

Activity Report

[Orientation on Exception/Correction Manual and Newly Approved Designs – Okhaldhunga District] [21/06/2017]

Activity Date:	21/06/2017
Report Prepared By:	Prakash Basnet and Tulasi Ram Lamichhane

Discussion:

Inception and overview : Yubraj Kharel, Act. Chief NRA

- Mr. Kharel the inaugurated orientation program with the status of housing reconstruction and stated the need and purpose of correction and exception manual.
- He also briefed the common problems arised during housing reconstruction and stated that the correction manual will address the problems and the beneficiaries will get the remaining tranches.
- He also shared the ideas how to treat the problems faced by the engineers at social levels and how to orient the beneficiaries towards the safer construction.

Parash Pandey, Engineer DTO

- Mr. Pandey briefed that the correction manual will be helpful to other engineers beside the engineers working in housing reconstruction because they use to face frequent grievances regarding the reconstruction on their site visits.

Resham Babu Khadka, DPC, NRCS

- Mr. Khadka updated the data that NRCS has done in the shelter construction which included the number of beneficiaries eligible for first tranche, those acquiring second tranche and are ready to gain it and the beneficiaries who are being processed to receive the third tranche of the grant provided.
- He also explained the benefit of correction manual to sort out the problems faced during the process of granting the consecutive tranches.

Himal Kafle, District Support Engineer

- Mr. Kafle stated that the team of two district Support Engineers has been deployed in the district under the financial support from NRA/UNDP in order to support the non-compliance cases through structural analysis. The team has been working via DUDBC/DLPIU to provide technical support to beneficiaries in preparation of detailed plan of non-compliance cases which do not fall under the scope of correction manual.
- He also stated the common problems during the reconstruction which are as follow:
 1. Lack of minimum reinforcement required in the RC frame structure.
 2. Lack of bands.
 3. Discontinuous bands

Questions Collected	Who asked the Q?	Response Provided
When the training regarding Correction/exception and Retrofitting guideline will be conducted?	DLPIU Engineers and Field Engineers of NRA	The CLPIU will conduct after setting all the necessary arrangements for the program

Questions Collected	Who asked the Q?	Response Provided
What are the common defects that has been found during reconstruction?	HRRP Team	POs , DLPIU Engineers and Field Engineers of NRA
What are the necessary guidelines to carry out for the partial damage structures listed by NRA?	Representatives of the POs	HRRP/NRA.
What steps can be carried out in case of RC frame structure which do not consist the minimum reinforcement required?	District Support Engineer	HRRP
