Highlights

- Transition from HRRP 4W to NRA 5W – HRRP 4W phased out as of 30 June. POs requested to report to NRA 5W (on 25th of every month). Please contact Uttam Paudel, im.manager@hrrpnepal.org, if you have any questions or need support.
 - [HRRP Housing Reconstruction Progress Maps](#), based on MoUD CLPIU inspection data as of 22 June
 - [Durable Solutions Information Session, 13 June](#): out of the 3,168 households already eligible for the GoN relocation grant of up to 200,000 NPRs, 749 households have already relocated. For further information, please contact Lama Sundup Dorje, sundup.lama@peopleinneed.cz.
 - Presentations from first 2020 Partner Sharing Session, 14 June available on the [HRRP website](#). Next 2020 Partner Sharing Session taking place on 13 July. Partners are requested to contact Ruplal Aidi, HRRP National Coordination Officer, nco2@hrrpnepal.org, by COB Friday 29 June to indicate their interest to present and what the proposed topic of the presentation is.
-

UPDATES & REQUESTS

National

[NRA, GMALI CLPIU, and Building CLPIU Grant Disbursement Data, as of 24 June:](#)

	27 May	10 June	24 June
Total No. Eligible HHs	767,710	775,149	781,733
HHs Enrolled	718,325	718,986	720,482
HHs Received 1st Tranche	709,031	710,329	711,988
HHs Applied for 2nd Tranche	430,885	449,802	463,780
HHs Received 2nd Tranche	385,449	406,546	421,341
HHs Applied for 3rd Tranche	163,837	189,408	210,931
HHs Received 3rd Tranche	127,734	138,324	169,526

Housing reconstruction progress based on MoFALD CLPIU enrolment data from July 2016 to 24 June 2018.

Transition from HRRP 4W to NRA 5W: the HRRP 4W has been collecting data on activities being implemented by Partner Organisations (POs) in support of housing reconstruction. HRRP has been supporting NRA with the setup and roll out of the 5W data collection system. With the 5W now up and running for many months, it has been decided that the HRRP will phase out the 4W as of 30 June (i.e. end of this week). Reporting to the 5W is monthly, on the 25 of each month and POs are requested to submit their reports on 25 July. The HRRP IM team remain available to provide support on any issues related to progress reporting. Please contact Uttam Paudel, im.manager@hrrpnepal.org, if you have any questions or need support. There will also be a series of orientations, at district and national level, on this transition in the coming weeks.

Durable Solutions Information Session, 13 June: many thanks to the team from Durable Solutions for delivering this information session and providing an update on the current status of displacement as a result of geo-hazard risk. It was very encouraging to hear that out of the 3,168 households already identified as eligible for the GoN relocation grant of up to 200,000 NPRs, 749 households have already relocated. For further information, please contact Lama Sundup Dorje, sundup.lama@peopleinneed.cz.

2020 Partner Sharing Session, 14 June: many thanks to Caritas Nepal, INF, ASF Nepal, Durable Solutions, Helvetas, Build Up Nepal, Medair, and CRS Nepal for presenting during the first 2020 Partner Sharing Session on 14 June. The presentations are available on the HRRP website [here](#) and videos from the event are on the [HRRP Facebook page](#).

Risk2Resilience Conference, 18-21 June: this international conference was organised by the Ministry of Home Affairs (MOHA), National Reconstruction Authority (NRA), Nepal Academy of Science and Technology (NAST) and National Society for Earthquake Technology - Nepal (NSET) and brought together experts from Nepal and internationally to share experiences and discuss ways forward for the reconstruction and DRR in Nepal. The R2R conference concluded with the approval of the Conference Resolution endorsed by Conference participants incorporating their final comments and suggestions.

NRA Technical Committee Meeting, 22 June: the meeting was held at NRA and chaired by Dr. Hari Ram Parajuli. Representatives from MOUD, HRRP, Building CLPIU, GMALI, DUDBC, NRA, IoE, NSET, JICA, and Build Up Nepal attended the meeting. During the meeting Build Up Nepal presented the Compressed Stabilised Earth Blocks (CSEB) guideline and this was then discussed. All members agreed to form a working group to finalise the CSEB guideline. Similarly, the two day training schedule on Light timber/Steel frame structure Manual was approved.

International Women in Engineering Day 2018, Celebrating Women Engineers of Nepal, 23 June: Nepal Engineers' Association (NEA) hosted an event on 23 June to mark International Women in Engineering Day and celebrate the women engineers of Nepal. The event shared stories from women in engineering in Nepal, including Shanti Malla who was the first Nepali woman to graduate as an engineer.

Districts & Municipalities

UKAID Supported Enterprise Catalyses Reconstruction and Generates Employment, Rasuwa: every shovelful of soil 18-year-old Prem Bahadur Tamang lifts is to help his family. Prem has been working at the new Concrete Stabilised Earth Blocks (CSEB) plant in Kalika Rural Municipality in Rasuwa. It is physically demanding work, but for locals like Prem each earth brick they produce is an opportunity to help rebuild their home area and their own futures after the 2015 Gorkha earthquake. CSEBs are an affordable, sturdy alternative to bricks and do not require firing kilns making it environmentally friendly. An added advantage is that they can be manufactured locally in most places with local materials, which reduces transportation costs and provides employment to the local population. Demand for these new bricks is high, and Prem has been making up to 100 bricks a day. He earns 10,000 – 15,000 NPRs (100-150 USD) a month depending on the demand for blocks. This helps him support his parents and pay tuition fees for his younger brother. The family is even putting aside savings so that they can also rebuild and move out of their tin shelter. “I’ll build it with blocks that I have made,” says Prem. The UKAid funded reconstruction project implemented by Practical Action is promoting the use of CSEB by facilitating establishment of local enterprises. This will provide alternative construction materials at an affordable rate to the locals as well as create employment opportunities. The project has already established 22 CSEB enterprises in its pilot districts of Rasuwa and Nuwakot and has established 16 more in Sindhupalchowk, Dhading, and Gorkha, replicating the successful model of the pilot districts. More than 300 houses have benefitted from the project supported CSEB enterprises in the five districts to date and more than 350 people have been employed through the local enterprises.

Prem at work in the CSEB plant in Kalika Rural Municipality, Rasuwa.

HRRP District and Municipal Coordination Meetings, 11 – 25 June: during this period district coordination meetings took place in Lalitpur (13 June), Kathmandu (14 June), Lalitpur (17 June) Sindhupalchok (12 June) and Gorkha (21 June). Municipal level meetings took place in Mahankal Rural Municipality, Kathmandu (14 June) and Gangajamuna Rural Municipality, Dhading (22 June). Some of the highlights from these meetings include:

- In **Lalitpur**, the meeting was with the DLPIU Engineers and it was agreed that engineers deployed at municipalities should properly inform households about the procedures involved in forwarding the file from inspection to grant approval. DLPIU Engineers working in municipalities should verify with the households regarding all relevant and required documents (copies of citizenship photo, PA document, pictures of houses and signatures) to be included while forwarding to DLPIU for further checking. Regarding the cases of houses with truss, if the houses have met all important minimum requirements from plinth level works then such houses are eligible to receive 2nd tranche, while those houses that have used heavy material (stones, bricks etc.) at sill level to connect the roof then 2nd tranche of such houses cannot be passed. If the houses under construction are not as per the building design then it should be clearly mentioned in the file being forwarded to DLPIU. If unavailability of any engineer is known strict action will be taken by DLPIU. All engineers must verify their attendance from the ward chief. The CS entry must be done immediately.
- In **Kathmandu**, the meeting mainly was targeted to the technical staffs deployed in Kathmandu district. As part of the technical aspects in the ongoing reconstruction, updates from all Municipalities and Metropolitan city including the tranche distribution, progress in the inspections, issues and challenges were discussed in detail.
- In **Lalitpur**, the meeting focused mainly on monthly sharing of POs activities. Issues on reconstruction and coordination need for its solution was also discussed. Some of the key decision of the meeting were the differences in the PA number will be further verified by providing three generation lists of the beneficiaries to NRA and this meeting gave continuation of former NRA Lalitpur's generation coordination meeting which will be organized once every 3rd date of Nepali month.
- In **Sindhupalchok**, some of the issues discussed during the meeting were that some of the displaced households have already bought the land by themselves instead of waiting for the additional government grants. The current policy however does not cover them. In Nawalpur, Bhedichaur and Mule of Indrawati Rural Municipality, the relocation is currently on progress, however, the displaced people are facing real challenge due to the water shortage. They are compelled to construct their houses by carrying water by themselves from far distance. They have been in touch with the elected representatives from their previous wards as well as their new wards but they haven't received any support. In Listikot, Gumbadada, the tranche has been approved to the households living in the geologically unfeasible and unsafe region. The individuals have provided written application to the government authorities stating they would not relocate. In Thanpalkot, A single beneficiary's name was documented in two wards. Similarly, some individuals reentered into agreement through grievances even though they had already done PA. NRCS are facing delay from the banks in disbursing the funds. The funds have not been disbursed by the Sindhu Bikash Bank, Melamchi even after 2 months have passed since the funds has been deposited in the bank by NRCS. In order to facilitate the distribution, NRCS has been providing staff support to the banks. Some decisions made in the meeting were that HRRP General coordination meeting will be held every second Friday of each month for regular coordination amongst partner organizations and the reconstruction rate is significant in the district and most of the households have received the second tranche. So, it was highlighted by DSE that the field inspection should be made more frequent by the concerned authorities to curb non-compliance.
- In **Gorkha**, the meeting focused on extending the support to vulnerable households identified by NRA beyond the existing support of partner organizations in the district. Partner organizations shared their modality to support the vulnerable households. HRRP will coordinate among the POs and support the POs in identifying the gaps and avoid duplication while supporting the vulnerable households. Further, discussion was conducted on monsoon preparedness and contingency plan of the POs in Gorkha district in view of the upcoming monsoon. Gorkha as one of the landside and flood prone districts, preliminary

information was taken from all the POs of their contingency plan, available Food and Non- Food Items and any other emergency response support. A decision also has been made to submit monthly progress reports by the partner organizations every first week of the month. Partner organizations have also been given a platform to share their experiences during the coordination meeting.

- In **Mahankal RM, Lalitpur**, some of the concerns raised during the meeting were inadequate presence of concerned Engineers based at Ward office in the grievances collection works as well as in technical assistance. Beneficiaries have faced delay in grant disbursement despite recurrent trips to concerned banking institutions. There was no response of grievances forwarded to DLPIU Building from concerned Ward office. Due to mistakes done by engineers deployed in the area in the field, wrong entry was done due to which one beneficiary received 3rd tranche instead of 1st tranche. Field presence, efficiency and accountability of engineers based at ward office were in question and doubts from the local representatives. Reconstruction issues raised from the public hearing programs were- cases of multiple beneficiaries, non-compliance houses that were built without following minimum requirements and delays in grant disbursement. Houses that were reconstructed sometime after earthquake and before endorsements of building code were flagged non- compliances by the engineers during inspection.
- In **Gangajamuna RM, Dhading**, the meeting focused on identification of Build Back Better opportunities (Infrastructure), Discloser of Environment and social screening report findings, Identification of Environmental and Social Issues due to reconstruction related activities to be addressed from ESMP, Identification of Geologically Vulnerable Sites, Identification of Income Generating Activities required on settlement level. In regard to vulnerable group list, Palika representatives assured to identify and verify the list in close coordination with Ward representatives before submitting to GMaLI or HRRP. Further issues discussed was uneven distribution of Engineers in Palika, for which engineers were suggested to first focus on areas with low reconstruction rate in coordination with ward representatives. Registration of grievance was one the main challenges in the current reconstruction process and Palika representatives assured that real earthquake affected households will not be left behind while strictly prohibiting the non-eligible ones. Palika has the record of beneficiaries and has kept a good tracking system.

HRRP District Coordination Team Gorkha, Weekly District Report, 8 – 21 June 2018

Ward No. 6, Dharche Rural Municipality, Gorkha: a two-room, RCC frame house under construction. The home owner has been relocated from Kerauja to Lamabesi and has received land owner certificate. The owner has only received first tranche of Government housing reconstruction grant.

HRRP District Coordination Team Kathmandu, Weekly District Report, 8 – 21 June 2018

Ward No. 9, Dakshinkali Municipality, Kathmandu: a two storey, hybrid structure. The ground floor is stone and mud mortar masonry, while the top floor is of CGI sheets with timber partitions. Double frames have been used in windows and door. The wall is 18 inches with use of timber bands and flexible roof bracings. The owner has received the second tranche of the GoN housing reconstruction grant and has been approved for the third tranche.

HRRP District Coordination Team Nuwakot, Weekly District Report, 8 – 21 June 2018

Ward No. 3, Tadi Rural Municipality, Nuwakot: a two storey, two-room house with an attic, constructed in stone and mud mortar masonry with concrete bands. The owner has received second tranche of Government housing reconstruction grant and has been approved for the third tranche.

Requests for Partner Support

The Settlements Approach and Urban Response, IMPACT Initiatives and Shelter Centre, in collaboration with the Global Shelter Cluster's Urban Settlements Working Group, 6 July: the event, made possible with the support of USAID/OFDA and DG-ECHO, will provide a space for sharing experiences, perspectives, research and initiatives, framed around several overarching questions:

- How do Settlement and Area Based Approaches differ in urban and rural settings?
- How can Settlement and Area Based Approaches offer a practical means of facilitating the "humanitarian-development nexus"?
- What is the relationship between these approaches and traditional humanitarian sectoral interventions? Are these approaches complementary?
- Building on a growing evidence-base, what is the way forward with these approaches?

Complementing discussions and working groups, an 'open-mic' session will provide participants an opportunity to share good practice, priorities and new initiatives in-person and through live video-conference from around the world. Access the event flyer [here](#), for more information and an indicative agenda. To register for the event, please click [here](#). The event is taking place in Geneva but those unable to attend in-person can connect remotely. Don't forget to register!

Update ALNAP lesson paper, 'Responding to earthquakes 2008 Learning from earthquake relief and recovery operations': the lessons paper methodology will provide rigorous review of what has been learned from the earthquake response over the past 10 years across sectors, organisations and modalities. Please email Joris Jourdain, joris@keyaidconsulting.com, to share any relevant documentation (published or not) that may support this piece of research.

Hollow Concrete Block Technical Working Group: during the meeting of the NRA technical committee on Thursday 7 June, the committee members endorsed the [HRRP report on production and use of Hollow Concrete Blocks \(HCBs\)](#), including the next steps. The HRRP technical coordination team are now planning to launch a technical working group to support with the development of guidelines for HCB producers, inspection checklists and minimum requirements for HCB construction, and options for corrections for non-compliant HCB construction. Those interested to participate are requested to contact Kuber Bogati National Technical Coordination Officer, techofficer1.national@hrrpnepal.org, by Wednesday 27 June.

Call for Presentations for next '2020 Partner Sharing Session', 13 July: many thanks to the partners that presented at the first of these sessions on 14 June (see 'National Updates' section above). The '2020 Partner Sharing Sessions' will take place monthly, on the second Friday of each month. As with the first session, there will be 10 spaces for presentations. Partners interested to present are requested to write to Ruplal Aidi, HRRP National Coordination Officer, nco2@hrrpnepal.org, by COB Friday 29 June to indicate their interest to present and what the proposed topic of the presentation is. N.B. this session will use the 'Pecha Kucha', 20 X 20 style of presentation. Each presentation will have 20 slides with 20 seconds allowed per slide, totaling 6 minutes and 40 seconds. The presentation is automated and therefore no additional time is possible.

Mason Training ToTs for Inspection Engineers: Building CLPIU are seeking support from POs for implementation of 25 mason training ToTs for newly hired inspection engineers across the 32 districts. Many thanks to the POs that have already committed support – CRS (in Okhaldhunga), NSET (Rasuwa, Dhading, Dolakha, Nuwakot – already completed), and JICA (Gorkha and Sindhupalchok – already completed). The estimated cost per training is 500,000 NPRs, however there are ways in which this can be potentially reduced, including HRRP providing trainers if required. POs that are interested to support are requested to contact Kuber Bogati, HRRP National Technical Coordination Officer, techofficer1.national@hrrpnepal.org, by Wednesday 27 June at the latest.

[e-Shelter in Urban Emergencies Training Course, RedR UK, 2 July – 10 August](#): this course is a 40 day online course that has been developed with the support and guidance of experienced Shelter practitioners from leading humanitarian agencies. It will help Shelter humanitarians with limited experience of working in an urban context to explore and develop the necessary skills and knowledge to work effectively in the early stages of an urban emergency. The target audience for this course are Shelter humanitarians, with practical experience in the field. Participants should have an interest in working in an urban emergency response and have some experience in the humanitarian and/or development sector. This course presupposes a working knowledge of basic humanitarian principles.

'What's Missing? Adding Context to the Urban Toolbox', ALNAP: pleased to share the [recording](#) and [transcript](#) of ALNAP's most recent webinar on this topic, which highlighted key messages from ALNAP's recent [research report](#). Three videos are also available to introduce some ideas from the research:

- [Video 1](#) answers two questions: What is context? And why is it important to understand? It is a great first step for anyone not quite sure what this topic is all about.
- [Video 2](#) highlights some of the tools explored in the research and is a great companion to the [annex document](#).
- [Video 3](#) sheds light on the range of different topics covered in the research – from who should carry out analysis of context, to ensuring uptake once tools have been used.

ALNAP is now finalising three 'bite size' documents to make this research even more accessible and relevant to different audiences and these will be shared through the ALNAP Urban Community of Practice (CoP) once available. If you wish to join ALNAP's Urban CoP please contact Leah Campbell, l.campbell@alnap.org.

[Milijuli Nepali, BBC Media Action, Episode 980:](#) in this episode the presenters visit Rasnalu village in Ramechhap and talk to some residents. Octogenarian, Tika Maya Sunuwar, talks about the damages done by the earthquake. She compares the damages in Ramechhap with the situation in Sindhupalchok. And she talks about how the earthquake has also provided the people an opportunity to build safe homes and to consider safety as important and the discusses the new techniques being used. The presenters also interact with other residents who are building their houses to meet the building code. They also meet families who are participating in building their homes together, and a returnee migrant shares information on how to improve the village.

[mVAM Food Security Monitoring Survey, Bulletin No. 3, April 2018:](#) this bulletin shares results of the NeKSAP food security monitoring survey conducted in 8 mountain districts in Province 6 (Karnali) (Humla, Mugu, Jumla, Dolpa, Kalikot, Bajura, Bajhang and Darchula). The survey was conducted based on a panel sample of 300 households in these districts via telephone calls. The panel was established during a face-to-face baseline survey in 2016, in which the phone numbers of households and traders were collected.

[First Advance Estimate of 2017/18 Wheat Production in Nepal using the CCAFS Regional Agricultural Forecasting Toolbox \(CRAFT\):](#) this is a joint product of the Ministry of Agricultural Development (MoAD), World Food Programme (WFP), and the CGIAR Research Program on Climate Change, Agriculture and Food Security (CCAFS). The CCAFS Regional Agriculture Forecasting Toolbox (CRAFT) is being piloted as part of the Nepal Food Security Monitoring System (NeKSAP) and is a new initiative to incorporate crop yield forecasting in Nepal with technical support from CCAFS South Asia. This report relies on information provided through different agencies, including the Department of Hydrology and Meteorology (DHM), Nepal Agriculture Research Council (NARC), Department of Agriculture, MoAD, WFP, International Centre for Integrated Mountain Development (ICIMOD), International Water Management Institute (IWMI), and International Research Institute for Climate and Society at Columbia University.
