

A Joint Interaction program on Disaster Risk Reduction and Management completed at Janakpurdham, Madhesh Province, organized by the Ministry of Home Affairs and Communication, Madhesh Province and NDRRMA on 28 December 2022. Excellent discussion was undertaken on safer homes, stronger communities and on tracking the durable solutions for localizing the shelter and resilient settlements plan for the disaster preparedness and response management in Madhesh Province. British Embassy (UK Aid), Durable Solutions, Community Self Reliant Center (CSRC), People in Need (PIN) and NHSRP supported the interaction program.

NATIONAL UPDATES

10 parks planned to construct by KVDA for disaster preparedness in the valley

Kathmandu Valley Development Authority (KVDA) is going to build 10 parks in different places inside Kathmandu valley. As per sharing by the Engineer and Information Officer of KVDA, Mr. Saurabh Dhakal, 'these parks are planned and designed with the multi-purpose goal of disaster preparedness, disaster response management and climate adaptation'.

In Kathmandu district, the Shalinadi Park in Shankharapur Municipality, Ghatal Baba Mandir Park in Nagarjuna Municipality, Kageshwari and Navatandham Park in Kageshwari Manohara Municipality, Champadevi Park in Kirtipur Municipality are going to be constructed. Similarly, three parks will be constructed in Lalitpur Metropolitan City. Machhendra Udyan located in Ward -13, Panchodyan in Ward -21, and Balkumari Udyan in Ward -27. The public land in Ward-25 Sainbu Bhainsepati of the Metropolitan City is going to be constructed by conserving the public land. The public land behind Lubhu Secondary School in Ward -8 Dhungetol, Mahalakshmi Municipality will be conserved as the park. As part of the garden construction program, public land in different places of Bhaktapur will be conserved and greening will be promoted in close collaboration with the local bodies of Bhaktapur. The KVDA has allocated a budget of NPR 10 crore for the construction of parks in the three districts. Detail news here: [10 parks in valley for disaster management](#)

Urged to create disaster information, policies and programs focusing the people with disability

An interaction program prioritizing the inclusion of people with disabilities in DRRM completed in Kathmandu on 19 December 2022, organized by NDRRMA. The program was attended by many people representing the Disability Peoples Organizations (DPOs) and

raised concerns over identification of need of the people with disability, to train the concerned agencies in the matter of rescuing the people with disability during disaster events and to make information accessible to them in all possible ways.

Joint Secretary of NDRRMA, Ms. Roshni Kumari Shrestha, presented a working paper on the inclusion and participation of people with disabilities in DRRM. The Joint Secretary informed the participants about various activities that have provisioned the inclusion of people with disability on this matter by NDRRMA. Wheelchair user Architect Deepak K.C. elaborated on the accessible houses for the disabled people. Highlighted concerns in the program were the tracking of actual statistics of disabled people, the design of further interventions on the basis of their disability, collection of statistics of disabled people in all 753 local bodies and further work in collaboration with the inter-ministerial offices.

Secretary of the National Federation of Disabled Nepal (NFDN), Ms. Srijana KC emphasized on the need to fully implement the policies and regulations regarding DRRM and to make various information disability friendly and accessible. Chief Executive of NDRRMA, Mr. Anil Pokharel said that in order to facilitate the rescue of disabled people as quickly as possible during any disaster events, they need to be prior trained and their needs should be prior identified according to the classification of disabilities. He said that public awareness programs should be conducted at all 753 local levels. Read news in detail: [Interaction program on inclusion of people with disability in DRRM](#)

Experts reiterated on the need to increase investment in disaster risk reduction

One day national conference on “Innovation and Enterprises for Disaster Resilient Nation” was organized by the Ministry of Home Affairs (MoHA) in association with various stakeholders on 13 December 2022 in Kathmandu. The major objective of this one-day national workshop focused on

bringing together the private sector and youth entrepreneurs working in the field of DRRM, learn the country's felt need on DRRM and promote innovation and possible in-country productions.

The key objectives of the program are highly emphasized over i) developing understandings on the needs and gaps in Disaster Risk Management and Resilient Innovations (DRM/R) & ii) exchanging experiences on DRM/R related innovations in Nepal.

Stakeholders and participants in the conference pointed out the need to exchange information and experiences of studies, research, inventions and innovative activities undertaken by government, semi-government and non-government, private and the academic sectors to be a part of disaster risk reduction and management solutions.

Secretary of MoHA, Mr. Binod Prakash Singh reiterated the necessity of all to pay attention to the increasing incidents of natural disasters due to climate change and the fact that impoverished communities are the hardest hit. He lamented that although Nepal was ahead in terms of laws and policies on disaster risk reduction and management, lax implementation had led to massive natural disasters annually incurring huge loss of lives and properties. Representative of Asian Disaster Preparedness Centre (ADPC), Mr. Man Thapa informed that the indigenous practices of local communities in emergency response in Nepal implemented since 1997 was not only exemplary within the country but also among Asian countries. Chief Executive of NDRRMA, Mr. Anil Pokharel reiterated the need of conducting an appropriate amount of research on DRRM from government agencies.

Joint efforts by private individuals on relief distribution and rehabilitation in post disaster conditions under the corporate social responsibility were applauded in the conference, while assembled participants argued that loss of lives and properties would be prevented if local knowledge, skills and experiences were leveraged for DRRM. During the event, various presentations were made on disaster risk reduction and management related innovations in Nepal and researches from the academic sector. NDRRMA conducted Reconstruction Guideline Orientation in Sudurpaschim and Karnali Provinces

NDRRMA completed conducting physical orientation on 'NDRRMA Guidelines for Private Housing Reconstruction and Rehabilitation Affected by Monsoon and Fire-Induced Disasters' in Doti and Achham districts of Sudurpaschim Province (25 November – 1 December 2022) and Jumla,

Mugu and Kalikot of Karnali Province (17 – 23 December 2022). In context of the loss and damage caused by earthquake induced disasters in Doti and Achham in November, along with the loss and damage caused to private shelter properties due to monsoon induced flood and landslide in Karnali region during October, has posed deem necessary of pushing the private housing reconstruction and settlements rehabilitation. NDRRMA planned these physical orientations in close coordination with respective District Administration Offices (DAO) to expedite private housing reconstruction and settlement rehabilitation in these affected areas.

This one-day orientation on NDRRMA Reconstruction Guidelines and on Reconstruction MIS (RMIS) was attended mainly by the concerned DAO staff, elected palika officials of all affected local bodies, technical staff, DRR Focal Person and IT Officers. Participants in the program were oriented on NDRRMA RMIS manual, NDRRMA reconstruction guidelines, procedures, inspection methodology and fund management from the RMIS systems. NHSRP Information Management Officer provided technical support in conducting the orientation as well as shared key highlights of using Reconstruction MIS system and discussed mitigating probable errors that arose during its usage. The technical participants were allowed to conduct hands on-walk through of the RMIS system as well as NDRRMA KOBO Collect Mobile Apps system.

Nepal country briefing: Drivers of Internal Displacement in Nepal

A co-publication with the Internal Displacement Monitoring Centre (IDMC) and financed by Asian Development Bank (ADB) under the technical assistance of “Understanding Disaster Displacement in Asia and the Pacific” conducted the surveys and key informant interviews in Nepal. The Nepal country briefing explains why events including monsoon floods, droughts, landslides, and earthquakes force thousands of people to leave their homes each year and shows how stronger data can support prevention and preparedness.

Every year, monsoon rains cause floods and landslides that displace thousands of people across Nepal. The 2015 Gorkha earthquake was the most significant disaster event in recent history, causing an estimated 2.6 million displacements. Damage and destruction were widespread in the country's capital, Kathmandu, which was near the epicenter. The city also hosted many displaced people. The earthquake had a lasting impact on Nepal's mountainous areas and may be contributing to more frequent landslides and landslide risk in other areas.

Shifting weather and climate patterns are also affecting landslide and flood risks throughout the Himalayan region, which could contribute to increased displacement in the future. The number of people affected by river flooding could more than double by 2030.

The probability of meteorological and hydrological droughts in the country is expected to increase as a result of climate change which can displace people and, by destroying natural vegetation, boost the risk of floods and landslides. Nepal has made substantial investments in policies for disaster risk management. Its vulnerability to weather-related and geophysical disasters, however, is exacerbated by its limited capacity to prevent and respond to disaster displacement. Along with natural hazards, its low level of human development raises the risk that its population will be unable to cope with the consequences of disasters and climate change and be forced to move to survive. Read the detail report: [Disaster Displacement in Nepal](#)

Resilient Solutions Conference and Expo 2022 held in Kathmandu

The 'Resilient Solutions Conference and Expo 2022: unlocking innovations and investments for green mountain economies' held in Kathmandu from 5-7 December 2022, took stock of existing solutions addressing the societal, environmental and climatic challenges faced by mountain communities across the Hindu Kush Himalayan region, assessing their scalability and selecting solutions for their scaling potential in the region.

The conference was organized in collaboration with the Ministry of Forest and Environment (MoFE), Government of Nepal, GRAPE and ICIMOD. The conference brought together over 200 participants that raised voices on himalayan regions of Nepal are

facing a crisis with increased frequency and intensity of disasters.

Deliberating on resilient pathways, Mr. Swarnim Wagle, Chair of the Institute for Integrated Development Studies, identified green growth, investment in clean energy, norms, regulations, and nature-based solutions in climate action as pathways to a resilient and green mountain. The event sessions also explored resilience, innovation, and solutions through the lens of transboundary risks, air quality, green mountain economies, disaster resilience, biodiversity, and environmental health. Read in detail: [unlocking innovations and investments for green mountain economies](#)

PARTNERS' UPDATES

Municipal BIPAD Portal launched in local bodies

Through the coordination expedited by Youths Innovation Lab (YI-L), Municipal BIPAD Portal is launched in some of local government bodies in December 2022. The local bodies reached in this intervention of DRR and Climate Fellowship program of YI-L are Prasauni Rural Municipality, Pokhariya Municipality, Garuda Municipality, Loharpatti Municipality, Phatuwa Bijaypur Municipality, Suwarna Rural Municipality. Following the launch of BIPAD Portal, ward representatives, municipal officials,

representatives from academia, and security forces units discussed the draft of the Local Disaster and Climate Resilience Plan (LDCRP) and provided feedback too. LDCRP provides the base for the municipality to carry out development activities in parallel with disaster management and risk reduction. The local-level plans on disaster and climate change take hold as the base guideline for the municipality and the majority of local bodies is currently working on the local DRRM act which will be endorsed in their upcoming executive meeting. During the launching event of municipal BIPAD Portal in respective local bodies, majority of the elected officials reiterated that the LDCRP remains as the base document for the municipality to prioritize the DRM in the developmental activities.

Sample of one municipal BIPAD portal: <https://prasaunimun.bipadportal.gov.np>

Knowledge sharing workshop on BIPAD Portal Localization

Knowledge Sharing Workshop on BIPAD Portal Localization completed at Sudurpaschim on December 20, 2022, which was technically supported by YI-L and in coordination support of Mercy Corps Nepal. The workshop reviewed the achievements, experiences, learning, practices and challenges from the DRR Climate Fellowship program that were launched in Punarbas Municipality, Belauri Municipality and Laljhadi Rural Municipality. Given the reality that most of the municipalities lack capacities to collect, manage and use DRR information for informed decision making, YI-L's DRR Climate Fellowship aims to address this issue by mobilizing trained local youths with sound knowledge on BIPAD portal in the local governments and they transfer their technical capacity of using BIPAD portal.

NDRRMA's Environment Inspector and GEDSI Focal Person, Ms. Reena Chaudhary provided insights on strengthening BIPAD Portal at local levels for decision-making by further strengthening the damage and loss, VisRisk modules. From the establishment of NDRRMA, the process of BIPAD Portal Localization has coverage of a total of 53 local bodies so far which is among the prioritized programs by NDRRMA. The program was attended by representatives of governmental and non-governmental agencies working in Sudurpaschim Province including key ministries, security units and organizations. Read more in detail: [DRR Fellowship program reviewed in 3 local bodies-Sudurpaschim province](#)

Impact-based Forecasting orientation conducted in Tikapur, Kailali

An orientation on Impact based Forecasting (IBF) was conducted on 4 December 2022 to the municipal officials from Tikapur Municipality. Nepal Red Cross Society district chapter organized the event with an objective to orient the municipal officials on IBF dashboard and familiarize them on different features and uses of IBF dashboard. A total of 24 participants attended

the workshop. The representatives from NRCS Kailali shared the importance of taking early actions for mitigating impacts of the disasters that are prone to the area and importance of data for identifying the at-risk households.

Team of YI-L provided technical support to facilitate the session on IBF thereby sharing the Importance of IBF, exposure and vulnerability data in predicting the impacts of the forecasted flood events and emphasized on the need of focusing in targeted approach in Forecast-based action (FbA) and DRRM. YI-L also presented about the household level data integration into the IBF module in the NDRRMA's BIPAD Portal and a short demonstration on IBF walkthrough was conducted for the participants. The data integrated in the IBF module was also thoroughly described to the participants which included households under the existing risk, potentially exposed and potentially impacted households. In addition, the module contains the information of the early action support required according to the impact level.

NHSRP's PROVINCIAL ENGAGEMENTS

UPDATES FROM BAGMATI

Technical support extended for DRRM system effectiveness

The NHSRP Bagmati Province Team coordinated with respective local bodies and district agencies (Makwanpur DAO, Nuwakot DAO, Bidur Municipality, Kavrepalanchok DAO, Dhading DAO, Makwanpurgadhi Rural Municipality and Hetauda Sub Metropolitan City) and completed providing technical support to organize "One-day orientation on the NDRRMA Guidelines for Private Housing Reconstruction and Rehabilitation Affected

by Monsoon/Fire-Induced Disasters' and NDRRMA Reconstruction MIS". Key highlights of BIPAD Portal, its usage and localization effectiveness were also shared during the orientations. The major participants from the local bodies and district agencies who attended these orientations were mainly the elected officials, senior officials, ward officials, IT Officers, DRR Focal Person, and technical staff. Participants in the program walked through to create surveyor user IDs, use the NDRMMA Kobo Collect mobile app, verify and approve the procedure of beneficiary survey data on the NDRRMA MIS, fill up the first inspection form and BIPAD Portal.

Basic training on Shelter and Settlement Planning

3-days basic training on “Shelter & Settlement Planning” conducted from 27- 29 December 2022 at Hetauda, Makwanpur district, which is jointly organized by the Ministry of Internal Affairs & Law Ministry of Physical Infrastructure Development, Bagmati province. This training mainly aims to emphasize on localizing the shelter and settlements contingencies plan for the disaster preparedness and response management. The participants are mainly the technical staff and DRR Focal Person from various ministries and local bodies of Bagmati Province and also from partner organizations. NHSRP along with NSET and CRS provided technical support in conducting the training, funded by USAID BHA Global Shelter Cluster and UNHCR.

UPDATES FROM GANDAKI

Technical support extended for DRRM system effectiveness

NHSRP Gandaki Province team coordinated with respective local bodies and district agencies (Gorkha DAO and Annapurna Rural Municipality) to provide technical support in organizing One-day orientation on ‘NDRRMA Guidelines for Private Housing Reconstruction and Rehabilitation Affected by Monsoon and Fire-Induced Disasters’ & Reconstruction MIS”. The program was attended by the participants, majorly the Palika officials, technical staff, DRR Focal Person and IT Officers. Participants in the program were oriented on NDRRMA RMIS manual, NDRRMA reconstruction guidelines, procedures, inspection methodology and fund management from the RMIS systems. The NHSRP team provided know-how on conducting payment from palika level in the payment section of Reconstruction MIS system and on updating datas after conducting inspection of

reconstructed houses for tranche release.

On the demand basis, the team also extended one-to-one information management technical support to IT Officers of the palikas in concern and helped in enhancing their capacities.

UPDATES FROM LUMBINI

Technical support extended for DRRM system effectiveness

NHSRP Lumbini Province team coordinated with respective district agencies and local bodies to conduct NDRRMA RMIS Orientation in Banglachuli Rural Municipality, Mandavi Rural Municipality, Maharajgunj Municipality, Rolpa DAO, Arghakhanchi DAO and Gulmi DAO in December 2022. The topics covered in orientation

were key highlights from the 'Guideline of Monsoon/Fire-induced Disaster Affected Private Housing Reconstruction and Rehabilitation', NDRRMA KOBO Collect App, BIPAD Portal, building code implementation process, verification/approval procedure of beneficiary survey data on the MIS system, house cost calculator and DUDBC design catalog volume 1. Participants attending the orientation were mainly elected officials, key municipal staff, DRR focal person, IT focal person and technical staff. These orientations were possible through the coordination with respective local bodies and with district agencies.

UPDATES FROM MADHESH

Shared objectives of DRRM activities planned for Madhesh Province

Team of NHSRP and People in Need collaborated jointly to attend the meeting of Madhesh Provincial level Disaster Management Executive Committee (PDMC) held on 14 December 2022 in Janakpur, Madhesh Province. The team shared objectives of activities planned for Province no 2 along with the plan of conducting 'Orientation on NDRRMA's Monsoon-Fire induced guidelines and Reconstruction MIS System'. The meeting was chaired by Madhesh Province's Minister of Home Affairs and Communication, Mr. Bharat Prasad Sah and Co-chaired by State Minister Mrs. Ruby Karn. The meeting focused on discussion based on preparedness activities to safeguard from cold waves in Madhesh Province and handover of accessing the details of BIPAD Portal to the provincial government. Noted representatives from Nepal Army, Armed Police Force, from Ministry of Physical Infrastructure, from Ministry of Forestry and Environment, along with UN agencies working in Madhesh Province sector and the technical staff actively attended the meeting.

Technical support extended to conduct joint interaction program on DRRM

A Joint Interaction program on Disaster Risk Reduction and Management completed at Janakpurdham, Madhesh Province which was organized in coordination between the Ministry of Home Affairs and Communication, Madhesh Province and NDRRMA dated 28 December 2022. Excellent discussion was undertaken on safer homes, stronger communities and on tracking the durable solutions for localizing the shelter and resilient settlements plan for the disaster preparedness and response management in Madhesh Province. Majority of the participants in the interaction were the representatives and concerned staff from ministries, security agencies and from partner organizations working in Madhesh Province. British Embassy (UK Aid), Durable Solutions, Community Self Reliant Center (CSRC), People in Need (PIN) and NHSRP support the interaction program.

UPDATES FROM PROVINCE 1

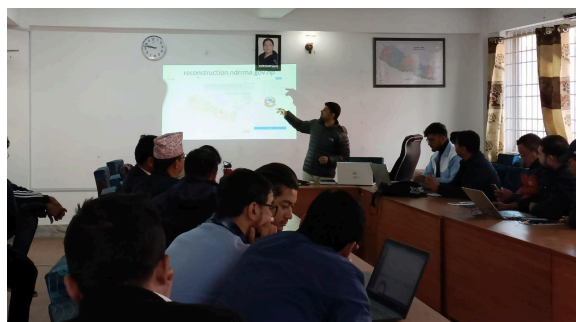

Technical support extended to conduct training on localization of BIPAD Portal

BIPAD Portal Localization Training completed by Dharan Sub Metropolitan City, Sunsari district with the technical support from NHSRP, dated 11-12th December 2022. Participants received an overview of BIPAD Portal's emergence and its relevance in DRRM, along with the walk through on updating, editing, verifying and using the data in the Portal for data-driven risk informed decision making.

Technical support extended for DRRM system effectiveness

In coordination with DAO Ilam, NHSRP Province 1 team conducted one-day orientation on the NDRRMA Guidelines for Private Housing Reconstruction and Rehabilitation Affected by Monsoon/Fire-Induced Disasters, NDRRMA RMIS and BIPAD Portal on 6 December and in Budiganga Rural Municipality, Morang district on 29 November 2022. Participants were mainly Bipad Focal Person, IT Officers and Technical Staff (Engineers, Sub-Engineers, Assistant Sub-Engineers) from Palika and Ward level. Participants walk through on how to create surveyor user IDs, use the NDRRMA KOBO Collect Mobile Apps, verify and approve the procedures of beneficiary survey data on the NDRRMA RMIS. Ilam DAO provided suggestions to carry out a training program on 'building code design' for effective implementation of the reconstruction and rehabilitation guidelines. Along with this, the team also conducted one-to-one virtual orientation in regard to NDRRMA KOBO Collect & RMIS System with Engineer/Disaster Focal person of Gauradaha Municipality of Jhapa.

The team also conducted coordination meetings at Morang DAO and Jhapa DAO for the planning of similar orientation in upcoming weeks, on strengthening capacities on following NDRRMA's guidelines and information management systems.
