

District Report

Kavrepalanchok

12 – 18 January 2018

Activity Summary

Activity	Contact Person	Reference Document
<u>Field Visit to Chyamrangbesi, 12th Jan 2018</u> (A field visit was conducted to Chyamrangbesi VDC, now Bethanchowk Rural Municipality on 12 th Jan 2018 with the participation of NRA Kavre, HELVETAS, NETSA and HRRP. The major objective was to get a brief overview of the retrofitted house by HELVETAS with technical guidance of BuildChange.)	Reshma Shrestha reshma@hrrpnepal.org	Field Visit Report in the section below
<u>PA Forms Collection</u> (7 Gaupalikas/Nagarpalikas were followed up for the submission of PA Forms to MoFALD/DLPIU.)	Reshma Shrestha reshma@hrrpnepal.org	N/A
<u>PA Forms Dispatch</u> (A request has been received from MoFALD/DLPIU return the scanned PA Forms to the respective Gaupalikas/Nagarpalikas. At current, the 40,000 PA Forms are being ordered according to the Gaupalikas/Nagarpalikas.)	Reshma Shrestha reshma@hrrpnepal.org	N/A
<u>Earthquake Safety Day, 16th Jan 2018</u> (District level Earthquake Safety Day was observed at Banepa Municipality with a rally and formal program. The program was attended by CDO, DCC, NRA, DLPIUs, Municipal authorities, Government officials, Army, Police, POs and locals.)	Reshma Shrestha reshma@hrrpnepal.org	Snaps
<u>Field Visit to Bhumlutar, 17th Jan 2018</u> (The field visit was made to Bhumlutar and Dolalghat on 17 th Jan 2018 with NRA Kavre and DSE to monitor some non-compliant houses. The team also participated in post review meeting of Prerana/Handicap International at Bhumlutar.)	Reshma Shrestha reshma@hrrpnepal.org	Field Visit Report in the section below
<u>NRA/HRRP Coordination Meeting, 22nd Jan 2018</u> (NRA/HRRP Coordination meeting has been scheduled for 22 nd Jan 2018, 11:00 AM at NRA Hall, Dhulikhel. Mail has been sent to the district mailing list. Meeting Agenda • NRA Updates • DUDBC/DLPIU Housing Reconstruction Updates • MoFALD/DLPIU Updates • Housing Reconstruction Challenges and Experience Sharing • HRRP Updates (Mason Rates, Housing Typology)	Reshma Shrestha reshma@hrrpnepal.org	Meeting Calendar
<u>Contact List Update</u> (2 contacts each from ASF Nepal and HELVETAS were updated to the district mailing list.)	Reshma Shrestha reshma@hrrpnepal.org	Contact List
<u>4W Update</u> (POs were mailed to timely update the 4W by 24 th Jan 2018.)	Reshma Shrestha reshma@hrrpnepal.org	N/A

Activity Summary

HRRP Summary Report

(A report based on HRRP 4W was submitted to NRA Kavre and MoFALD/DLPIU)

Upcoming Events & Meetings

Event / Meeting	Date, Time, and Location	Contact Person
NRA/HRRP Coordination Meeting	22 Jan 2018, 11 AM – 1 PM, NRA Hall, Dhulikhel	Reshma Shrestha reshma@hrrpnepal.org
Gaupalika Level Meeting	25 Jan 2018, 10 AM- 3 PM, Temal Gaupalika	Reshma Shrestha reshma@hrrpnepal.org
To include details of upcoming events and meetings in the next bulletin, please share details with reshma@hrrpnepal.org by COB Wednesday of each week.		

News and Updates

NRA has requested all Gaupalikas/Nagarpalikas to collect and send the list of vulnerable by 19th Jan under four categories:

- Elderly above 75
- Red Card listed Specially abled
- Orphan below 16
- Widows above 60

(Condition: There should be no other family members between 16 to 59)

Field Visit Report

Date	Location	Participants
12 th Jan 2018	Chyamrangbesi VDC, Bethanchok Rural Municipality	NRA Chief Dhruba Gaida, Reporter Meena Ghorashaini, HELVETAS Khul Bahadur Thapa, NETSA Shiva Ghimire, HRRP Reshma Shrestha
Objective(s)	• To observe the houses retrofitted during Retrofit Vocational Training. • To collect details and experiences of the training from POs, Masons and Households.	
Summary	HELVETAS, with its implementing partner NETSA and through technical support from BuildChange, conducted a 52 Days Retrofit Vocational Training at Chyamrangbesi with 20 participants. Three houses of two and a half storey constructed in Stone in Mud were retrofitted through Cement Technology during the training as per the design prepared by BuildChange and approved by NRA. Three houses of Laxman Dahal, Yagya Ghimire and Deepak Ghimire were selected for the retrofit training and all three are the reconstruction beneficiaries. NPR 40,000 and NPR 60,000 were provided as material support to the selected houses by HELVETAS and BuildChange respectively. A team each of five participants was involved in each house. Four Stonebacks reinforced with 4-12Ø rods run in each longitudinal direction throughout the two and half storey, connected to the outer stone fabric by dowels at	

regular intervals. These stonebacks are connected by 6mm beams of 2-12Ø rods at each level. Through concrete have been placed at two feet distance horizontally and vertically. The gable walls have been replaced with light materials with proper bracing whereas the roof has been held down to the ring beam through CGI straps.

The house-owners collectively purchased the materials required for the retrofit. 275 bags Cement, 3100kg rod were used, costing 18 lakhs in total, for all materials and labor. Given the huge cost for demolition, code restrictions for enough space for Stone in Mud reconstructions, the house owners are satisfied with the retrofit process. But they are not satisfied with the one lakh grant as they think retrofit is equally costly as reconstruction. Also, the technical guidance they received throughout the process will not be received by other interested beneficiaries.

During the short interaction with seven trained masons they shared that they were able to learn all of the deliverables of the training and are confident enough to retrofit similar buildings but technical guidance needs to be provided. Shoring and providing through stones/concrete are the most tedious part of retrofitting. The major challenge for retrofitting in larger scale would be its high cost, technical support from engineers, less trained masons and convincing beneficiaries/communities on its strength. They have received the first tranche but do not know the official process to switch into retrofit beneficiary from reconstruction beneficiary.

The trained team is starting their first house post training of Dilli Prasad Dahal who also is a reconstruction beneficiary. Also, they have received requests from ten houses at KanpurKalapani of Namobuddha Municipality. 2415 houses at Kavrepalanchok have been listed as retrofit beneficiaries.

Field Visit Report

Date	Location	Participants
17 th Jan 2018	Bhumlutar VDC Dolalghat VDC	NRA Chief Dhruva Gaida, DSE Bidhya Subedi, HRRP Reshma Shrestha
Objective(s)	- To monitor non-compliant houses at Dolalghat and Bhumlutar. - To participate in post review meeting of Prerana/Handicap International at Bhumlutar.	

Summary

Some complaints were filed by beneficiaries regarding non-compliance certifications by DLPIU engineers. During the visit, some of the houses were visited for the details. Pictures and some information were collected to be studied back at office. The four houses visited were two and a half storey Stone in Mud constructions with RCC bands. Plinth bands and lintel bands too were missing in all of the houses.

Handicap International through its Implementing Partner Prerana, has been working at Saping, Simthali and Bhumlutar of Bhumlu Rural Municipality in Livelihood sector. As the project ends after January, a review meeting was conducted with the attendees from NRA Kavre, Bhumlu Rural Municipality, Ward authorities and Community groups.

A two storey with attic house constructed in Stone in Mud with RCC bands at Bhumlutar. The beneficiary, Nirmala Kharel has received Second Tranche.

Housing Typology Report

House Owner: Dwanda Prasad Dahal
Location: Chyamrangbesi VDC (Now Bethanchok Rural Municipality)

Building Typology: Stone in Mud with RCC Bands

This house has received Second Tranche and applied for the third. The house owner shares that major cost for reconstruction was for demolition and site clearance.

House Owner: Deepak Ghimire
Location: Chyamrangbesi VDC (Now Bethanchok Rural Municipality)

Building Typology: Stone in Mud, RCC Retrofit

This house has received First Tranche and now for the further tranche, needs to switch to Retrofit Beneficiary. This house was retrofitted during 52 days Retrofitting Vocational Training by HELVETAS.

House Owner: Ram Sharan Kharel
Location: Bhumlutar VDC (Now Bhumlu Rural Municipality)

Building Typology: Stone in Mud with Wooden Bands

This house has received First Tranche. The house has been constructed attached to the pre earthquake house. The leaning side has been supported only with timber supports and no masonry construction.

House Owner: Narayan Basnet
Location: Bhumlutar VDC (Now Bhumlu Rural Municipality)

Building Typology: Brick in Cement with RCC Bands

This house has received Second Tranche and has been inspected for the Third.

Questions Collected

Question	Who Asked the Question?	Response Provided (By Whom)
Can a single roomed house be constructed?	House Owner, Dolalghat	Only the vulnerable ones can construct a one roomed structure but it too needs to be approved at the Ward Level. (HRRP Kavre, Reshma Shrestha)

Challenges and Way Forward

Challenge	Way Forward
Beneficiaries complain on the long interval between inspection and tranche release.	Insufficient manpower mostly at MoFALD/DLPIU also is one of the reasons behind this. POs will be requested to support human resource as earlier in the upcoming coordination meeting.
