Case Study

Reconstruction of Ultra Poor House hold

Sushma Baniya of Gankhu, Siranchowk rural municipality ward no 6 is a 40-year-old single woman whose husband passed away 10 years ago in vehicular accident. She lives with 13-year-old son and a 16-year-old daughter. She is living in the temporary shelter constructed after her house was damaged by earthquake. Only source of income of her family is agriculture and daily wage which is used in food, education, clothing and fulfilling basic needs. She doesn't have land on her name, but she has about 3 ropani land owned by her husband right for agriculture. Even though her husband family have land, but they hesitate to transfer the land ownership to daughter in law. According to her mother in law, she is young, and she can elope leaving her children, so they will transfer land in grandson name. Apart from 3 ropani land, she does farming in other land on crop share basis.

Sushma said, "I lost my hope to construct new house and made my mind to stay in the temporary shelter with few maintenance works." Even though she received NPR 50,000 from the government for construction of house, the money was given during the festival time, which was used to buy clothes during Dashain and pay the school fee of her children. She is worried if she could not able to construct by this May 2018, they must live in the temporary shelter during the monsoon with 2 children.

After the motivation from community and ward office, support from the Care/Unification, she is motivated to construct her house and working day and night to complete house. With community support she has excavated the trenches of her house and completed the plinth level with the support of Care/Unification through their mason refresher training. She received her second tranche and after which she has continued her house reconstruction.
