

A 45 day-situation report of monsoon 2021

(June 11, 2021 - July 30, 2021)

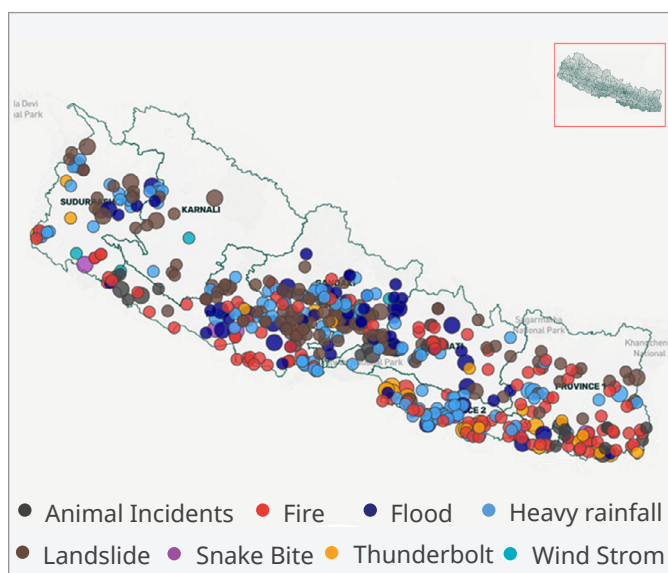

Nepal has been receiving above-average rainfall since the onset of this year's monsoon. However, during this 45 days monsoon period, human casualties have decreased compared to last year. During this 45 days monsoon period, 55 districts have been affected by monsoon related incidents (Flood, Landslides and Incessant rainfall) and 4 thousands 7 hundreds and 24 people have been shifted to safer places. Details of damage, rescue and relief operations during this period are as mentioned hereunder:

Monsoon related incidents during the first one month of this year's monsoon (June 11 to July 30)
