

ACTIVITY REPORT

Organised by HRRP

Name of Activity	Technical session (District Level)		
Program Name:	One Day Orientation on NRA Technical Guidelines and Policies		
Location	Ward no.7, Besisahar Municipality, Lamjung		
Date	11 September 2019		
Organizer	1. HRRP		
	2. DLPIU-GMaLI, DLPIU-Building		
Targeted Groups	NRA Technicals		
Number of participants	Male	Female	Total
	42	3	45
Resource Persons from HRRP	Biren Shah, DTC, HRRP-Lamjung		
Counterpart Coordinator	Biren Shah		Contact No. 9817396852
	Umesh Dangol		
Program Brief	The one-day Orientation on Technical Guidelines and Policies for Engineers, Sub Engineer and Assistant sub-engineers was organized by NRA-CLPIU Building, NRA-CLPIU-GMaLI with technical support from HRRP at Hotel Tukuche, Besisahar, Metropolitan City, Lamjung on 11th September 2019. The program was chaired by Mrs. Sunita Shrestha, DLPIU chief, Lamjung. Chief guest of the program-Mr Lokraj Pandey-DCC Chief and Special Guest as Mr. Jagdish Mishra-GMaLI Chief. The program has participation from DLPIU – Building Lamjung, Engineers, sub-engineers and sub-assistant Engineers and technicals from Partner Organizations from Lamjung, HRRP. Opening Remarks Lokraj Pandey, District Coordination Committee- Chief, Lamjung He welcomed all the participants to the one-day Orientation on Technical Guidelines and Policies and shared that this is the most important opportunity and learning experience to all the technical staffs working in the reconstruction. He highlighted that the technical staffs are the main actor in the reconstruction and this effort would not have been possible without the hard work of the technicals. He personally thanked all the engineers, sub-engineer and assistant sub-engineers for their hard work. He requested all the participants to not let your motivation and momentum down. He shared that the reconstruction in Lamjung district is two years behind with respect to the other 14-most earthquake districts due to the delay in the deployment of technicals in the district just after the quake. He highlighted that the scenarios would have been different if just after the earthquake the technicals would have been deployed in Lamjung the condition and status have been different. His major concerns were on when the NRA would complete the		

Activity Report of Orientation

process of grievance and list the names of the beneficiaries and the name of beneficiaries from RTB to RCB.

Remarks from DLPIU-GMaLI, Lamjung

He welcomed all the participants and shared the update and status of reconstruction of Lamjung District to all the participants. He shared that Lamjung is in the 14th position in reconstruction out of 18 moderately affected earthquake districts. He shared that only 28% of the third tranche has been disbursed and now it's the peak time to accelerate the reconstruction work. He shared that he has received complains from different ward-level stakeholders on technicals not doings as they say but convinced them that they are the technicals and have limitations and technical boundaries in flexibility. He also shared that technical staffs are the main actor in the reconstruction and this effort would not have been possible without the hard work of the technicals.

Closing Remarks

Sunita Shrestha, DLPIU-Chief, Lamjung

She focused on the fact that the role of field technicals are most important factor to achieve the goal of prosperous and successful reconstruction. Since the field technicals are directly working being associated with the HHS so it is very important for them to have proper knowledge of Earthquake resilient Building. She also focused and motivated technicals to complete the third inspection.

She projected on the importance of different guidelines and manuals which have been proved to be a boon for field technicals. She added that we must learn from the reconstruction effort from other nations such as India, Japan and build our nation. The donor needs to be reported and the CS entry must be submitted to access the reconstruction grant, so she kindly requested all the engineers and sub-engineers to focus on the CS entry as soon as the inspection is conducted. She also added that now the technicals must find out the reasons (in format) of the beneficiaries who have received the first and the second tranches but have not started reconstruction and constructed above DPC level respectively.

She highlighted that now the technicals in the district and Palika have to accelerate the retrofit works. She shared that the technicals should try to convince the beneficiaries in different ways technically and socially to uplift the status of retrofit work as the technology is not new, but the subject has been new in reconstruction. Also, the task force in the district and each Palika have been deployed for accelerating retrofit work so it's the peak time to accelerate the status of retrofit.

Finally, she told all the participants to forget the small issues and work together to complete the reconstruction effort. Also, this training is a big opportunity so learn as experienced trainers will be conducting the session, so she requested all the participants to take the training seriously, gain valuable knowledge and follow the rules and regulations of the training.

Finally, she focused on the fact that the role of field technicals are most important factor to achieve the goal of prosperous and successful reconstruction. Technicals are the pillar in the reconstruction effort. This forum has provided opportunities in learning new things so don't lose this chance. Learn more, don't feel ashamed to as thing which you don't know.

Session and Observations

Lists of Session/support from HRRP

- **Correction/Exceptional Manual**
- **HCB Manual**
- **NRA Guidelines and Policies**
- **Retrofitting Manual**

Good Aspects of the Program & Area of Improvement

- The sub-engineers and sub-Asst engineers were not familiar with these guidelines and manuals which will help them to overcome the future non-compliance decrement and compliance check.
- HCB manual and retrofitting manual were new to the technical. Since, retrofit is one of the major challenges of private housing, this orientation helped them to learn a lot about the concept and methods of retrofit.
