending the program and for their active participation during the orientation.

Discussion:			
○ Discussed on the approval process of dry stone masonry structure. - It can be approved if the structure is as per type design published by MoUD CLPIU Or, - It should have been structure analysis (calculation) ○ Discussed on drawing preparation issues of stone mud mortar structures in Melamchi N.P. - Required a strong coordination between municipality, local bodies and POs soon to address the problems.
