

Activity Report

Orientation on Confined masonry, Dry stone, Timber Treatment process and M & E Process

[08-21-2017]

Activity Date:	08/21/2017
Report Prepared By:	Sachin Sapkota
Facilitator	Sachin Sapkota, Pramod Khatiwada & Khagendra Raj Awasthi

Discussion:

Welcome and Introduction:

- Prabin Gautam District Coordinator of Dhading welcomed all the participants in the Orientation of confined masonry, dry stone masonry, timber treatment process and Monitoring & Evaluation Process. The orientation was mainly focused for technical person of POs, DLPIU, NRA and other interested persons. He also presented the orientation schedule and course content of the presentation. After that introduction among the participants was conducted.

Confined Masonry(Sachin Sapkota)

- This presentation was focused on introduction of confined masonry, its construction processes, guidelines, possible causes of failure.

Dry Stone Masonry(Pramod Khatiwada)

- In this presentation mainly briefed about reason behind adopting stone masonry, its construction technology in dressed stone and random rubble stone masonry with GI wire mesh. This was quite interesting for the participants because in our northern belt most of the constructions are based on such techniques.

Timber and Bamboo Treatment Process(Sachin Sapkota)

- Timber and bamboo treatment session was mainly focused on steps involved in the chemical treatment of timber and bamboo. Chemicals like mixture of bitumen and kerosene for timber, boric-borax solution and Tim-bor solution for bamboo treatment.

M&E Process(Khagendra Raj Awasthi)

- This presentation was focused on monitoring and evaluation process, its objectives, outcomes and the vision that CLPIU has taken regarding reconstruction.

Closing Remarks(Prabin Gautam)

- Finally all the participants were thanked for their active participation and constructive discussions throughout the orientation. They were requested for more active participation in future programs of HRRP.
