Respondents by Type of Organization

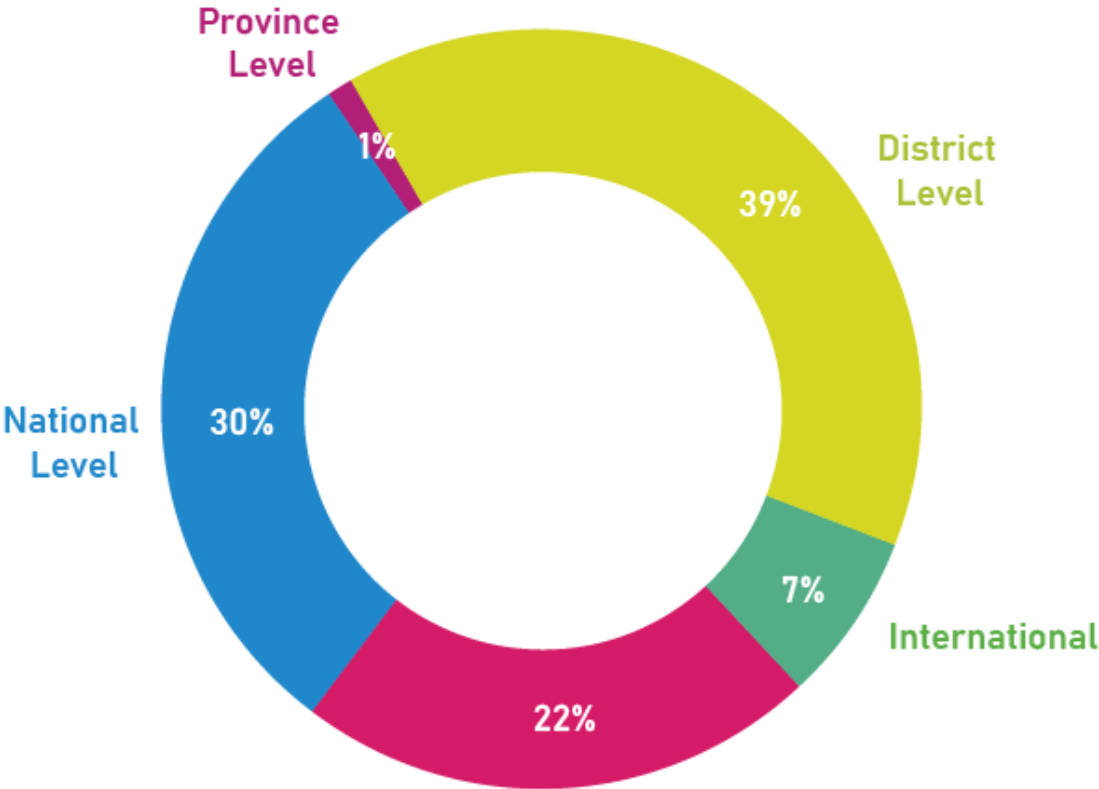

Respondents by Type of Organization

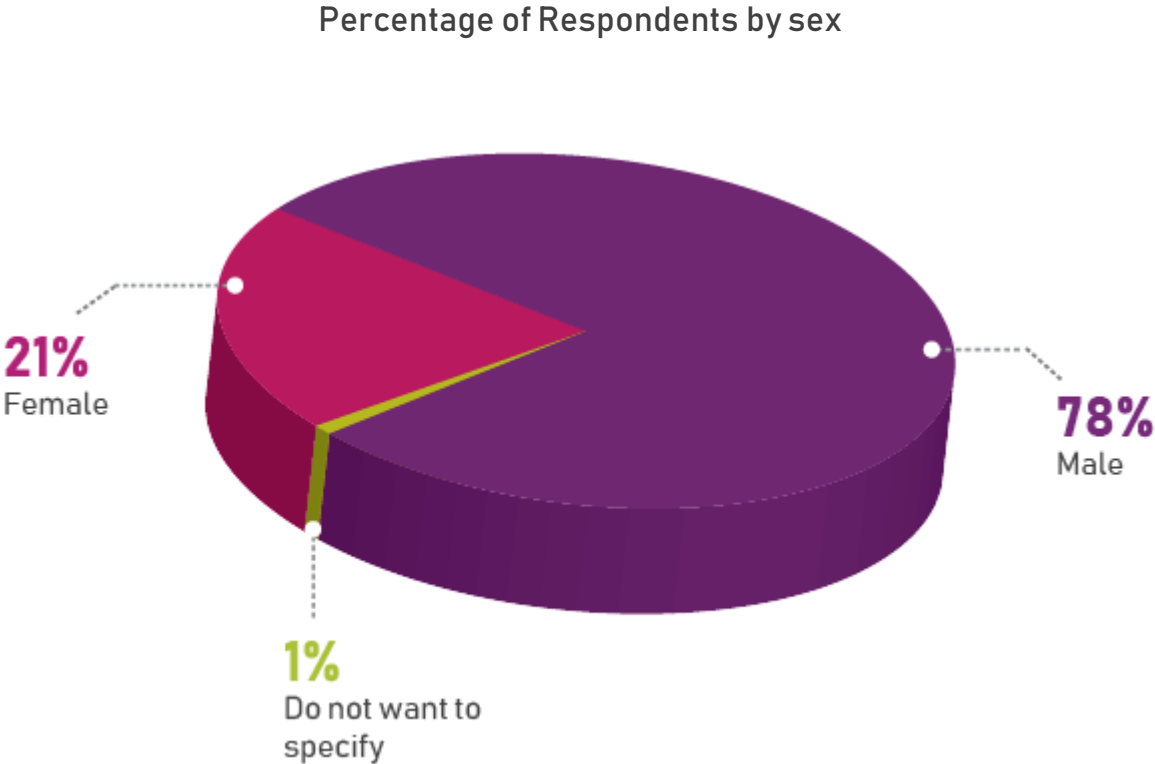

Total Respondents in the PSS Survey

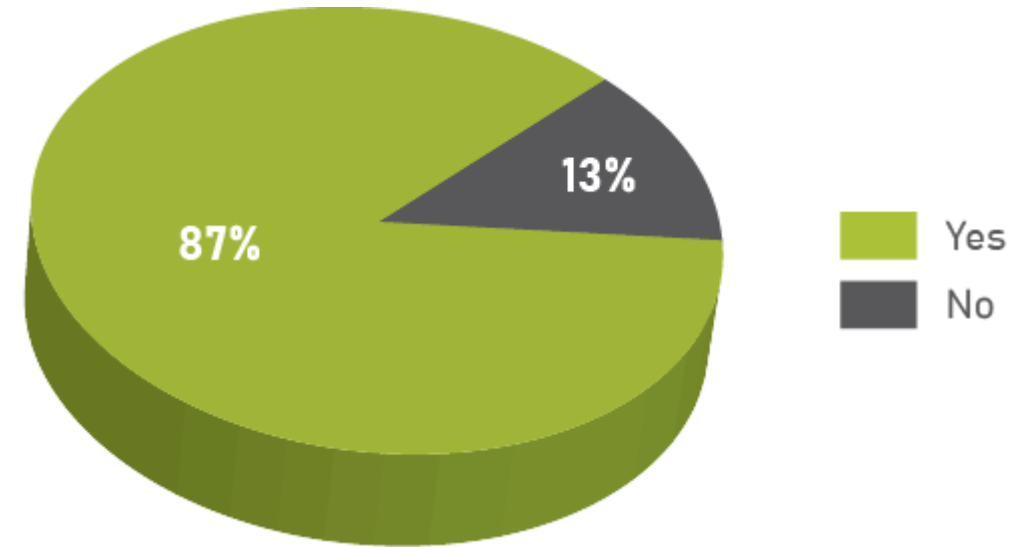

Respondents Disaggregation by Working Location & Sex

Respondents by Working Location

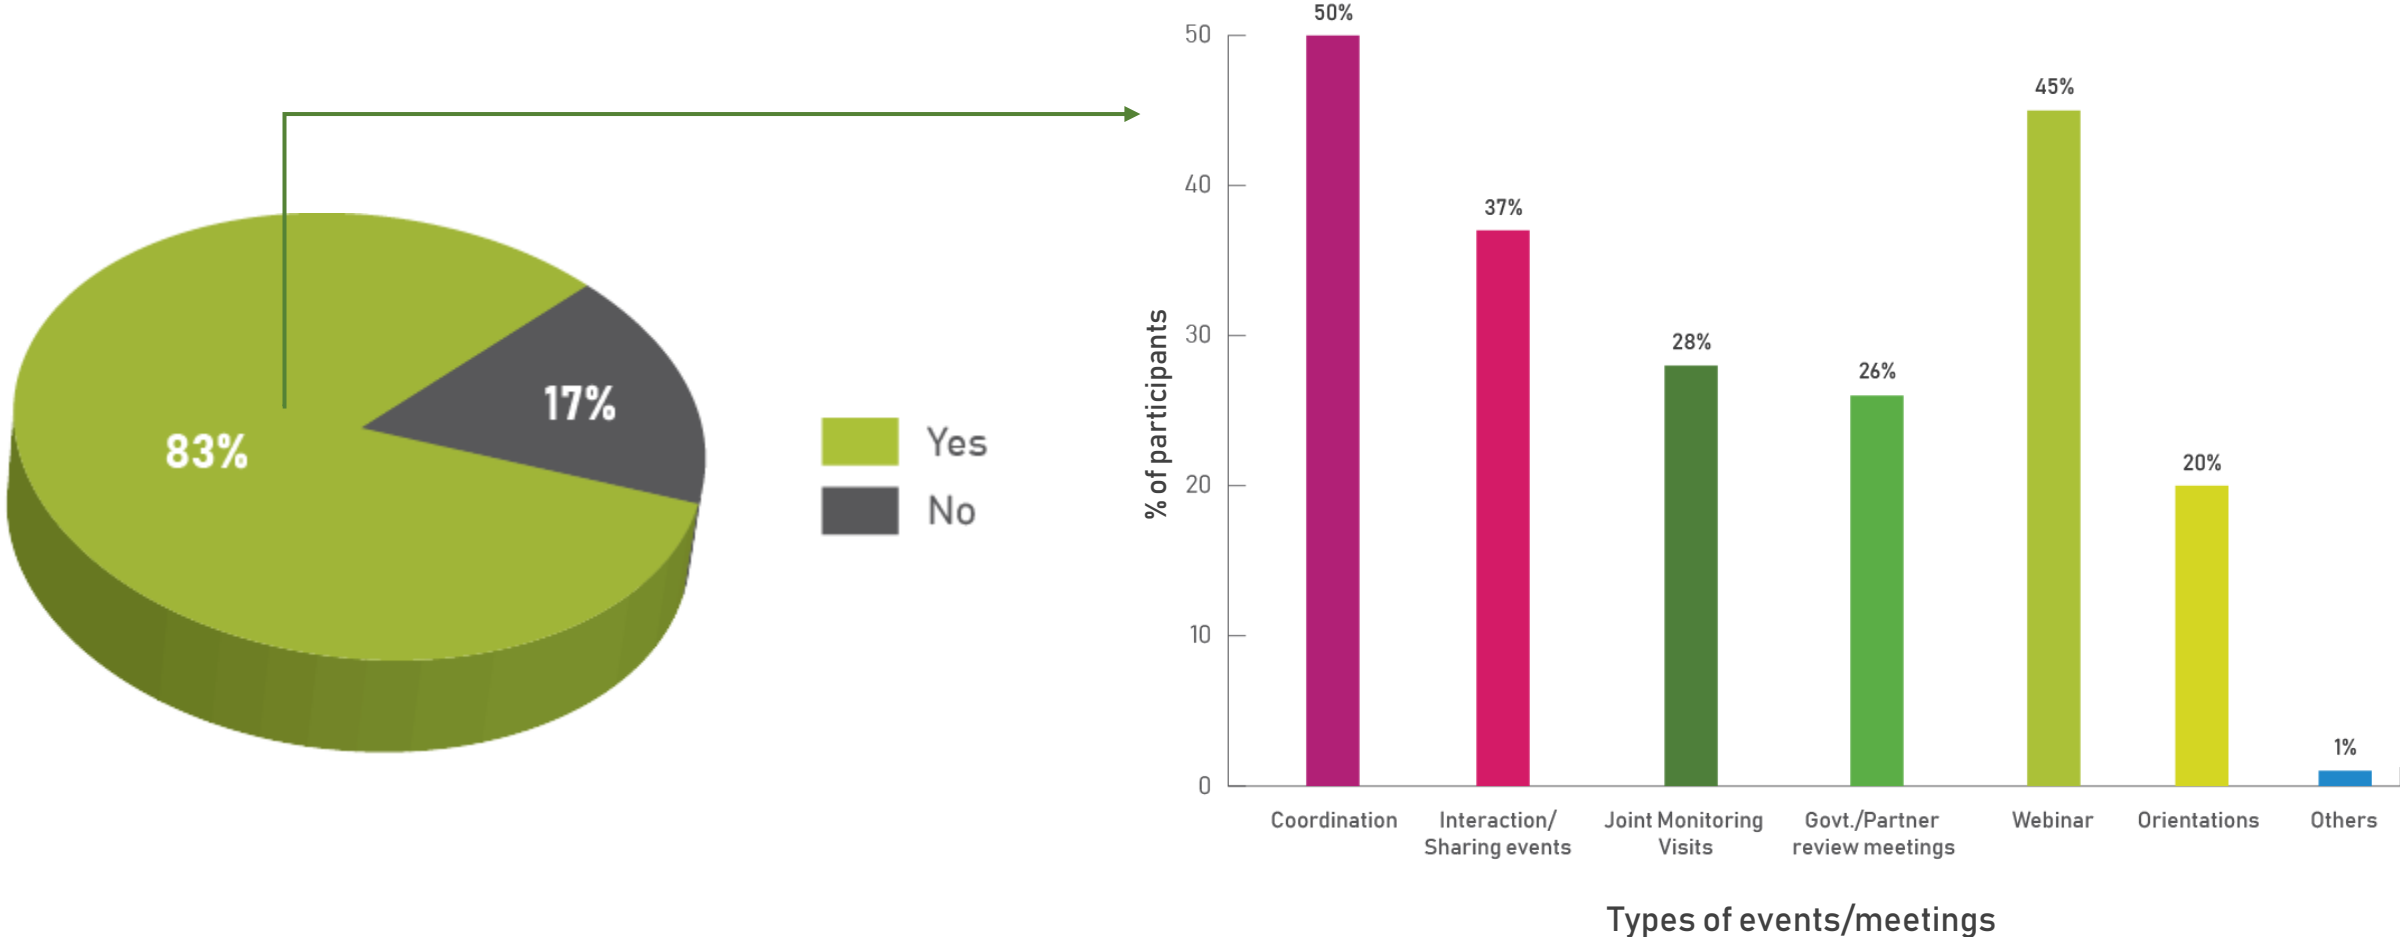

% of Reconstruction Stakeholders stated that they have improved capacity for decision making to support vulnerable households

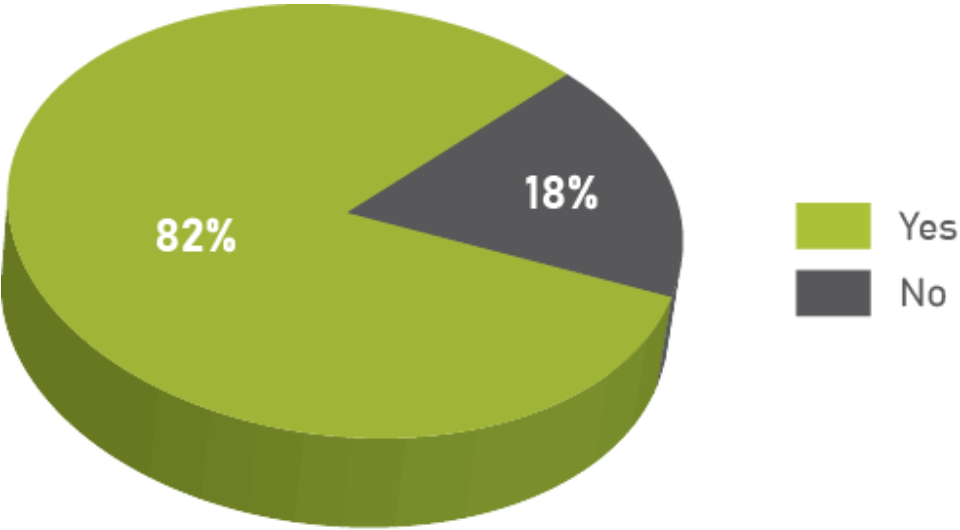

% of reconstruction stakeholders involved at least one of the communication mechanisms

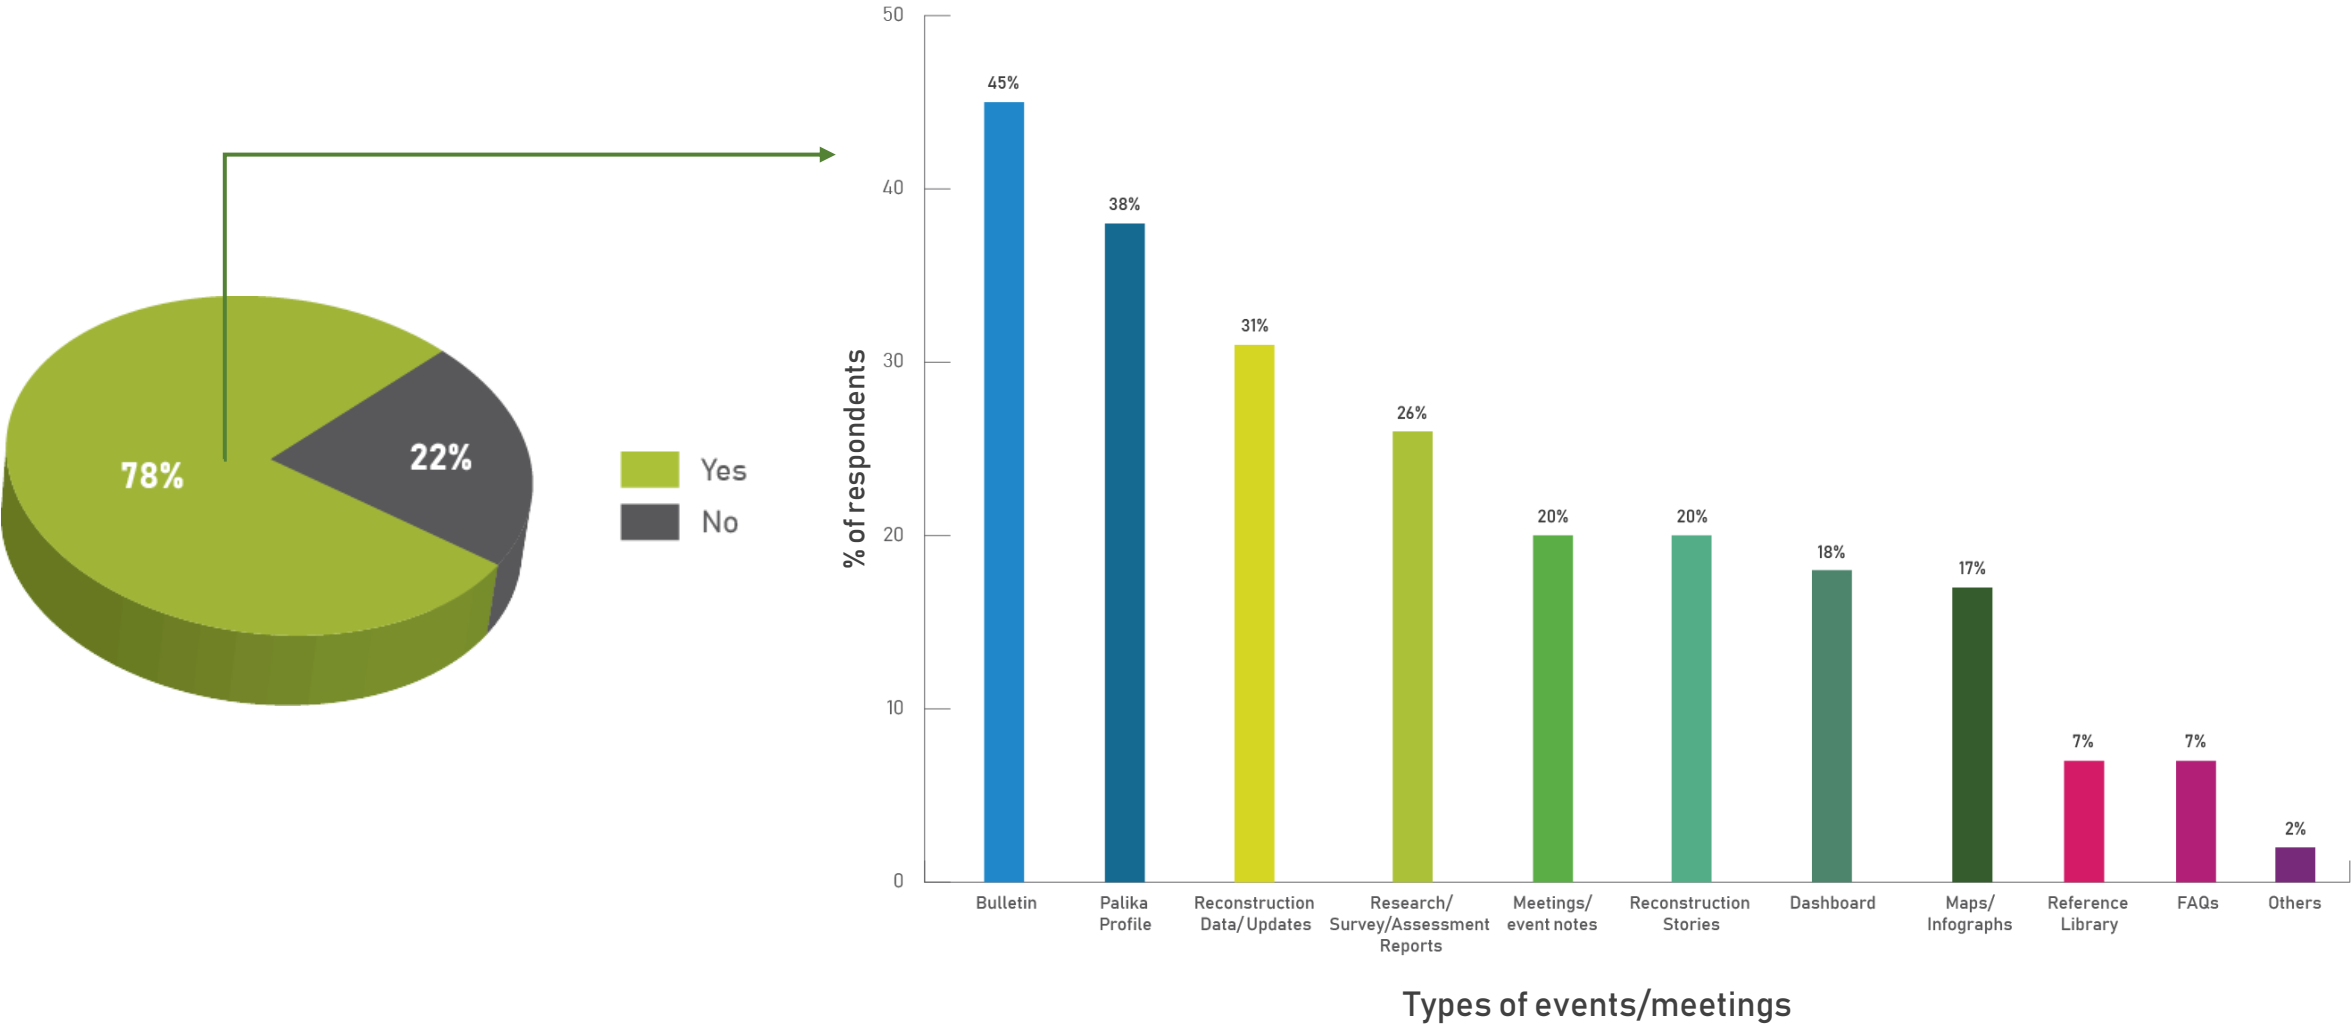

Your organization have used any of these tools to access information on reconstruction and recovery

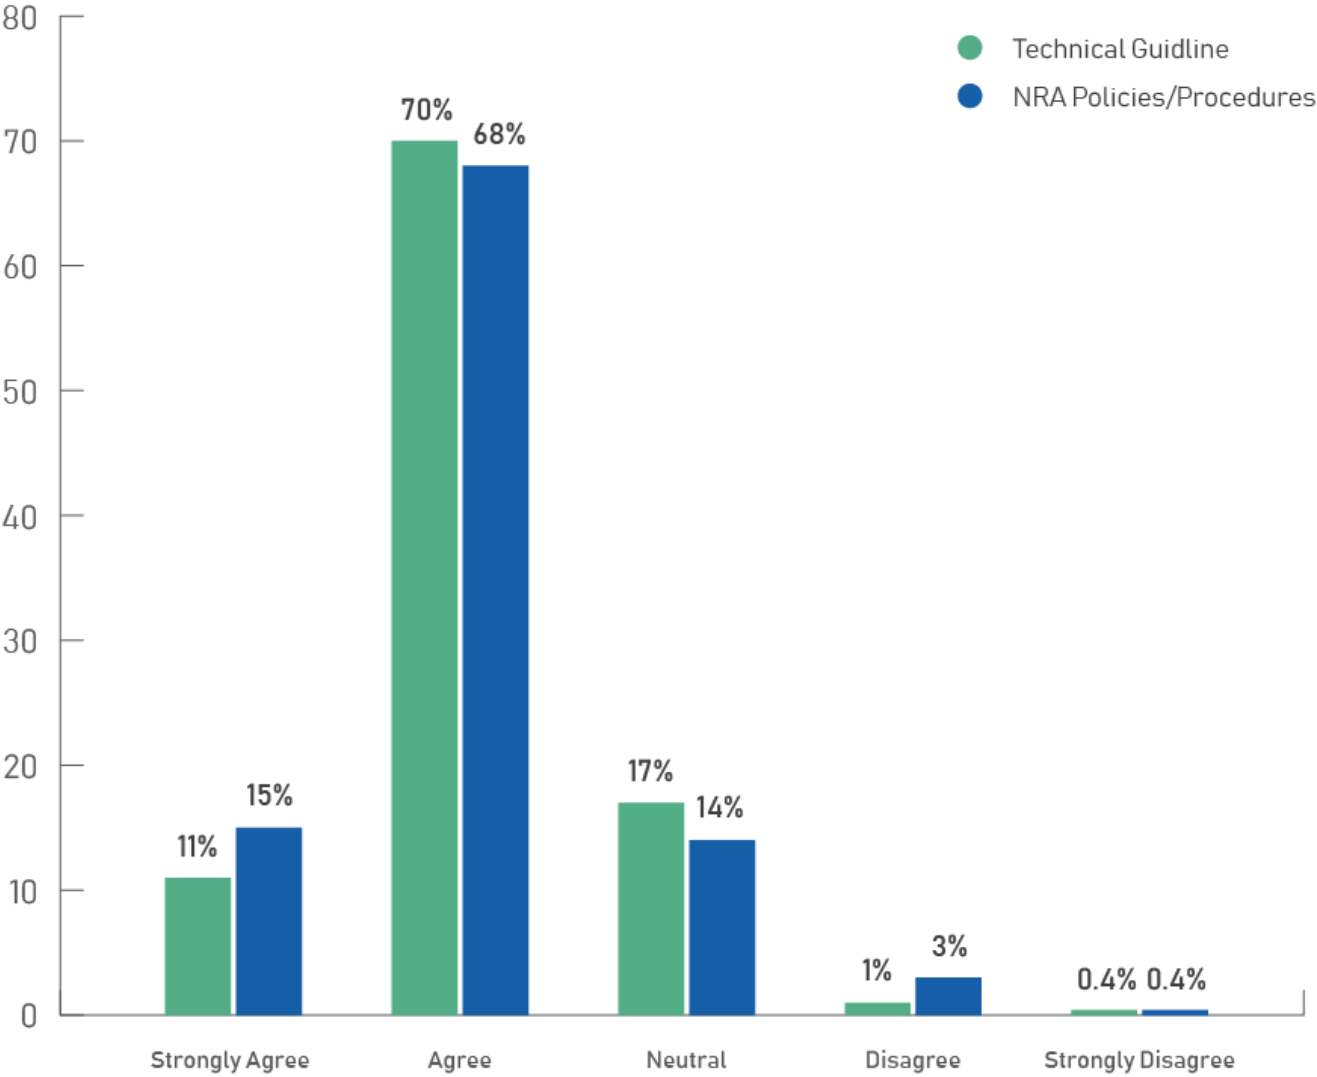

Types of organizations	5W	NRA PMIS	EHRP MIS	Tranche Tracking Sheet	Beneficiary Conversion Matrix	Survey forms
GoN	35%	73%	83%	60%	62%	42%
NGO	18%	11%	4%	20%	21%	19%
INGO	36%	9%	4%	13%	10%	28%
Private sector		4%	4%		3%	4%
Donor	6%	3%	4%	5%	3%	1%
Red Cross	2%					1%
UN agencies	2%		1%	2%		1%
Other	2%		1%		3%	3%

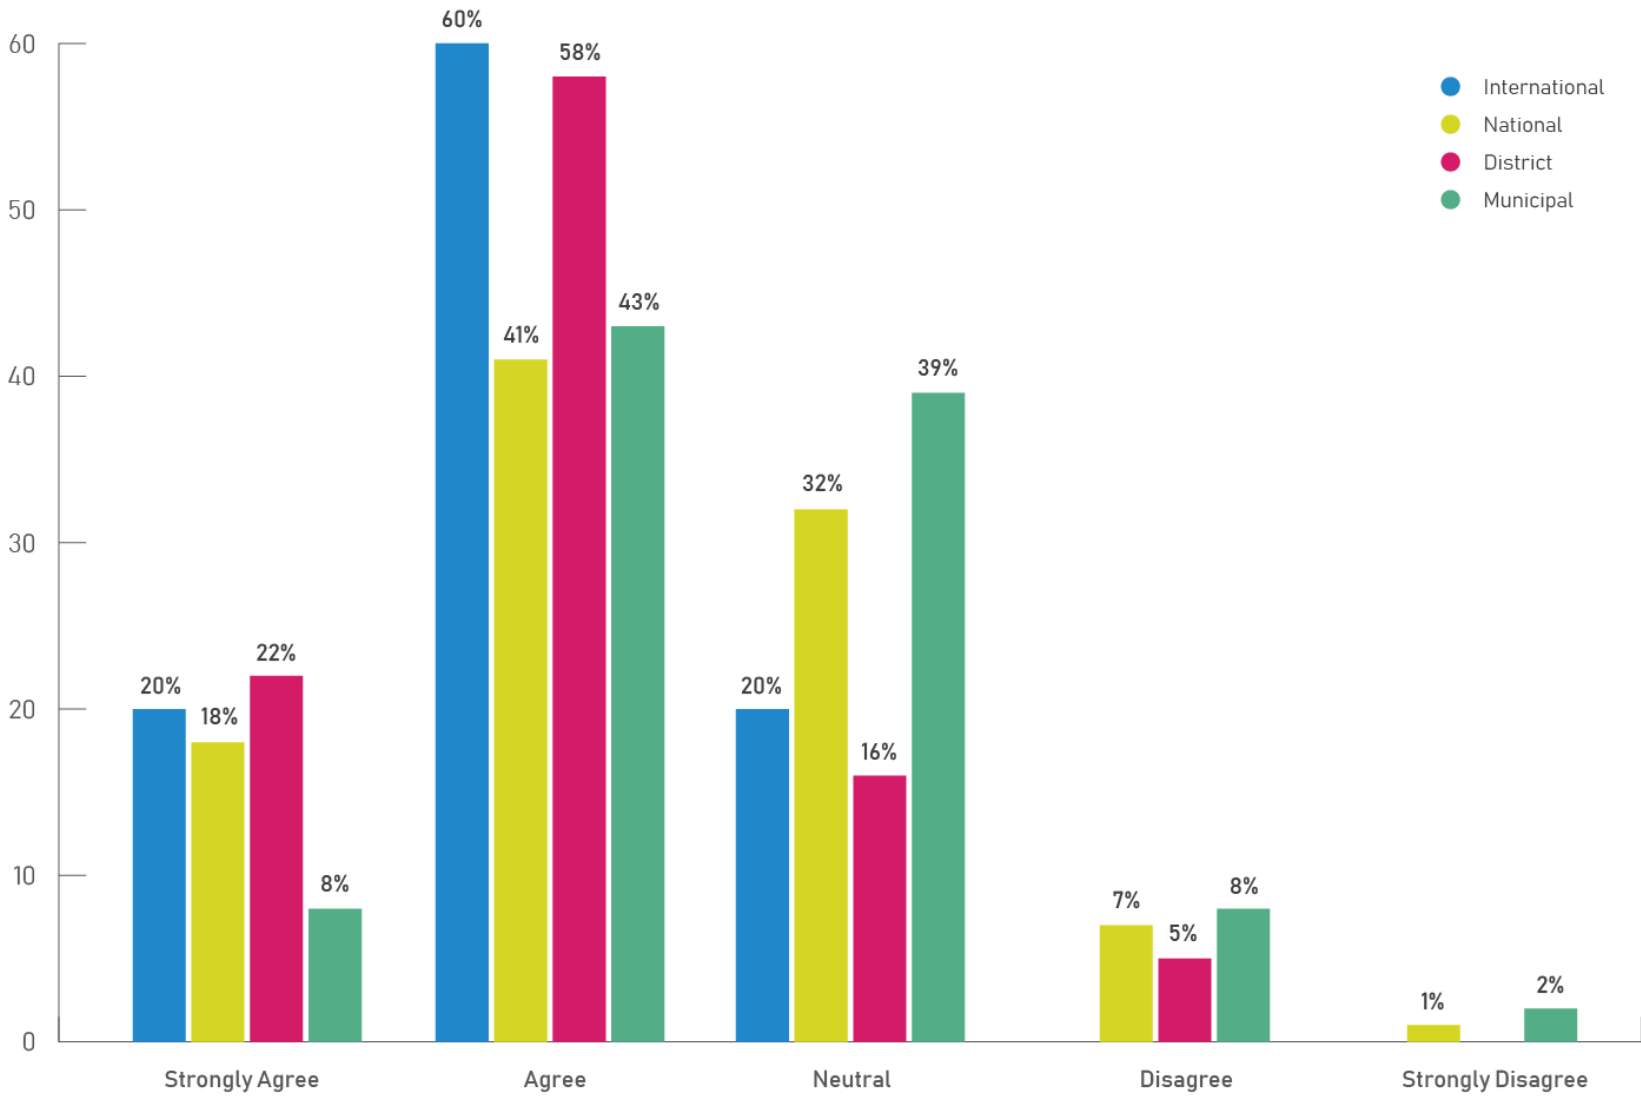

Your organization have used any of these information for decision making

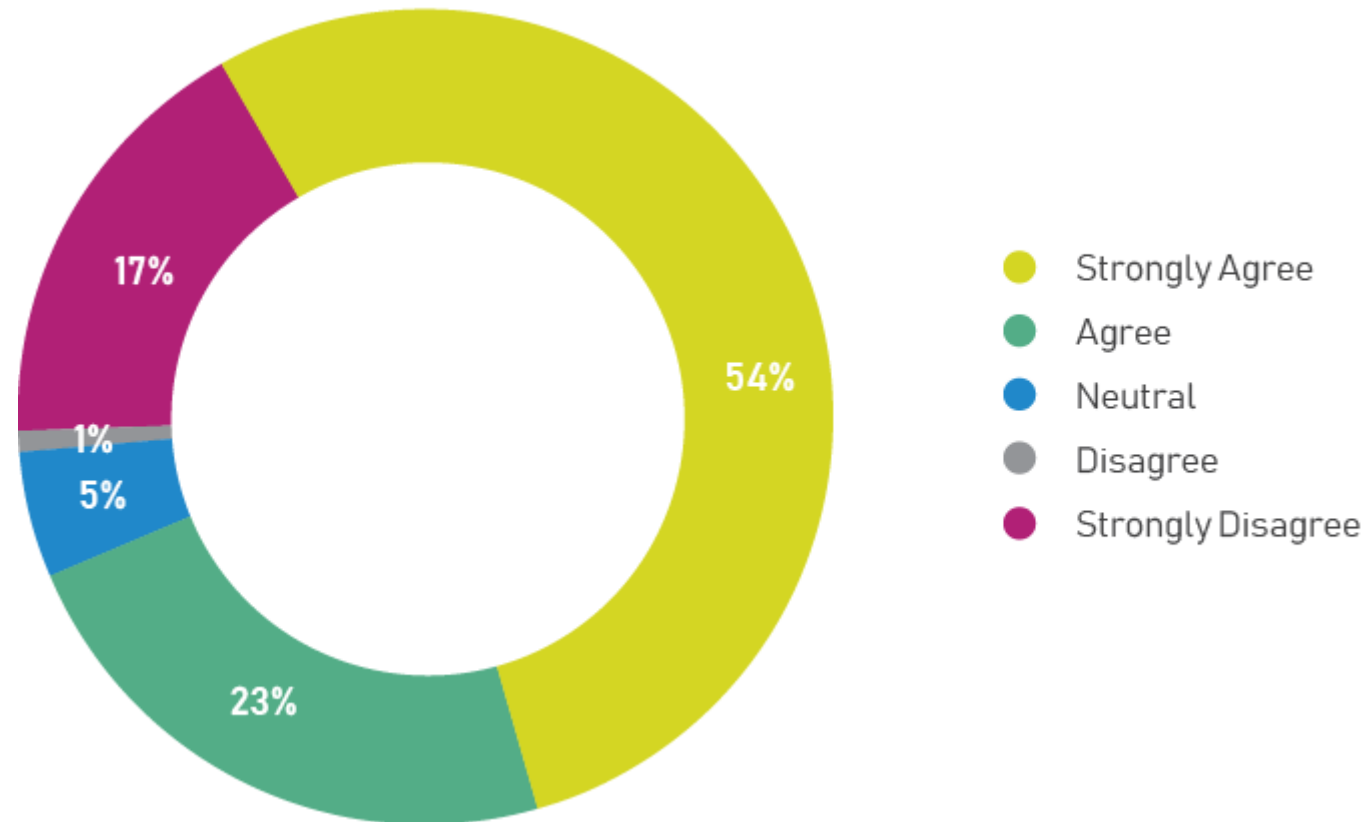

Easy access to reconstruction information

Coordination capacity has been increased

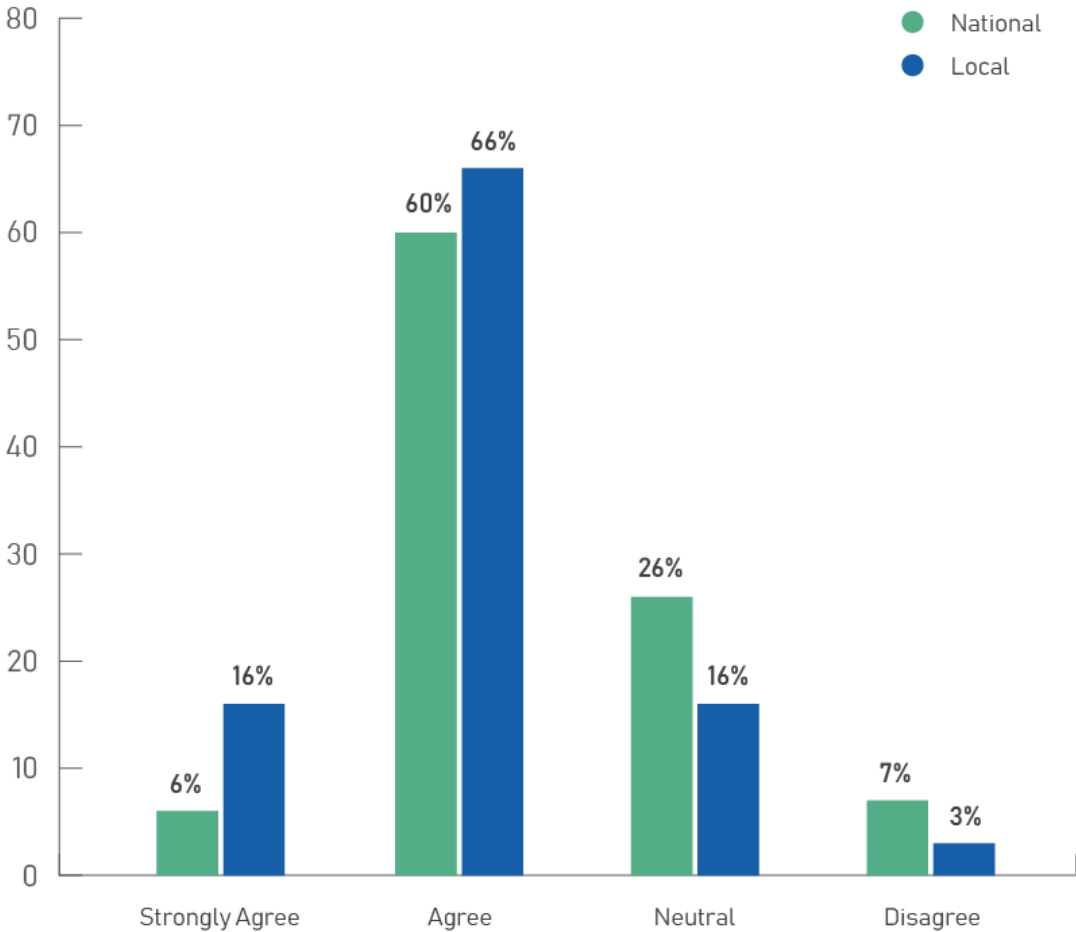

Improved coordination and collaboration contributed to reduced gaps and duplications

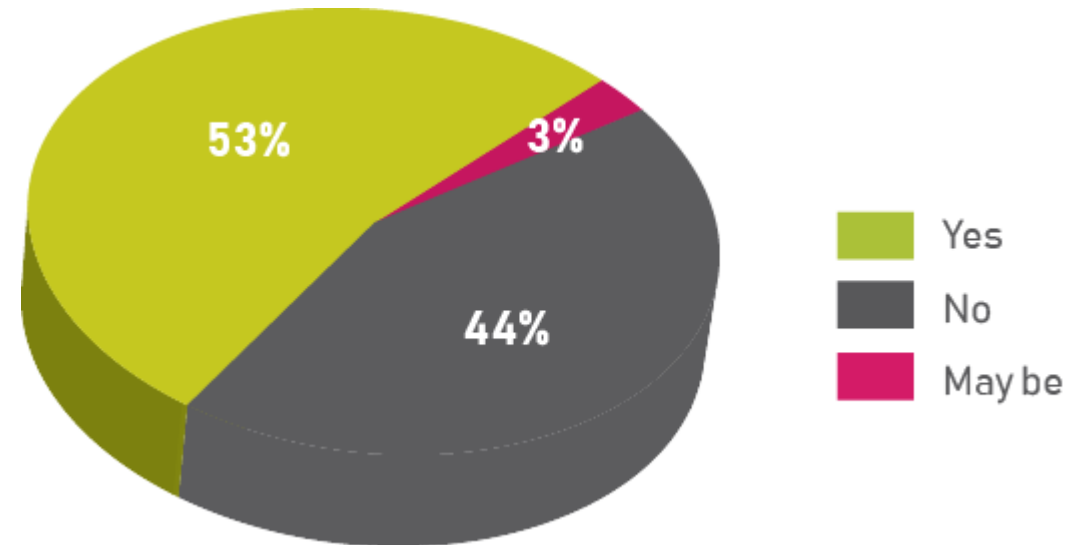

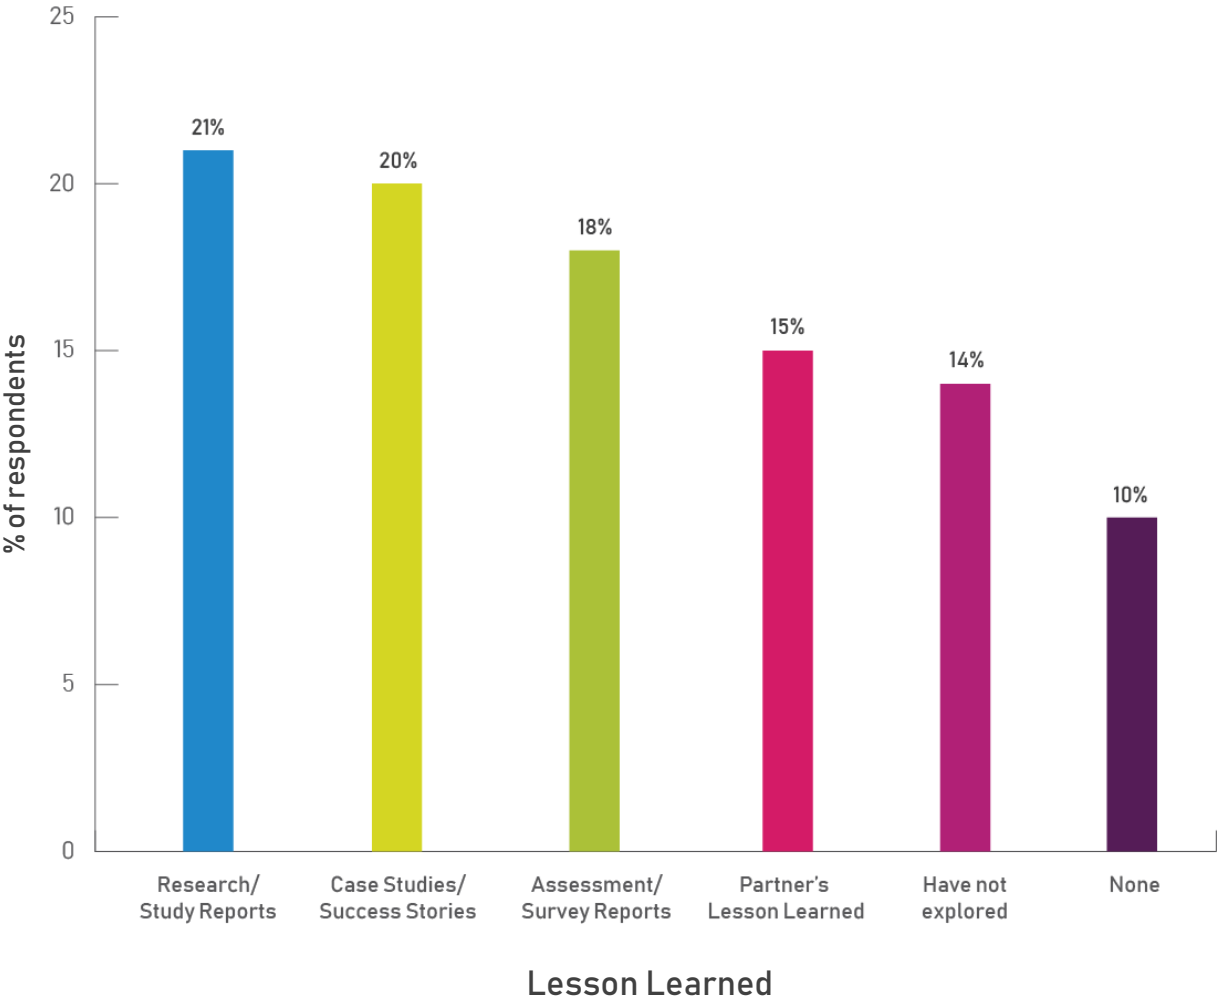

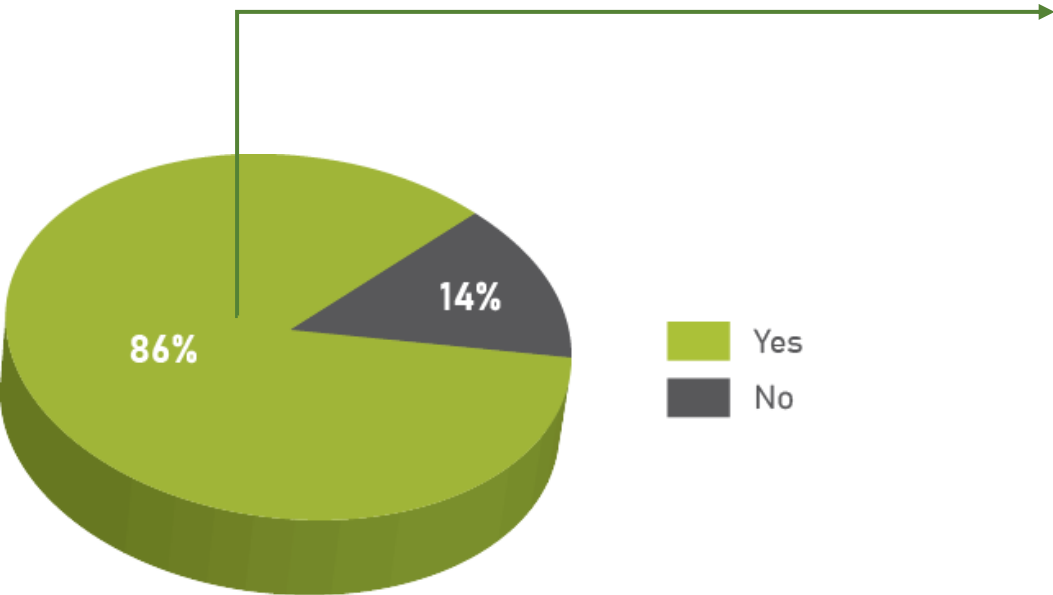

Local, National Government, and Non-government partners effectively deliver recovery related services and products.

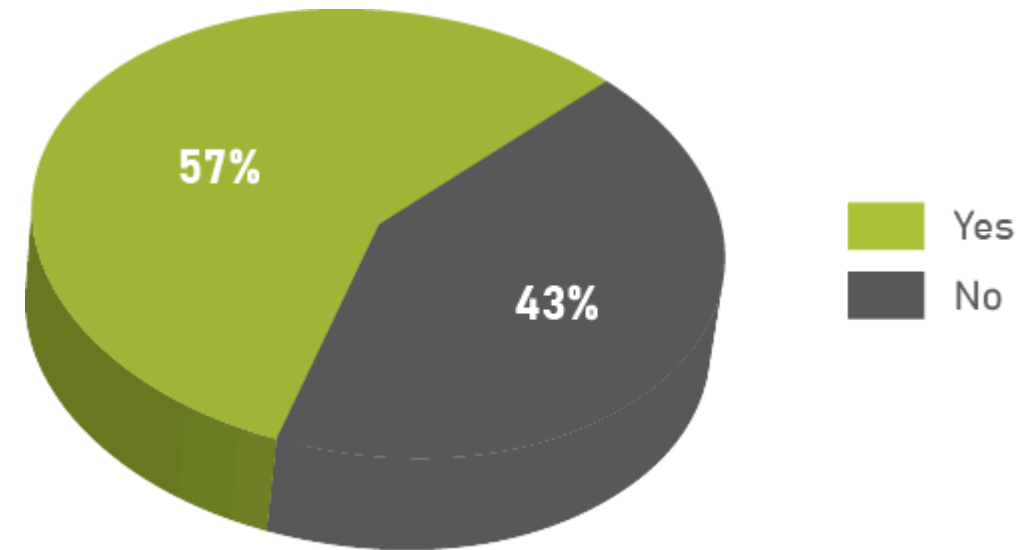

Information product has helped them to improve their coverage of STA

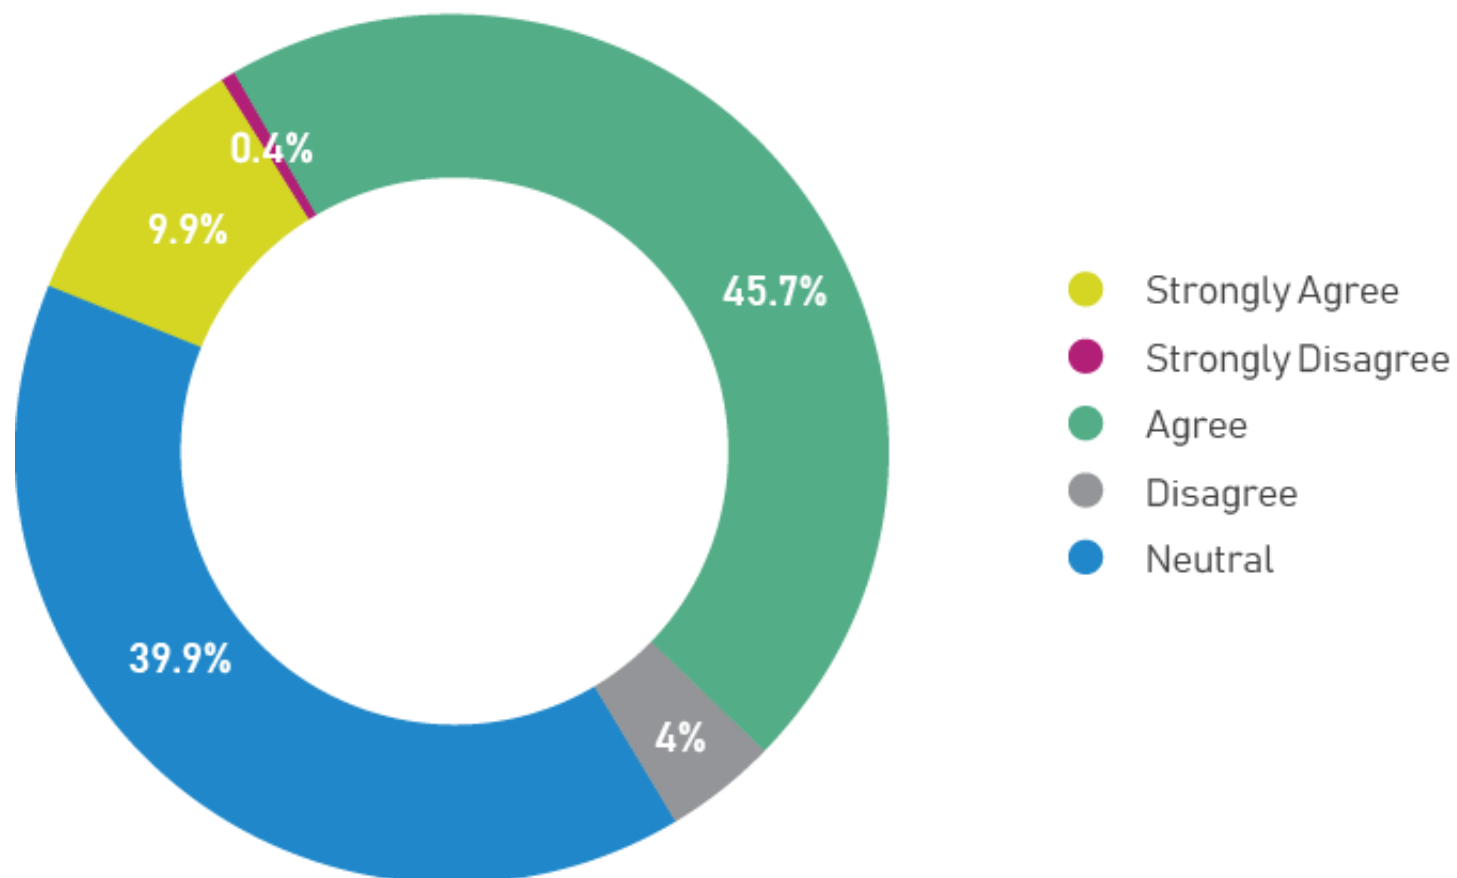

Sharing experiences, lesson learned, best practices of various stakeholders are found useful

Aware about reconstruction library supported by HRRP

HRRP has considered GESI in reconstruction work

Please briefly provide suggestions on how HRRP could improve the coordination services it provides:

It has been doing great in coordination among the actors/partners and providing useful information. As many of the organizations has already wrap up their reconstruction and recovery projects. It would be good if HRRP publish and share the achievements and lesson learned document.

Use action plan with fixing responsible person for the action preparation practice during the coordination meeting and follow-up with direct interaction with the responsible person, erase bureaucratic hurdle and make easy process for the services.

Support for remaining housing reconstruction.

Need to organize webinars for sharing lesson learn.

Suggest HRRP also to actively engage in AIN (ALLIANCE FOR INTERNATIONAL NGOS) coordination meetings or platforms

Coordination to avoid duplication, effective reconstruction and lesson learnt

HRRP has great opportunity to coordinate with NDRRMA and Local government to localizing the DRR practice.

HRRP should explore the relative stakeholders/actors who are working on reconstruction work and need to organize the coordination meeting regularly.

Continuous organize the district level meeting and share update and challenge as before.

Much of the technical information on specific materials and seismic design after the earthquake was misleading or incorrect. In addition, some of the housing designs in the "Design Catalogue for reconstruction of earthquake resistant houses" were inadequate from a seismic and durability perspective (the bamboo ones) and inappropriate from a reconstruction perspective (the earth bag ones). I strongly recommend that bad practices such as these are not allowed, and clear guidance is provided to combat these.

Please briefly provide suggestions on how HRRP could improve the coordination services it provides:

Ensure the (any) activities should well-coordinated with the Local Government just in case to duplication intervention in one areas, communities and households then, make sure the level of intervention aware by the Local Government.

Staff members in district level should be increased.

Special attention is required to identify the vulnerable/needly people and reduce the duplication while providing support.

Would like to see the report revised PDRF for our reference, if available. Thanks.

HRRP coverage should be increased.

Should provide more information and more structure of HRRP is doing.

Need to organize webinars for sharing lesson learn.

Continue sharing HRRP work, after action reviews, emerging trends and tools.

Maybe, a quarterly newsletter to provide updates on the works HRRP are doing could increase HRRP visibility and interest from its members/readers.

HRRP should work in disaster related awareness programs or in local level capacity building programs.

The working modality of HRRP is good and working as per the context of reconstruction. DRR & resilient are interrelated subject and crucial for all communities. So, HRRP need to be develop or improve the DRR & resilient programs. In current development discourses, DRR is interlinkages as a cross cutting issue. But DRR and resilience works are main part of development discourses. And finally, digitalization is core subject in new housing & reconstruction. In current federal context, digitalization of all municipal level is important & crucial.

Please briefly provide suggestions on how HRRP could improve the coordination services it provides:

Coordinating and promoting the local partners in the implementation of the activities and using the local resources on it.

HRRP should now focus on exit strategy of NRA and work accordingly rather than doing survey only.

Maybe it would be great to explain in a newsletter what kind of data you can provide and where exactly they are located and share the links, so it is easy to access for everyone.
Just a thought :)

Bring livelihood projects too

It must reach to more ground level and to communicate more and more people with visible materials

I have only received email from HRRP for submitting my organization's reconstruction data. But I was not aware how the data is used and how we could benefit from this platform.

It must think on how support can be assisted to local bodies after phase out of NRA's timeline officially. Key areas of interventions must be identified further.

Support for remaining housing reconstruction

Now days HRRP is not supporting DLPIU. We need support from HRRP

It must think on how support can be assisted to local bodies after phase out of NRA's timeline officially. Key areas of interventions must be identified further.

THE HRRP must be to work together with NGOs/INGOs and UN to strengthen legal law/Human Right Law for supports to vulnerable epically the Child Rights. 1. To disseminate the implementation of human rights law and procedures, law enforcement in the courts and other procedures to effectively promote human rights. 2. The HRRP must strengthen the promotion of human rights and the implementation of the law and the judiciary must be independent. 3. Ensuring the protection of human rights, especially the right to participate in social work.

THANK-YOU
