Field Visit /Joint Field Monitoring Visit Reports

Visit 1

Date:	Location:	Participants from HRRP and stakeholders		
July 5, 2018	Bidur Municipality Ward no 5, Pipaltar	• Badri Pyakurel • Buddhasing Thakuri • Pravuram Pokhrel		
Objective(s)	• Objective 1 To know the reconstruction trend and highlighting the issues related to government grant • Objective 2 To find out challenges on rainy season			
Summary	The field visit intends to know the issue of reconstruction in the contemporary days. Bidur Municipality is the older municipality of Nuwakot District. It is now formed with former Charchare, Khadkabhanjyang, Kalyanpur, Tupche, Gerku Vdc and Bidur Municipality. It has 13 Wards. Most of the wards are semi urban area. Wards 1, 2, 4, 5 are urban area and remaining are semi-urban area and rural area. Most common reconstruction in this area is RCC Frame with multi-storey building. Many beneficiaries has more than 1000Sq houses. That is the issue of compliance. People of urban areas rarely use mud mortar and alternative materials. Reconstruction materials are quite accessible to urban area rather than rural. The objective of the joint field visit is to find out the general issues of the area. The team has notified that most of the reconstruction task are stopped due to the heavy rain, lack of materials, worker and water in some places. Beneficiaries' agreement is satisfied in all 13 wards and 2nd tranche around 85% in progress. And 3rd tranche progress seems slow. Regulatory body like DUDBC/DLPIU, Municipality should be in close coordination in work progress. Some technical related issue has claimed by beneficiaries between DUDBC and Municipality which should be solved.			
Challenges / Issues Identified		Action Required	Responsible	Timeframe
Transportation of reconstruction Materials		promote to use locally available materials	POs, Ward offices	Regular
Quality of reconstruction materials		Quality assurance to local supplier	DCC, Rural Municipality	Regular

House Owner: Muktiram Bhatta Bidur Municipality, Nuwakot, Ward no 5, Pipaltar, CSEB Inspected for 2 nd tranche		House Owner: Ujeli Kumal Bidur Municipality, Nuwakot, Ward no 5, Pipaltar, Hollow block, Inspected for 2 nd tranche		

Housing Typology Report

House Owner: Motiram Neupane
Bidur Municipality, Ward no 5, Pipaltar,
RCC, Brick, CSEB
Inspected for 3rd tranche

House Owner: Ambika Shrestha
Bidur Municipality, Ward no 5, Pipaltar,
CSEB
Inspected for 3rd tranche

Challenges and Way Forward

Challenge	Way Forward
Lack of technical assistance in the field. NRA engineers are not in regular monitoring to the house. When they visited for the inspection, they only commented for non-compliance.	MOUD-DLPIU should monitor the engineer and instruction for regular visit.
Delay in addressing the grievance. Real victim from the earthquake has not addressed as beneficiaries. They have applied for grievance many times but not addressed.	NRAs should address as soon as possible by the help of local elected persons, Like ward chair and other members.
When will retrofit start? People don't have trained manpower for the retrofit, they are waiting the response from NRA side.	Training and other technical issue with proper communication to the common people should be done before monsoon starts.

Case Study

CSEB continues to raise the income for Tanumaya

Tanumaya Tamang is a competent woman entrepreneur of Meghang-3, Deurali and have struggled through thick and thins of life towards success. With a small family of a child and husband, thirty-year- old Tanumaya's financial state was quite pitiable until a year back. There was very little land which could afford the household only for 6 months and she had to work as labor for the rest of the six months to manage the household.

The life was crawling at a low pace when the devastating earthquake hit it hard on the 25th of April 2015. It did not claim lives but demolished her house and changed all food stored and the poultries into rubble. The life became tougher after this. She had moved on with a tinned shed forgetting the past and trying to make a living.

One day, she learnt that the project "Strengthening the Supply Chain of Construction Materials for Reconstruction" financially supported by UK Aid and implemented by Practical Action and Sahayata Samajik Sanstha in Nuwakot also provides support for small business and entrepreneurship. So, ignoring the pressure of work, she rushed to Sahayata Samajik Sanstha, Bidur, Nuwakot and selected CSEB industry after collecting necessary information. She decided to set up an industry by taking loans from others as she was required to make some investment as well. Gradually, the machine was available and she along with her husband and 4 others received a seven-day training. She started to increase her production gradually in the recent days. She started using the clay that was being wasted, the sand from the nearby river and cement to produce CSEB bricks and started selling them for the construction of earthquake resistant houses. The production continued for 2 months but people had no confidence as it was a new technology. With support from the project again, she received support to conduct mason training and gradually her industry started gathering publicity and people got to know about the usefulness of CSEB bricks.

She gradually started to sell the product. She started selling one CSEB for 55 rupees. Now, she along with four others are employed in this work with a daily production of more than 400 bricks. She has been able to sell 25 thousand bricks till date and she informed that there are more demands. She says, "before, there was fear that it might not sell but now there is a fear that customers might get angry if the demands are not met." Simon Tamang, husband of Tanumaya Tamang said that they were lagging behind in building their own house as they were unable to keep up with the demand. Tanumaya reiterates, "this industry has increased my self-confidence and has supported in generating income and now I am preparing to add one more machine to keep up with the demands in this area". She has been able to provide good education for her son with the income from this industry. Now, she has the added facility of radio, television and telephone at her house.

Now, she has no problem to afford for food and education for her son. She says, "This saved my family in hardship days so I will not leave this business as long as I live." It was obvious that she had happy tears as she is now the proprietor of an industry raising from the hardship of managing food to live. Now, her husband has also left going to work for others as labor and have started promoting the business by making CSEB houses. Now she advises that anyone can be successful like her if one starts doing one's own business, even if it's a small business, with confidence.
