FEATURED TECHNICAL STAFF STORY: **Krishna Gyawali, Focal Engineer, DLPIU Building, Sindhupalchowk**

*Krishna Gyawali,
Focal Engineer
DLPIU-Building
Sindhupalchowk*

Er. Krishna Gyawali has been working as a Focal Engineer at DLPIU (District-Level Project Implementation Unit)-Building Sindhupalchowk since April 2015. According to him, overall, 95% of reconstruction work in Sindhupalchowk district has been completed, whereas housing reconstruction of vulnerable households is 100% completed. However, this remarkable progress on reconstruction was achieved after going through numerous challenges and issues.

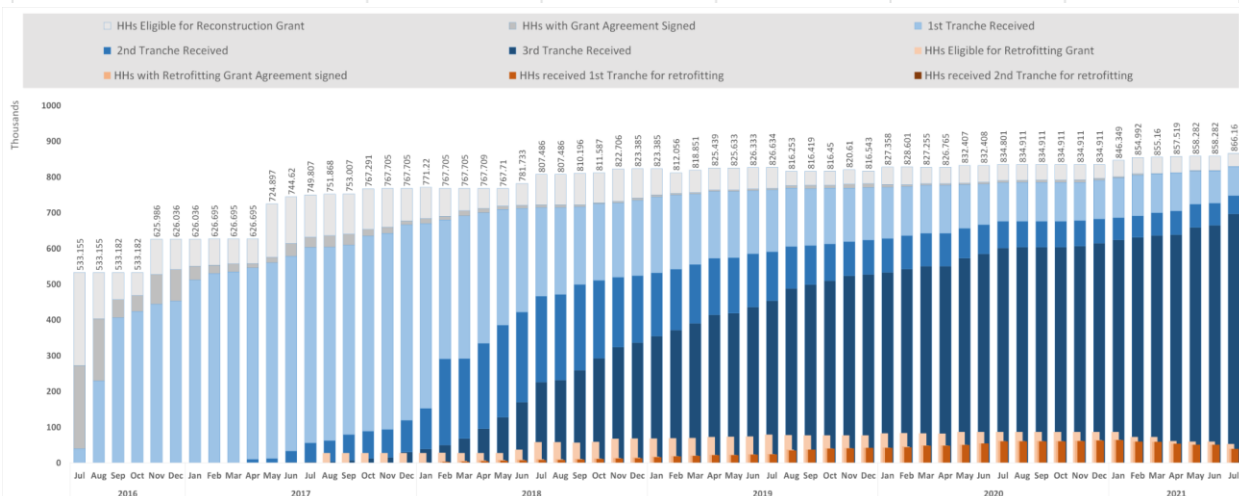

Mr. Gyawali added that local governments should take overall responsibility to proceed further reconstruction work even after the phasing out of NRA, so that 100% achievement in reconstruction of schools, public and social infrastructure, and culture and historical monuments can be made.

NATIONAL UPDATES

NRA, CLPIU- GMAI and CLPIU-Building, Grant Disbursement Data, as of 26 July 2021

HHs Received 2nd Tranche	418	445	756	762	2014

Progress with the disbursement of the GoN housing reconstruction and retrofit grants based on NRA GMAI CLPIU data as of 26 July 2021

You are invited to the upcoming sharing session on 'Cost Benefit Analysis (CBA) research findings of housing reconstruction support to vulnerable HHs' -10 August (10 am).

HRRP, together with Vulnerable Support Working Group (VSWG), People in Need (PIN) and Practical Action (PA), would like to invite you for the upcoming webinar/sharing session titled

"CBA research findings of housing reconstruction support to vulnerable HHs, of LNOB Project" scheduled for **10 August 2021, Tue, (10:00 -11:15 AM)**. This sharing session will mainly focus on the dissemination of findings of the research carried out on cost-benefit analysis (CBA) of the shelter works performed within the UK Aid-funded, Leave No One Behind (LNOB) project, implemented by two organizations- PIN and PA in four earthquake affected districts. The research has compared two shelter models implemented by PIN & PA to reconstruct the house damaged by 2015 earthquake, adopting value for money (VfM) and CBA framework. Three speakers will present at the sharing session, which will be facilitated by HRRP. ([*Detail/invitation to follow next week*](#))

Urban Recovery Strategy Study update:

HRRP is coordinating the ongoing urban recovery study (March-July 2021) on urban issues commissioned by NRA with technical support by NSET, CRS and HRRP. An independent consultant team with Lead Consultant, Mr. Surya Bhakta Sangachhe, Urban Expert, is leading the study. The objective of the study is to collate learning elements and prepare ground for integration of evidence-based urban strategies into specific government Acts, Policies, Working procedures and Regulation.

As part of the study over the past months, various high-level events, such as the consultative meeting and validation team meetings were held in April organized by the NRA/CLPIU-Building and supported by CRS, NSET, UKAID and HRRP. Key Informant Interviews (KIIs) were held throughout April-June, with key urban stakeholders, local governments, among others. During the last week of May, a progress review meeting was organized by NRA which took stock of the progress made so far by the study and agreed on some next steps as per guidance from NRA. The consultant team in late June prepared the draft report and was subsequently submitted to NRA for review and feedback.

Around mid-July, a discussion/review meeting on the draft report was organized for NRA's guidance, review, and feedback to the consultant/study team. The consultant team is currently working towards incorporating feedback and on report finalization and two I consultations meetings are planned. The plan is to submit a final report to the NRA by July,

after which a wider large-scale meeting is being planned. The final report will be included in the NRA's upcoming ICNR (International Conference on Nepal's Reconstruction) scheduled to be held in Dec 2021. For more information, please write to Bishan Wagle, Urban Coordination Officer; uco@hrrpnepal.org

Partner Satisfaction Survey (PSS) Round 3: HRRP has launched the final round of PSS survey on 6 July and the survey will be closed on 30 July 2021. The main objective of PSS is to assess how HRRP is working with and perceived by the stakeholder groups involved in the platform. It is also intended to gather feedback on which HRRP activities are working and which aren't and enable partners to suggest improvements. As HRRP phase four (HRRP-4) is ending on 31 July 2021, this survey provides further support in evaluating services rendered by HRRP measures and provides recommendations for future actions of the next phase of HRRP.

Lamjung Earthquake Response Program (LERP) Update

Following the 19 May earthquake, CRS, HRRP and NSET are jointly implementing the Lamjung Earthquake Response Program (LERP), since June, in coordination with National, Provincial, District, and municipality governments and engaging members of affected communities in planning and execution of the various project activities to ensure an effective, efficient response

to the Lamjung earthquake affected population. The coverage area of this program are all the three affected districts- Lamjung, Tanahun, and Kaski and the main target is to work jointly with the Government of Nepal (GoN) and local stakeholders. The project also supports the highly vulnerable 200 HHs in Lamjung District for shelter, WASH, and food security

assistance. Socio-technical assistance will focus on affected communities in Lamjung District.

As of 23 July, the program has had some key activities and achievements , such as on 19 July a meeting with NRA, NDRRMA, CRS-HRRP and other stakeholders was organized at NRA office, with the meeting's key objective being to set strategy and further action plan for Damage Grade Assessment (DGI) and Response Plan of Lamjung EQ. In terms of response support, 31HHs from Dordi RM ward number 2,3,6,7 and 8 have received transitional support (NFIs, Wash/Covid and Food) on 22nd July. Temporary shelter construction of 2 HHs at Marsyangadi RM and 1 HH for Dordi RM is ongoing. Also, Socio-Technical assistance (STA) for all EQ affected population of Lamjung is ongoing during field visits (in person) and Via phone (remote). Coordination with Province government, district level offices, Local level governments and partners organization is ongoing for Damage Grade Assessment (DGA), Multi Sectoral Need Assessment (MSNA) and Recovery Plan.

Earlier, around 2 months back, on 19 May early morning, the Lamjung District was hit by a 5.8 magnitude earthquake, followed by two aftershocks of 4.0 and 5.3 magnitude. According to initial emergency assessments conducted by ward-level authorities in Lamjung and the neighboring districts of Tanahun and Kaski, 1053 houses were fully damaged, and 929 houses were partially damaged across the three districts by the series of earthquakes, which also caused displacement of over 200 households, all Lamjung District. For more information contact Rijan Gajurel, National Coordination Officer: rijan.gajurel@hrrpnepal.org

HUMANITARIAN SITUATION UPDATE

[COVID-19 update from Ministry of Health and Population \(MoHP\)](#)- (as of 25 July 2021)

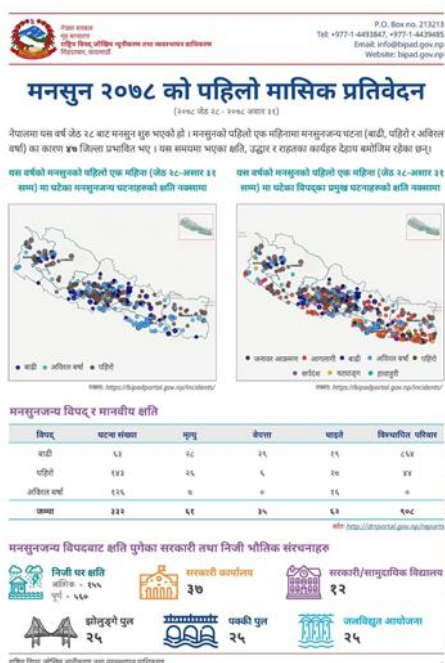

According to the Ministry of Health & Population (MoHP) [website](#) national COVID-19 data, as of 25 July 2021, total cumulative new cases are 680,556 out of which 643,615 patients (94.6%) have recovered and 27,228 (4.0%) are undergoing treatment in isolation. Likewise, as per national death tally, a total of 9,713 (1.43%) people succumbed to the virus as of 25 July MoHP data. For more information, click in the given link [COVID-19 Response and Preparedness Plan](#) released by UN-RCO Office and Situation Report (SitRep) as of 16 July (covering the period 26 June -16 July) of [Nepal -COVID-19 Pandemic Sitrep #43 \(16 July\)](#)

Bagmati Shelter Cluster Coordination update:

After the regular follow up and widely dissemination of the public appeal made by Jugal Rural Municipality concerning the construction material support for the construction of temporary shelters for 45 landslides affected HHs by province shelter cluster, Kadoorie Agricultural Aid Association (KAAA- British Gorkha) is supporting shelter construction for 77 landslides affected HHs. Province level coordination for monsoon response and preparedness is ongoing at province level. Similarly, 4W report preparation for Melamchi emergency response supported by partners organizations, private sector and individuals was compiled and shared with the national shelter cluster for the planning and response for flood affected HHs. Bagmati province is preparing a Bagmati shelter cluster contingency plan with coordination with national, province, and local level government as well as national shelter cluster and other relevant stakeholders. The first working session meeting for the contingency plan is planned for this week. Bagmati Shelter Cluster Coordination is led by HRRP. For more information contact Rijan Gajurel: rijan.gajurel@hrrpnepal.org

Gandaki Shelter Cluster Coordination update:

On 09 July, Gandaki Province Shelter Cluster Coordination meeting was organized with an objective to discuss the monsoon situation along with identified needs and gaps of the flood and landslide affected population. The meeting was attended by the representatives of the Gandaki Province Chief Minister's Office, NGO Federation-Gandaki Province, District Administration Office (DAO), DLPIU-GMaLI-Lamjung, DLPIU-Building, Lamjung as well as IFRC, IOM, CRS, NRCS, HRRP, WHO, COPPADESS, Choice Humanitarian Nepal, IPAS-Nepal, among others. During the meeting, the recent floods and landslide situation across the province, its damage and loss, ongoing humanitarian aid assistance including other aspects of necessary coordination and communication to supply relief assistance material, were discussed to cater the immediate needs of the flood affected victims. In addition, the District Disaster Management Committee (DDMC)'s coordination role in facilitating the response activities and future response plan was also discussed. During the meeting, Province government thanked all the partners organizations (POs) for emergency need support for affected population of Manang district, alternative supply mechanism for emergency needs collected from POs was discussed as the roadway is totally blocked due to flood and landslide for Manang district, ensuring proper communication and coordination with development partners, private sectors and other interested partners willing to contribute to emergency relief assistance through provincial government, support to victims of last months' Lamjung Earthquake and their needs assessment including data tracking matrix of the relief aid assistance was extensively discussed. The Gandaki Shelter Cluster Coordination is led by CRS-Nepal. For more information, contact Prakash Basnet: prakash.basnet@crs.org

NDRRMA -Monsoon 2078 First Monthly Report:

The Government of Nepal (GoN), National Disaster Risk Reduction and Management Authority (NDRRMA) has prepared the Monthly Report covering the first month of this year's Monsoon. HRRP technically supported NDRRMA in the preparation of this Report. According to the [First Monthly Report on Monsoon 2021](#) of NDRRMA released on 20 July, [61 people have lost their lives](#) between June 11 - July 15. The report highlighted that the floods and landslides affected 47 districts during this period, with a total of 332 incidents recorded in these districts. The report covers the monsoon

situation in Sindhupalchowk of Bagmati Province and Manang and Lamjung districts of Gandaki Province, among other districts. Of the total deaths, 28 were due to floods, 26 were caused by landslides and the remaining seven were due to heavy rainfall, the NDRRMA data shows.

DISTRICT & MUNICIPAL UPDATES

In **Lalitpur**, a 20 feet height wall has been constructed till now at Rato Machhindranath Temple as a major part of reconstruction work, located at Ward no 22, Bungamati, Lalitpur Metropolitan City, Lalitpur district. The wall building works was delayed due to unavailability of relevant wood and bricks that were necessary to apply in Rato Machhindranath Temple. Further COVID-19 pandemic crisis situations also delayed the process of accessing the wood and in production of bricks. To complete full reconstruction of Rato Machhindranath Temple, it mainly requires 64 feet 4-inch wall. The relevant works have been supervised and monitored by the Temple Users Committee. According to Mr. Amir Shakya, Chief of the

Temple Users Committee, the application of 11 different types of traditional bricks in 20 feet height wall has now paved ways towards continuity of reconstruction works of Rato Machhindranath, though still 2 types of bricks are in manufacturing process, the production of which was delayed due to resource constraints and pandemic situation. The Committee is worried that the current pandemic situation could again delay the temple reconstruction completion process. The temple was severely damaged by Nepal earthquake 2015, however the priests have managed to conduct regular workshopping processes.

Ongoing reconstruction works in Rato Machhindranath Temple, Lalitpur (Photo; Setopati).

In **Bhaktapur**, DLPIU Building-Bhaktapur has been providing technical support in public infrastructure works located around various *palikas* and its wards. NRA Technical staff deployed at DLPIU Building-Bhaktapur Office has provided technical support such as design estimation works along with regular supervision and monitoring. Some of the noted public infrastructures with ongoing works includes - Concreting of one building of Juddha Barun Yantra Karyalaya located at Bhaktapur Municipality completed while of second building in underway; Foundation works ongoing in Sudal Health Post at Changunarayan Municipality and Chittapol Health Post, Suryabinayak Municipality while Chhaling Health Post, Changunarayan Municipality is underway with first foundation works soon. All these ongoing

reconstructions of public infrastructures has reinforced cement concrete framed building (RCC) typology. All these public buildings were damaged to certain extent by the 2015 earthquake, however they managed to operate the services with risk in all these years due to lack of proper resilient buildings.

Photo: Concreting works in Juddha Barun Yantra ongoing, Bhaktapur Municipality (July 2021)

In **Nuwakot**, 593 retrofit beneficiaries' caseload are remaining in the district, where 339 beneficiaries have signed PA and received the first tranche. Out of 1,169 vulnerable beneficiaries, 95% of beneficiaries have received both first and second tranche from the government housing grant, whereas 85% of vulnerable beneficiaries have completed their housing reconstruction.

In **Rasuwa**, 83 retrofit beneficiaries have converted their beneficiary types to reconstruction. Reconstruction of Pangling Integrated settlement has been started at Amachhodigmo Rural Municipality of ward no 2, which consists of Tallo Haku of 51 households. The construction was started in January 2021.

In **Lamjung**, DLPIU - Building is doing filing of tranche details from wards. Technical teams are engaged in close out of health post reconstruction. Data digitization of 2,521 damaged households from the recent Lamjung earthquake is completed and digitized data is also approved from the district facilitation meeting. The District Facilitation Meeting has forwarded digitized data to NRA and NDRRMA for further processing. GMaLI office is also emphasizing on reconstruction of remaining vulnerable households within the timeframe of NRA. GMaLI office has delisted 299 earthquake affected households from the beneficiaries list as they have not started house reconstruction and they also did not activate the Dummy account.

HRRP District Coordination Team Bhaktapur, Lalitpur Monthly Report, 24 June - 21 July 2021

Ward-7 Bagmati Rural Municipality, Lalitpur: Load bearing structure with brick in cement mortar and CGI roofing. The house owner has received all the tranches from the Government Housing Grant.

HRRP District Coordination Team Makwanpur Cluster Monthly Report, 24 June - 21 July 2021

Ward-7, Thaha Municipality: Thaha Municipality: Stone in mud mortar with two rooms and one attic. The house has a flexible roof with CGI roofing. The house owner has received all the tranches from the government housing grants. In partnership with RADO Nepal, TEAR Fund provided technical supervision for housing reconstruction.

HRRP District Coordination Team Rasuwa, Nuwakot Monthly Report, 24 June - 21 July 2021

Ward-3, Myagang Rural Municipality, Nuwakot: Single storey brick cement mortar house. The house owner has received all the subsequent tranches from the government housing grant.

[HRRP District Coordination Team Lamjung Cluster Report, 24 June - 21 July 2021](#)

Ward-2, Phalebas Municipality, Parbat: Single storey plus attic stone masonry in cement mortar house. The house has two rooms with light flexible CGI roofing. The construction of the house is completed, and the house owner has received all the tranches from the government housing grant.

FEATURED STORY

Er. Krishna Gyawali has been working as a Focal Engineer at DLPIU-Building Sindhupalchowk since April 2015. According to him, overall, 95% of reconstruction work in Sindhupalchowk district has been completed, whereas housing reconstruction of vulnerable households is 100% completed. However, this remarkable progress on reconstruction was achieved after going through numerous challenges and issues, such as beneficiaries were reluctant to abide by the rules and regulations of NRA, frequent changes in the reconstruction policies, many houses being in good condition were identified as vulnerable, and in some

areas people who are still living in temporary shelters due to collapsed houses not being in beneficiaries list.

While in the current scenario, engineers are not able to do final technical supervision of reconstructed houses as many beneficiaries have not done roofing of reconstructed houses. Besides that, after receiving all the subsequent tranche amounts, it is found that beneficiaries have been reconstructing without technical supervision of engineers. Local governments do not show concern regarding such issues.

Mr. Gyawali further added that local governments should take overall responsibility to proceed further reconstruction work even after the phase out of NRA so that 100% achievement in reconstruction of schools, public and social infrastructure, and culture and historical monuments can be made.

Households Grant Type Conversion

Number of households switching to grant type (July 2021): This data has been collected from the DLPIU offices by the HRRP District Coordination Teams. It will be updated as more information is received.
