Destruction in the traditional settlements

Emergency Support to the Communities

Emergency Support to the Communities

Temporary Shelter Support

Reconstruction Plan

- Dhaibung and Laharepauwa VDCs in Rasuwa
- Dalchoki VDC, Chapagaon, Siddipur and Thecho in Lalitpur
- Machhegaon in Kathmandu
- Chitlang in Makwanpur

Total 1520 housing units reconstruction

Total 300 housing units repairing and maintenance

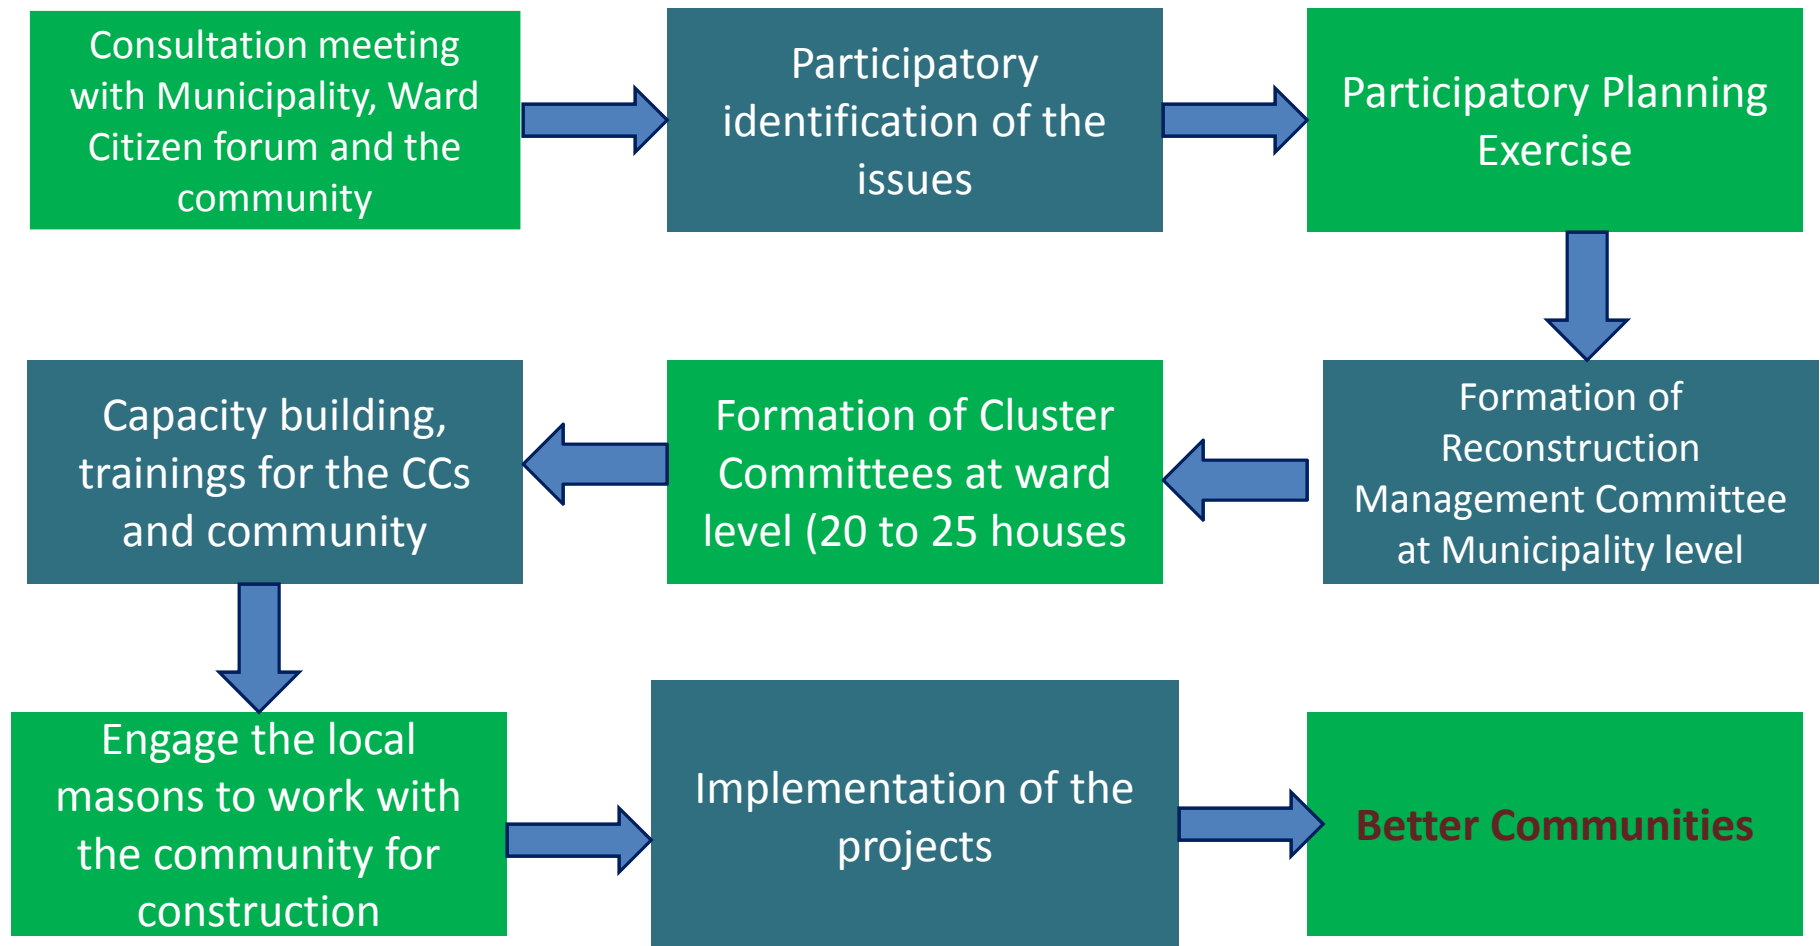

Why Community Driven Reconstruction and Recovery

- Building better communities, not only the houses
- Ensuring all the affected families get necessary support to build their houses
- Work out on a common norms for managing land, safer building and future expansion
- Plan for integrated community development including infrastructure and heritage conservation
- Making reconstruction inclusive. Engagement of women at all the levels of reconstruction.
- Collective designing for the optimum use of the limited land other resources

Community Driven Reconstruction and Recovery

- Community Mapping
 - HH damage grade mapping
 - land issues mapping (ownership, plot size, informal swapping)
 - infrastructure issues mapping
 - brainstorming for solutions
 - policy recommendations
 - integrated settlement design
- Cluster Committees (CC) formation
- Selection Criteria set by CC
- Formation of Reconstruction management committee at Municipality level

Process

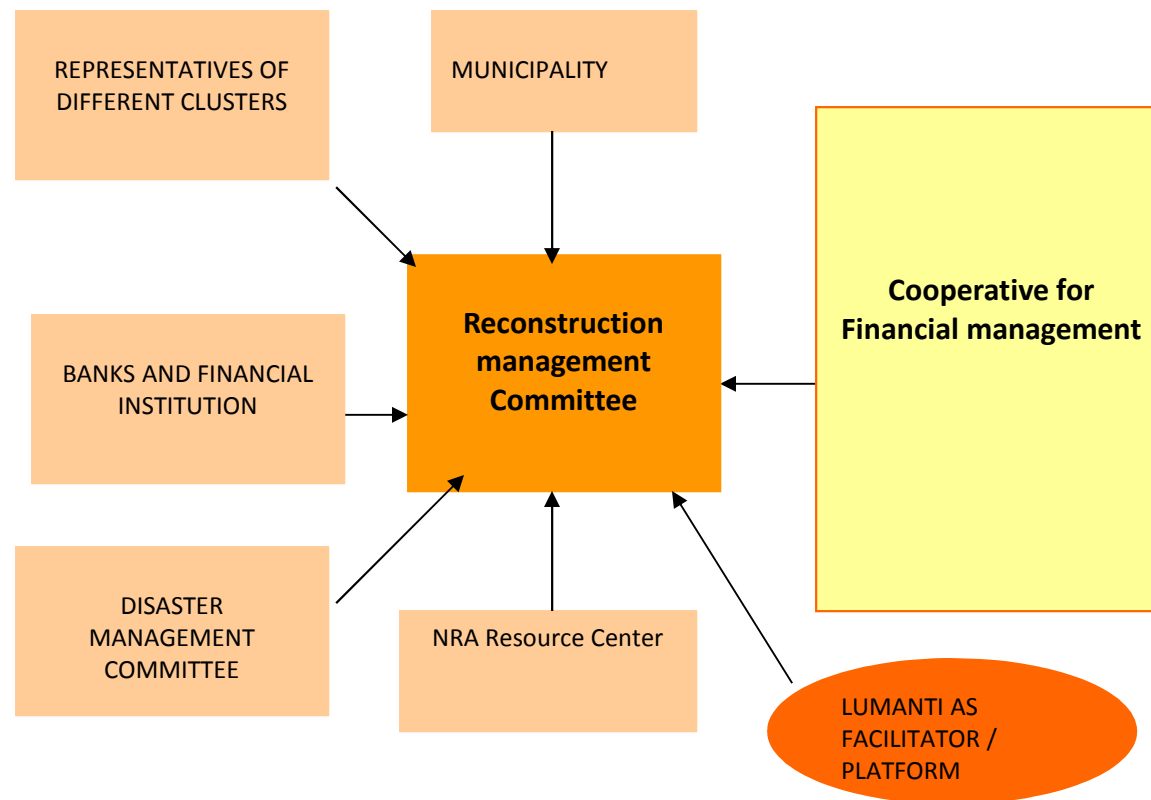

Continuous Monitoring of the Process, documentation of Experiences + Learning and Sharing Exchanges

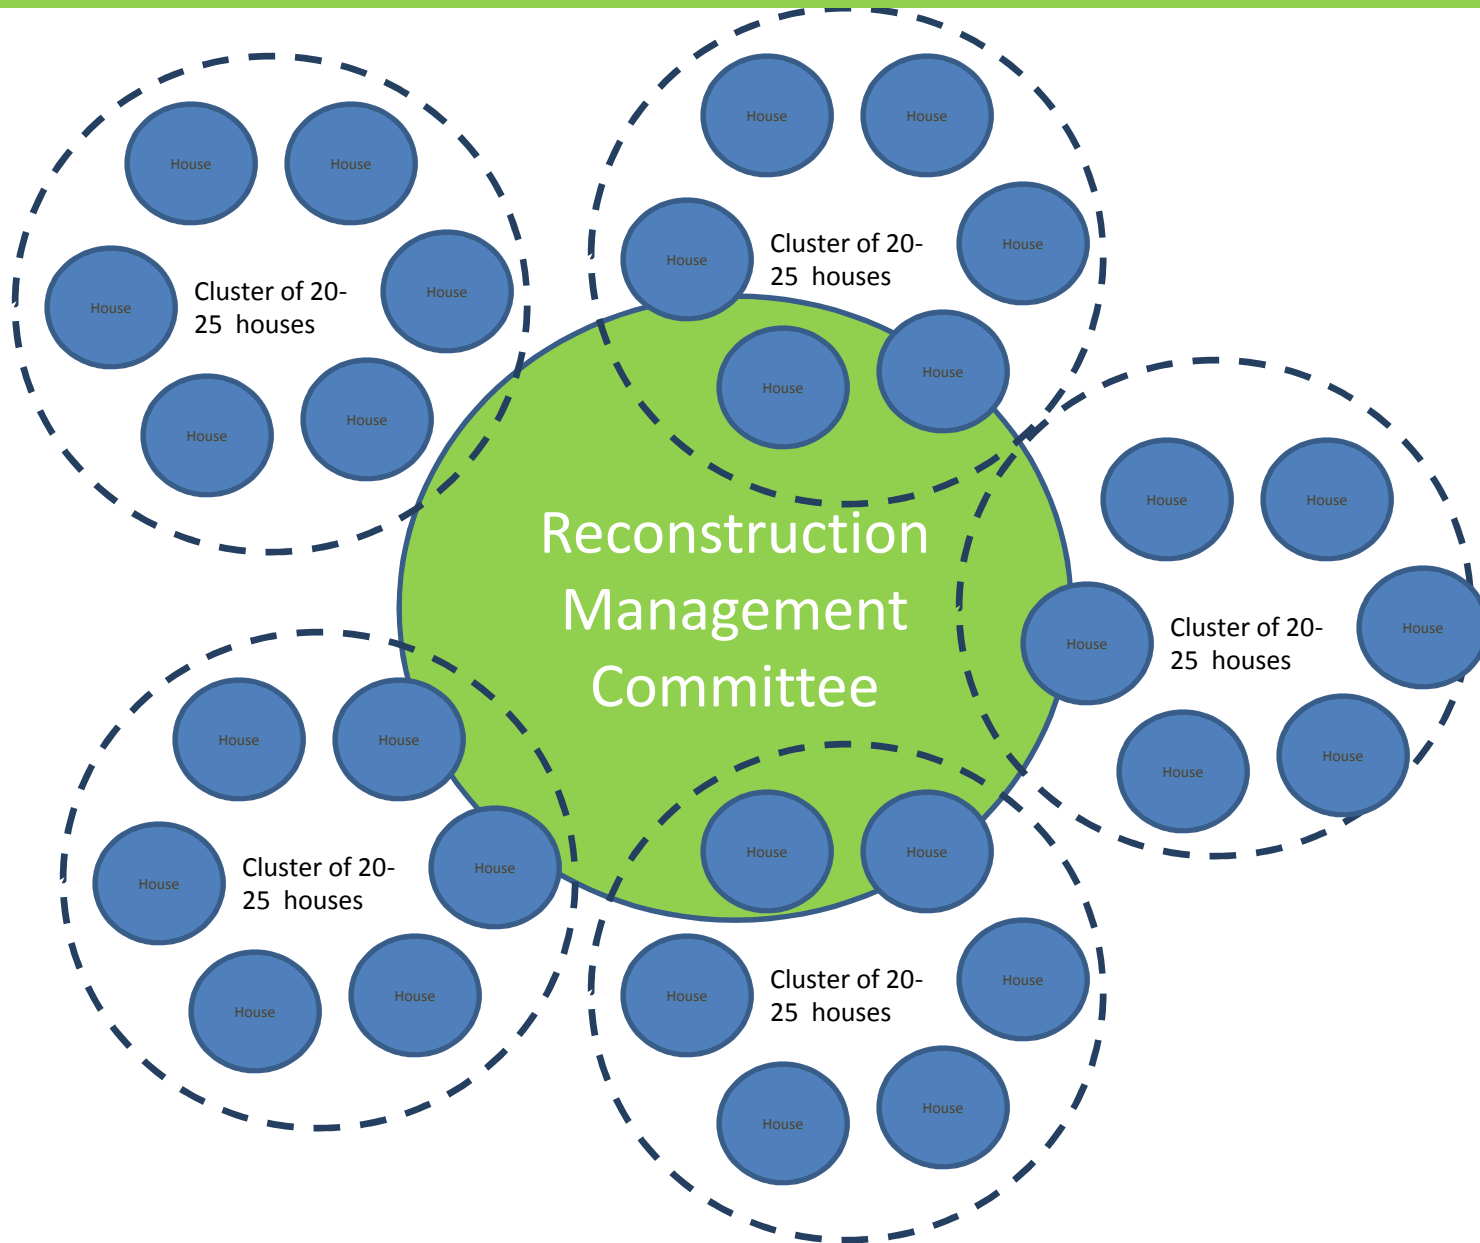

Building better communities

- Formation of city level reconstruction committee
- Cluster managed reconstruction
- Work with municipality and NRA Resource Centres to formulate city / situation specific reconstruction norms
- Cooperatives to support in the management of finance
- Coordination with concerned authorities and stakeholders
- Collective process for acquiring land ownership certificates
- Advocate financial institutions, banks and cooperatives for easy loan

City level Reconstruction Management Committee

Cluster Coordination

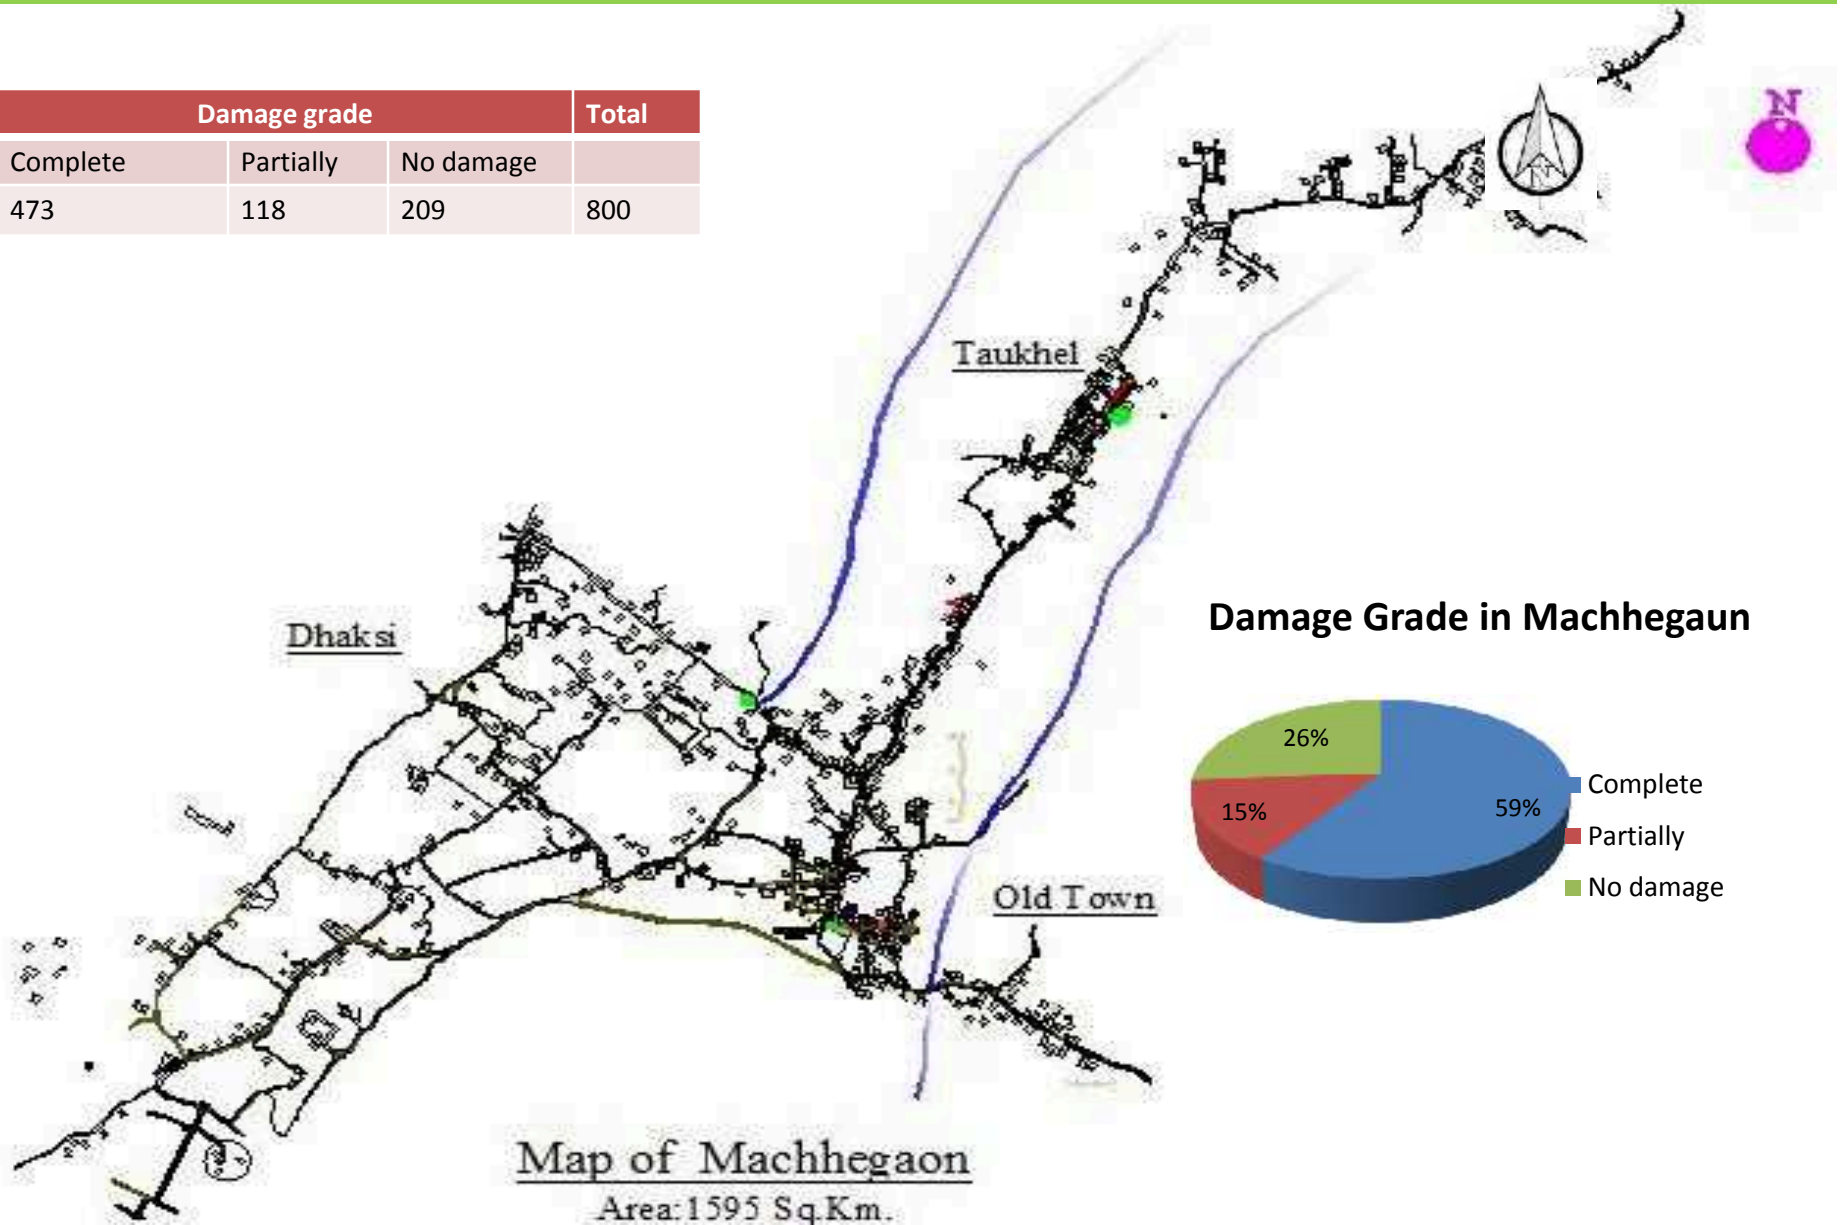

Focus Area

Machhegaon, Chandragiri Municipality
Thecho, Bajra Barahi Municipality

Machhegoan

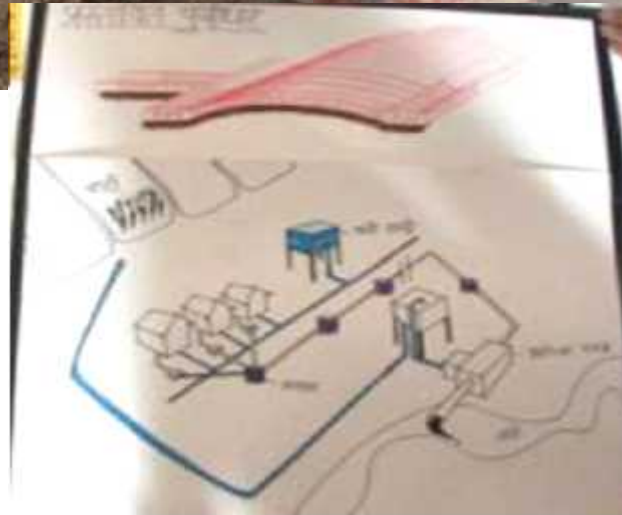

Damage grade			Total
Complete	Partially	No damage	
473	118	209	800

Participatory Planning in Machhegaon

Community exercises in Machhegaun

Infrastructure Survey and Planning

Community exercises in Machhegaun

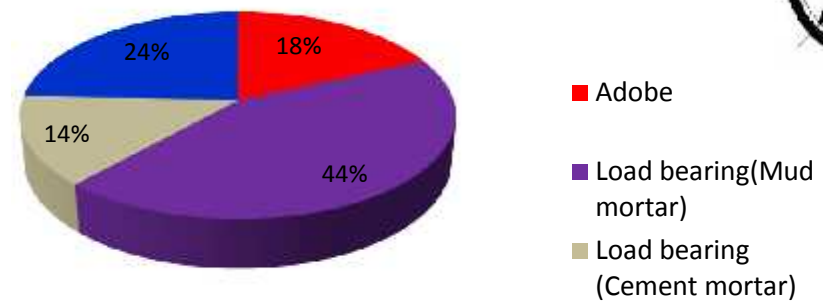

Exercising the possibilities of land readjustment

land certificate

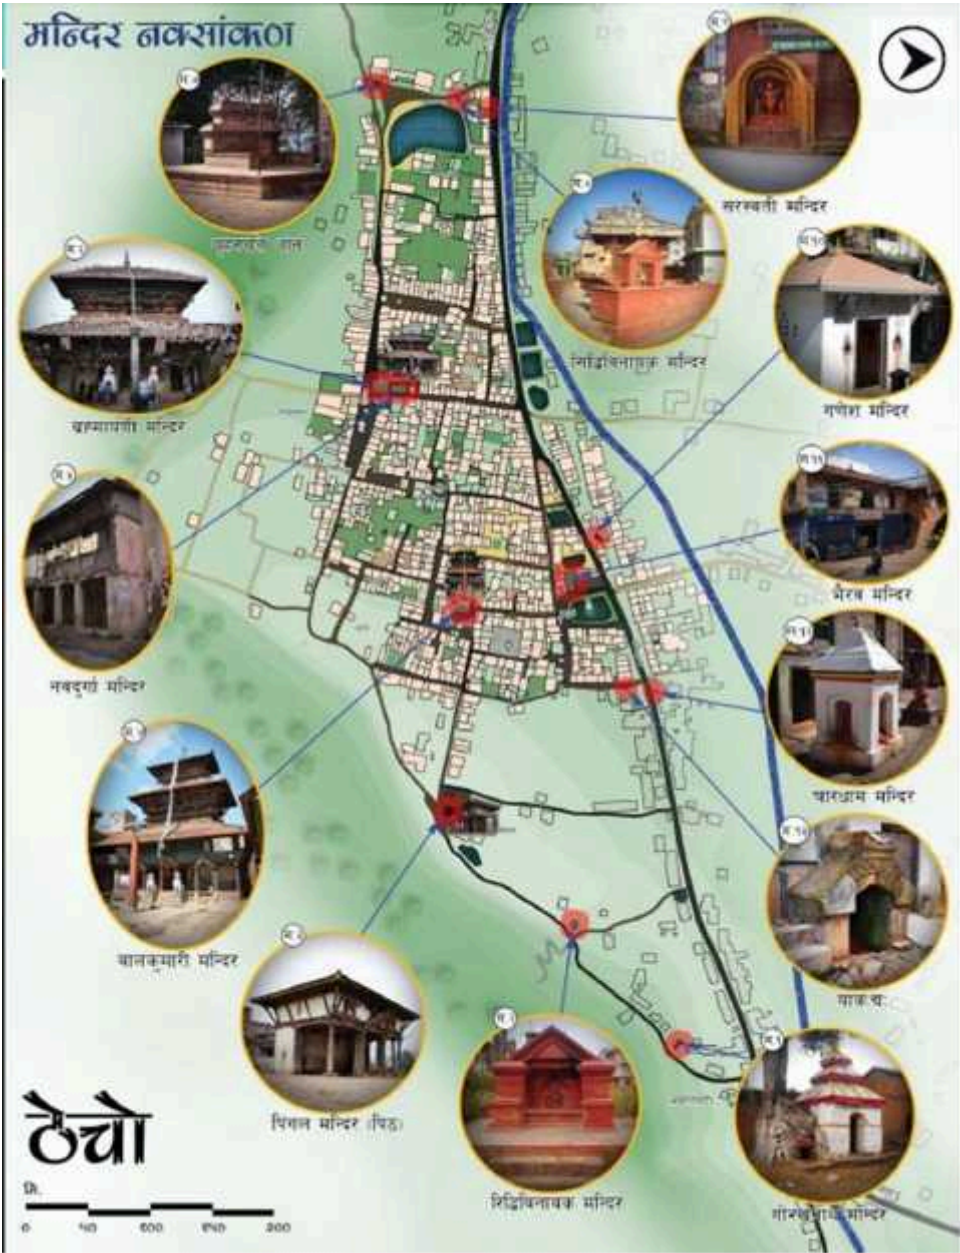

Community exercises in Thecho

Rain water Harvesting

Survey and planning on rain water harvesting

Mapping the cultural heritage

Community exercises in Thecho Heritage Eco Walk

Concept of Heritage Eco walk along forests, heritage spaces and agricultural land

Community exercises in Thecho Evacuation Areas

Evacuation spaces inside and around the settlement

Key Issues identified by the communities

- Around 20-90% of the total numbers of plots are below the standard plot size. These plots cannot access the building permit process.
- 20-40% of the households in the community do not have land title.
- Road Expansion project will affect most of the houses along the road will be fully and partially demolished.
- Accessing finance/loan !
- Cultural values, ritual need to be retained (courtyards, patis, temples, jatra routes)

Recommendations by the communities

- Construction through Clusters
- Categories of ground coverage as per plot size
- Regular access to registering land titles
- Simplify the process of land readjustment
- Support for infrastructure and open spaces
- Declaration of Heritage monument site
- Subsidy on people who construct in traditional style

Community Driven Process-Advantages

- Efficient survey (eg:185 households in a day in ward 5 at Thecho)
- Transparent (data with community)
- Public verification
- Participatory/community led
- Solutions from community (bottom-up)
- Community takes more ownership & responsibility
- Simplified financial mechanism

Way forward

- Formation of CDRR guidelines

Better Community, Better Settlement
