Field Visit /Joint Field Monitoring Visit Reports

Visit 1

Date: 5/10/2018	Location: Tamakoshi Rural Municipality-02, Jhule, Dolakha	Participants from HRRP and stakeholders
		- Binod Kalauni - Janak Raj Joshi, M&E Specialist, CLPIU - Bhogendra Sah, Engineer, DLPIU(Building) - Rukmita Sharma, Sub Engineer, DLPIU(Building)
Objective(s)	- To conduct Palika level meeting in Jhule, Tamakoshi ward no-02 - To collect housing typologies; - To find out health post land status in Jhule (Health Post buildings are going to support by DLPIU(Building); - To sort out issues of houses build using interlocking brick with single reinforcement at the corner.	
Summary	We discussed about the Health Posts building/land status in Jhule, Tamakoshi Rural Municipality-02 with ward Chair along with ward office staffs/stakeholders. They showed potential land for the construction of the health post also told that there is no problem regarding the land for the construction of the health post. While taking on the topic of the reconstruction he told that few of the genuine earthquake victims are yet to be enlisted as the earthquake beneficiaries. He further told that the rate of reconstruction is increasing after the announcement of the deadline from NRA. Additionally, he has been satisfying with the work of the technical staff deployed from DLPIU/Building. In the case of the houses constructed by using interlocking bricks; he told that they were unknown about the technical norms, they used those bricks as they were locally manufactured, less expensive and easy to construct a building. The machine for the manufacturing of the brick was donated by the local NGO Rural	

Reconstruction Nepal (RRN). Additionally, they constructed houses in the direct supervision of engineers from RRN since, it is a new technique, so they were not much aware of the technical norms they did work according the suggestions provided from RRN.

Now those houses are not eligible to get final tranche because of lack of reinforcement at the corners. Focal person/Engineer of DLPIU/Building and M&E told that they will look at such houses by visiting individually and will do necessary things to make them eligible for tranche release.

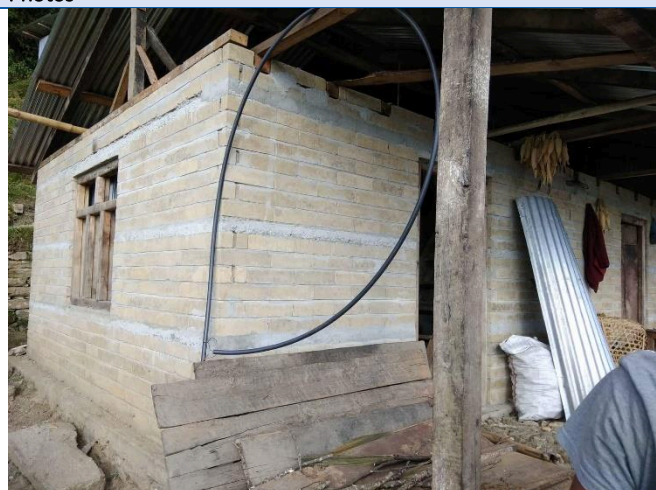

Significantly, ward chair told that only 2%-3% beneficiaries will not construct their houses because some of them are migrated to other places, some are out of contact and some of them are not financially strong to build their private houses.

Figure 1: Meeting with ward Chair of Jhule, 02-ward of Tamakoshi Rural Municipality. Er. Janak Raj Joshi(M&E), Er. Bhogendra Sah (DLPIU/Focal person) and Rukmita Sharma (Sub-Engineer/DLPIU)

Challenges / Issues Identified	Action Required	Responsible	Timeframe
Many houses are non-compliance because of insufficient reinforcement at the corner	Analysis required, or correction required	DLPIU/Building	Immediately
Few real earthquake victims are not listed in the list of housing reconstruction beneficiary	Grievance addressing by doing meeting with ward representative.	GMaLI	Immediately

Photos

Two Room one storey house made by using interlocking brick in Kharidhunga, Jhule, 02-ward of Tamakoshi RM. Mr. Jung Bahadur B.K. is the house owner and he has received second tranche. Third tranche is in hold because of insufficient reinforcement at the corner. The tentative cost of the construction is 5 lakh. PC = Binod Kalauni

Two Room One Storey SMM building is under construction in Paiyabot, 02-Jhule, Tamakoshi Rural Municipality. Mrs. Kalpana Kafle is the house owner and she has received second tranche. The tentative cost of construction is 6.5 lakh. PC = Binod Kalauni

Case Study

Local representatives committed on Dolakha's reconstruction in time

Figure: Local Bodies representatives and stakeholders participating in the Municipal level interaction in Dolakha Photo: Ravi Pajiyar

Dolakha completed municipal interaction programme organized by CLPIU and HRRP in 8th October 2018. Local level reconstruction stakeholders including palikas' representatives, CEOs, CDO, District Treasury Controller Office(DTCO) chief, GMaLI, C/DLPIU(Building/Education), HRRP, journalists and other stakeholders participated in the programme.

In the programme, they discussed on different issues faced in the reconstruction in the district. On return of the grants, Tamakoshi chair Mr. Ishwor Chandra Pokhrel told that local bodies will not take responsibility to facilitate to return the money. He told that the concerned body who distributed the grant should be responsible to take initiate to return the grant.

Mr. Bharat KC, Mayor, Bhimeshwor municipality raised concern that people living in Boch, Lakuridanda, Sushpa (Bhimeshwor-1,8 and 9) areas in public land should be provided grants. Significantly, he asserted that the retrofitting categories enlisted by NRA of stone mud mortar(SMM) houses are baseless, irrelevant because noticeably, one of the most affected districts from Gorkha earthquake is Dolakha. Mr. Ishwor Chandra Pokhrel, chair, Tamakoshi Gaunpalika, and other participants unitarily voiced the proposal that retrofitting of SMM houses must be changed in regular beneficiaries. Significantly, local level representatives have consensus that the deadline provided by NRA surely support to speed up the housing reconstruction procedure. Further, Mr. Ishwor Chandra Pokhrel, chair, Tamakoshi Gaunpalika told that there have been misuse of fund by Development partners, government in school, health post, temporary learning centers reconstruction. Moreover, his concern about the headmaster working as 'contractor' in school building construction leaving the school management and teaching. In his concern, DLPIU(Education) unit chief Mr. Deb Kumar Baral assured that the construction committee will be formed to construct the school buildings now onwards. Further, Bigu CEO Mr. Nabaraj Oli raised concern that they told DLPIU(Education) to not to release fund for the 'low quality' construction work in school (Sharada Secondary School, Bulung) in Bigu but the DLPIU(Education) release 'undermining' the local government's suggestions. From Bhimeshwor, focal person told that there isn't 100 percent compliance so should be flexible to release tranche to the beneficiaries.

The vulnerable settlements assessment has been inaccurate according to the representatives. Also, the Gaurishankar Gaunpalika representatives told that the geological survey has a lot of mistakes on assessment.

Significantly, Bhimeshwor mayor Mr. Bharat KC asserted that in Dolakha Bhimsen area the heritage settlement must have different norms for reconstruction because there is not enough space to construct the private houses. They interacted about measures to check the attitude of people to construct houses with saving money from NRs 3 lakh grants to provide petty contractor to construct private houses. Further, they raised concern houses constructed by the SOS children's village in Lakuridanda which have been controversial since months. Most significantly, the meeting raised concern about the bank's negligence in tranche distribution. Baiteshwor Gaunpalika representatives told that there are two banks in Mainapokhari i.e. Prime and Megha banks but only Megha bank has right to distribute the tranche; so the bank delayed the procedure normally one month. Further, Bigu Gaunpalika's representative told that the Nepal Investment Bank Limited(NIBL) delayed the tranche release process in Bigu.

Further, Baiteshwor representatives told that the houses which destroyed and constructed new should be process smoothed by *sarjain muchulka* (public inquiry deed). The other issue is the names repeated nearly 7,00-8,00 which will be resolved i.e. same beneficiary names in the system. Further, they asserted to reduce communication gap among District Treasury Controller Office(DTCO), NRA to know the tranche release process, date in time to beneficiaries, Palikas.
