

Discussion on Vulnerability in Private Housing Reconstruction

Approaches & Recommendations for an inclusive reconstruction process in Nepal

**National Reconstruction Authority , Kathmandu,
22 February 2019, Friday**

Reconstruction Timeframe

**Maili Tamang,
Nagarjun Municipality,
Kathmandu**

- 65 years Old widow, living with a TB affected son
- PA signed and spent the 1st tranche money for the medical expenses of her son
- Have a small piece of land but not able to build home
- She is in NRA vulnerable list.

Lakpa Yangen, Parbatikunda Rural municipality, Rasuwa

- 70 Years Old, Widow living alone in temporary Shelter
- PA signed and spent the 1st tranche and already spent the money
- Have a small piece of land but not able to build home
- Not in NRA vulnerable List

Gyan Bahadur Tamang and his Sister

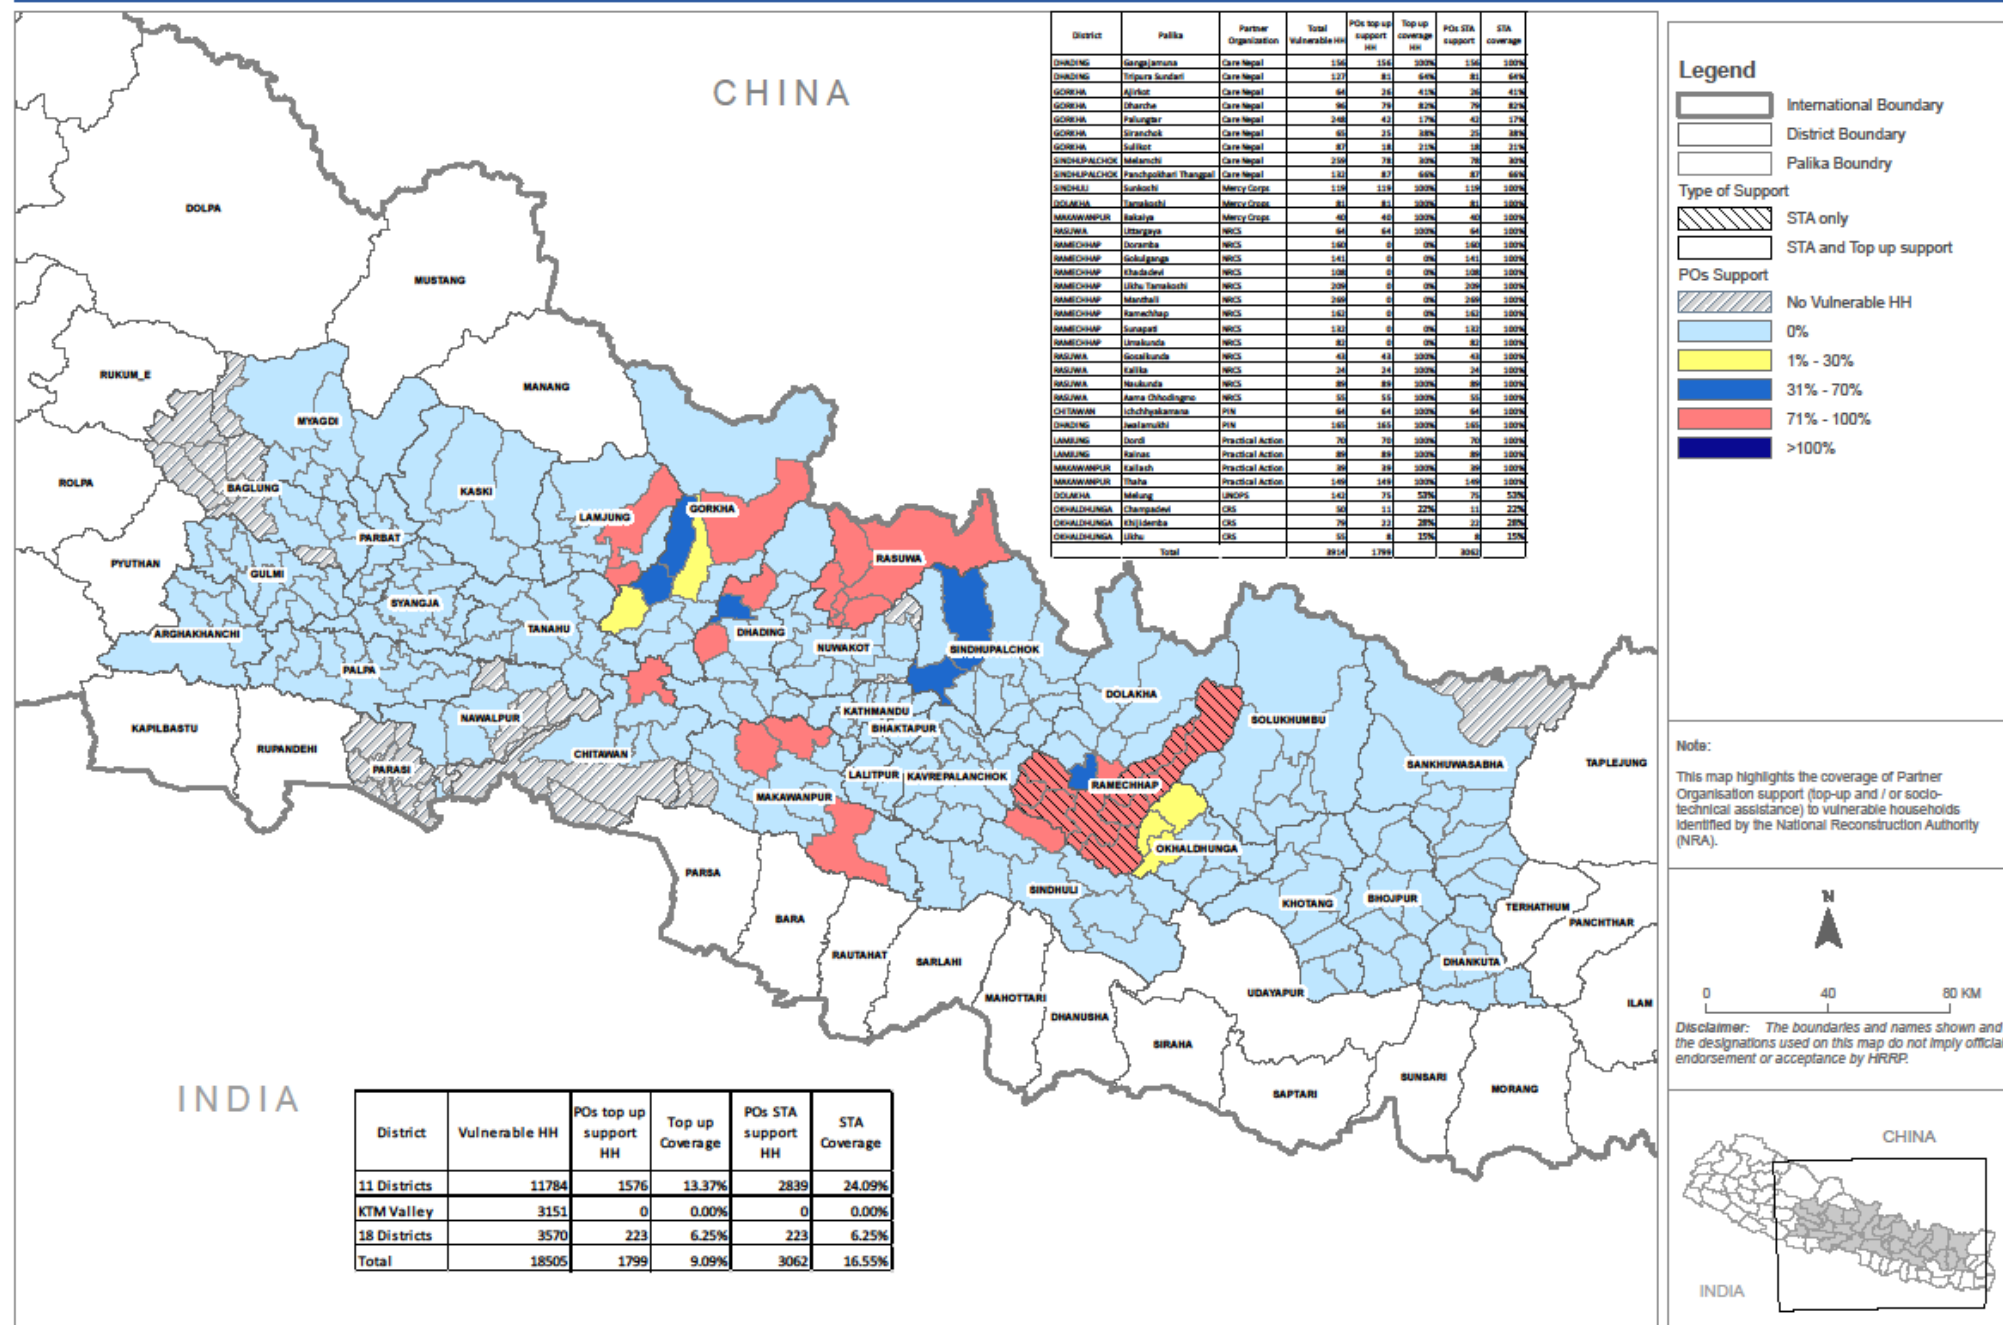

Marin Rural municipality, Sindhuli

- Both are disabled
- Living in the earthquake affected house
- PA signed and already spent the 1st tranche
- Not able to start reconstruction
- Not in NRA vulnerable List

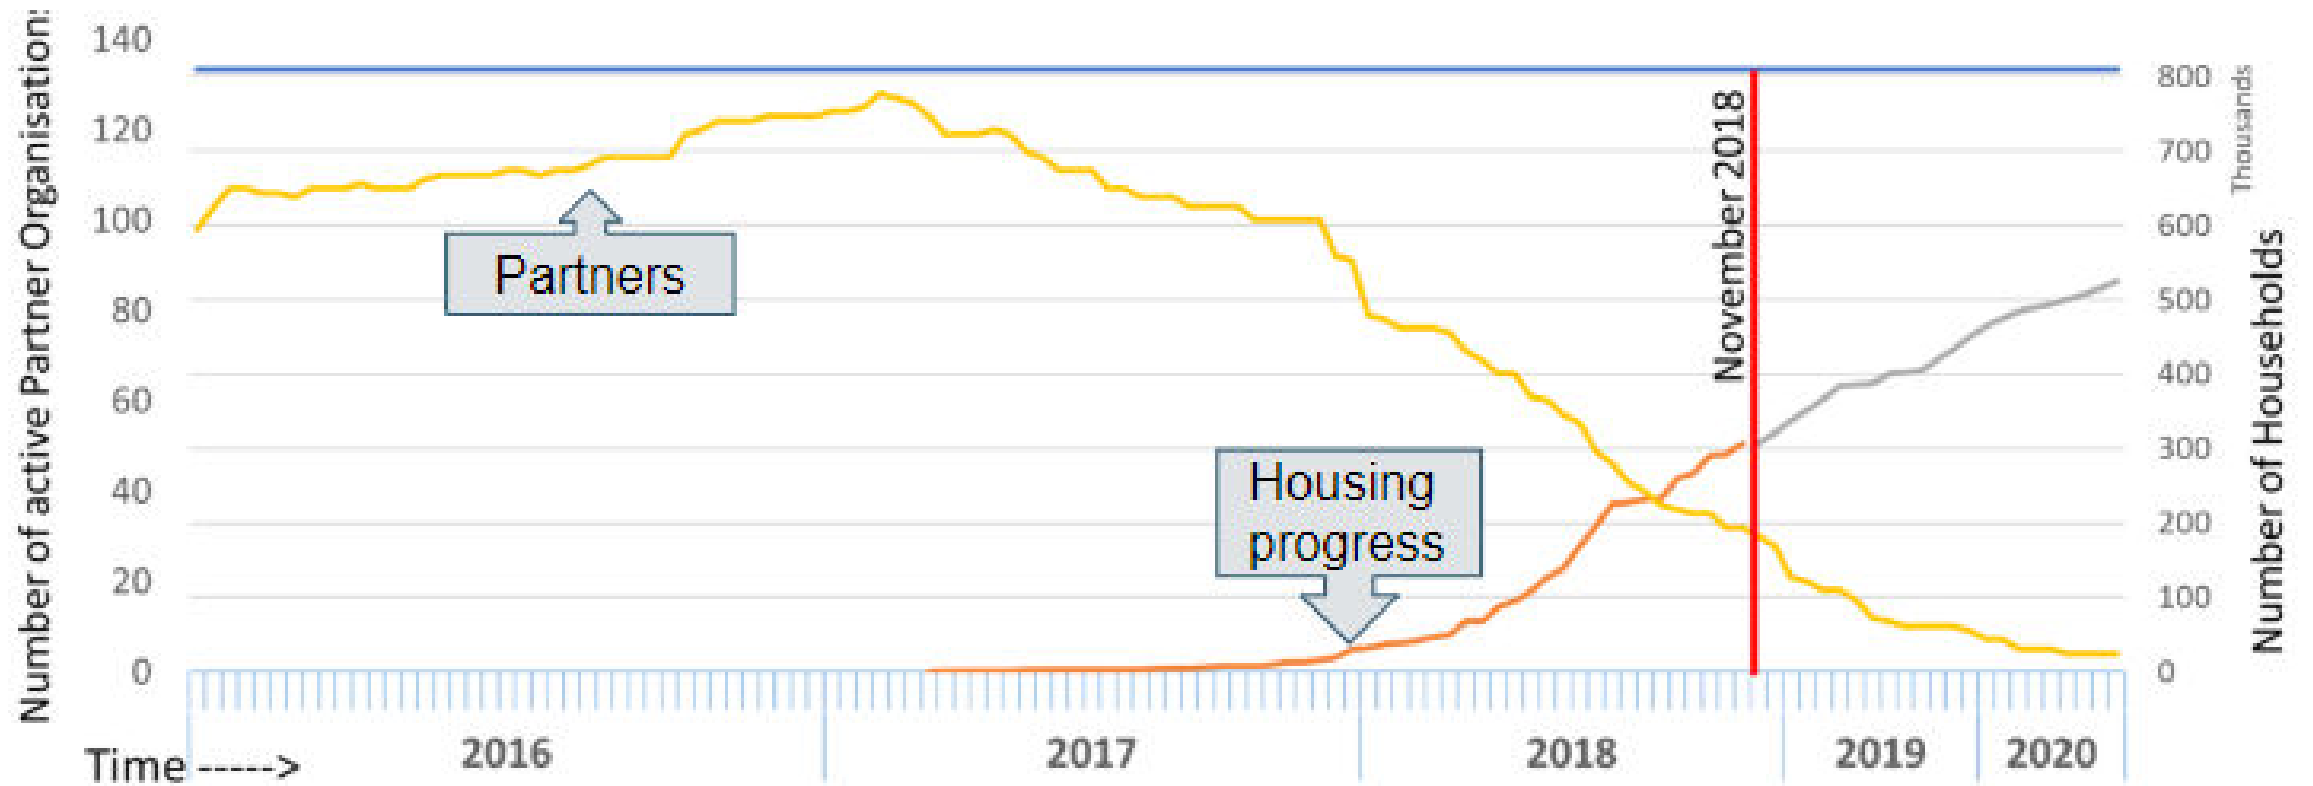

Challenges

- Insufficient evidence and data
- Require a resource intensive approach
- NRA vulnerable criteria a good entry point but not comprehensive
- Lack of enabling environment for local government
- Cash alone is not a solution
- Difficult HH access to affordable credit
- Slow release of tranches and handling of grievances
- Insufficient funding to meet the needs

PO Presence Over Time

Lesson Learned

- **“Private sector”** approach
- **Community Wide Approach**
- **Close Collaboration with local level government**
- **Cash only** is not the solution
- Masons, local contractors, suppliers of materials
- Use of socio economic data at the start of the process
- **Revolving fund (HRRP)**

Cost comparison – 2 room house in different locations

By CRS, People in Need, HRRP and Build up Nepal

House specifications:

Carpet area: 180 sq ft

Plinth area: (incl verandah): 415 sq ft

Foundation: Stone masonry in mud mortar

Flooring: Compressed mud floor

Roof: CGI sheet on wooden or metal truss

Doors & windows: Local wood

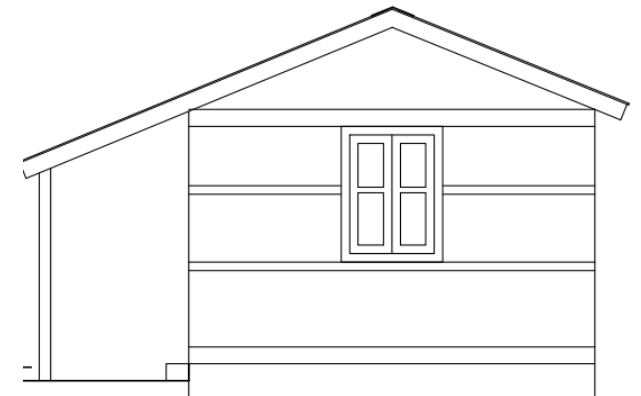

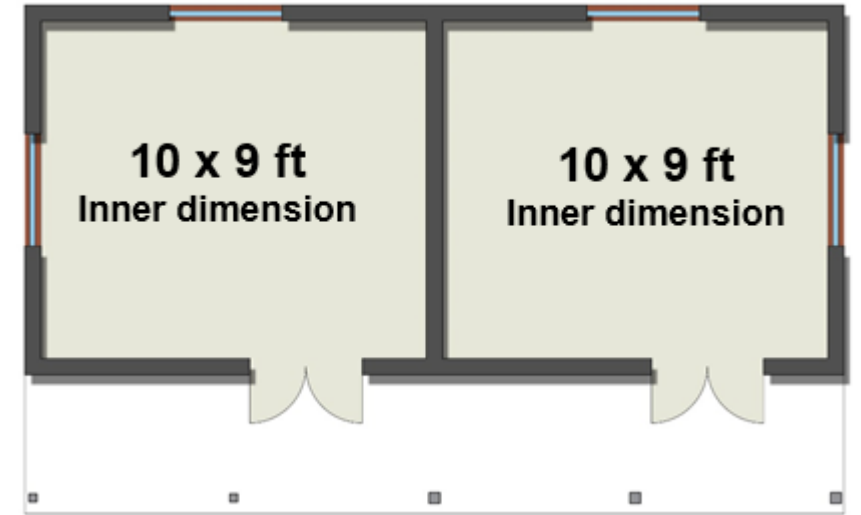

4 locations

Ichhakamana, Chitwan: On the highway

Jyamrung, Dhading: 30 km (2,5 hours) on dirt road

Dhule, Okhaldhunga: 65 km on dirt road + 4 hours walk

Chum Valley, Gorkha:

6 house typologies

Stone masonry in mud mortar
(Wooden bands)

Stone masonry in mud mortar
(RCC bands)

Interlocking brick (CSEB)

Fired bricks

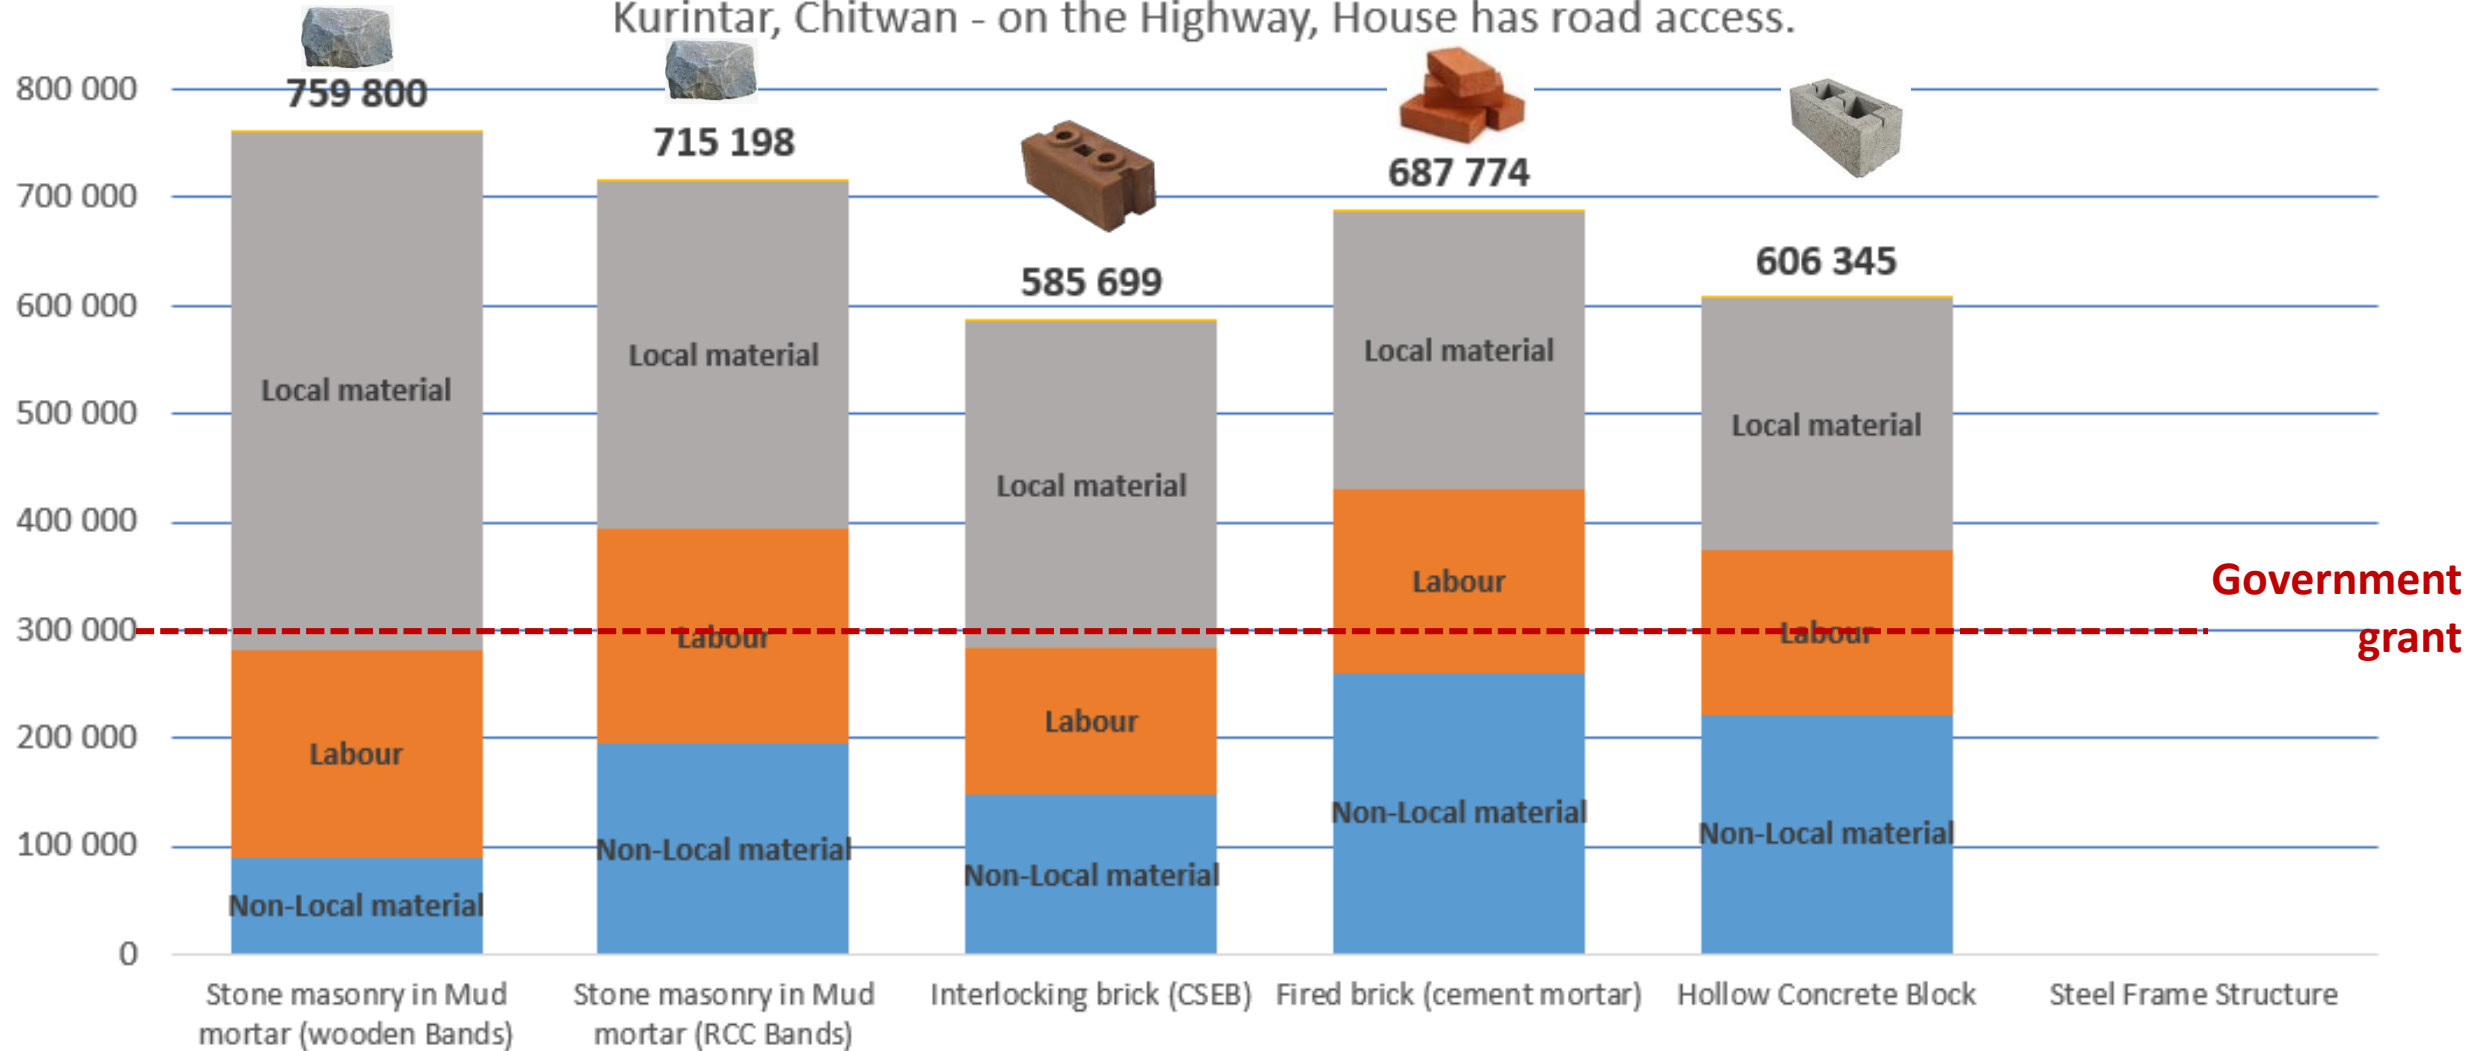

Hollow concrete blocks

Steel frame structure

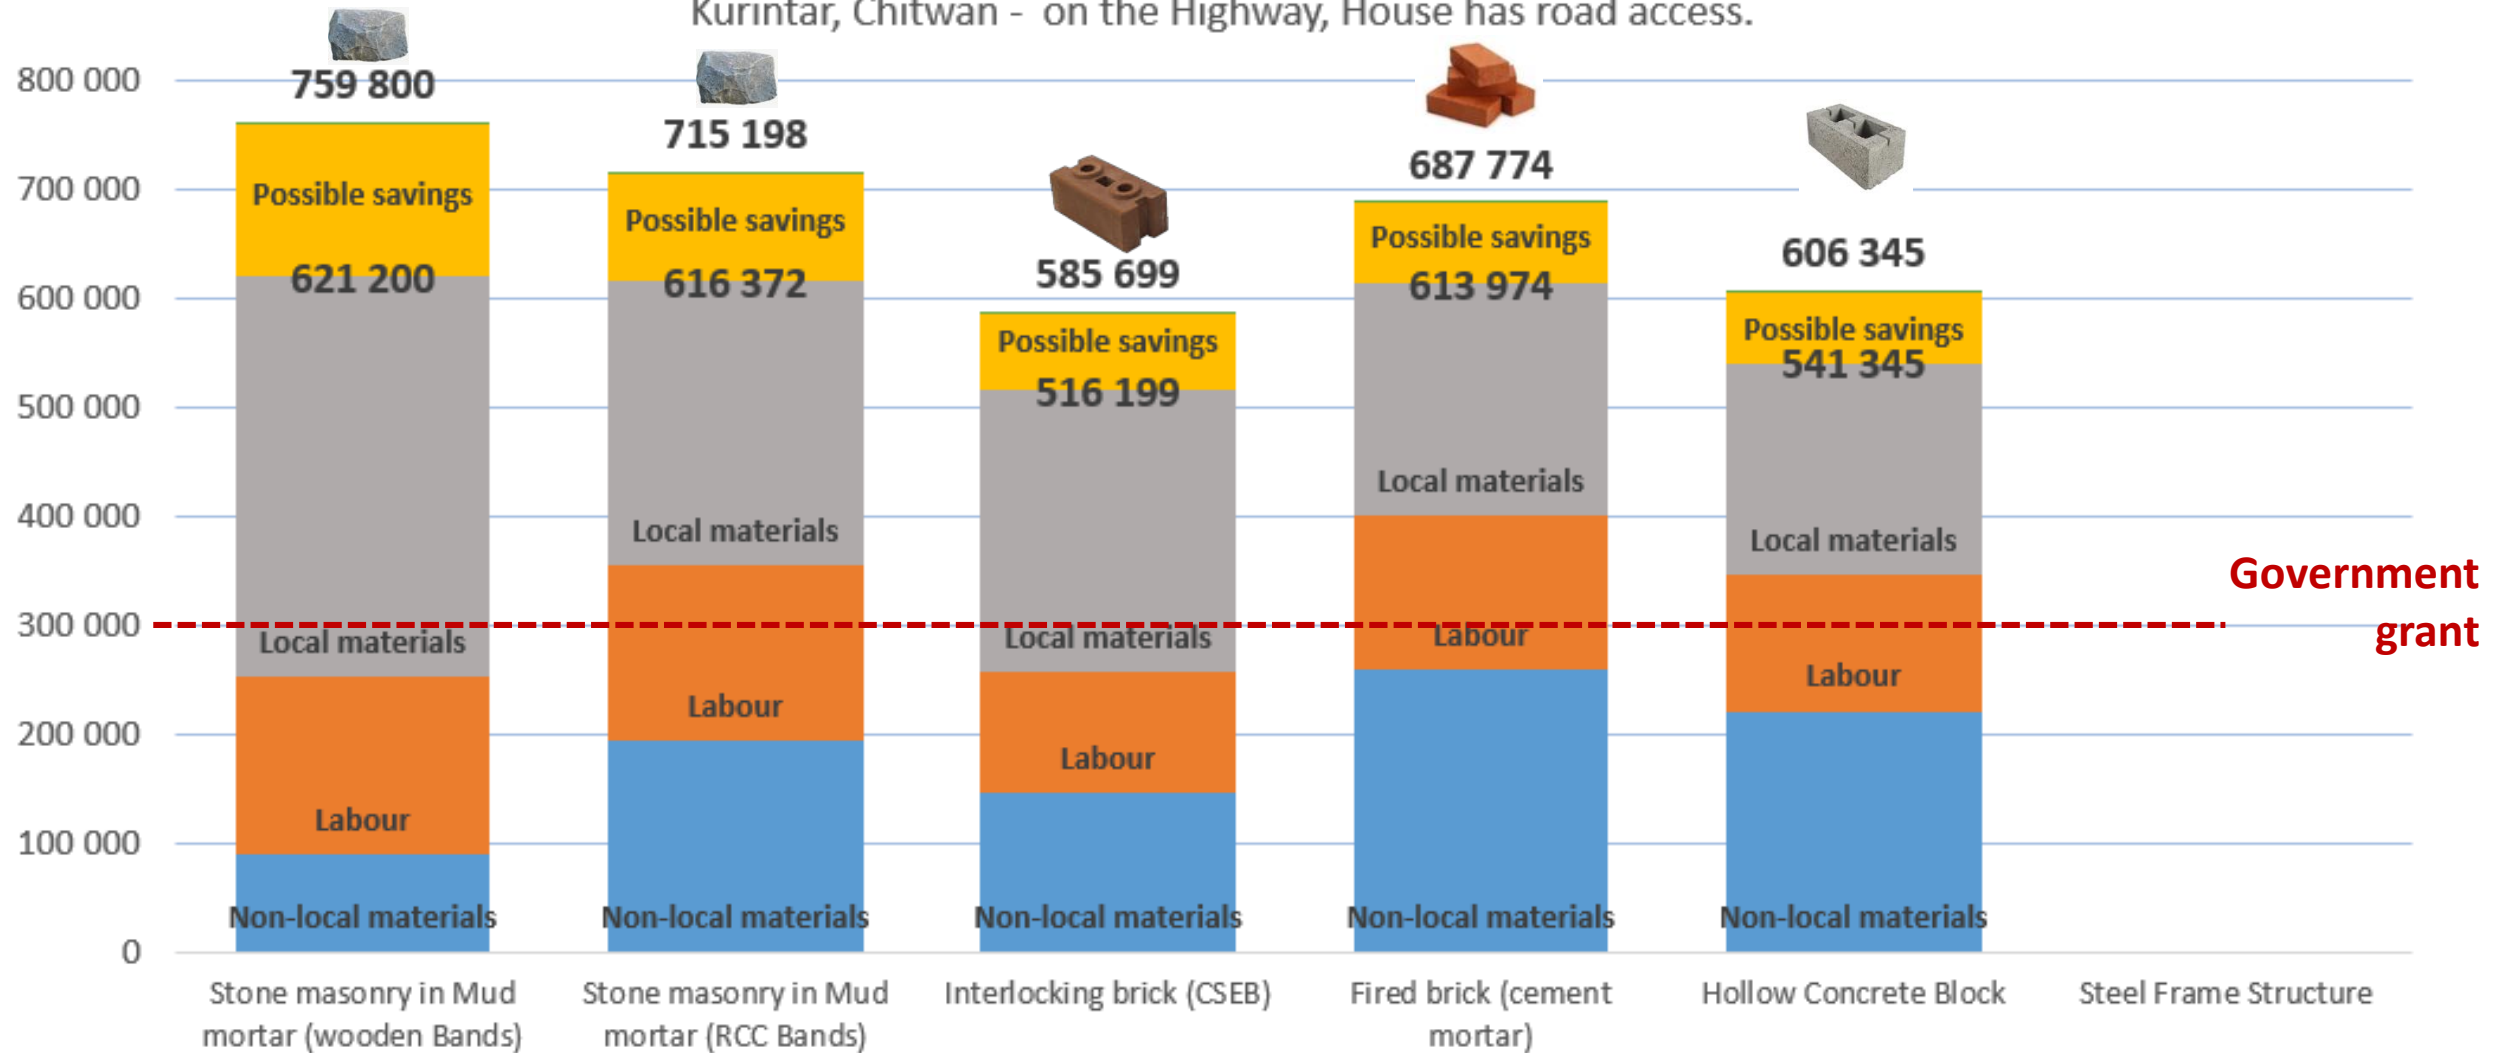

Cost comparison 2-room house

Kurintar, Chitwan - on the Highway, House has road access.

Cost comparison 2-room house

Kurintar, Chitwan - on the Highway, House has road access.

Key messages

- Transportation and distance from market center is biggest factor in house cost variation
- The cost can be significantly reduced with the use of local material
- Cost comparison tool for Local government and engineers to provide context wise affordable solution to vulnerable HHs would be beneficial
- It is difficult to build a house within 3.50 lakhs
- May require other type of support for the vulnerable e.g. timber from local government through community forest, roof or timber is the largest pie
- Assume it is difficult for vulnerable HHs to contribution more than 25% of the house cost
- No single typologies is suitable for all areas

Emerging recommendations (I)

Target	Key messages	Action points
NRA/ Donors	Enhanced NRA leadership and ownership to support most vulnerable HH	• Seek guidance from NRA on next phase of support for the vulnerable • (e.g. commitment of resources, revision of current operational framework drawing learnings from existing models (socio technical offer, beyond cash only)
NRA / Local Gov/ DPs/ POs	Improve quality of data and info. on those not able to rebuild	• Joint effort to better understand why people are unable to rebuild (building on HRRP pilot in collaboration with Local Gov and GMALI) • HRRP to coordinate on data on households, approaches, cost and typologies to better inform policy dialogue
		• Monitor Reconstruction progress for the most vulnerable using disaggregated data.

Emerging recommendations (II)

Target	Key messages	Action points
NRA / Local Govt.	Engage local government in delivering support for the most vulnerable	• Clarify roles and responsibilities of local government in supporting vulnerable post MOU signing
		• How to work with GPs/municipalities on addressing needs of vulnerables (although the NRA vulnerability list a good entry point, municipalities have identified those outside of the criteria who are also vulnerable)
		• Enhanced communication on vulnerability with all stakeholders via orientations • NRA vulnerability package once its formalized, good practice sharing from partner experiences, revolving funds; and ways of expediting reconstruction grant process for the vulnerable

Emerging recommendations (III)

Target	Key message	Action points
NRA /Local Govt.	Engage local government in delivering support for the most vulnerable	• Platform/point for engaging with local government • The MOU refers to Municipal reconstruction committees • Could this be used as an engagement platform? Or best use of other existing forums such as NARMIN, MUAN, GMALI, DDC, CLPIU etc to engage with municipalities
		• Donors currently coordinating to respond to NRA ask on supporting decentralization
		• Use of local government resources – suggestion to take forward conversation in the steering committee on formalizing use of current local government resources for vulnerability related issues

Emerging recommendations (IV)

Target	Key message	Action points
Local Govt/ NRA	Promotion of affordable house solutions	• Use the comparative study on cost and typologies of houses to promote low cost housing options for the vulnerable • Recognizing that rolling out of this would require a disemination strategy and handholding support in design and typology approval
NRA / Local Govt	Fast track reconstruction processes for the vulnerable, blanket approach does not work	• NRA/Local government resource commitment for Technical HR
		• Set up a tracking tranche disbursement app
		• Quicker disbursement of tranches-Coordination between GMALI, Local Gov and District Treasury Office

Emerging recommendations (V)

Target	Key message	Action points
NRA	Formalize taking forward of recommendations	• Follow up on the above recommendations where agreeable by NRA; • Requires dedicated resources/point person at the NRA; co-chairing of vulnerability group; monthly meetings?
