NDRRMA has introduced eight units of mass casualty evacuation ambulances (equivalent to mini hospital) on 23 July; Honorable Minister Mr. Bal Krishna Khand, Ministry of Home Affairs has handed over various search and rescue equipment including these ambulances to Chief, Mr. Raju Aryal of Armed Police Force Nepal. These ambulances will be used under the management of the Armed Police Force during disaster emergencies in providing critical life support systems. Treatment can be done by keeping up to 10 disaster affected people in a minibus size ambulance with modern technology, backed up by doctors. These mass casualty evacuation ambulances are the state-of-art ambulances that are going to be used for the first time in Nepal for disaster mass rescue.

KEY HIGHLIGHTS

- i) MoHA Minister Khand handed over Mass Casualty Evacuation Ambulances to Armed Police Force Nepal for its wide usage during disasters of various scales
- ii) National Disaster Resilient Framework 2022-2030 is being formulated, interaction program held to consolidate feedbacks
- iii) Forest Fire Management Strategy 2067 BS (2010) is being amended interaction program held to incorporate inputs
- iv) Consultation workshop on vulnerability, exposure assessment and its visualization for disaster risk assessment has stressed for multi-stakeholders' collaboration
- v) Nepal joins UN-Habitat and European Commission initiative on applying global definition of urban areas
- vi) Parliamentary Committee has instructed for revising MoUD's Building Guidance
- vii) MoUD Minister and World Bank Nepal officials discussed to ensure GRID agenda adopted by Government in its programmes
- viii) Government of India has provided disaster relief materials to MoHA, Government of Nepal

NATIONAL UPDATES

Minister Khand handed over Mass Casualty Evacuation Ambulances to Armed Police Force Nepal for its wide usage during disasters of various scales

On 23 July 2022, Minister, Mr. Bal Krishna Khand, Ministry of Home Affairs (MoHA), handed over to the Armed Police Force (APF) of Nepal. Under the management of National Disaster Risk Reduction and Management Authority (NDRRMA), these eight units of mass casualty evacuation

ambulance, equivalent to mobile hospital, along with 62 numbers of different types of search and rescue equipment were further handed to Armed Police Force Nepal by Minister Khand. Similarly, disability assistive equipment and devices were also handed over to National Disable Fund (NDF) by Minister Khand. These mass casualty evacuation vehicles, search and rescue materials along with disability assistive devices and equipment were supported through Multi -Donor Trust Fund (MDTF)- World Bank Project.

Each mass casualty ambulance has six beds for patients, critical care facilities such as advanced life support devices, portable ventilator, patient monitor, syringe pump, infusion pump, defibrillator, oxygen concentrator, ECG Machine, ultrasound machine and other infectious control instruments. The vehicle is also equipped with CCTV cameras and can be monitored centrally. This kind of fully equipped mass casualty vehicle is first of its kind in Nepal and is largely seen as a great help in treatment of the patient on site and mass transfer of patients from disaster site to nearby tertiary hospital. The injured affected by disasters like flood, landslide, earthquake can be treated in vehicles. All types of equipment (critical care facilities) in an ambulance including treatment beds, ventilator, ultrasound machine have been installed in the ambulance. Since CCTV cameras are installed in these ambulances, even distant doctors can guide in treatment. Ambulance can also be used as a mobile hospital. Ambulances will be distributed in seven provinces, and one will remain in Kathmandu valley which will be operated through Armed Police Force Nepal. Access detail news: [Mass Casualty Vehicles handover to Armed Police Force](#)

National Disaster Resilient Framework 2022-2030 is being formulated; interaction program held to consolidate feedbacks

Intensive interaction program to consolidate feedback on National Disaster Resilient Framework 2022-2030 (NDRF) was organized by NDRRMA in Kathmandu, on 15 July 2022. The program was attended by concerned different stakeholders including representatives from government ministries, line departments, representatives of I/NGOs, DRR experts, academia, DRR experts and researchers. Task force committee was formed to deliberately look into NDRF under the leadership of Joint Secretary, Ms. Anita Niroula of NDRRMA who further elaborated on rationale, approach, mission and objectives of formulating NDRF with the participants. NDRRMA has been hosting the BIPAD portal, developed by pooling all credible digital and spatial data on disasters and disaster risks which is gaining popularity among different spheres to enhance existing knowledge about risks of disasters and but also to guide disaster-friendly decision making. Status on Mid-term Review of Nepal

National DRR Strategic Plan of Action 2018 were shared by Under Secretary, Mr. Matrika Acharya of MoHA while key features of Nepal's approach towards Green Resilient and Inclusive Development (GRID) were shared by Under Secretary, Mr. Yugraj Pandey of the Ministry of Finance. Participants raised concerns over knowledge exchange between government ministries and like-minded stakeholders and institutions on DRRM as a crucial instrument for effective risk minimization and adaptation while leadership activities from the local level, backed up by the central level, are important for the success of DRR initiatives.

NDRRMA's National Council Executive Expert Member, Mr. Gangalal Tuladhar shed light on the utmost importance of consolidating inputs on NDRF from all concerned sectors which eventually will add value in raising ownership on it. Chief Executive, Mr. Anil Pokhrel of NDRRMA urged for imperative collaboration among various relevant actors for disaster risk reduction and management. Access detail news: [Interaction program organized to collect feedbacks on NDRF 2022-2030](#)

Forest Fire Management Strategy 2067 (2010) is being amended; interaction program held to incorporate inputs

Regarding amendment of Forest Fire Management Strategy 2067 (2010), NDRRMA has organized an intensive interaction workshop on 12 July 2022 in Kathmandu. In order to collect inputs from local levels, a similar interaction program was organized at Province no 1, Province no. 7 and Province no. 4 where active participation was seen from concerned stakeholders. Chief Executive, Mr. Anil Pokhrel of NDRRMA has stressed for cooperation from local levels and communities in reduction of forest fire. Local communities happen to be the first coverage where fire incidents take place, therefore, voices were raised to sensitize the community's people, particularly those groups of people who visit nearby forest areas for collecting fodder and foliage. Hundreds of hectares of forests are destroyed by forest fires annually. It also has effects on climate, wildlife and human health. Through the amended Strategy, Mr. Pokhrel emphasized for strong roles and responsibility sharing of multi-sectoral stakeholders involvement in prevention and control of forest fires. Access detail news: [Cooperation by local communities in reduction of forest fires](#)

Consultation workshop on Vulnerability, Exposure assessment and its Visualization for Disaster Risk Assessment has stressed for multi-stakeholders' collaboration

The NDRRMA with support from the FCDO/UKAid and through technical support from Youth Innovation Lab (YI-Lab) has completed organizing an interactive consultation workshop on 11 July 2022 in Kathmandu. The workshop particularly targeted to reflect best practices and learnings from the relevant stakeholders and actors working in disaster risk reduction, disaster management, risk assessment, exposure and vulnerability assessment, and similar, on the approaches they have taken so far, their experiences and challenges to standardize exposure and vulnerability assessment, and identify necessary next steps for standardizing the exposure and vulnerability assessment elements to help better understand the disaster and climate risk in Nepal. Aiming to address the issue of standardization of risk, hazard, exposure, and vulnerability assessment that provides a common understanding to all four levels of governance including relevant agencies working in the disaster risk reduction sector; NDRRMA has focused to standardize the process of disaster risk assessment in Nepal whereby initiating series of dialogues with experts and concerned stakeholders.

Presentations on reflecting the overall best practices and ongoing data visualization for exposure and vulnerability assessment interventions as per agency-wise experiences were shared by Ms. Reena Bajracharya, YI-Lab; Ms. Premuka Rai, Asian Disaster Preparedness Center; Mr. Madhab Uprety, Red Cross and Red Crescent Climate Center; Dr. Jagat Basnet, Community Self Reliant Center and by Dr. Surya Narayan Shrestha, NSET. Under Secretary,

Mr. Rajendra Sharma Gautam of NDRRMA through his sharing reflected on the need for multi-hazard Early Warning System and Impact Based Forecasting for DRRM. Chief Executive, Mr. Anil Pokhre of INDRRMA, stressed strengthening the local governments capacity to bring quality to data and developing a task force to develop the standardized guideline for exposure and vulnerability assessment and their visualization to effectively undertake risk reduction and response action. Access workshop report: <https://bit.ly/3S04t4W> and five presentations: <https://bit.ly/3OA1GN7>. For more information contact Ms. Reena Bajracharya, DRR Program Manager, YI-Lab. Email: reena@youthinnovationlab.org

Nepal joins UN-Habitat and European Commission initiative on applying global definition of urban areas

The four-day capacity building event was organized by UN-Habitat Nepal in July 2022, that were delivered in partnership with the Central Bureau of Statistics - GoN and European Commission, has delved around the application of the Degree of Urbanization (DEGURBA) that classifies an area as either urban or rural based on a set of criteria that includes population size and density; this application has wider usage for production of comparable data.

The introductory training was a part of a larger project targeting 13 countries, whose aim is to build the capacity of the national statistical systems and agencies involved in urban development to apply the DEGURBA approach, which was endorsed by the UN Statistical Commission in March 2020.

Member of National Planning Commission – GoN, Dr. Ram Kumar Phuyal emphasized that for policy and decision-making processes, we have to rely on data. European Union Ambassador Ms. Nona Deprez highlighted the need for implementing the New Urban Agenda, “shared vision of an urban future that should be transformative.” Ms. Deprez further stressed that “the European Union is committed to science-based policy for cities based on reliable data and invited the GoN to use introduced urban data tools to lead policy making that will be for the benefit of all people in Nepal”. Country Programme Manager, Ms. Pragya Pradhan of UN-Habitat Nepal highlighted the significance of the project in advancing urban monitoring activities at the global and local levels, and also acknowledged the standing collaboration between UN-Habitat and the GoN in post disaster recovery and reconstruction processes, among others. Access detail news: [Classification of urban and rural based data for advancing urban monitoring activities](#)

Parliamentary committee instructs for revising Building Guidance

The Parliamentary Development and Technology Committee has instructed the Ministry of Urban Development (MoUD)- GoN to amend the “Town Development, Urban Planning and Building-related Basic Guidance-2072 B.S. (2015)” after holding consultations with experts, urban planners and stakeholders. Through an interaction meeting organized in Kathmandu on 19 July 2022, the Committee has directed the MoUD to consider an amendment in the Guidance yet again. The Guidance was introduced in 2072 BS (2015) and it was revised in 2078 BS (2021) lately. The Committee's meeting today concluded that the revision in 2078 BS (2021) had further made the Guidance narrower and stated it was against the government's policy of building green, clean and safe cities ensuring balanced and proportionate development in those cities. The Committee said that such Guidance should be proportional to the geographical conduciveness to mountains, hills and terai so as to protect the people in those geographical places from natural disasters in the long term as well as for the construction of environment-friendly residences and settlements. Minister,

Mr. Metmani Chaudhary of MoUD assured that consultation will be held soon to correct shortcomings in the Guidance in relevant ways.

MoUD Minister and World Bank Nepal officials discussed to ensure GRID agenda adopted by Government in its programmes

World Bank Country Director for Nepal met with Minister, Mr. Metmani Chaudhary of MoUD and discussed the importance of policy reforms and continued collaboration to ensure that Nepal's urbanization process is aligned as per the GRID agenda adopted by the GoN. The World Bank is supporting the GoN to empower local levels and strengthen federalism through Nepal Urban Governance and Infrastructure Project (NUGIP) which finances critical infrastructure, livelihood support through public works & improvement of urban management and service delivery in strategic municipalities. The World Bank also provides technical assistance to federal & urban local governments on waste management, green building codes, climate-resilient infrastructure, local economic development & sustainable urban planning and land use.

Government of India has provided disaster relief materials to MoHA-GoN

The Government of India has provided disaster relief material to the GoN on 15 July 2022. Ambassador of India to Nepal Mr. Naveen Srivastava handed over consignments of flood and disaster-relief material to Minister, Mr. Bal Krishna Khand of MoHA during a ceremony held at the MoHA in Singhadurbar. The relief material includes 3000 tents and ten motor inflatable boats.

During the ceremony, Minister Khand has thanked the Indian government for the relief material and has appreciated ongoing disaster relief-related cooperation between Nepal and India and hoped for continued support from the Indian government in the future as well. Likewise, Ambassador Srivastava expressed that this timely supply of relief material is optimally utilized by concerned agencies to ensure its maximum benefit by timely distribution and efficient utilization, according to a press release issued from the Embassy of India in Kathmandu.

PARTNERS' UPDATES

Global Shelter Week in Geneva from 4 – 8 July 2022

The Global Shelter Cluster (GSC) and Shelter Meeting (Shelter Centre) with the theme “the future of humanitarian shelter & settlements” was held from 4-8 July 2022 at Geneva in Switzerland. National Coordinator, Mr. Minar Thapa Magar of HRRP and Technical Coordinator-Localization, Mr. Rijan Gajurel of HRRP, accompanied by Ms. Radha Verma of UKAid/FCDO from Nepal has participated in the GSC Shelter week. The sessions in GSC Meeting were focused

around reflecting on the role of the shelter and settlements interventions in a fast-changing humanitarian landscape. Part of the discussion was a reflection on the previous GSC strategy and emerging themes for the new strategy being developed. Localization was featured quite strongly as part of the overall vision, and HRRP shared their experiences on localization during open sessions. Climate and environment were another theme identified by the GSC as part of the strategic vision, which created a lot of interest and debate around how this may be translated into action. The Shelter Meeting brought together humanitarian technical practitioners around a commonly agreed theme to promote inclusivity, prioritization, collaboration, consensus, and capacity.

Training for newly elected local authorities on DRM Localization Manual has been launched in various local units across seven provinces

Training on [Disaster Risk Reduction Management \(DRRM\) Localization Manual](#) targeting the entire 753 local bodies of 7 provinces, elected representatives and municipal staff has started to conduct in various districts at Provincial level, on different dates of July 2022. Under the “Promoting Action for Disaster Risk Governance and Working to Achieve Preparedness for Risk Reduction through Technical Assistance in Nepal (PARIWARTAN) Project” as a part of IOM Nepal's technical assistance and USAID Nepal's/BHA support to GoN - Ministry of Federal Affairs and General Administration & implemented by Lutheran World Federation (LWF Nepal), Practical Action

Nepal and Consortium lead by National Society for Earthquake Technology – Nepal (NSET). These trainings will assist municipal councils to draft targeted DRRM laws, policies, and strategic plans of action. Collectively, this training remains as the basis of strengthened capacity for reducing disaster risk and enhancing community and government capability to respond to disasters as well as in identifying pressing DRRM issues and paves way forward. For more information, contact Ms. Ruchi Thapa, IOM Nepal, Email: ruthapa@iom.int

Media Engagement on Hydro-Meteorological Forecasting Systems for Reducing Disaster Risk in Nepal

DPNet-Nepal with coordination support from Flood Resilience Alliance members - Mercy Corps and Practical Action have organized a program on 'Media Engagement on Hydro - Meteorological Forecasting Systems for Reducing Disaster Risk in Nepal' on 10 July 2022. Early warning systems have been recognized as an effective tool to reduce vulnerabilities and improve preparedness and response to natural hazards. Timely and effective information sharing, through identified institutions, helps individuals exposed to hazard to take action to avoid or reduce their risk and prepare for effective response. Online news media, national and local radio media and print media have been regarded as quite effective free open source to share the information. This program, therefore, has targeted to sensitize and instill knowledge to journalists on usage and application of hydro-meteorological forecasting systems during the time of approaching disasters. The orientation program informed the assembled journalists about different sources to get pre-informed (early warning system) such as global forecast, website of Ministry of Energy, Water Resources and Irrigation, Department of Hydrology and Meteorology, from India Meteorological Department, BIPAD Portal of NDRRMA and various social media pages of these websites. A brief practical session with the journalists to make them capable of generating hydro-metro related data from various open sources was also disseminated. For more information, contact: Mr. Sajjan Neupane, Policy and Advocacy Specialist, Mercy Corps, Email: saneupane@mercycorps.org

People of lower Mahakali river basin were provided boat to help in rescue and response

Dan Church Aid (DCA) in coordination with Dodhara Chandani Municipality and its partner Nepal National Social Welfare Association (NNSWA) has handed over a boat to the municipality to assist the people

of the lower Mahakali River Basin, which lies in Western Nepal of Kanchanpur district. As the area is frequently affected by flooding every year DCA partly financed the boat to help in rescue and response missions in the area. It is one of the first boat assistance in the far western area of Nepal for such a purpose. Every year the monsoon flood results in the loss of property, resources, and human lives. DCA implements SUDRIDH project in Dodhara Chandani, Bheemdutt and Parshuram Municipalities through partnership with NNSWA for reducing the risk of disaster and building the resilience of the communities. One of the focus areas of the project is to strengthen the capacity of community and local government for effective preparedness and response and this initiative is part of it. For more information, contact: Mr. Dinesh Gurung, Program Manager, Humanitarian Response and Disaster Risk Reduction, DCA Nepal, Email: digu@dca.dk

Simulation exercise conducted at local communities of Dodhara Chandani Municipality

A simulation exercise on monsoon preparedness was conducted at Kutiyakabhar community of Dodhara Chandani Municipality in the Sudurpaschim Province, considering it as a highly vulnerable area for floods near the confluence of Mahakali and Jogbudha rivers. The simulation event was coordinated by DCA and its local partner, NNSWA through SUDRIDH Project. During the simulation, an early warning to inform about possible flooding from upstream was sent out after

which the community people moved to safer areas and a search and rescue team was mobilized. The first aid task force provided support to injured people while organizations working on the humanitarian response provided food and water to displaced people. Finally, an Initial Rapid Assessment (IRA) team was activated to collect information on the damage done by the flood. Deputy Mayor, Ms. Ganga Devi Joshi of Dodhara Chandani Municipality, expressed that this sort of exercise at the community level proves to be very effective to sensitize communities on roles to play during times of disaster and how coordination with different stakeholders is crucial. For more information, contact: Mr. Dinesh Gurung, Program Manager, Humanitarian Response and Disaster Risk Reduction, DCA Nepal, Email: digu@dca.dk

TableTop Simulation Exercise conducted by CARE Nepal in Sudurpaschim Province

CARE Nepal in partnership with Ministry of Internal Affairs and Law (MoIAL) Sudurpaschim Province, along with Humanitarian Partnership platform members, UN agencies, NSET and

other humanitarian actors in Sudurpaschim Province has successfully organized a TableTop Simulation Exercise of Monsoon Preparedness and Response Plan. The simulation exercise was organized on 12 July 2022 in the premises of MoIAL in Dhangadhi where Minister, MoIAL; Chief Secretary, MoIAL; Secretaries, Joint Secretary of NDRRMA, security forces, and office in-charge of different stakeholders, UN agencies, I/NGOs and local media personnels have actively participated. Altogether 181 participants from these agencies had participated in this event. The simulation exercise provided an opportunity to government officials who are the first responders along with humanitarian actors and others concerned to realize the gap, current capacity and improvement areas in the plan including the ways for better communications and coordination in disaster response efforts. Preparedness and response planning are keys to saving lives and property during disasters. Aside from experiencing and responding to an actual disaster, conducting a tabletop disaster simulation exercise is the best way to test the plan and hone communications and coordination skills based on challenges and gaps observed. For more information, contact Mr. Dev Raj Gautam, Senior Resilience Manager - DRR & CCA, CARE Nepal, Email: Dev.Gautam@care.org.

Training Program on Green Technologies and Heritage Buildings were organized in Kathmandu

A 3-days long Training Program on Green Technologies and Heritage Buildings was organized in Kathmandu from 8-10 July 2022. The training program was targeted for Municipal engineers and architects and largely aimed to assist the trainees to have a better understanding of the importance of green technologies and heritage settlement. It was also intended to define how the historical features of the settlements can contribute to green features, how a vital settlement can provide a base of existence for the historical features at stake, to provide knowledge on techniques/ methods of green practices of the heritage settlements and building to adopt

to the new needs of their community /users and also to contribute towards building a human resource within the new municipalities who value the significance of heritage buildings. The ultimate goal of this knowledge based practical training was to contribute to rehabilitation of the historical settlements so that they become more sustainable in future. A total of 30 participants from Kathmandu Metropolitan City, Lalitpur Metropolitan City, Kirtipur and Mahalaxmi Municipality along with architecture students from Thapathali Engineering Campus, Nepal Engineering College and Khopwa Engineering College were part of the training program. The program is organized by Lumanti Support Group of Shelter, as part of the Parya Sampada Project, SWITCH Asia Project funded by EU and UN Habitat. For more information, contact Ms. Lumanti Joshi, Program Manager-Housing. Lumanti Support Group for Shelter, Email: lumantijoshi@lumanti.org.np

Participatory meeting organized at local communities to enhance capacity of communities

To strengthen DRR and humanitarian mechanisms such as anticipatory action and shock responsive social protection, a local participatory meeting was held in Sonpur area of Rajapur Municipality, Bardiya district, on 24 July 2022. Two local Community Disaster Management Committees (CDMCs), Teuni CDMC and Sonpur CDMC along with Yuwa Bakheri have jointly forwarded the participatory meeting that discussed the advocacy strategy, its implementation and the additional objectives for DRR and humanitarian mechanism enhancement. A total of 32 participants from CDMCs, Yuwa Bakheri and members of local communities have actively contributed to the meeting. ActionAid International Nepal's local partner Kamaiya Mahila Jagaran Samaj (KMJS) has overall coordinated for community level initiatives on DRR. Similarly Teuni and Sonpur CDMCs have developed two small level mitigation sites in Teuni and Sonpur areas respectively, based on the identified risk during participatory and vulnerability analysis (PVA) exercises. Small scale mitigation measures were mostly culvert, hand pipe, and tube wells in two places that involved women and adolescents throughout the process.

PROVINCIAL UPDATES - GANDAKI

Various districts of Gandaki Province: NSET with its consortium partners including PAC, and LWF has started providing training on [Disaster Risk Reduction Management \(DRRM\) Localization Manual \(access here\)](#) through PARIWARTAN Project, which is being implemented by IOM Nepal's technical assistance and USAID/BHA funded program. The training delivery team has started organizing DRRM localization capacity-building training programs in entire local units (Palikas) of all districts under Gandaki Province. So far training has been conducted in Gaindakot & MadhyaBindu Municipalities and Hupsekot & Binaye Tribeni Rural Municipalities (Nawalparasi East district), Palungtar Municipality (Gorkha district), Annapurna & Rupa

28 July 2022

Rural Municipalities (Kaski district), and Phedikhola Rural Municipality (Syangja district) from 18 to 26 July 2022. The major objective of this training program is to strengthen understanding of DRRM localization manual, facilitate DRRM governance, and to envision capacity on DRRM resilience at a local level. Total of more than 200 participants participated in this training program, which included mainly the municipality executive council members including Mayors, Deputy Mayors, and Chief Executive Officers. Similarly, DRR Focal Person and other concerned staff members were major participants of this training event. The whole session was monitored by IOM Provincial Focal Point and by HRRP Provincial Technical Coordinator in Gorkha and Syangja districts.

PROVINCIAL UPDATES - LUMBINI

Bardiya: DRR messages have started to broadcast on two local radio stations in Bardiya district (Radio Sathi, Rajapur Municipality and Radio Tiger, Thakurbaba Municipality) to inform and raise awareness among community members about mechanisms of early action and flood preparedness. ActionAid International Nepal's local partner Kamaiya Mahila Jagaran Samaj (KMJS) has overall coordinated to reach towards community level through localization of DRR messages. Following the prime time of radio stations, the messages were carried out ten times per day in Nepali and Tharu languages.

PROVINCIAL UPDATES - BAGMATI

Makwanpur: The Bagmati Shelter Cluster Technical Working Group meeting was organized on 26 July 2022, at the Office of Bagmati Province's Ministry of Physical Infrastructure and Development. The meeting was coordinated and facilitated by HRRP while the Working Group is led by the Ministry itself. The meeting was participated by representatives

from the Bagmati Province's Ministry of Internal Affairs and Law and Red Cross Makwanpur District Chapter. The meeting primarily focused on discussing the draft of the Bagmati Shelter Cluster Contingency Plan and feedback was collected from the participants. The cluster meeting decided to incorporate the feedback and discussion inputs in relevant ways in the draft Contingency plan document and finalize it further, which will be submitted with

the Task Force Committee under the Ministry of Physical Infrastructure and Development, Bagmati Province for next level of communication.

Sindhupalchowk: The local bodies in Sindhupalchowk have taken initiatives in the reconstruction process for permanent shelters for those rendered homeless due to natural disasters. The number of beneficiaries has reached 1,041 in various places of 12 local levels in the district prone to disasters like floods, landslides and soil erosion, according to the District Disaster Management Committee here.

Helambu Rural Municipality has the highest number of beneficiaries. A total of 392 households in the locality were displaced by the flood in Melamchi river last year. Among them, 182 have been resettled in permanent shelters. Similarly, 15 households have benefitted in Melamchi, 40 in Barhabise 15 in Bhotekoshi Rural Municipality, two each in Panchpokhari Thangpal Rural Municipality and Balefi Rural Municipality, as per information shared by Mr. Bednidhi Khanal, Chief District Officer of Sindhupalchowk district.

Although the process to resettle disaster survivors has been taken forward, relocating those residing in the high-risk zone in the district is yet to get an impetus. Relocation of those affected by floods in the Yangri and Larkekhola rivers has not made any progress in a lack of arrangement of safer places, according to the District Administration Office, Sindhupalchowk. Households in Yangri, Sunmaikharka, Bhangchung and Tipeni are at high risk of natural disasters. The DDMC is coordinating with NDRRMA and other responsible agencies for post-disaster operations such as relief packages, relocation, and resettlement among others.
