Progress with the disbursement of the GoN housing reconstruction and retrofit grants based on NRA, GMALI CLPIU, and Building CLPIU data from July 2016 to 29 October 2018.

Districts & Municipalities

Lato Tamang's story of recovery in Shivapuri Rural Municipality -03, Sikre, Nuwakot: Lato Tamang is 80 years old, has difficulty speaking, and has been living on his own for more than ten years. Lato survived the April 2015 earthquake but his house collapsed. He spent the next three years living in a poor quality temporary shelter. The Baliyo Ghar Program, under the National Society for Earthquake Technology-Nepal (NSET), has been implementing On the Job Training (OJT) in Sikre village. After a series of discussions with the ward committee and villagers, Lato's house was chosen to be built during the OJT training. However, Lato did not have the money needed to buy the construction materials. The Baliyo Ghar mobile team facilitated Lato to receive support from three villagers who lent him 20,000 NPRs each and construction of his house began. Lato supported the construction by carrying stones and water. When Lato received the second tranche of the GoN housing reconstruction grant he was able to repay the villagers that had lent him the money to purchase construction materials. Lato has also constructed a toilet now and is looking forward to receiving the third tranche of the government grant.

Story of retrofitting success from Manedobhan Rural Municipality, Kavrepalanchok:

Mithu Maya Lama (pictured, photo credit: UNOPS) lives in Manedobhan Rural Municipality, Kavrepalanchok and received support from UNOPS and Build Change for the retrofit of her house. Mithu's home, which was built on her own land, was partially damaged in the April 2015 earthquake. Mithu continued to run a small teashop from inside the house but lived with her family in a temporary shelter beside the house. Mithu was unsure how to proceed with repairing or rebuilding her home but after receiving information from UNOPS and Build Change engineers and social mobilisers working in the area Mithu agreed to move ahead with retrofitting her home. The retrofitting took 2.5 months to complete and Mithu is about to rent the ground floor space to a commercial bank and will move her teashop into the temporary shelter.

HRRP District Coordination Team Dhading, Weekly District Report, 12 – 25 Oct 2018

Ward No.8, Nilkantha Municipality, Dhading: a three-room house built using Compressed Stabilised Earth Blocks (CSEB). The home owner has received all three tranches of the Government housing reconstruction grant. The construction was supported by OXFAM.

[HRRP District Coordination Team Gorkha, Weekly District Report, 12 – 25 Oct 2018](#)

Ward No.5, Bhimsen Rural Municipality, Gorkha: a brick and cement mortar masonry house with RCC bands. The home owner has received all three tranches of the Government housing reconstruction grant.

[HRRP District Coordination Team Okhaldhunga, Weekly District Report, 12 – 25 Oct 2018](#)

Ward No.9, Siddhicharan Municipality, Okhaldhunga: stone in mud mortar house with an attic. RCC horizontal band provided with flexible roof. The home owner has received all three tranches of the Government housing reconstruction grant.

HRRP District Coordination Team Rasuwa, Weekly District Report, 12 – 25 Oct 2018

Ward No. 3, Aama Chhidingmo Rural Municipality, Rasuwa: initially, three single room houses belonging to three individuals. All the three home owners have received the third tranche of the Government reconstruction grant. But after receiving the third tranche, the home owners put a single/common roof making the building a single house with three rooms.

[Milijuli Nepali, BBC Media Action, Episode 1092](#): this episode is focused on stories from Baglung. The episode begins with women singers from a village in Baglung, Bishnu Kumari and Beli. They talk to Milijuli Nepali presenter, Asha Thapa about memories of the earthquake. They are still living in their houses, damaged by the earthquake, and they discuss the possibilities of seeking help from the government to improve or retrofit their homes. The presenter also talks to Beli's husband, Chandra Bahadur Karki. He talks about the process he followed to seek support for retrofitting his house and the difficulties he faced to receive support from the government. The presenter helps Chandra and his family understand the meaning of 'retrofitting' and what kind of support is available from the government to people who want to retrofit their homes. The presenter then interviews the government authorities on how the residents can seek help for retrofitting and what legal procedures they need to follow to apply for the government grant to retrofit.
