

On November 3rd, 2023, a 6.4 ML earthquake struck Jajarkot district at 11:47 pm, centered around Ramidanda. It resulted in substantial casualties and property damages in remote areas of Jajarkot and Rukum West districts in Karnali Province. Initial assessments by the National Emergency Operations Center (NEOC) indicate complete destruction of 35,455 houses and partial damage to 26,557 houses; the majority of them were mud and stone masonry homes. There is a critical necessity for housing reconstruction and recovery, emphasizing a "build back better" approach.

NATIONAL UPDATES

Jajarkot Earthquake: Nepal faced grim reality of challenging resilience of Karnali region

According to the Nepal Earthquake Monitoring and Research Center, an earthquake measuring 6.4 on the Richter scale hit at 11:47 pm on 3rd November 2023 (Friday) with its epicenter at Ramidanda of Jajarkot, resulting in significant casualties and property damage in Jajarkot and Rukum West districts of Karnali Province. Nepal faced a grim reality with

154 lives lost, 364 injured and more at risk with on-set of winter while the affected population suffered with collapse of traditional mud & stone masonry homes. Initial assessments by the National Emergency Operations Centers/Ministry of Home Affairs (MoHA)/Government of Nepal claims that the earthquake caused complete destruction of 35455 houses and partial damage to 26557 houses. ([Refer NEOC Data as of 30 November](#))

From the morning of 4th November, Rt. Honorable Prime Minister of Nepal Mr. Pushpa Kamal Dahal (Prachanda) himself took initiatives in rescue efforts by visiting the quake affected areas with necessary relief equipment, medicines and medical personnels. On 5th November, the National Council Meeting of NDRRMA winded up discussions on the damage caused by the devastating earthquake and forwarded the necessary directives to address response initiatives in its aftermath. The quick responses from federal, provincial and local governments have managed to complete rescue efforts in a short span of time. 915 Nepal Army, 854 Nepal Police and 395 Armed Police Force Nepal were deployed for the search, rescue and relief activities.

Dozens of governmental and non-governmental organizations and private sectors were rampantly engaged in providing relief and response support. The Government of Nepal received phenomenal support from several neighboring countries and others countries mainly on the emergency relief materials for quake affected communities such as warm blankets, tents, tarpaulins, mattress, utensils, hygiene kits, nutritional foods for special needs, regular food items etc.

On 9th November, a meeting was held at the Ministry of Finance with development partner countries and agencies in Nepal regarding the state of damage and loss caused by the Jajarkot earthquake and the future direction of reconstruction. In the meeting, the Chief Executive of NDRRMA, Mr. Anil Pokhrel, presented a detailed report on the damage and loss caused by the earthquake so far, as well as the resources needed for reconstruction. Detail news: [Jajarkot earthquake Prime Minister instructs to make relief, and rehabilitation effective](#)

Approval of Procedural Guideline on Temporary Shelter Construction for Earthquake Affected Households 2080 (with amendments)

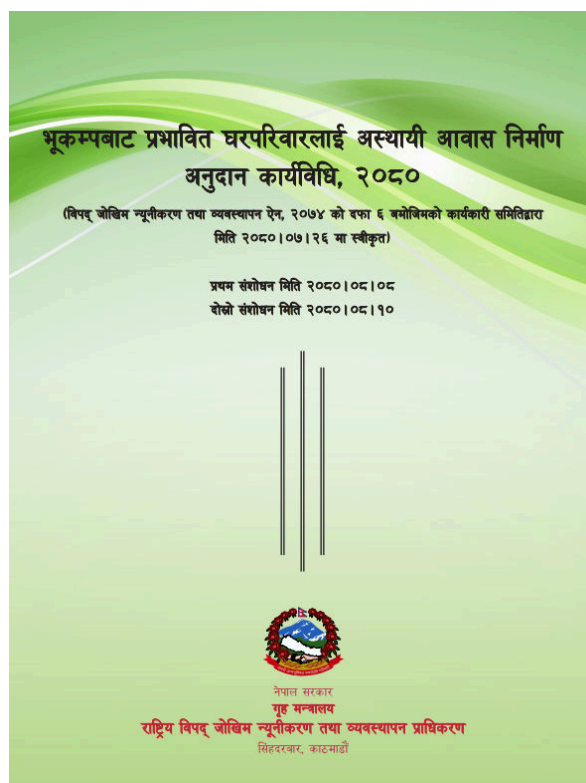

In context to impacts made by Bajhang and Jajarkot earthquake in private housings of people, the 19th Executive Committee of NDRRMA held on 12th November 2023, chaired by the Honorable Deputy Prime Minister/Minister of Home Affairs, Mr. Narayan Kaji Shrestha has made major decisions on tranche disbursement related to temporary shelter construction. In accordance to the rights given by Section 48 of Disaster Risk Reduction and Management Act 2074, NDRRMA put

enduring efforts to formulate the “[Guidelines on Grant Distribution of Temporary Shelter Construction for Earthquake Affected Households 2080 \(with amendments\)](#)” which was approved by its 20th Executive Committee Meeting. This procedural framework aims to facilitate the efficient utilization of funds for the construction of temporary housing, ensuring a speedy and effective response to the pressing needs of those households who were affected by the earthquake.

As per the guideline, the provision has been endorsed to provide grant support of NPR 50,000/- for each affected household in two installments (tranche), 25,000 in first and 25,000 in second installment.

According to the [Guideline](#), the District Disaster Risk Reduction and Management Committee will release the first tranche payment through the bank account of enrolled temporary shelter beneficiaries. Similarly, the beneficiaries are required to submit their applications for the final (second) tranche amount after commencing the construction of temporary shelters but before initiating the roof works. With the completion of all required processes, the grant amount will be transferred to the beneficiaries’ account. The Local Levels shall play a leading role in the identification of actual affected beneficiaries, selection, agreement, tranche payment recommendation and payment for the construction of temporary shelter construction. The Local Levels shall coordinate with all concerned parties, including governmental and non-governmental organizations, to prevent double payments of grants as well as avoiding deprivation of receiving the services.

Additionally, government decides that NDRRMA shall coordinate and collaborate with Ministry of Urban Development (MoUD)/Department of Urban Development and Building Construction (DUDBC) for conducting Post Disaster Needs Assessment (PDNA)/Detailed Damage Assessment (DDA) and to manage appropriate human resources to effectively execute the retrofitting, reconstruction and rehabilitation of private housing, public buildings and structures damaged due to the earthquake. [Decisions of 19th Executive Committee Meeting of NDRRMA in detail](#)

Nepal unveils historic climate adaptation plan for bolstering nation's resilience

Nepal launched its first National Adaptation Plan (NAP), a comprehensive strategy aimed at bolstering the nation's resilience against climate change. The plan, having an estimated cost of USD 47 billion extending to 2050, was unveiled at the National Climate Summit in Kathmandu on 21st November 2023 in presence of Rt. Honorable Prime Minister, Mr Pushpa Kamal Dahal (Prachanda).

The development of a NAP is an important milestone in a country's efforts to adapt to the escalating climate crisis. Drawing on the latest climate science and projections, Nepal's adaptation plan pinpoints critical sectors where enhancing resilience is urgent, with the goal of systematically integrating adaptation measures into policies, planning, and programs across all levels of government.

Nepal's NAP is a welcome boost for national and global climate action. It is a visionary policy document charting the path for the country to adapt to climate change now, as well as in the medium and long-term. The NAP outlines 64 specific adaptation interventions across eight key economic sectors. The three most urgent priority sectors were identified as: i) agriculture and food security; ii) forests, biodiversity and watershed conservation; and iii) disaster risk reduction and management.

The funding model for Nepal's NAP involves a blend of national and international financial support, with the Nepalese government committing USD 1.5 billion and external sources providing the remaining USD 45.9 billion. The plan will call for wider-scale collaborations with development partners and the private sector. For successful implementation, a whole-of-society approach will be required and a review of the plan will take place every five years. Detail news: [National Adaptation Plan launched](#)

Government and development partners prioritizes investment in green, resilient and inclusive development

The Ministry of Finance and the development partners organized a high-level event on consolidating and scaling up financing and technical assistance to support Nepal in implementing a set of high-priority investments and policies in line with Nepal's Green Resilient and Inclusive Development

(GRID). On 2nd November 2023, a joint communique to operationalize Nepal's GRID Strategic Action Plan was endorsed. At the event, the government, development partners, civil society organizations, private sector stakeholders, and think tanks also renewed their commitments to work across institutional and sectoral boundaries to continue to finance and implement Nepal's GRID priorities.

Honorable Finance Minister, Dr. Prakash Sharan Mahat underlined that Nepal has already internalized the GRID approach to build a greener, more resilient, and more inclusive economy that can withstand shocks, protect our environment, and uplift the lives of our people. Minister Mahat added that Nepal's new GRID Strategic Action Plan can be a policy vehicle that accelerates growth and job creation, strengthens livelihoods, and boosts the prosperity of Nepali people sustainably. Investment priorities in the GRID Strategic Action Plan aim to build on Nepal's development success stories, scale up action on the ground, help mobilize private sector investment, and deliver sustainability along with resilience and inclusion at the same time. This will help create more jobs for more people; build the resilience of people and their livelihoods; boost environmental, climate, water, and food security; and create opportunities for a more inclusive and durable economy. Read detail news: [Government and Development Partners prioritizes GRID Strategic Action Plan](#)

PARTNERS' UPDATES

Training on constructing transitional shelter for disaster-stricken families

Volunteer Corps Nepal (VCN) with support from Reciproboo Shelter Kit (RSK Shelter) organized training sessions for constructing transitional shelters as part of the earthquake response in 2023. The trained volunteers will contribute to building these shelters in the earthquake-affected regions of Jajarkot and Rukum West in Nepal. These shelters aim to assist families in coping with the harsh winter conditions in the disaster-stricken areas.

The Reciprocal frame shelter kit is empowering people to build their own strong, secure and dignified shelter using a simple but well proven building method called "reciprocal frame" roof. Components of all RSK shelter kits are locally sourced, that contains mainly - bamboo central frame poles, bamboo side and ridge poles, bamboo support posts, lashings and tarpaulins. For more details, <https://www.rskshelter.org/>

NHSRP's Response and Engagement in Post-Earthquake Phase

NHSRP immediately mobilized its provincial teams from Karnali and Sudurpaschim province within 24 hours of the earthquake incident at Jajarkot district. The support includes tracking database and information management in earthquake affected districts. The Information Management support by NHSRP team proved to be crucial in emergency relief management and government coordination, from direct support in publishing [Situation Reports \(SitReps\) of Jajarkot earthquake](#)

NHSRP thoroughly collaborated with NDRRMA team in drafting and finalization of "Earthquake Affected Temporary Shelter Construction Grant Disbursement Procedure 2080 (2023)". NHSRP coordinated 2 number of partners coordination meetings, including 2 number of procedures sharing and feedback session. Two staffs of NHSRP, including Technical Coordinator and Information Management Officer are embedded in earthquake affected Jajarkot district for district and local level support in temporary shelter enrollment processes and tranche disbursements. For more information, contact Mr. Rijan Gajurel, National Technical Coordinator- Government Engagement/NHSRP. Email: rijan.gajurel@hrrpnepal.org

Capacity building training on localizing BIPAD Portal

Habitat for Humanity International Nepal, in collaboration with NHSRP, organized a three-day training on BIPAD Portal for municipal officials and partner staff in Biratnagar, Koshi Province from November 23rd to 25th, 2023. The training aimed to provide the participants with the necessary skills and knowledge to use the BIPAD portal effectively for disaster risk reduction and management. The BIPAD portal is an information management platform that integrates data from various sources and supports risk-informed decision-making for development and planning before, during, and after disasters.

The training participants represented a diverse group of stakeholders, such as IT Officers, DRR Focal Persons, Admin Heads, and Volunteers from different

municipalities and rural municipalities in Jhapa, Dhanusha, and Saptari districts. The training covered various topics related to DRRM policies and procedures of NDRRMA, such as data collection, analysis, visualization, action-plan preparation, hands-on exercises and interactive discussions.

The participatory sessions helped the participants to enhance their understanding and application of the portal in their respective contexts. The training also facilitated the collaboration between Habitat Nepal and NHSRP, which played a pivotal role in delivering a comprehensive and impactful training program. As a result of the training, the three municipalities from the three districts-Dhanusha, Saptari and Jhapa will upload their DRR data in the BIPAD portal, which is linked to NDRRMA. For more information, contact: Rupendra Basnet, DRR Program Manager, Habitat for Humanity Nepal. Email: RBasnet@habitatnepal.org

Consolidating Multi-hazard impact results for Future Rapti City

In the course of developing disaster resilient new Rapti city, scientific studies based on multi-stakeholder consultations have now come up with possible future scenarios and multi-hazard impacts for the provincial capital city. Under the collaborative effort of Provincial Infrastructure Development Authority (PIDA), Local Governments, Tomorrow's Cities research project and stakeholders, a Risk Agreement Workshop has been held in Rapti during 30th November to 1st December 2023. Tomorrow's Cities International and National team including NSET, Institute of Engineering (IoE), Practical Action, Nepal Development and Research Institute (NDRI) & South Asian Institute of Advanced Studies (SIAS) showcased the impact results for the previously detailed plans in Future Rapti City. Based on this, the community groups and stakeholders discussed policy modifications on the plans based on the multi-hazard physical and social impacts they learned in this workshop. The team guided the 6 disaggregated groups to decide on three clear policy suggestions that would realistically reduce physical and social impacts in Tomorrow's Rapti.

Tomorrow's Cities (TC) is the UK Research and Innovation (UKRI) Global Challenges Research Fund (GCRF) Urban Disaster Risk Hub - a global interdisciplinary research hub. The hub aims to support the delivery of the United Nations Sustainable Development

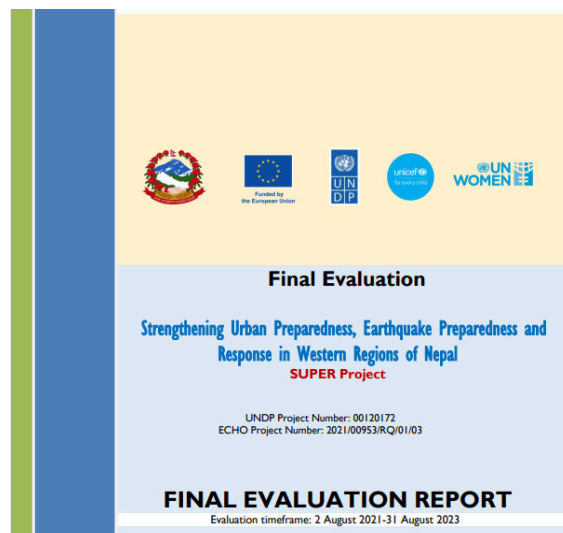

Goals and priorities 1 to 3 of the Sendai Framework for Disaster Risk Reduction 2015-2030. It is a fully-functioning, fully funded consortium of communities, government organizations, researchers and risk professionals at local, national and global level formed to reinforce disaster risk governance. It undertakes integrated, multi-scale and multi-disciplinary research to better

understand natural multi-hazard risks and their drivers. For more information, contact: Mr. Vibek Manandhar, Program Manager & Research Associate -Tomorrow Cities Rapti at NSET. Email: vibekmanandhar@nset.org.np

Evaluation Report: Strengthening Urban Preparedness, Earthquake Preparedness and Response in Western Regions of Nepal (SUPER) Project

The Strengthening Urban Preparedness, Earthquake Preparedness, and Response in Western Region of Nepal (SUPER) Project worked to empower provincial and local governing units across the three provinces of Sudurpashchim, Lumbini, and Karnali and to enhance their earthquake preparedness and urban readiness. Financed by the European Civil Protection and Humanitarian Aid Operations (ECHO), the project operated with an overarching goal to facilitate the development and execution of comprehensive and inclusive earthquake and urban disaster preparedness as well as emergency response measures. The timeline of the project was from August 2021 to August 2023.

The project successfully established model disaster risk governance arrangements at sub-national levels, addressing the evolving needs of the restructuring governance landscape. Various policy and technical documents were developed to standardize disaster preparedness, including the Provincial Earthquake Response Framework and manuals on fire response and safe construction practices. The creation and strengthening of Emergency Operation Centers (EOCs) at province and municipal levels, in collaboration with the government and the Red Cross, aimed to enhance disaster response and coordination. Read in detail: [Evaluation Report SUPER Project](#)

Enhancing Climate Resilience: Three-Day Training Empowers Gandaki Province for Sustainable Agricultural Development

A comprehensive Climate-Resilient Development Plan Training took place in Pokhara, Kaski district, from November 7th to 9th, 2023. Organized by the Institute of Integrated Development Studies (IIDS) in collaboration with the Provincial Policy and Planning Commission (PPPC) and other key partners, the workshop aimed to fortify agricultural approaches against climate challenges in Gandaki Province. During the training, representatives from ministries, municipalities, and local

bodies (Palikas) in Gandaki Province were equipped with the knowledge and skills necessary to formulate a climate-resilient agricultural plan for the region. The agenda delved into critical topics such as climate resilience, disaster preparedness, the integration of information technology in agriculture, and the role of tourism. Engaging group exercises focused on the development of a provincial-level strategy, ensuring participants were actively involved in the learning process. For detail news: [IIDS updates](#)

On-the-job training continues on safer building construction at Duduwa, Banke

On-the-job (OJT) training is ongoing at Duduwa Rural Municipality (Banke district). Masons and carpenters are currently building a demo-community house which is raised by 5 feet plinth constructed from brick cement masonry following earthquake resistive principles. Demo-community house is in a high-risk flood prone area. In November 2023, local masons and carpenters were given training on bamboo-frame technology which included training on bamboo cultivation, harvesting, chemical treatment and better connection of joints. The walls of the demo-house will be of wattle and daub type using chemically treated bamboo where stabilized soil mixed with quick lime will be applied as wall plaster together with floor screed which are resistant to flood. In addition, a ramp is provided for differently-abled users to easily access the demo-house. For more information, contact: Mr. Rupesh Shrestha, Technical Coordinator-Flood Resilient Housing Solutions/CRS. Email: rupesh.shrestha@crs.org

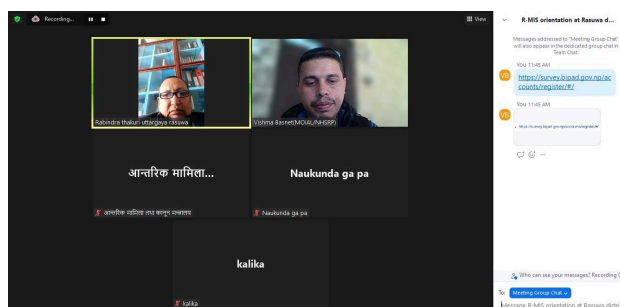

NHSRP's PROVINCIAL ENGAGEMENTS

UPDATES FROM BAGMATI

Comprehensive coordination efforts in housing reconstruction

Virtual technical support was continuously extended by NHSRP Bagmati team to various district and local governments of Dolakha, Ramechhap, Sindhuli, Dhading, Nuwakot and Rasuwa districts mainly focusing on creating users ID of respective Palikas related to system

strengthening for monsoon-induced housing reconstruction. Similarly support was provided in the inspection process of reconstructed houses and tranche release processes. Additionally, NHSRP also coordinated with NDRRMA and Bagmati province/Ministry of Internal Affairs and Law (MoIAL) regarding the geological study of the relocation sites for the resettlement beneficiaries of Bagmati province.

UPDATES FROM GANDAKI

Enhancing capacities of local bodies in disaster management initiatives

Continuous technical support in information management was extended by NHSRP Gandaki team to Bhimsen Thapa RM (Gorkha district), Bandipur RM (Tanahu district) and Dordi RM (Lamjung district) to verify the beneficiaries affected by monsoon induced disasters, in accordance with NDRRMA Reconstruction Guidelines. Additionally, support was provided for the release of reconstruction grant amounts in Vyas Municipality (Tanahu district) and Dudhpokhari RM (Lamjung district), while follow-up was done related to building code implementation in Rupa RM (Kaski district).

UPDATES FROM LUMBINI

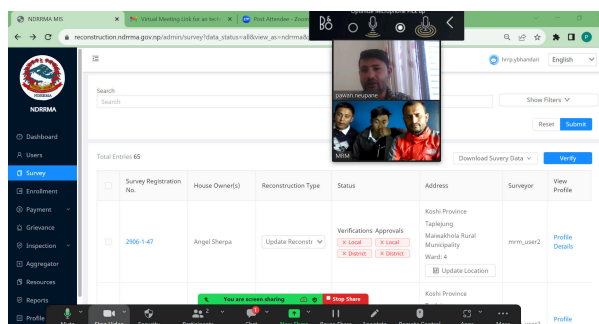

Comprehensive technical assistance in disaster management initiatives

NHSRP Lumbini Province provided ongoing technical support, focusing on verifying and validating 30 numbers of files for the third tranche release in Gulmi district. Additionally, the team identified glitches from the survey of 48 disaster affected houses in Resunga Municipality, Gulmi, which were forwarded to NDRRMA for further proceedings. Furthermore, the Resunga Municipality's GEDSI plan was meticulously developed and finalized. The team also conducted routine incident reporting for disasters occurring in Lumbini Province and compiled progress activities of the Ministry of Home Affairs in the province.

UPDATES FROM KOSHI

Strengthened capacities of governments in housing reconstruction

The provincial team of NHSRP Koshi has successfully conducted virtual orientation on procedures of NDRRMA's monsoon affected housing reconstruction and Reconstruction MIS with Maiwakhola Rural Municipality (Taplejung district) and DAO Dhankuta including support extended to guide in household survey processes too.

Additionally, technical support has been extended to DAO Dhankuta and Dhankuta Municipality to facilitate the final tranche release of processes related to the reconstruction of disaster-affected housing while monsoon impact data collection were done at provincial level and also reached out to Dharan Sub Metropolitan City (Sunsari district) and Budhiganga RM (Morang district).

UPDATES FROM MADHESH

Empowering Kamala Municipality by integrating public Infrastructures into BIPAD Portal

The NHSRP Madhesh team, in collaboration with Kamala Municipality (Dhanusha district), has successfully integrated 106 critical infrastructures into the BIPAD portal. This includes educational institutions, health facilities, governance institutions, banking and financial entities, bridges, communication facilities, religious sites, and water supply infrastructure. This integration equips Kamala Municipality with digitized data, enhancing disaster preparedness, planning, and response capabilities. Local administrators can now make well-informed decisions for disaster risk reduction and management, unlocking the municipality's potential for data-driven planning and decision-making.

UPDATES FROM SUDURPASCHIM

Collaborative efforts in Jajarkot earthquake response

Soon after the earthquake hit Jajarkot district on 3rd November 2023, the NHSRP Sudurpaschim team actively coordinated with NHSRP Karnali team jointly in earthquake response efforts in Jajarkot, focusing on documentation and data management from 5th-12th November. Collaborations were done with national and provincial clusters, including Shelter, Early Recovery, Protection, Camp Coordination and Camp Management. Support was extended to Jajarkot DAO, organized consultation meetings with key stakeholders, and facilitated coordination and distribution of relief items in Ward no. 6 of Bheri Municipality with assistance from DRR Department of Habitat for Humanity International Nepal.

UPDATES FROM KARNALI

Capacity enhancement of local bodies in monsoon-induced housing reconstruction

To localize the NDRRMA's Reconstruction Guideline, NHSRP Karnali team completed orientation on the monsoon induced housing reconstruction procedures, Reconstruction MIS and BIPAD survey tool in Bhagwatimai, Dungeshwor and Naumule Rural Municipalities (Dailekh district) from 2nd -4th November 2023. The orientation was attended mainly by the technical focal engineers/sub-engineers, IT and DRR personnels.

Extended technical support of NHSRP in Jajarkot earthquake response

The team was mobilized in compiling information management processes of Jajarkot earthquake response on behalf of the Karnali Province/MoIAL. The District Disaster Management Committee (DDMC) was supported to track data on relief materials received and distributed to Palikas and also rolled out a 5W matrix to all the Clusters and Co-leads for compiling the data of relief distribution materials. The information was compiled to reduce the duplications and find the gaps. Similarly, support was provided to Provincial Emergency Operation Centers (PEOCs) for generating infographics as well as facilitated inter-cluster meetings.

Furthermore, NDRRMA team along with two staffs of NHSRP, including Technical Coordinator and Information Management Officer are embedded in earthquake affected Jajarkot district for district and local level support in temporary shelter enrollment processes and tranche disbursements from 24th November 2023.

The team has forwarded coordination with district and local governments in facilitating coordination meetings with all local levels, banking institutions, security agencies and with partners working in the district. Database tracking and compilation of earthquake affected people is crucially prioritized throughout. The team also attended a meeting of DDMC at Jajarkot on 25th November and shared requests for

smooth coordination among all concerned parties, including governmental and non-governmental organizations, stakeholders to prevent double payments of grants as well as avoiding deprivation of receiving the services by the quake affected people. During these meetings, the team has briefed the key procedures of grant disbursement for temporary shelter construction.

Nepal Earthquake Response: Jajarkot Situation Report #1 (as of 4 November 2023)

This report is produced by National Disaster Risk Reduction and Management Authority (NDRRMA) in collaboration with partners. It covers the situation of Jajarkot, Rukum West and neighbouring districts following the earthquake and subsequent aftershocks on 3 November 2023.

Highlights

1. Jajarkot, Rukum West and few neighboring districts are reported to be affected by the 6.4M_w earthquake and its after-shocks.
2. 157 lives were lost due to earthquake, 105 in Jajarkot and 52 in Rukum West.
3. 102 people are injured in Jajarkot, 78 in Rukum West, 1 in Rolpa and 3 in Dalkh.
4. A total of 184 Nepal Army, 827 Nepal Police, 328 Armed Police Force Nepal and 22 Health work personnel are deployed from the security forces for rescue and relief.
5. The major cause of deaths seems to be collapse of weak building structure.

Situation Overview

On 3 November 2023, at 11:47 PM an earthquake of magnitude 6.4 M_w followed by several major aftershocks struck Jajarkot, Rukum West and five other districts in Karnali Province of Nepal.

The affected districts experienced more than 150 additional aftershocks as reported by National Earthquake Monitoring and Research Center, with a magnitude of 3.3 Richter scale on average, on Saturday afternoon. This has only exacerbated the challenges faced by the affected population, further testing the resilience of the region. The Jajarkot quake is the deadliest since 2015 when about 9,000 people were killed in two earthquakes in Nepal.

The death toll is rising and by this reporting hour it reached 157 people dead with 184 injured however these figures are expected to rise.

Rt. Hon. Prime Minister Mr. Pushpa Kamal Dahal (Prachanda) along with cabinet ministers and ex-ministers visited the earthquake affected districts and gave instructions for effective search and rescue including distribution of relief.

Nepal Earthquake Response: Jajarkot Situation Report #2 (as of 5 November 2023)

This report is produced by National Disaster Risk Reduction and Management Authority (NDRRMA) in collaboration with partners. It covers the situation of Jajarkot, Rukum West and neighbouring districts following the earthquake and subsequent aftershocks on 3 November 2023.

Highlights

1. Jajarkot, Rukum West and few neighboring districts are reported to be affected by the 6.4M_w earthquake and its after-shocks.
2. 157 lives are lost due to earthquake, 105 in Jajarkot and 52 in Rukum West.
3. 256 people were injured, 112 people in Jajarkot, 132 in Rukum West, 3 in Dalkh, 3 in Baitadi, 3 in Jumla, 2 in Salyan and 1 in Rolpa.
4. 937 houses are fully damaged and 2954 houses are partially damaged.
5. 202 Nepal Army, 874 Nepal Police, 485 Armed Police Force Nepal personnel are deployed from the security forces for rescue and relief.
6. MoLAL Karnali Province has circulated a data collection template to DEOCs for collection of latest updates on human casualties, public and private infrastructure damage and Food and Non-food items (NFI) need assessment.

Situation Overview

On 5 November 2023, National Council for Disaster Risk Reduction and Management held a meeting for discussion on Jajarkot earthquake and Rt. Hon. Prime Minister Pushpa Kamal Dahal (Prachanda), provided instructions for carrying out immediate relief need assessment for effective relief distribution and rehabilitation of the affected population.

A team of technical experts from Ministry of Urban Development and

Nepal Earthquake Response: Jajarkot Situation Report #3 (as of 6 November 2023)

This report is produced by National Disaster Risk Reduction and Management Authority (NDRRMA) in collaboration with partners. It covers the situation of Jajarkot, Rukum West and neighbouring districts following the earthquake and subsequent aftershocks on 3 November 2023.

Highlights

1. Rescue operations completed and relief operations started.
2. High households damage recorded in Jajarkot and Rukum West.
3. Ward level household damage data is being collected in Jajarkot.
4. Armed Police Force Nepal has established temporary accommodation centers in Jajarkot and Bheri of Jajarkot.
5. NPR, 2,45,99,45,000 worth of estimated private property loss in Rukum West (NPR, 2,45,95,00,000 and Dang (NPR, 4,65,000).
6. Various humanitarian organizations meeting to appeal and supporting in relief distribution.

Situation Overview

High number of private houses damages have been recorded in Jajarkot and Rukum West. In response to the earthquake impact, the Armed Police Force (APF) Nepal in Jajarkot has successfully set up temporary shelter camps across earthquake-affected areas, specifically in Jajarkot and Bheri Rural Municipality. In Jajarkot, 2 temporary camps with 20 beds each have been set up, while in Bheri 5 camps with a combined capacity of 100 beds are now operational. These temporary accommodation centers have been established with the aim of providing temporary shelter for earthquake-affected individuals for a projected duration of about 3-6 months. The camps are equipped with essential amenities, including electricity.

Nepal Earthquake Response: Jajarkot Situation Report #4 (as of 7 November 2023)

This report is produced by National Disaster Risk Reduction and Management Authority (NDRRMA) in collaboration with partners. It covers the situation of Jajarkot, Rukum West and neighbouring districts following the earthquake and subsequent aftershocks on 3 November 2023.

Highlights

1. On 6 November 2023, another aftershock of 5.8 M_w struck with the same epicenter as previous. This caused more damage to the previously partially damaged buildings.
2. Rt. Hon. President Ram Chandra Poudel visited Jajarkot accompanied by Deputy Prime Minister and Minister for Defence Prerna Bahadur Shrestha, Chief of the Army Staff General Pradhum Ram Sharma and Karnali Province lawmakers.
3. Government of India handed over two consignments of earthquake relief materials.
4. 153 lives are lost and 164 are injured.
5. 26520 HHs are Fully Damaged, 25371 HHs are Partially Damaged.
6. 263 Nepal Army, 740 Nepal police and 234 Armed Police Force Nepal are deployed for the search, rescue and relief activities.

Nepal Earthquake Response: Jajarkot Situation Report #7 (as of 4 December 2023)

This report is produced by National Disaster Risk Reduction and Management Authority (NDRRMA) in collaboration with partners. It covers the situation of Jajarkot, Rukum West and neighboring districts following the earthquake and subsequent aftershocks on 3 November 2023.

Highlights

1. Relief materials containing Tents, Blankets and P-Foam transported to Jajarkot and Rukum West.
2. "Earthquake affected households grant disbursement procedure 2080 (2023)" (Second Amendment) approved by 20th Disaster Risk Reduction and Management Executive Committee.
3. NPR 1,41,00,00,000/- (1 Arab 41 Crore) released by Government of Nepal for construction of temporary shelter to 5 earthquake affected districts (Jajarkot, Rukum West, Salyan, Bajhang and Bajura).
4. First tranche for temporary shelter construction worth NPR 54,81,25,000/- for 34,039 affected households released from districts to respective local levels as per request and households identified for temporary shelter from local levels.
5. Additional cash relief of NPR 10 crore (5 crore each) sent to Jajarkot and Rukum West for distribution to family members of the deceased.
6. Decision made for Formation of Task Force for Preliminary Damage and Needs Assessment (PDNA) and Detail Damage Assessment (DDA).

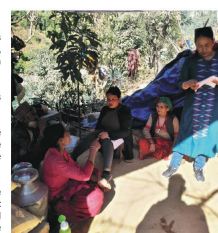

Situation Overview

144 tents, 2,036 blankets and 45 rolls of p-foam has been transported to Rukum West likewise 144 tents, 2,040 blankets and 45 rolls of p-foam has also been transported to Jajarkot.

Temporary shelter grant disbursement process is underway in the affected districts.

A team from NDRRMA deployed to earthquake affected districts for the facilitation of the "Earthquake affected households grant disbursement procedure 2080 (2023)" (Second Amendment).

In order to inform about the provisions of the "Earthquake affected households grant disbursement procedure 2080 (2023)" (Second Amendment) and the expectations made by related agencies in the construction and management of temporary housing for the homeless according to this procedure, NDRRMA discussed and interacted with representatives from Nepal Banker's Association, Nepal Chamber of Commerce, FNCCI and International Federations.
