

The 24th Executive Committee meeting of the National Disaster Risk Reduction and Management Authority has endorsed the Partner Organization Mobilization Procedure for Disaster Risk Reduction and Management, 2081.

KEY HIGHLIGHTS

- I. **Endorsement of Temporary Housing Construction Tranche Procedures for Disaster-affected Households 2081 by DRRMA Executive Committee**
- II. **Endorsement of Partner Organization Mobilization Procedure for Disaster Risk Reduction and Management 2081 by DRRMA Executive Committee.**
- III. **Devastating flooding in Thame village is due to glacial lake outburst**
- IV. **Thasang avalanche: Blocked Boksi khola starts flowing**
- V. **210 people died in disasters including floods and landslides 28th May till 28th August 2024**
- VI. **Unrestrained urbanization poses risk of land subsidence in Kathmandu**

KEY GOVERNMENTAL UPDATES

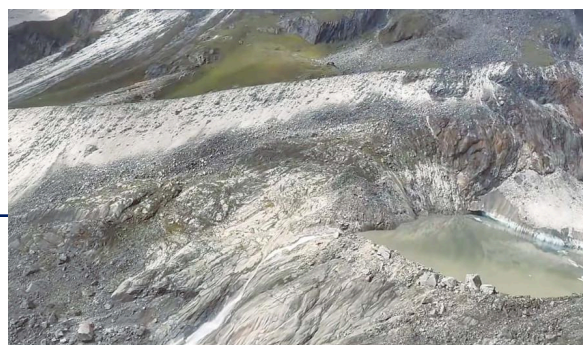

Endorsement of Partner Organization Mobilization Procedure for Disaster Risk Reduction and Management 2081 by DRRMA Executive Committee

The 24th Executive Committee meeting of the National Disaster Risk Reduction and Management Authority has endorsed the Partner Organization Mobilization Procedure for Disaster Risk Reduction and Management, 2081. This procedure has been developed under the duties, responsibilities, and authority granted by Clause 11 of the Disaster Risk Reduction and Management Act, 2074, and using the authority provided by Clause 48 of the same Act. This guideline aims to ensure a simple, transparent, coordinated, and integrated manner of resource mobilization of partner organizations in line with government priorities. It outlines the roles and responsibilities of all three tiers of government and district authorities for approval, effective implementation, and monitoring partner activities in DRRM. NDRRMA has planned a sharing session on the details of the mentioned Procedure with the development partners, including UN agencies, AIN TGDM, and DPNet, on September 16, 2024.

Devastating flooding in Thame village is due to glacial lake outburst

A devastating flooding in the Everest region that swept a village downstream on 16th August 2024, was an incident of glacial lake outburst from Thyanbo glacial lake, according to the government and an international organizations working in the Hindu-Kush Mountain region. The flooded Thame

National Housing and Settlements Resilience Platform, Nepal

River brought down Himalayan slopes mud, gravel and boulders, destroying 20 houses, an elementary school, and a clinic in ward 5 of Khumbu Pasang Lhamu Rural Municipality. As many as 135 people have been displaced as the Thame riverside settlement has been carpeted by mud and stones. Thame is a prominent village in the Namche region of Solukhumbu district.

On Saturday, 17th August, a monitoring team composed of the Minister of Defense, Honorable Manveer Rai, along with senior government officials, security officers, and experts reached Thame bazaar. After inspecting the flood-hit areas and the upstream region on a helicopter flight, they concluded that a glacial lake outburst had caused the flood. An initial assessment of damage by the local authorities shows 14 properties have been destroyed, including one school, one health post, five hotels and seven homes. Several glacial lakes lie upstream of Thame. Satellite images of the area dating back to 2017 obtained by ICIMOD from the European Space Agency's Copernicus earth observation programme show these lakes constantly changing in size. Researchers at ICIMOD confirm that some of them frequently expand and contract, making them susceptible to breaches.

Thasang avalanche: Blocked Boksi khola starts flowing

The rivulet was completely blocked by the avalanche that fell from Manapathi Mountain in the Dhaulagiri glacier on Tuesday evening, 23rd August 2024. Spokesperson and Ward Chairperson, Gautam Sherchan of Thasang Rural Municipality -2 (Mustang district), said the river that was blocked since Tuesday morning has started flowing again. Earlier, the debris of the avalanche had piled up in the Mulkharka area which made the rivulet to completely dry up due to accumulation of snow and landslide since Tuesday, 23rd August. This time's avalanche has extended the debris far down to Bokshikhola. Ward Chair added, "We have adopted precautionary measures in the embankment areas with the water level gradually increasing in the rivulet." Nine houses in the embankment areas were shifted to safer places at night. Thasang Rural Municipality-2 Ward Member Bhim Prasad Thakali said that the snow and landslides have not caused any human or physical damage. It was said that snow accumulated up to about one kilometer below Mulkharka of the rivulet. Detail news source: [Avalanches hits local Boksikhola in Mustang](#)

Approval of Temporary Housing Construction Tranche Procedures for Disaster-affected Households

The 24th meeting of the Disaster Risk Reduction and Management Executive Committee has approved the 'Temporary Housing Construction Subsidy Procedures for Disaster-affected Households, 2081'.

210 people died in disasters including floods and landslides 28 May till 28 August 2024

Due to have died in different 28th May till 210 people such as Kathmandu eight in Bagmati Province, 38 Karnali Paschim

incessant rain, 210 people due to floods and landslides parts of the country since 28th August 2024. A total of were affected by disasters floods and landslides, three in Valley, 29 in Koshi Province, Madhes Province, 46 in Province, 56 in Gandaki in Lumbini Province, 14 in Province and 16 in Sudur Province. Central Police Spokesperson and Deputy

Inspector General of Police Dan Bahadur Karki confirmed the data on 28th August. The data of people injured by monsoon-induced disasters includes - 11 people in Kathmandu valley, 42 people in Koshi province, 12 people in Madhes province, 31 people in Bagmati province, 47 people in Gandaki province, 25 people in Lumbini province, 68 people in Karnali province and 36 people in Sudur Paschim province due to landslides. Unrestrained urbanization poses risk of land subsidence in Kathmandu

This monsoon, many areas in the Kathmandu Valley experienced severe flooding. Excessive rainfall resulted in increased water levels in the Bagmati River and its tributaries, leading to floods that brought debris into residential homes across several neighborhoods settlements near to river banks like Teku, Balkhu, Samakhushi, Dhungedhara, Anamnagar, Bhotebahal, Gyaneshwor, Thamel and Chamati. Additionally, sinkholes appeared on various roads. A significant section of the road over the Tukucha Khola in Kamaladi even caved in. Experts attribute these issues to the rapid urbanization, uncontrolled settlements, unplanned construction and riverside encroachment in Kathmandu. The increasing concretization of surfaces and poor drainage systems have also contributed to the risks of inundation and land subsidence.

Meanwhile, a report on hydrological and flood modeling prepared by the High Powered Committee for Integrated Development of the Bagmati Civilization Kathmandu in 2022 mentions that river corridor of Dhobi Khola, particularly in Dhumbarahi, Gyaneshwor and Anamnagar, is more vulnerable

during floods due to low river depth. Similarly, Bishnumati Khola road corridor and built-up areas near Gongabu and Teku as well as the Manohara Khola upstream of Jadibuti. The researchers and experts have suggested proper design of sewer and drainage systems with sufficient discharge capacity for proper safeguard against inundation. The experts also suggested prohibition on the river encroachment and the narrowing of waterways. They emphasized that river training works should be carried out to mitigate the potential impacts of flooding and land subsidence on adjacent lands. Above all, urbanization should be planned in a way that allows rainwater to infiltrate the soil rather than flow directly into the rivers. Detail news source: [Land subsidence in Kathmandu valley](#)

PARTNERS' UPDATES

Two-days program organized to observe World Humanitarian Day in Sukhet

World Humanitarian Day is observed annually on 19 August to honor humanitarian workers and raise awareness of global humanitarian efforts. This year, it was celebrated with a two-day event organized in Birendranagar, Sukhet (Karnali province). The focus of the event was on stopping the normalization of attacks on humanitarian workers, preventing civilian suffering, and enforcing

international law. DpNet Nepal, actively participated in the event, sharing views on overcoming challenges and enhancing motivation in humanitarian actions. Humanitarian workers, who risk their lives to provide aid, often face unfair accusations during their duties, causing hesitation in responding to disaster-affected areas. To protect them, the nation should provide proper identification and support, which was a major highlight of the program. Additionally, there is a need for skill enhancement initiatives to prevent unintended harm during rescue operations, which both governmental and non-governmental sectors should address. Networks and funds should also be established to safeguard at-risk workers. The event concluded with a focus on recognizing and rewarding humanitarian workers, especially on occasions like World Humanitarian Day, as this is essential to encourage their efforts. For more information: [Social Media of DpNet Nepal](#)

Detailed Project Report (DPR) for Protection of lives from lightning strikes in Mountain Areas of Karnali

Scott Wilson Nepal (SWN) have recently designed Lightning Protection Systems (LPS) to protect from lightning strikes the lives of the people of Mahabu Gaunpalika, Karnali. The Gaidabaj settlement in the Gaunpalika is repeatedly hit by lightning strikes, putting lives, livelihoods, and infrastructure at risk. SWN with support from the International Organization for Migration (IoM) within its SIKAI program carried out a detailed assessment of the lightning risk-prone area resulting in a DPR that includes an innovative and affordable Lightning Protection System (LPS) and how it works, among other items. The LPS system can also be adapted for other parts of the Gaunpalika.

Community engagement session as a part of Cities4Women

A ward-level community engagement session was organized on 23 August in Lamkichuha Municipality, Ward 1, Kailali as a part of the Cities4Women project, supported by the USAID and European Union, and implemented by UN Habitat Nepal in collaboration with UNOPS and Cities Alliance. The workshop sought an active participation of ward officials, students, women's groups, community forest users' groups, and local youth clubs, to empower local voices in shaping safer and more inclusive urban spaces. Various public open spaces in the ward were identified and prioritized as part of the project's efforts to build cities that are resilient to climate change and responsive to the needs of all.

5-day training on Natural Hazard of Himalaya – Landslide and Fault Activity held in Kathmandu

A 5-day training course has kicked-off, on Aug 12, 2024, in Kathmandu with the objective to impart fundamental information and knowledge about landslides, contributing to future hazard mitigation efforts and thereby reducing human casualties and property losses in societies at risk. The program “2024 Advanced Institute on Natural Hazard of Himalaya – Landslide and Fault Activity” has been organized by the Advanced Institute on Natural Hazard of Himalaya – Landslide and Fault Activity (AI on NHH - LFA). The Advanced Institute (AI), supported by IRDR ICoE-Taipei, National Central University, and Academia Sinica, aimed to deliver a concise yet comprehensive program that includes a series of in-depth lectures, practical exercises, and a field trip. NDRRMA and NSET hosted the course in Nepal. Participants were expected to gain practical knowledge in landslide investigation, monitoring techniques, and analytical methodologies to facilitate effective hazard assessment. A focused discussion were planned to center around earthquakes and rainfall-triggered landslides in Nepal, addressing specific challenges associated with these events. This discussion aimed to contribute to a deeper understanding of the complex phenomena related to landslides in the region.

Although the training course was designed for approximately 20 young to mid-career participants with an interest or involvement in geological science, hazard analysis, and the mitigation of landslide risks in the Himalayan region from academia, practitioners, and policy communities in South and Southeast Asian countries, a total of 36 persons from Taiwan, Vietnam, Laos, India, Pakistan, Indonesia, and Nepal participated in the training program. NHSRP's PROVINCIAL ENGAGEMENTS

UPDATES FROM SUDURPASCHIM

Series of capacity-building training sessions were held in Dadeldhura and Dipayal in August focusing on the Reconstruction Management Information System (RMIS) and Building Code compliance. These sessions were organized by the Ministry of Internal Affairs and Law (MoIAL), with financial and technical support provided by the NHSRP Sudurpaschim team, who also facilitated the training. The training aimed to strengthen the skills of local technical staff and Disaster Risk Reduction (DRR) focal persons in effectively utilizing RMIS and

adhering to Building Code standards. This initiative is expected to significantly contribute to enhanced disaster preparedness and resilience within Sudurpaschim Province. Participants included technical personnel and DRR focal persons from 25 rural and municipal bodies across the districts of Darchula, Baitadi, Bajhang, Dadeldhura, Doti, Achham, and Bajura. Representatives from the District

A meeting to address the impacts of heavy rainfall on Ashad 24th 2081 was organized in Kanchanpur by NDRRMA in collaboration with the District Administration Office (DAO), Kanchanpur, on 14th Bhadra 2081. The rainfall affected severe flooding affecting over 2,000 families. The event, chaired by the Chief District Officer of Kanchanpur, brought together representatives from various UN agencies and AIN members to discuss immediate relief efforts and future plans to support the affected communities. During the meeting, NDRRMA CEO Anil Pokhrel outlined the objectives of the gathering and shared NDRRMA's strategic response to the disaster. Following the event, the NDRRMA team, along with representatives from the DAO and local municipalities, conducted a field visit to Dodhara Chandni Municipality, one of the areas most severely impacted by the flood.

UPDATES FROM KARNALI

Orientation program for the local levels of Jumla district completed on 13-14 August on key guidelines and tools essential for disaster risk reduction and reconstruction. Participants included 30 representatives from eight local levels, including Bipad (DRR) focal persons, IT officers, engineers, sub-engineers, Nepal police, and officials from District Administration Office (DAO) Jumla. This event, organized by the DAO Jumla and supported by NHSRP, aimed to equip local staff with essential knowledge on the reconstruction guidelines of NDRRMA, inspection procedures, RMIS, and the latest provisions in Nepal's National Building Codes. The program was inaugurated by Chief District Officer Mr. Jaya Kumar Ghimire, who emphasized the importance of disaster preparedness and effective coordination between district and local governments in his opening remarks.

One day training on" Private Housing Reconstruction & National Building Code and Inspection Procedures" Completed in Tribeni Rural Municipality Rukum West. Date: 29 August 2024.

The annual progress review meeting of development partners and non-governmental organizations working in Jajarkot district was held on August 27, 2024. The program was organized by the Jajarkot District Coordination Committee. Here are some glimpses of the program

UPDATES FROM LUMBINI

Three events of two-days GEDSI training for local government completed in Raptisonari Rural Municipality (Banke), Rapti Rural Municipality (Dang) and Sarumarani Rural Municipality (Pyuthan) in August. The training aimed to localize the NDRRMA's GEDSI Strategic Action Plan. NHSRP provided technical support to organize these events of GEDSI trainings for local governments across Lumbini Province. Coordinated with the Ministry of Internal Affairs and Law - Lumbini Province, these trainings have been vital in enhancing the knowledge and capacity of local government staff in planning and community development. The skills gained are expected to play a key role in prioritizing GEDSI issues at both the ward and rural municipality levels. In each training, more than 60 participants gained knowledge & insights on mainstreaming GEDSI in disaster risk reduction programs through the training.

UPDATES FROM BAGMATI

A coordination meeting was held with the Disaster Risk Reduction (DRR) focal person and the cluster lead agency of Bagmati Province at the MoIAL in presence of the MoIAL's Secretary Purna Bahadur Darji. The meeting focused on reviewing the activities and achievements of the previous Fiscal Year, with an emphasis on the lessons learned from the monsoon season. The discussions highlighted the effectiveness of the implemented strategies and areas for improvement in monsoon preparedness and response plan. Additionally, the meeting outlined the planned activities for the Fiscal Year 2081/82 (2024/025), with a focus on enhancing early warning systems, capacity building, and community engagement to further strengthen disaster risk reduction and management efforts across the province. The collaborative efforts of all stakeholders were recognized as crucial for achieving the set objectives and ensuring the safety and resilience of communities in Bagmati Province. The NHSRP Bagmati province team was also present and highlighted the challenges and gaps in disaster risk and reduction in the Bagmati province. For more information contact: vishma.basnet@hrrpnepal.org

UPDATES FROM KOSHI

Knowledge, attitudes and Practice (KAP) assessment study carried out across various locations in Budiganga Rural Municipality (Morang), from 12-15 August, focusing on Janata Awas Housing. NHSRP's Technical Coordinators led field observation along with focussed meetings with the community from Ward no 4, 5, 6 and 7. The meeting also covered Key Informants Interviews (KIIs) with the respective local officials, mainly Ward Chiefs. The focused group discussions included participants from mixed groups and the male & female groups. The team also visited several houses constructed under the Janata Awas Program.

One-day session on monsoon-fire affected housing reconstruction procedures of NDRRMA was shared and oriented by the NHSRP Koshi team at Panchthar. The session also provided insights into

the Reconstruction MIS, Bipad Apps, technical inspection processes, and other related procedures. This event held on 8th August at Panchthar, saw the participation of 45 representatives from 13 local governments and 3 District Administration Offices of Illam, Panchthar, and Taplejung.

मनसुन २०८१ को ६० दिने अवस्था प्रतिवेदन

(२०८१ जेठ २८ - २०८१ साउन २४)

जेठ २८ गते नेपाल प्रवेश गरेको मनसुन सक्रिय भई देशका विभिन्न भागमा पानी पर्ने क्रम जारी छ। जल तथा मौसम विज्ञान विभागले प्रक्षेपण गरेकोनुसार नौ गो वर्ष औसतभन्दा बढी नै पानी परिरहेको छ।

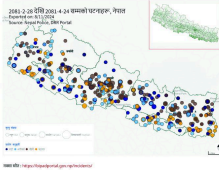

मनसुनजन्य विपद्को क्षति कम गर्न राष्ट्रिय विपद् जोखिम न्यूनीकरण तथा व्यवस्थापन प्राधिकरण मनसुन आउँदैछ भन्ने सरोकारवालासँग सन्तुलन गरी पूर्वसूचना सुन्ने। खोज, उद्धार र राहतका काम गर्न तयारी अवस्थामा रहने। परिणामस्वरूप निजी क्षेत्र, साझेदार संस्था, सुरुवात निकाय, स्थानीय तथा प्रदेश सरकार र विपद् सम्बन्धित निकायहरूसँग समन्वय गरी काम भइरहेको छ।

यस अतिरिक्त विपद् सम्बन्धी सूचना प्रवाहलाई पनि प्राधिकरणले प्राथमिकतामा राखेको छ। विपद् सम्बन्धी पुर्नगठनी, खोज, उद्धार र राहतका सम्बन्धमा विभिन्न स्तरबाट साटासाट सहकार्यलाई रोजा सार्वजनिकता समेत तत्काल पुगे गरी सूचना समन्वयमा भइरहेको छ।

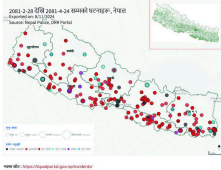

हालसाले:

- जेठ २८ देखि साउन २४ सम्म ६० दिनमा मनसुनजन्य विपद्ले १०० जनाको मृत्यु, ४४ जना बेपत्ता र १९५ जना घाइते।
- मनसुनजन्य विपद् प्रभावित परिवार संख्या २,९९८।
- गतवर्ष सँगै अवधिमा ६२ जनाको मृत्यु, २८ जना बेपत्ता, १०० जना घाइते र विपद् प्रभावित परिवार ५,८८१।
- मनसुनजन्य विपद्ले सबैभन्दा धेरै गाउँको प्रदेशमा ५४ जनाको मृत्यु, सबैभन्दा कम मर्ने प्रदेशमा तीन जनाको मृत्यु।
- असार २८ गते चितवनको भरतपुर महानगरपालिकाको सिमलतालमा गैरमान बहाबमा गरी दुई बसका ६२ जना यात्रु बिहारी नदीमा बेपत्ता। (सि मन्त्रो २४ जनाको शव फेला परेको।)
- मानसुनको भौतिक बोनसको आधारमा ऐतिहासिक वर्षाजल प्राप्त गर्नको ७० वर्षको इतिहासमा सबैभन्दा धेरै ६२४ मि.मि. वर्षा।

मनसुनको ६० दिनमा मनसुनजन्य घटनाहरूको क्षति नक्सा
