

Meeting Minutes

HRRP Coordination Meeting - Dhading**Date:** 2016/12/15**Time:** 2:00 PM**Location:** ACTED Office, HRRP-Hall, Dhadingbesi**Focal Point:** Prabin Gautam, HRRP-Dhading**Participants Organizations:**

- OXFAM-GB
- UNOPS/DIFD
- DUDBC
- NSET-Nepal
- ICDC-Nepal
- ACTED
- HIMS-Nepal
- EPF-Nepal
- ICF-International
- UMN

Agendas

1. Introduction
2. **Discussion on Housing Status (Tranche disbursement, inspections process) Dhading**
 - a. Number of Beneficiaries that have started reconstruction
 - b. Number of Engineers at VDC level
3. **Coverage of 12 Gap VDCs**
4. **Masons Trained from POs (Avoiding duplication)**
5. **Modification of 4W activity-list of HRRP**
6. **Support to Grievance encoding**
7. **AOB**

1. Introduction

HRRP organized another episode of coordination meeting on Thursday, 15th December, 2016, ACTED office, HRRP-Meeting hall. This meeting was organized as per the suggestion and consultation with DDC and DUDBC-Dhading. The HRRP meeting started with a formal introduction of participants from partner organizations and government officials.

The purpose of the meeting was to fill up the mason training gap VDCs of Dhading and provide a platform to share POs plans for upcoming challenges. During the meeting HRRP District Coordinator: Prabin Gautam facilitated the discussion by explaining the role of POs in reconstruction process.

2. Discussion on Housing Status (Tranche disbursement, inspection process)

With the first tranche receivers reached to 58,195; the start of reconstruction has not been initiated in most of the VDCs. Only 2,174 HHs have started the reconstruction with received 1st tranche. But the figure of beneficiaries who have constructed houses on their own (themselves) is more i.e. 3,323. Among them, a segregated figure was lacking whether the houses constructed were based on earthquake resilience norms and components or not. The DUDBC engineer mentioned that the number of engineers at VDC level was below 160 but the figure would definitely increase in coming months for support to reconstruction process. 16 VDCs have completely received the 1st tranche

namely; **Baireni, Baseri, Benighat, Bhumisthan, Dhola, Jogimara, Jyamrung, Khalte, Kiranchok, Lapa, Mahadevsthan, Phulkharka, Pida, Sertung, Salyankot and Satyadevi**
The POs also agreed to support the inspection process through technical assistance but will not be directly involved in the activity.

3. Coverage of 12 Gap VDCs

The meeting was mainly focused on achievement number of trained masons who have been provided with the required skills for construction of earthquake resilience houses by partner organizations and government. Followed by the previous meeting at Department of Urban Development and Building Construction (DUDBC) only 1656 masons were trained in 46 VDCs and 1 municipality. With identified 12 gap VDCs, the meeting mainly focused on discussion for providing any possible support to cover them with mason training activity. Out of 12, 6 VDCs were purposed to be covered by:

- a. **OXFAM [Benighat, Gajuri, Jogimara, and Salang]**
- b. **UMN [Kiranchok, Gumdi]**
- c. **ICDC [Salang – Ward no.: 9]**

After discussion, participants mentioned that the meaning of coverage is not defined and would like to emphasize to find gaps on the basis of population demography. With higher no. of HHS in one VDC, the mason training for just 30 or 60 or 90 may not be sufficient to say it as a covered VDC.

The remaining gap VDCs were

- i. Baireni
- ii. Bhumisthan
- iii. Chainpur
- iv. Salyantar
- v. Katunje
- vi. Khari

But with the HRRP 4W matrix data following findings were conformed:

- 1) **Baireni (GoN)**
- 2) **Bhumisthan (CARE-Nepal and GoN)**
- 3) **Chainpur (FOCUS-Nepal)**
- 4) **Salyantar (CARE-Nepal)**
- 5) **Katunje (Helvetas-Vocational Training and NRCS-7 days mason training)**
- 6) **Khari**

“Khari” was found to be remaining but it was concluded that FOCUS-Nepal is present at Khari VDC.

4. Mason Trained from POs (Avoiding duplication)

As per the HRRP record, 2,652 masons were produced through short training course that comprises of 10 to 5 days under curriculum of DUDBC and other (POs). 130 engineers were recorded under ToT course provided by NSET. 480 masons were produced through vocational training course under CTEVT curriculum. HRRP made focus upon the Mason Roster preparation so as to avoid any duplication of the participants under training courses. With a total figure of 3,262 masons produced only 2,119 participants were recorded in the mason roster thus HRRP requested POs to provide with a complete set of mason data trained. The DUDBC engineer Mr. Subodh Gyawali requested POs to provide support at Naubise VDC for mason training courses. Concerning the mason training activity, participant from UMN mentioned the need of constructing a model house after a training is accomplished, then only the produced mason will learn practically.

The meeting also provided sharing platform for open discussion. The UNOPS District Liaison and Monitoring Officer Mr. Ishwar Pudasaini put forward the possibilities of “Retrofit” program to partially

damaged houses of the district. As DFID is pushing retrofit in Dhading, he urged to provide any relevant data so as to figure out how much fund is exactly required. Questions were raised on how the retrofit would be relevant in rural areas of Nepal.

Mr. Pudasaini emphasized that “retrofit” would help the beneficiaries reducing the cost of construction without demolition of the structures which are partially damaged. NSET coordinator Mr. Pramod Khatiwada mentioned that the “On the Job Training” courses will be implemented in 46 VDCs of Dhading very soon.

5. Support for Grievance encoding

All the POs were requested to provide human resource support for grievance encoding process to DDC Dhading.

6. Modification of 4W activity-list of HRRP

With the modification made in 4W matrix of HRRP, POs were oriented about the various categories and sub-categories of activities list. The different types of activities that need attention for reconstruction process were mentioned.

POs too, agreed to share their information once the new 4W is disseminated to all. They were also informed that such a massive categories and details would help NRA and HRRP to create map indicating the presence/coverage up to ward level, too.

7. AOB

a. Dhading Festival

Dhading festival (Mautshav) is going to be organized from **22nd December, 2016 to 1st January, 2017** by Chamber of Commerce and Industry (Udhyog Banijya Sangh) Dhading in coordination with the local government and private sectors. Participant of OXFAM mentioned that installs are being provided to I/NGOs thus, she requested all the participants from OXFAM, NSET, DUDBC, ICDC, UNOPS, HIMS-Nepal, EPF, ICF, ACTED, UMN and other agencies to actively participate and share relevant information among the mass. The size of the install will be 9x6 Ft.

This festival would be a great opportunity for conveying message among people so that any confusion can be resolved and proper guidance could be provided through different agencies for the process of build back better program and other, too.

b. Tracking of public property construction (Hospital, health-post, communal shelters, School, etc.)

Participant from ICF International mentioned the need to find gaps in similar fashion of mason training and VDC coverage for tracking construction of publicly built properties from different agencies. With this finding, it would be easier to prepare plans and gap of need at various places of Dhading district. ICF International funded by DFID is working for reconstruction plan with DDC so as to make better investment plans in the district.

Action Points

- 1. Prepare for upcoming Dhading festival which is starting from 22nd December, 2016 to 1st January, 2017 in coordination with DDC and Dhading municipality.**
- 2. Support for grievance encoding and follow inspection SOP by POs.**
- 3. To share all detailed completed and ongoing data of mason training in modified 4W with HRRP.**
- 4. To prepare the minutes of meeting and share among all.**
