

# HRRP District Coordination Meeting Minutes

|                      |                                                        |
|----------------------|--------------------------------------------------------|
| Meeting Purpose:     | <i>HRRP Coordination Meeting</i>                       |
| Meeting Date:        | <i>18/07/2017</i>                                      |
| Meeting Time:        | <i>2:00 PM</i>                                         |
| Meeting Location:    | <i>District NRA meeting hall, Santa Bazar, Dhading</i> |
| Meeting Facilitator: | <i>Prabin Gautam</i>                                   |
| Minutes Taken By:    | <i>HRRP-Dhading Team</i>                               |

## Discussion: (Items/Knowledge Shared)

### Agenda:

- **Introduction**
- **NRA Update**
- **Findings of Field**
- **HRRP/EHRP Reconstruction Update**
- **Housing Reconstruction Challenges and Experience Sharing**
- **AOB**

### **1. Introduction**

HRRP-Dhading conducted monthly coordination meeting in chairmanship of NRA-Dhading chief **Er. Rabichandra Pajiyar**. All participants from various organizations introduced themselves in the meeting.

### **2. NRA Update**

In case of landless people, Nepal Reconstruction Authority has published a document (संशोधित अनुदान कार्यविधि) which provides a clear guideline that can guide through the procedure of receiving grant for landless people of the victims of earthquake.

With the presence of various organizations working in the district it would be much easier now to convey this message to such community who has no land to build houses of their own. A better way to resolve such a vital issue was suggested by the POs was to convey every people through mobile SMS system by the central governing bodies.

### **3. Findings of Field**

- Huge lack of Awareness at local level.

With the help of field visits in close coordination of NRA, DUDBC and HRRP, many of the issues were found at community. Due to lack of proper orientation of community people with reconstruction guidelines, supports and knowledge of what to do when and how, people were misled by themselves.

All stakeholders like Media, government and partner organizations can play vital role to raise awareness among people through focus group discussion, awareness campaigns, social mobilization, etc.

- Door to door technical Assistance is insufficient.

During the visit, it was observed that the many of the local community are willing to build RCC structure building but due to lack of technical support at most, the people find their own way to construct houses that is most suited for them leaving behind proper analysis and technical guidance.

This has caused difficulty in receiving further tranche from the government. Such houses do not come into compliance and thus are rejected for further grants. The chief of Siddhalekh rural municipality mentioned that the beneficiaries were delayed to receive grant amount from the bank

## Discussion: (Items/Knowledge Shared)

also holds money of beneficiaries in its deposit it was reported by a rural municipality chief at Salang VDC.

- How can we address single woman in reconstruction

With the help of 3 lakh Reconstruction Grant amount, a very low living conditioned women who have no any financial support and lost her family, this amount may not be sufficient. Thus, a financial support can be provided by POs to such beneficiary as top-up grant of NRs. 50 thousand which is already been instructed by the Nepal Reconstruction Authority.

- Rate of Reconstruction

With so much of effort and money, only 4 percent of the earthquake affected beneficiaries have built their houses while majority have not started yet. People are seen to watch/observe others and follow accordingly so that there are fewer struggles to be tackled in future. They have a fear that whether their houses will be approved for 2<sup>nd</sup> & 3<sup>rd</sup> grants or not.

Thus, many beneficiaries will be in a race to construct their houses once they are supported technically through setting up an examples of approved houses at many small communities/toles & wards.

This is where the role of Social Mobilization part comes in and which can support people by raising awareness. Such an example was observed at the working VDC of CARE-Nepal in Dhading where a group of trained masons were formed within a community who were equipped with all necessary knowledge and skills required for building an earthquake resilience house.

- Landless people are still unaware of the process!

As for now, NRA has published documents related with land purchase and relocation for earthquake victims. With this, the issue related with landless people is thought to be resolved.

Beside this, one of the partner organizations strongly emphasized the missing number of beneficiaries who are also the victims of earthquake left behind in this reconstruction process. Such people are basically behind due to ignorance, their low voices and dominance within the society. Thus, the NRA policy to conduct resurvey of houses through damage assessment work can bring them together in front and support for building earthquake resilience house.

## 4. HRRP/EHRP Reconstruction Update

Till now there are 75,685 enrolled beneficiaries of Dhading where 65,465 beneficiaries have received the 1<sup>st</sup> tranche while only 3,649 have received the 2<sup>nd</sup> tranche. Total number of grievance recorded is 16,000 out of which only 15,500 are being gradually verified and recorded within beneficiary list.

The total number of trained masons produced through 7 days training in the district is 4626. ICDC put quire on training manual for carpentry interestingly which can help to set procedures to conduct such training in future.

The ASB country director put ways forward to resolve a huge gap in reconstruction. She emphasized on those missing number of people who are deprived of getting government grant. A mechanism which can convey correct message to affected people to receive further tranches is may be through mobile SMS system. This mechanism must be adopted by the government to rapid up the reconstruction pace. EPF mentioned that 40 model houses will be built in its first phase program to the needy families of Nalang VDC through direction identification (selection) of beneficiaries.

## 5. Housing Reconstruction Challenges and Experience Sharing

- High expectation of community as well as government agencies.

# HRRP District Coordination Meeting Minutes

## Discussion: (Items/Knowledge Shared)

- Inconsistency in decision of Government body.
- NRA lengthy approval process (community buildings, mason trainings, Shelter).
- Difficulty in selection of beneficiary during training, community building construction, etc.
- Less coverage of VDC area by organization in particular location.
- Water scarcity hindering the construction of buildings at villages.
- Unavailability of government engineers for technical support to beneficiaries at municipalities and rural municipalities.
- Challenge in transportation of construction materials at most of the areas of Dhading.
- High number of non-compliance houses at rural-municipality and even at municipalities.
- Lack of monitoring of trained masons at their locality.
- Different perception and view of newly elected ward leaders has created obstacles in work as they have high expectation from Partner Organizations (POs).
- Due to inconsistency in transportation rate, the construction cost hikes with it.
- Huge numbers of earthquake victims are still needed to be identified yet.

## Miscellaneous Items / AOB:

## Decisions Made: (What, Why, Impacts)

1. To support NRA through technical assistance by all POs technical staffs of the district and work in close coordination of NRA engineers.
2. Distribution of NRA new documents discussed in the meeting through HRRP.
3. As working in Humanitarian organization it is our duty to identify all affected victims who are still missing in this reconstruction process and suggest government and POs to provide necessary assistance for them.
4. All POs to share name list of Engineers working in Dhading district so as to participate in current MTOT for Correction and Exception Manual conducted by DUDBC.
