## NATIONAL UPDATES

### Shaken Nepal again: 6.1 magnitude earthquake rocks Dhading district

An earthquake of 6.1 magnitude is the latest tremor to hit Nepal, one of the world's most seismically active countries. According to the National Earthquake Monitoring and Research Centre, the earthquake of 6.1 magnitude with epicenter in Khari area of Dhading district was recorded at 7:39 AM on 22 October 2023. The tremor was also felt in other districts of Bagmati and Gandaki provinces. Although no casualty has been reported so far, there were landslides in various parts of the district, according to media reports.

According to reports, twenty houses were damaged and 75 more have developed cracks at Kumaltari, Jwalamukhi Rural Municipality of Dhading due to the earthquake. Aftershocks measuring over 4 magnitude were felt frequently that triggered panic among people. Detail news: [Dhading earthquake](#)

### Earthquake shakes Bajhang: Government pledges relief and reconstruction in the aftermath of dual earthquakes

Two earthquakes with epicenters in Bajhang district jolted western Nepal, Sudurpaschim Province on 3 October 2023 within a span of two hours, causing damages to several houses,

government buildings and schools. According to the National Earthquake Monitoring and Research Centre, an earthquake measuring 5.3 Richter scale was recorded at 2:40 PM and another 6.3 magnitude quake at 3:06 PM. The jolts were also felt in the adjoining district of Bajhang as well as in Kathmandu valley.

Following the Bajhang's earthquake, Hon. Prime Minister Mr. Pushpa Kamal Dahal 'Prachanda' decided to visit the quake hit areas of Bajhang. The discussions were made during a meeting of the Executive Council of NDRRMA conducted on 5 October.

During interactions with quake affected communities, PM Prachanda has pledged to provide a sum of Rs. 200 thousand to every family that lost their member due to landslide caused by the earthquake. Paying tribute to those killed in the quake-induced landslide, the PM pledged the relief amount to the victim's family while taking stock of the quake-affected area in Bajhang today, according to the PM's secretariat. A sum of 50,000 rupees will also be provided for each of the families whose houses have been completely damaged to build a temporary shelter. As an immediate relief amount, each household will be provided Rs. 15-20 thousand depending on the number of family members. #### Nepal Earthquake Response: Bajhang

##### Situation Report

This report is produced in a joint response effort of National Disaster Risk Reduction and Management Authority (NDRRMA) and Ministry of Internal Affairs and Law (MoIAL) - Sudurpashchim Province. It covers the situation of Bajhang and neighbouring districts following the earthquakes and aftershocks on 3 October 2023.

##### Highlights

- 7 districts are reported to be affected by the 5.3M, and 6.3M, earthquake and its after-shocks.
- 1 Female lost her life due to earthquake induced landslide in Bajhang.
- 18 people are injured in Bajhang, 5 in Achham, 2 in Bajura and 2 in Baitadi.
- 378 private houses are reported to be damaged.
- 7 school buildings, 1 health center, 25 government buildings are damaged in Achham, Baitadi, Bajhang, Bajura, Dadelthura, Darchula and Doti districts of Sudurpashchim Province.
- Particularly traditional buildings made from brick masonry in mud mortar and stone masonry in mud mortar have collapsed. Parts of buildings have crumbled, and several houses have developed cracks.

##### Situation Overview

On 3 October 2023, an earthquake of magnitude 5.3 M, followed by another 6.3 M, struck Bajhang district of Nepal which killed 1 people, and injured 27 others. Approximately 1,900 people (378 households) have been displaced across seven districts. The quake not only affected Bajhang district, but it severely affected other neighboring districts and the tremors were felt as far as Delhi in India. The impact of this earthquake was felt heavily in and around the epicenter of Bajhang district including the neighboring districts Achham, Baitadi, Bajura, Dadelthura, Darchula, and Doti.

As per the initial report from the Ministry of Internal Affairs and Law (MoIAL) - Sudurpashchim Province and respective districts and municipalities a total of 378 houses have been damaged. 33 public buildings that includes schools, hospitals have been damaged. Besides physical damages, hundreds of displaced families await rehabilitation and moving into

## International Day for Disaster Risk Reduction 2023 Theme: Fighting Inequality for a Resilient Future Nepal's Focus on People with Disabilities

Under the leadership of NDRRMA, the National Platform for Disaster Risk Reduction (NPDRR) organized an International Day for Disaster Risk Reduction (IDDRR), focusing on supporting People with Disabilities in disaster situations. On 13 October 2023, the event centered around the theme 'Fighting Inequality for a Resilient Future,' stressing the importance of involving persons with disabilities in disaster planning and response. It was a hybrid event of in-person and virtual attendance. The aim of this interaction program was to highlight the

unique challenges persons with disabilities face during various disasters.

The opening session was chaired by Joint Secretary of NDRRMA, Mr. Jay Narayan Acharya with the Deputy Prime Minister and Home Minister, Hon. Narayan Kaji Shrestha, gracing the event as the Chief Guest, among other notable attendees. Minister Shrestha acknowledged the critical importance of the event and emphasized that our society's preparedness level plays a crucial role in determining how severely disasters impact us. He highlighted the government's commitment to enhancing its predictive weather capabilities and shared the ongoing efforts to establish an earthquake early warning system in Western Nepal, reflecting on the recent Bajhang earthquake.

In the latter part of the program, a technical session was conducted where organizations that work for 'persons with disabilities' were trained on how to gather and input crucial data into the BIPAD Portal. Mr. Sachin Malego, Information Management Officer from NHSRP facilitated the session on behalf of NDRRMA. This step is pivotal in ensuring collaboration with local governments, aiming to facilitate a system that ensures the needs and challenges faced by persons with disabilities so that they are addressed efficiently during calamitous events. The underlying ambition of this initiative is to pave a path where every individual, especially those with disabilities, is safeguarded and supported during crises. Detail news: [IDDRR 2023 celebrated](#)

## 92 people killed in natural disaster incidents during this monsoon

Ninety-two (92) people lost their lives in the natural disaster-related incidents across the country during monsoon this year. Similarly, 30 people have gone missing and 168 sustained injuries in such incidents. Under Secretary and Spokesperson, Mr. Dhruva Bahadur Khadka of NDRRMA said the highest incidents of landslide occurred during this monsoon. In a press meet organized by the Authority on 17 October 2023, information on 459 incidents of landslide took place in this monsoon season along with 142 incidents of flooding, 168 of heavy rainfall and 113 incidents of lightning were reported. This year's monsoon had receded from Nepal on October 15 marking a delay of 13 days and the monsoon lasted in the country for 124 days. Although less rainfall had taken place in the country this year, landslides and floods following heavy rainfall took place in many places causing heavy destruction. Detail news: [Incidents caused by monsoon this year](#)

## The women-centric and climate responsive urban development initiatives in Nepal

The 'Cities for Women' Project in Nepal aims to create climate-responsive and inclusive public spaces in five Nepalese municipalities by strengthening the systems that plan and implement municipal public infrastructure. Launched in October 2023, and funded by the Delegation of European Union in Nepal, the four-year project will be implemented in partnership with United

## National Housing and Settlements Resilience Platform, Nepal

Nations Office for Project Services (UNOPS Nepal), UN-Habitat, and the Ministry of Urban Development of Nepal (MoUD) and Ministry of Federal Affairs and General Administration (MoFAGA) in the municipalities of Sunwal, Tansen, Dhangadi, Birendranagar, and Chandragiri.

Operating at both national and local levels, this project aims to boost the demand for gender-responsive, climate-resilient public spaces, produce tangible evidence through participatory public space projects, bolster municipalities' urban planning and design capabilities, and offer policy review recommendations by assessing the existing legal framework. More information: [Cities4Women](#)

### Strengthening Resilience and Recovery Through Advancing Equality in Urban Development

The Ministry of Urban Development/Department of Urban Development and Building Construction (MoUD/DUDBC) and UN Habitat Nepal, in collaboration with the various stakeholders working in the field of housing and urban development organized a national workshop to mark this year's World Habitat Day with the theme "Resilient Urban Economies: Cities as Drivers of Growth & Recovery" on 2 October 2023 in Kathmandu. Hon. Minister for Urban Development Ms. Sita Gurung launched the revised "Gender Equality & Social Inclusion Operational Guideline" of the Ministry, on this occasion of Habitat Day on 2 October 2023. Under the leadership of Urban Development Division- MoUD, UN Habitat collaborated and engaged with the wider stakeholders during the revision process. The Guideline aims to establish a gender responsive and socially inclusive approach in planning, designing and implementing urban development projects within MoUD and the line agencies - to ensure access of women, children, senior citizen, minorities, poor, vulnerable and persons with disabilities to resources, opportunities and benefits from the programs/ projects and services of the Ministry.

## PARTNERS' UPDATES

**RSLUP datasets for risk-informed planning and data-driven decision making**

## National Housing and Settlements Resilience Platform, Nepal

Youth Innovation Lab (YI-Lab) organized a series of physical workshops on Risk Sensitive Land Use Planning (RSLUP) for informed planning and data-driven decision-making. These workshops took place from October 9 to 18, 2023, in eight municipalities that are part of the "Consolidation and Institutionalization of BIPAD Portal at the Federal and Municipal Level " project, funded by USAID's Tayar Nepal. The participating municipalities included Bhimeshwor Municipality, Neelakantha Municipality, Rajapur Municipality, Tulsipur Sub-Metropolitan City, Birendranagar Municipality, Dullu Municipality, Lamkichuha Municipality, and Godawari Municipality, all of which are Tayar partner municipalities. These areas frequently experienced floods in the low-lying regions and landslides in hilly areas.

The purpose of the workshops was to introduce participants to RSLUP and its datasets, building upon the QGIS training provided to Planning Officers, IT Officers, and DRR Focal Persons in July-August 2023 by YI-Lab. The workshops also included discussions about the practical use of RSLUP datasets in risk-informed planning. Moreover, they aimed to sensitize participants to the application of RSLUP datasets in aligning with risk-informed approaches for annual budgeting, policy formulation, planning, and decision-making.

The workshops were attended by key officials, including Mayors, Deputy Mayors, CAOs, DRR Focal Persons, IT Officers, ward representatives, Planning Officers, and department heads, among other municipal staff. With access to RSLUP datasets, municipal leaders and planning officers expressed confidence in implementing risk-informed planning, which would contribute to infrastructure development and the formulation of new plans and policies to encourage residents to build infrastructure in areas less prone to risks. For example, Rajapur Municipality, facing the highest risk of flood hazards, is planning to construct embankments in flood-prone areas in the upcoming fiscal year to enhance protection.

During the workshops, some concerns were raised regarding the unpredictability of hazards due to climate change, leading to potential loss of lives and economic damages. To address these concerns, municipal representatives suggested improving risk-informed planning and data-driven decision-making by overlaying RSLUP datasets on

cadastral maps. This approach would enable municipalities to make the most effective use of their land resources despite the hazards they face. For further information, contact Mr. Pradip Khatiwada, Executive Director of YI-Lab, at [pradip@youthinnovationlab.org](mailto:pradip@youthinnovationlab.org)

### **On-the-job (OJT) training ongoing on safer building construction in Banke**

Through On-the-job (OJT) training approach at Rapti Sonari and Duduwa Rural Municipalities (Banke district), masons and carpenters have completed raised plinth constructed from stone cement masonry in Rapti Sonari and brick cement masonry in Duduwa. Carpenters from Rapti Sonari constructed light timber-frame superstructure in Rapti Sonari and in Duduwa light bamboo-frame superstructure is planned. Both of these demonstration houses are intended to be resistant to earthquakes and floods. This

Safer Building Construction program is supported by Homes and Communities Project/CRS Nepal and implemented by local partner- Caritas Nepal together with Department of Urban Development and Building Construction (DUDBC) Banke district.

The main goal of OJT mason and carpenters training started from August 2023 aimed to train masons and carpenters on flood and earthquake resilient housing construction. The training content

included theory and practical on improved stone and brick masonry techniques following DUDBC standard curriculum. Furthermore, the training has instilled knowledge and skills on upscaling better joinery and connection of building elements to withstand flood and earthquake. OJT plans to also impart practical knowledge of lime stabilized soil wall plasters and flood screed which are resistant to flood. For more information, contact: Mr. Rupesh Shrestha, Technical Coordinator-Flood Resilient Housing Solutions/CRS. Email: [rupesh.shrestha@crs.org](mailto:rupesh.shrestha@crs.org)

### **Karjanha Municipality's dalit community embraces safe homes**

Through a collaborative effort involving the Karjanha Municipality (Siraha district) in Madhesh Province, the Hilti Foundation and Habitat for Humanity Nepal, with the dedication of the homeowners and the support of the implementing local partner organization, Bhawan Integrated Development Centre, a total of 55 homes were officially handed over to the homeowners. Out of 55 households of Dalit community in said areas of Karjanha area, 45 of them were displaced by the heavy flood disaster that occurred in 2017.

The occasion was graced by the presence of Johann Barr, who serves as the Director of Affordable Housing and Technology and is a member of the Executive Board at the Hilti Foundation. Along with this, the event witnessed the presence of representatives from the Government of Nepal as well as from municipal bodies, partner organizations and other concerned stakeholders. For more information, contact: Rupendra Basnet, DRR Program Manager, Habitat for Humanity Nepal. Email: [RBasnet@habitatnepal.org](mailto:RBasnet@habitatnepal.org)

## **NHSRP's PROVINCIAL ENGAGEMENTS**

### **UPDATES FROM BAGMATI**

#### **Review of disaster management initiatives in Dolakha**

A discussion program on 'Progress review of Disaster Management' was conducted in Dolakha district on 12 October, in partnership with Ministry of Internal Affairs and Law (MoIAL) Bagmati

province, through coordination forwarded by NHSRP Bagmati province team with District Coordination Committee (DCC) and District Administration Office (DAO) Dolakha. The program aimed to familiarize the participants with the NDRRMA's Reconstruction Guideline and Reconstruction MIS Tools for taking forward disaster affected housing reconstruction. The participants mainly belonged to five local levels of Dolakha district, along with stakeholders representing various agencies government & non-govt. agencies. The participants engrossed in discussing the issues and challenges of disaster risk reduction in Dolakha. The NHSRP team laid smooth technical execution of sessions, enabling the participants to gain useful knowledge and skills related to the reconstruction efforts in Dolakha.

## UPDATES FROM GANDAKI

### Enhancing capacities of stakeholders and frontlines in building code

Technical support was offered by the NHSRP Gandaki team in Tanahun district, specifically in Bandipur Rural Municipality, to kickstart a new application on NDRRMA's Reconstruction MIS tool. This support was also extended to various municipal bodies in Tanahun and Gorkha districts, focusing primarily on the inspection process of reconstructed houses. Additionally, discussions with municipal officials and technical staff took place in Rupa Rural Municipality (Kaski district) to implement building code measures. To further this effort, the NHSRP Gandaki team was approached for assistance in developing municipal-level building bylaws and technical guidelines for safer house reconstruction.

## UPDATES FROM LUMBINI

### Strategic collaboration in the municipal DRRM Bylaws

Technical support is being laid to pilot municipalities by the NHSRP team in Lumbini province, namely - Resunga Municipality (Gulmi district) and Maharajgunj Municipality (Kapilvastu district) to develop Road and Building Construction Guidelines. The guidelines ensure that various elements pertinent to construction projects are met. These ten elements include – Safety, Quality Assurance, Standardization, Environmental Protection, Cost-Effectiveness, Legal and Regulatory Compliance, Public Welfare, Aesthetics, Resilience, Insurance and Financing.

Guidelines set several quality standards that help to ensure the quality, safety, resilience, structural integrity, environmental considerations, durability, community service, well-being of the public and longevity of constructed roads and buildings. These elements are prioritized essential for infrastructure investments to provide significant value over the long term.

## UPDATES FROM KOSHI

### Strengthened capacities of local governments in housing reconstruction

The Maiwakhola Rural Municipality (Taplejung district) has initiated a survey of landslide affected 65 households of Odak and Tamrang areas through BIPAD Survey App according to NDRRMA's Reconstruction Guidelines. The frontliner technical personnels are involved in this survey that also tracked the GPS locations of the surveyed households through door-to-door visits. The survey will contribute to the relocation and reconstruction for accessing NDRRMA's reconstruction grant. The survey has been possible through the technical support and orientation of the Reconstruction Guidelines provided by the NHSRP Koshi team.

### Technical support for DRRM system effectiveness in municipal bodies

The NHSRP Koshi team continued providing technical support to the DRR focal person of DAO Dhankuta and Dhankuta Municipality, the DAO, Dhankuta for the release of final housing tranche to four beneficiaries of Dhankuta Municipality. This makes a total of eight beneficiaries have access to the third & final tranche as per NDRRMA's Reconstruction Guidelines. Furthermore, the capacitated municipal bodies and district agencies are also actively working to release funds to remaining beneficiaries who have successfully completed final inspection of their reconstructed houses.

## UPDATES FROM MADHESH

### Strengthening capacities of local governments in housing reconstruction

NHSRP Madhesh team organized an orientation program in Pokhariya Municipality (Parsa district) on 5 October with a purpose of providing guidance on NDRRMA's grant disbursement guidelines for monsoon/fire induced disaster affected private housing reconstruction and rehabilitation, as well as the Reconstruction MIS, BIPAD Survey Tool. Practical training sessions were conducted for participants including technical officials and the DRR focal person. Additionally, during field based visit, the NHSRP team provided technical support to the DRR focal person in using NDRRMA's disaster affected beneficiary's survey apps and RMIS tools for surveying fire/flood-affected households in Ward 6, 7, and 9. Four houses were surveyed in total and households were issued identification numbers (nissa).

### Technical support for DRRM system effectiveness to municipal bodies

In Dhanusha district, technical support was extended from the NHSRP Madhesh team to verify the list of beneficiaries of Kamala Municipality by utilizing the NDRRMA's Reconstruction MIS tool. A total

of five beneficiaries were identified in Kamala Municipality through a survey conducted using the BIPAD Apps. Similarly, assessment on the Building Code Implementation (BCI) was conducted in Kalaiya Sub Metropolitan City (Bara district). Technical personnel were consulted thoroughly to track BCI status based on the records of the municipality.

## UPDATES FROM SUDURPASCHIM

### Collaborative efforts in Bajhang and Bajura for enhancing disaster resilience

In coordination with the Provincial Ministry, DAOs and Municipalities, NDRRMA (lead by Under Secretary) along with the NHSRP team has done an interaction meeting with the government agencies in Bajhang & Bajura districts, on 13 October and 14 October. Field-based monitoring of affected municipalities in Bajhang & Bajura districts were done in coordination & collaboration with DAOs & municipalities. The team discussed the existing policy measures, provisions and guidelines on disaster affected housing reconstruction. Similarly, roles & responsibilities of LDMCs/DDMCs were also discussed. Detailed damage assessment (DDA) mechanisms of private houses and public buildings were also shared.

## UPDATES FROM KARNALI

### Strengthening capacities of local governments in housing reconstruction

Orientation program on NDRRMA's Reconstruction Guidelines along with RMIS and BIPAD Survey Apps was conducted in Bheriganga Municipality (Surkhet district) on 12 October. The program aimed to familiarize the participants with the Guideline and updated Tools for undertaking disaster affected housing reconstruction in areas of Bheriganga. The NHSRP Karnali team laid smooth execution of technical sessions, enabling the participants to gain useful knowledge and skills related to the reconstruction efforts. A total of 28 participants attended the program, mainly including local officials and technical officers.

## Checklist on Greening the Shelter

### Shelter Environmental Checklist Greening the Shelter

This checklist has been prepared to encourage the use of green and sustainable shelter and settlement approaches in local level planning and implementation. The collected information will act as guidance to further plan for a greener and climate friendly response and reconstruction from local and provincial level by providing status of the existing or planned buildings in reference to environment friendly, greener, and more sustainable practices.

#### Objectives of the Checklist:

1. Assess the incorporation of environmental criteria focusing on Green Shelter (considering environmental impacts) for buildings and settlement.
2. Recommend practical solutions to make buildings greener and climate friendly with lesser environmental impact during construction and operations.

### Shelter Environmental Checklist Greening the Shelter

#### H. Good Construction Practices:

H.1 Has proper site protection work been designed for the construction sites?

☐ Yes ☐ No ☐ Not Applicable

H.2 Have proper health and safety practices guidelines been established for construction sites?

☐ Yes ☐ No ☐ Not Applicable

H.3 Has training been provided to masons and carpenters on the best construction practices for health, safety, and environment?

☐ Yes ☐ No ☐ Not Applicable

H.4 Are there any proper storage facilities segregated as hazardous, flammable, toxic, etc. materials in the construction site?

☐ Yes ☐ No ☐ Not Applicable

H.4 Are there any preventative measures incorporated into the design of buildings to protect against moisture damage and termite infestation, such as overhangs, porches, drainage systems, and barriers specifically designed for termites?

☐ Yes ☐ No ☐ Not Applicable

#### I. Monitoring and Evaluation:

I.1 Does the construction and building design comply with the existing National Building Code and bylaws?

☐ Yes ☐ No ☐ Not Applicable

I.2 Has legal and sustainable sourcing of materials been carried out?

☐ Yes ☐ No ☐ Not Applicable

I.3 Have health and safety guidelines been implemented through Health and Safety, Environmental checks monthly?

☐ Yes ☐ No ☐ Not Applicable

I.4 Have community audits and monitoring for construction quality and environmental impacts been carried out in regular intervals?

☐ Yes ☐ No ☐ Not Applicable

I.5 Has Community feedback been collected and incorporated into design, construction, and monitoring?

☐ Yes ☐ No ☐ Not Applicable

I.6 Have the measures incorporated in the above sections been evaluated for the effectiveness of environmental measures and their impacts?

☐ Yes ☐ No ☐ Not Applicable

I.7 Type of Feedback received from the community regarding the overall planning and construction?

☐ Positive ☐ Negative ☐ Constructive ☐ Other

Please Specify Others:

I.8 Has a mechanism been developed to document the lessons learned and incorporate the learnings into the next response?

☐ Yes ☐ No ☐ Not Applicable

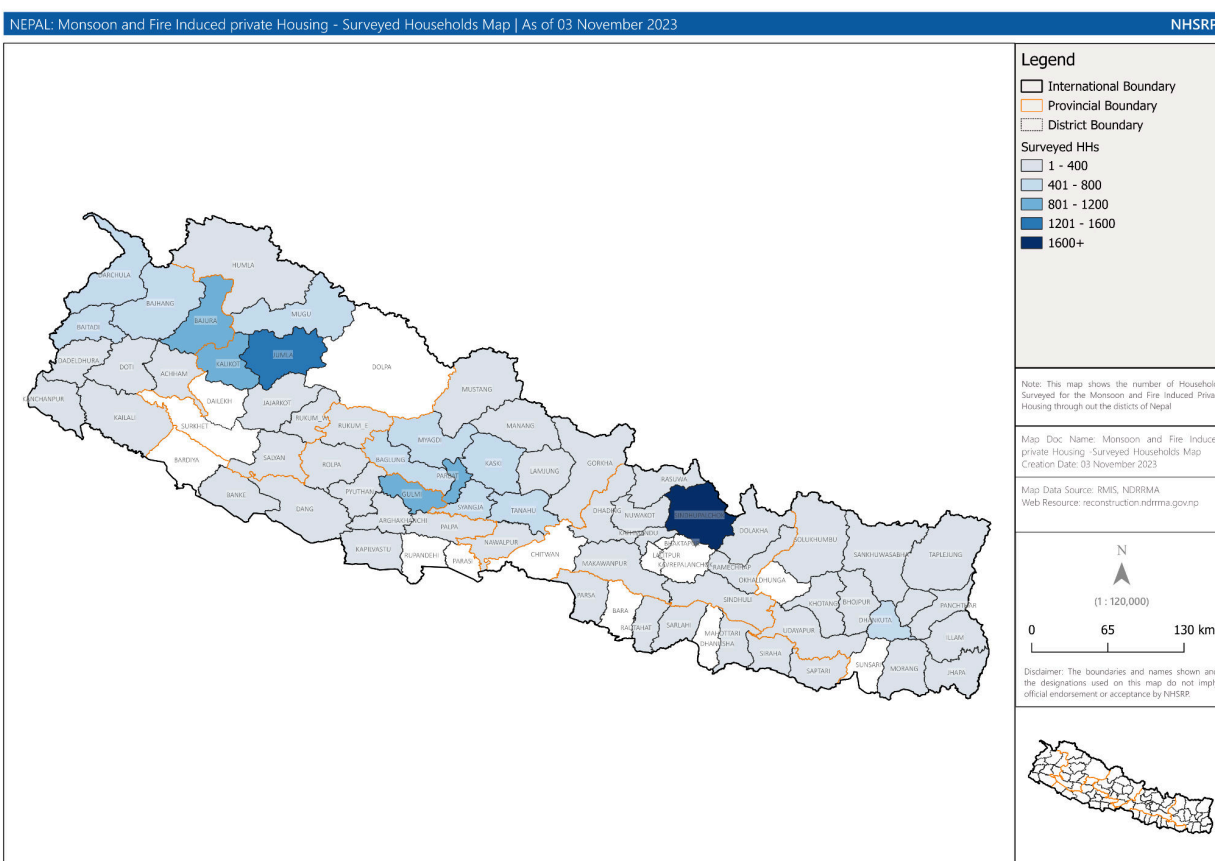

I.9 Has the project considered the steps to comprise gender and diversity in all stages such as planning, implementation, and monitoring?

☐ Yes ☐ No ☐ Not Applicable

About Courses Certifications Partnerships Blog

**FREE ONLINE LEARNING**

**HUMANITARIAN SHELTER AND SETTLEMENTS ONLINE COURSE**

This free course by InterAction and USAID/OFDA provides an overview of the humanitarian community's shelter and settlements activities and examines trends based on past experiences. Learn how humanitarian actors can prepare to face emerging challenges and why shelter should be viewed as more than just four walls and a roof.

After you create your free DisasterReady account, search for this course to start learning.
