

NSET BALIYO GHAR PROGRAM

Supporting Vulnerable Households to Reconstruct: Learning from Field Experience

7/13/2018

Implemented by:

National Society for Earthquake Technology-Nepal (NSET)

with funding support from

United States Agency for International Development (USAID)

Baliyo Ghar Introduction

Name of the Program: Baliyo Ghar

Life of Project: October 2015 to September 2020

Objective/Purpose: Support disaster-resilient reconstruction of houses

Goal: Support the GON's owner driven model of housing reconstruction by promoting disaster resilient construction standards and design and building back safer in earthquake affected districts

Baliyo Ghar Support for Vulnerable Household: Concept!

Blanket Technical Support to Every Household

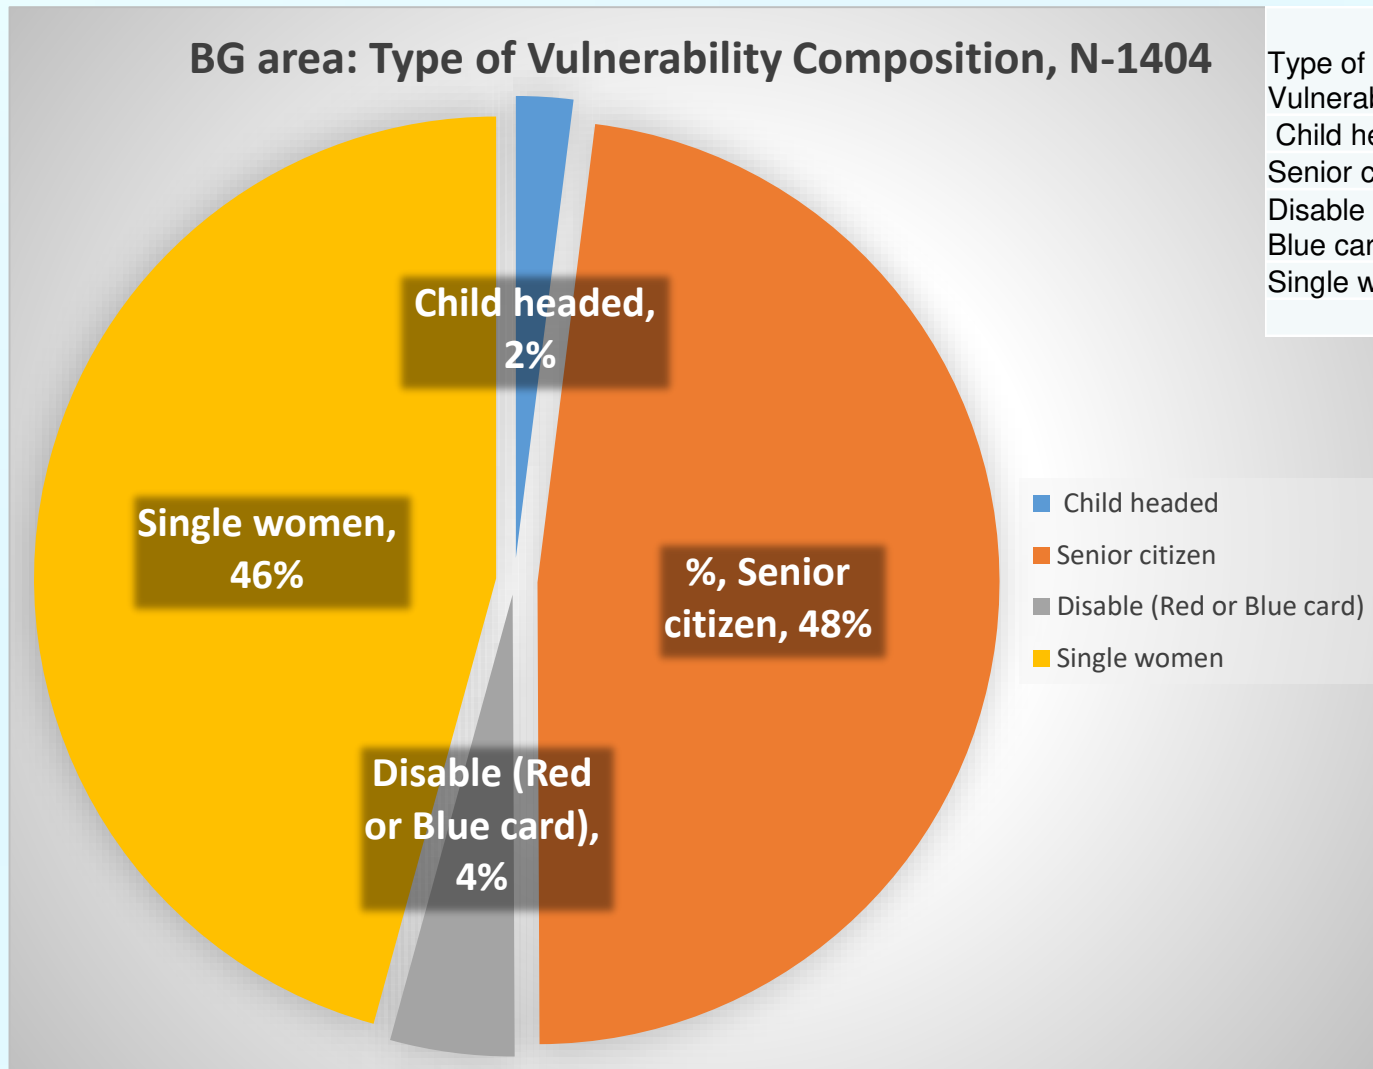

There are sufficient lessons from around the World:

- On Technology
- On Process

Under blanket technical support to every household Baliyo Ghar program is focusing to support Vulnerable household on Housing reconstruction at program implemented area.

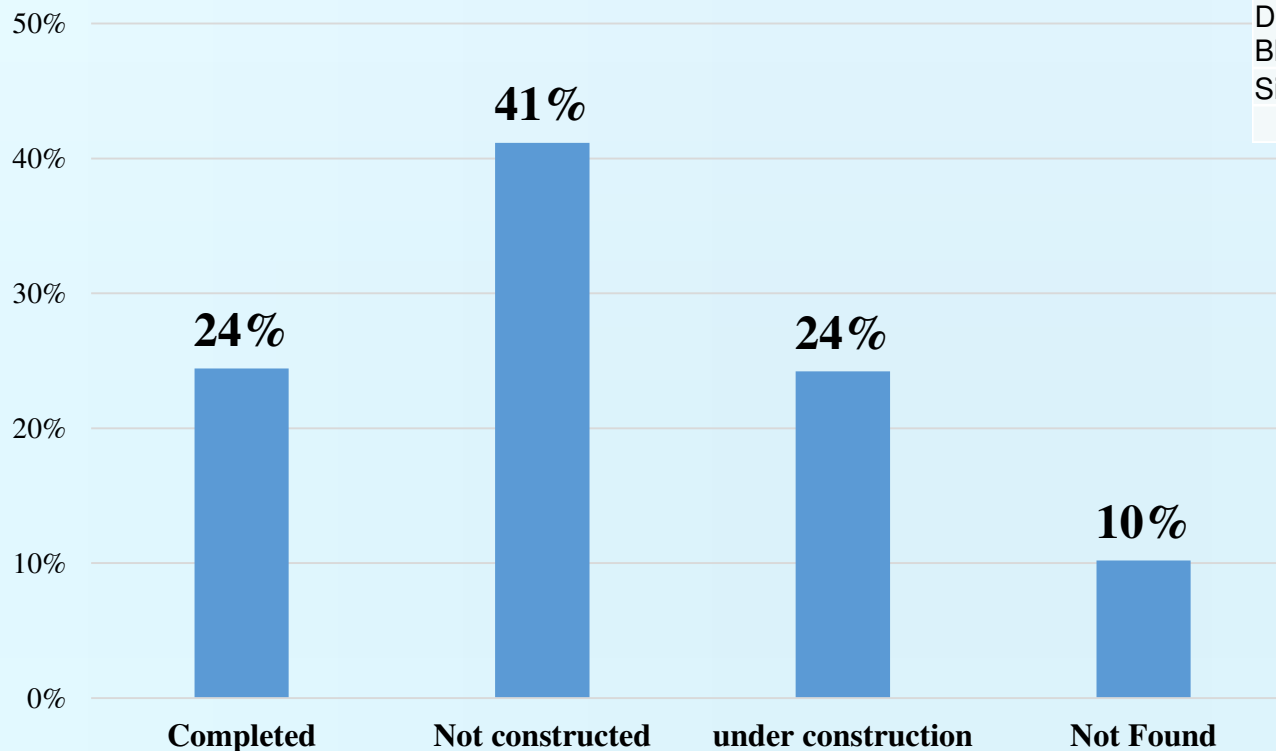

BG area: Type of Vulnerability Composition, As of 2018

Type of Vulnerability	Completed	Not completed	Under construction	Not founded	Grand Total
Child headed	11	10	6	1	28
Senior citizen	168	264	175	66	673
Disable (Red or Blue card)	16	31	12	2	61
Single women	148	273	147	74	642
Total	343	578	340	143	1404

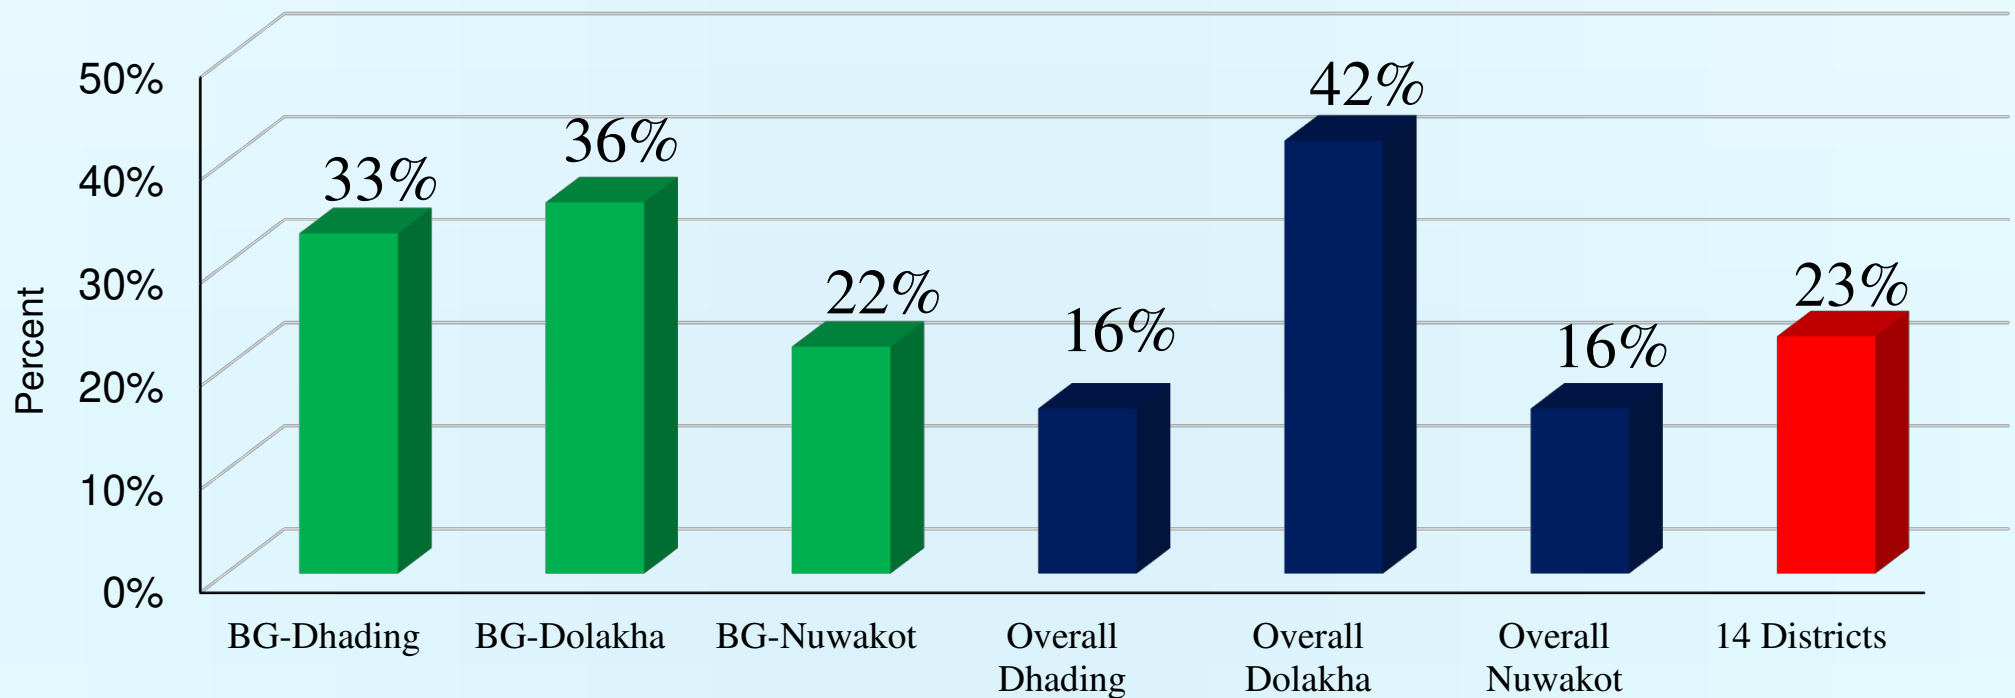

BG area: Vulnerable Population Housing Status, As of June 2018, 1st week

BG area: Vulnerable Population Housing Status, N-1404

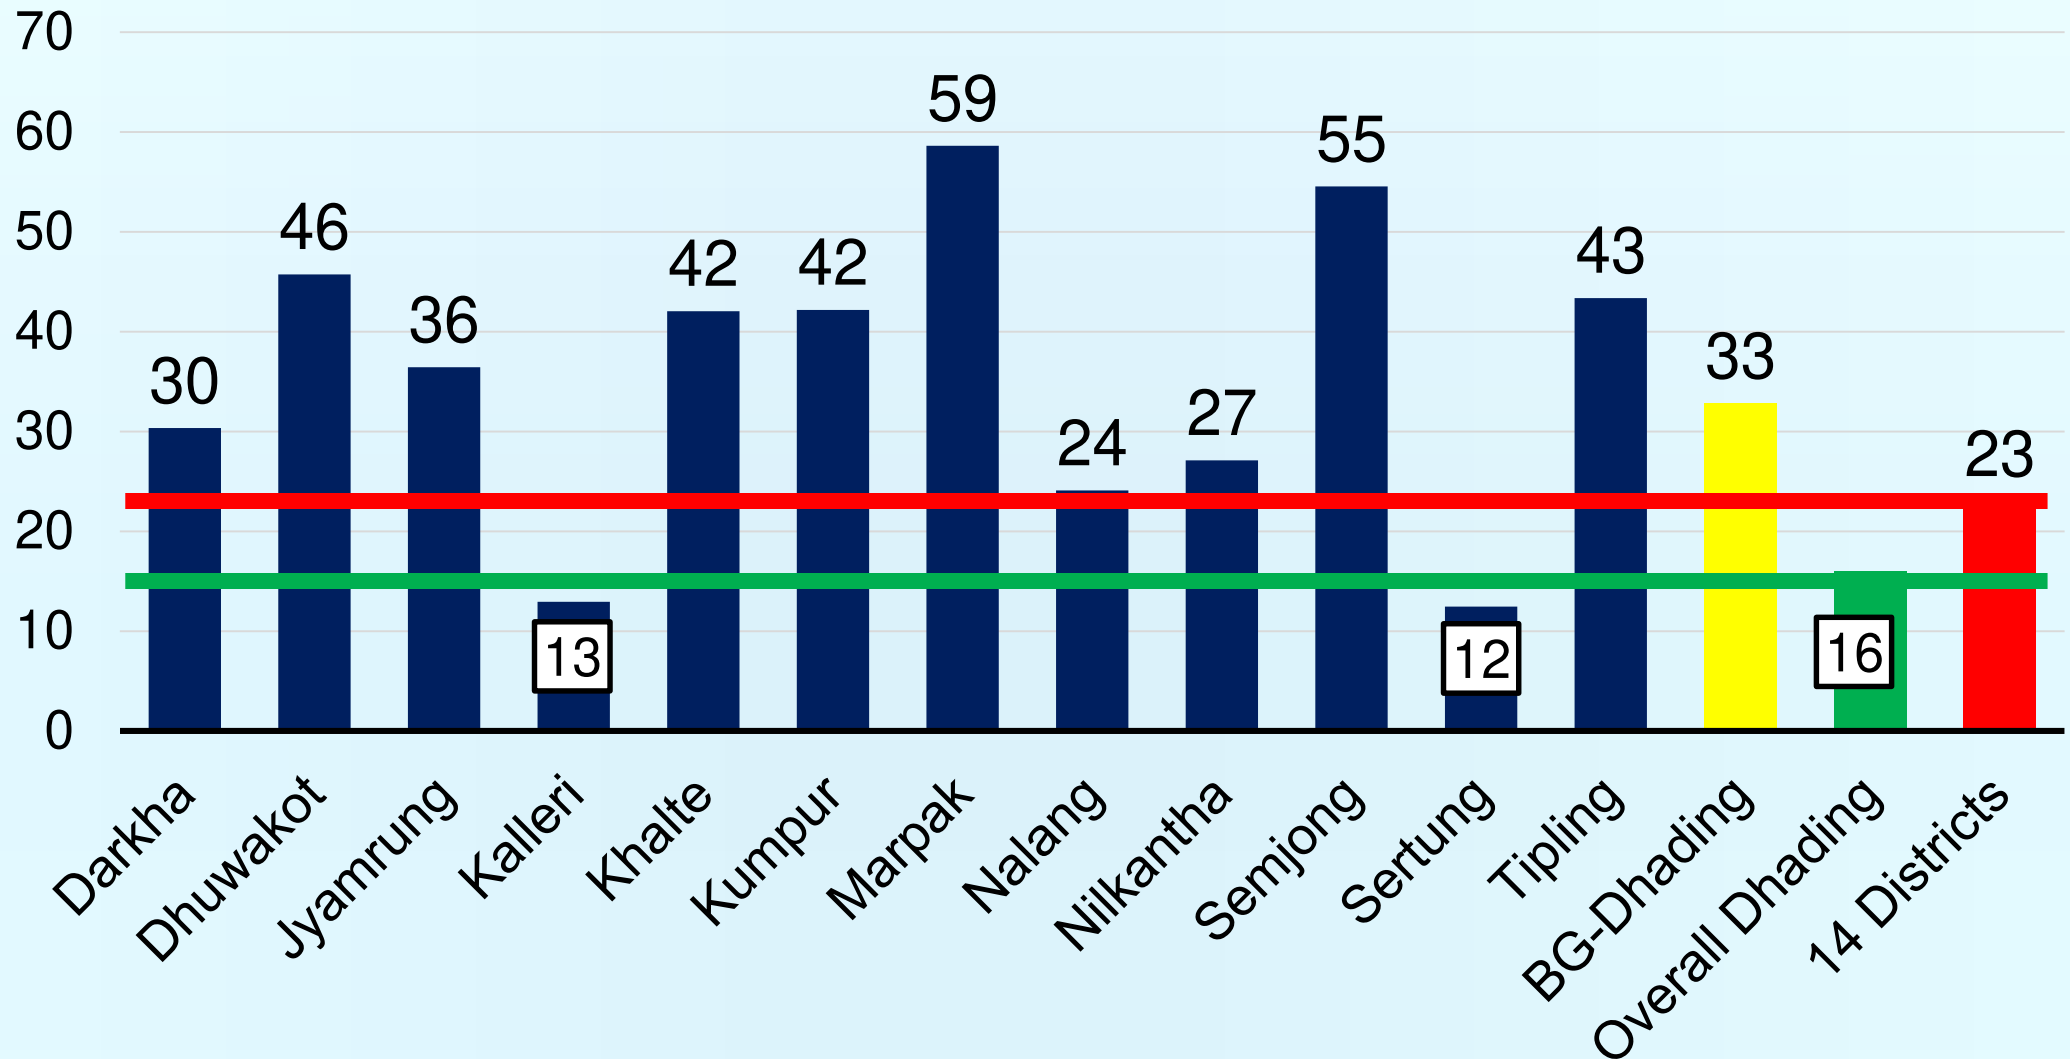

Type of Vulnerability	Completed	Not constructed	under construction	Not Found	Grand Total
Child headed	11	10	6	1	28
Senior citizen	168	264	175	66	673
Disable (Red or Blue card)	16	31	12	2	61
Single women	148	273	147	74	642
Total	343	578	340	143	1404

3rd Tranche Comparison between BG program area and overall

Data Source: DLPIU Dhading, Dolakha and Nuwakot, June 2018

3rd Tranche Comparison between BG program area and overall example from Dhading District

7/13/2018

Data Source: DLPIU Dhading,
Dolakha and Nuwakot, June 2018

Learnings

- ❑ Construction rate of Vulnerable household is not highly different than average rate of housing reconstruction in program area. (as per NRA list)
- ❑ Local authority are sharing that they can identify real vulnerable household as per criteria.
- ❑ There are few cases noticed that senior citizen identified as vulnerable are not really vulnerable (**staying with family**)
- ❑ Vulnerable Household need helping hands on material procurement and required support on financial support system of GON.

Learnings

- ❑ **Single tranches** support (300K, GON financial support) to Vulnerable household helps them to start the construction and they will get support from neighborhoods or community people for material management.
- ❑ Technical support is continuously required to vulnerable household.
- ❑ Criteria?? Of Vulnerable ?
