At the 14th National Council Meeting of NDRRMA, Rt. Honorable Prime Minister KP Sharma Oli proposed another international summit with donor communities and partners to fast-track the reconstruction of disaster-impacted homes. Key resolutions set deadlines by the Council Meeting include - construction of temporary housing completion by mid-November 2024, rapid restoration of essential services, and a swift damage assessment to prioritize rebuilding efforts in 71 local municipalities which are declared as the disaster -crisis zones by the Cabinet Meeting. Recognizing the immense need for rehabilitation and recovery, the government allocated NRs. 430 million to support local levels in rebuilding their communities.

KEY HIGHLIGHTS

- I. September Flooding: Nepal government declares 71 local units of 20 districts as disaster crisis zones**

- II. **Review of Monsoon 2024: Nepal witnessed excessive rainfall resulting in flash floods and landslides in Kathmandu valley as well as its adjoining districts**
- III. **National Climate Summit held in Kathmandu to raise voice 'from mountains to sea' at COP 29**
- IV. **APMCDRR brought together a wide range of stakeholders to accelerate progress in reducing disaster risk**
- V. **APSSF highlights key best practices and lessons in post-disaster housing recovery across the Asia-Pacific Region**
- VI. **World Habitat Day marked with a focus on engaging youth for thriving cities**
- VII. **IDDRR 2024 focused on empowering youths as the foundation for a culture of disaster preparedness**

KEY GOVERNMENTAL UPDATES

September Flooding: Nepal government declares 71 local units of 20 districts as disaster crisis zones

In the face of widespread destruction caused by rainfall-induced flood and landslide tragedy of September 2024, the Government of Nepal swung into action to coordinate relief and rescue operations, providing immediate assistance to those affected. The district and municipal administration worked tirelessly to ensure that emergency resources reached the hardest-hit areas, demonstrating a level of preparedness and responsiveness.

Recognizing the immense need for rehabilitation and recovery, the government allocated NRs. 430 million to support local levels in rebuilding their communities. This decision was made during a cabinet meeting on 18th October (2nd Kartik), following recommendations from the NDRRMA's 27th Executive Committee Meeting held on 17th October (1st Kartik). Rt. Honorable Prime Minister KP Sharma Oli also directed relevant agencies and the three levels of government—federal, provincial and local—to expedite relief distribution and reconstruction efforts. [News source: declaration of disaster-crisis zones](#)

The government had already declared the 71 local units of 20 districts as the 'disaster crisis zones' for three months, through the Cabinet decision of 4th October, after the eastern and central region of the country was hit hard by the rainfall induced landslides and flood from 26th -28th September. The affected districts were categorized into three groups: severely affected, affected and generally affected. Based on this classification, local levels in severely affected districts will receive up to NRs. 10 million in grants, while those in affected districts will receive NRs. 7.5 million, and generally affected local bodies will receive NRs. 5 million. This financial support is aimed at facilitating the reconstruction of damaged homes and infrastructure, with funds being distributed through local levels as identified by the NDRRMA.

Additionally, the government announced a relief package for families who lost their nearest family members, ensuring they receive the financial support they desperately need during these difficult times. This prompt decision to release funds for reconstruction and relief underscores the government's commitment to providing timely assistance to its citizens and rebuilding stronger, more resilient communities.

At the [14th National Council Meeting of NDRRMA](#), Rt Honorable Prime Minister KP Sharma Oli proposed holding another international summit with donor partners and countries to expedite the reconstruction of the thousands of homes damaged by the disaster. Council meeting held on 18th October (2nd Kartik) also established deadlines for the commencement of all reconstruction and recovery work related to damaged infrastructure. As per the decisions, temporary housing construction must be completed by mid-November 2024, essential services must be operational within 15 days, and a detailed damage assessment (DDA) must be conducted immediately within 15 days to accelerate the reconstruction of public infrastructure and private homes.

Review of Monsoon 2024: Nepal witnessed excessive rainfall resulting in flash floods and landslides in Kathmandu valley as well as its adjoining districts

The 2024 monsoon season in Nepal, onset on June 13th to withdrawal on October 2nd, saw heavier-than-normal rainfall, aligning with predictions by the Department of Hydrology and Meteorology. This year's monsoon period marked a significant increase in rainfall, which triggered various natural disasters, resulting in more human and material losses compared to previous years. An extraordinary downpour on July

8th-9th recorded 624 mm of rain at the Dodhara Rain Measuring Center in Kanchanpur, the highest daily rainfall in 77 years. Despite such extreme events, timely public messaging and early warning and disaster preparedness actions helped avert loss of life, showcasing the effectiveness of early warning systems. Source: [Report on 2024 Monsoon Review-draft](#)

Several severe incidents occurred due to intense rainfall and flash floods. On July 12th, a tragic accident in Chitwan's Simaltal region saw two buses swept into the Trishuli River, with 59 people missing and only 24 bodies recovered. The Nepali Army, Nepal Police, Armed Police Force, and India's National Disaster Response Force (NDRF) collaborated in an extensive search operation, using advanced technology, including underwater drones and sonar cameras. Additionally, on August 16th, two glacial lake outbursts in Solukhumbu district led to destructive floods in Thame, damaging 27 buildings, including a school and health post. The monsoon's phase from September 26th – 29th brought heavy rains that caused widespread damage to infrastructure and agricultural fields, blocking 39 highways and costing over NRs 27 billion rupees. All roads to the capital Kathmandu were blocked by the heavy monsoon rainfall. The rainfall was reported to be the highest since the start of the measurements in 1970.

Throughout the monsoon season, 494 lives were lost, 66 still missing, 523 injured and 5,937 families were directly affected across 63 districts, with Bagmati Province reporting the highest fatalities at 276. In anticipation of intense rainfall, the NDRRMA endorsed the 'National Action Plan for Monsoon Preparedness and Response, 2081,' which involved deploying rescue resources and equipment to high-risk areas. The government declared 71 local levels in 20 districts as disaster-prone, while over 5,000 individuals were relocated to safer areas. While this monsoon brought record rainfall, improved disaster preparedness strategies helped mitigate losses and increase community resilience.

In response to 26th-29th September 2024 Flooding All Nepal, the Executive Committee of NDRRMA led by the Minister of Home Affairs (MoHA) outlined key measures to support those impacted by recent disasters. Families of the deceased or missing for over ten days are accounted for eligibility on financial aid of NRs 200,000 (USD 1,500). To address immediate needs, the government has tasked relevant ministries with the reconstruction of damaged infrastructure, including public buildings, roads, bridges, and essential facilities. A "Shock Responsive Social Protection" guideline was proposed to strengthen social support systems, and local governments are mandated to identify beneficiaries promptly, ensuring rapid disbursement of grants. Temporary housing grants of NRs 50,000 (USD 400) will be provided to those with damaged homes, while disaster management committees at provincial and local levels are activated for comprehensive relief and recovery operations. National Climate Summit held in Kathmandu to raise voice 'from mountains to sea' at COP 29

Under the leadership of the Ministry of Forest and Environment, National Climate Summit 2024 on "Loss and Damage, Mountains, and Climate Finance," was organized by the Ministry of Forest and Environment, Government of Nepal in Kathmandu on 26th October 2024. The collaborative efforts of Practical Action in Nepal, Youth Alliance For Environment (YAE) and Oxford Policy Management, the National Climate Summit highlighted the meaningful participation of Nepal in the upcoming COP 29th UN Climate

Conference of Parties (COP29). The event was graced by the esteemed presence of Rt. Honorable Prime Minister KP Sharma Oli. Addressing the inaugural session PM Oli said that Nepal's stance on climate justice, presented at the 79th United Nations General Assembly, will be more effectively expressed at COP 29th.

Key themes of the discussion were: Impact of Climate Change across Seven Provinces, Nepal's Proposal for Climate Finance at COP 29, Challenges and Responsibilities of Developed Nations, and Commitment to Reducing Climate Change Impacts in Nepal. This summit marks a key step in Nepal's preparation for COP29, prioritizing inclusive and participatory approaches to climate action. It is believed that suggestions and feedback collected through discussions on seven thematic areas, including climate finance, loss and damage, mountainous regions, and climate and gender issues during the summit would help make Nepal's agenda for COP29 even more strong and effective. APMCDRR brought together a wide range of stakeholders to accelerate progress in reducing disaster risk

The Asia Pacific Ministerial Conference on Disaster Risk Reduction (APMCDRR) 2024, held in Manila on 14th-17th October 2024 was centered around three thematic pillars: enhancing disaster risk reduction financing, fostering gender-responsive and inclusive disaster risk governance, and strengthening localization in both urban and rural resilience efforts. These pillars were underpinned by four cross-cutting themes: science, technology, and knowledge; multi-stakeholder coordination and collaboration; convergence and coherence of disaster risk strategies; and full private sector

National Housing and Settlements Resilience Platform, Nepal

engagement. Discussions on loss and damage highlighted the urgent need to close the gap between climate finance pledges and actual contributions, especially to protect vulnerable communities. Key issues included the lack of data on slow-onset hazards, gap between pledge and commitment on loss & damage fund, and challenges in accessing climate finance.

The discussions in APMCDRR 2024 delivered a clear and urgent message mainly on - i) Country-driven Prioritization of Resilience Actions; ii) Systematized Data for Informed Decision-making, iii) Institutional Reform to Facilitate Resilience and Integrate DRR & Climate Action, iv) Budget Tagging and Tracking to Measure Investments and Outcomes; and, v) Strengthening the Evidence Base to Inform Policies and Practices.

CRS led a partner session on Moving the Margins to the Mainstream: Progress and Gaps in Effective Inclusive DRR in Asia Pacific. NDRRMA's Chief Executive Anil Pokhrel was one of the panelists and he shared the journey of drafting and endorsing the GEDSI Strategic Action Plan for DRR, which was hugely appreciated by the participants.

APSSF highlights key best practices and lessons in post-disaster housing recovery across the Asia-Pacific Region

Asia Pacific Shelter and Settlements Forum (APSSF) 2024 was held in Philippines, Manila on 21st -23rd October 2024 with the objective of bringing together shelter practitioners, policymakers, and other key stakeholders to discuss and share insights and best practices on shelter and settlements in the Asia-Pacific region. This year's theme was "Building towards resilient and inclusive homes and communities". The practitioners from shelter, settlements and disaster risk reduction assembled at the two-days forum to share ideas on post-disaster housing recovery across different countries that provided valuable exchange of knowledge and experiences among practitioners in the field.

The team from CRS, National Housing and Settlements Resilience Platform (NHSRP) along with NDRRMA and Ministry of Physical Infrastructure and Development (MoPID) Bagmati Province participated in the event and joined as a panelist/speaker for three sessions and keynote speaker for the opening remarks. CRS/NHSRP also disseminated learning documents and project briefs through the market stall along with the VR video of NHSRP

and earthquake response. NDRRMA and NHSRP both resonated the key insights from the Nepal Shelter Forum 2024 ([#NSF2024](#)) highlighting the experiences of localizing policies and coordination for resilient and inclusive homes and communities with a stronger commitment to continue active engagement to influence collaboration and localization.

Government of Nepal and World Bank delegation visits Provincial Disaster Management Authority (PDMA) Sindh, Pakistan to study floods 2022 response and disaster risk management systems

A high-level delegation from the Government of Nepal and World Bank visited the Provincial Disaster Management Authority (PDMA) Sindh in last week of October 2024 to gain insights into the authority's efficient handling of the 2022 floods and to understand its Multi-Hazard Vulnerability and Risk Assessment (MHVRA) and Disaster Management Information Systems (DMIS).

Mr. Imdad Hussain Siddiqui, Director (Operations) PDMA Sindh, delivered a comprehensive briefing on the operations and mitigation strategies employed by PDMA Sindh during the catastrophic floods of 2022 in Sindh Province Pakistan, whereby highlighted the authority's rapid response, coordination with local and international stakeholders, and successful relief operations, which set a model for disaster management in the region. Detailed presentation was also shared on the MHVRA and the Disaster Management Information Systems (DMIS) developed by PDMA Sindh.

Mr. Waseem Shamshad, Secretary to the Government of Sindh, Rehabilitation Department, also met with the delegation, engaging in fruitful discussions on various topics of mutual interest, including Disaster Risk Reduction (DRR) initiatives undertaken by PDMA Sindh. The meeting underscored the importance of regional collaboration and knowledge exchange to enhance disaster management capabilities.

The visit team also toured two project villages in Tando Allahyar—Ahmed Khan Lashari and Ismail Shah Colony—where they explored constructed houses, met with the Village Reconstruction Committee, and interacted with beneficiaries, appreciating the active role of women in the reconstruction efforts. World Habitat Day marked with a focus on engaging youth for thriving cities

Ministry of Urban Development, in collaboration with UN-Habitat, Department of Urban Development and Building Construction, Nepal National Urban Forum (NNUF) and various urban stakeholders, organized a one-day event to commemorate the World Habitat Day 2024 themed “Engaging Youth to Create a Better Urban Future” and the Nepal National Urban Forum on “Financing Localization and Localizing Finance” on 7th October 2024 in Kathmandu, Nepal.

The Voluntary Local Review (VLR) Report of Chandragiri was

National Housing and Settlements Resilience Platform, Nepal

also officially launched at the event. The report is a significant step in localizing the Sustainable Development Goals that provides valuable insights into the municipality's progress towards the SDGs, that guides the actions to achieve the targets and the importance of VLRs to achieve the national SDG commitment. The Chief Guest, Hon' Deputy Prime Minister and Minister of MoUD, Mr. Prakash Man Singh highlighted youth as the future of Nepal's cities and must be actively engaged in planning and decision-making to shape a better tomorrow.

Other sessions in the event included a presentation on New Towns and Cities in Nepal and several other powerful youth-led initiatives on urban greenery, waste management, urban mobility, community mobilization and digital governance. The afternoon session transitioned into the NNUF which focused on localizing finance for sustainable urbanization to align local actions with global urban agendas for the [World Urban Forum \(WUF\)](#) and poster presentations showcased ongoing efforts by several organizations. Source: [World Habitat Day marked](#)

IDDRR 2024 focused on empowering youths as the foundation for a culture of disaster preparedness

This year's International Day of Disaster Risk Reduction (IDDRR) 2024 was observed in Kathmandu through a Symposium, with a theme of, "Empowering the Next Generation for a Resilient Future", focusing on the vital role that youth play in building disaster resilience. By equipping younger generations with the knowledge, skills, and innovative tools necessary to confront disaster risks, we can reduce the vulnerability of communities and ensure a more resilient future. Youth empowerment is key to creating a culture of preparedness, where the next generation can confidently manage and mitigate disaster risks.

The primary objective of the 2024 IDDRR Symposium was to foster dialogue, knowledge-sharing, and innovation in disaster risk reduction, with a special emphasis on youth empowerment and resilience-building. The IDDRR Symposium 2024 seeks to raise awareness on the importance of disaster risk reduction with a particular focus on empowering youth to build a resilient future through technical presentations, panel discussions, and reflection discussion sessions.

This event aligns with Nepal's commitment to global DRR frameworks and is strategically designed to empower youth as champions of resilience. Through collaboration, knowledge exchange, and strategic partnerships, the symposium contributes to building a sustainable and disaster-resilient society for future generations. PARTNERS' UPDATES

September Monsoon Flooding: Summary of Humanitarian Responses from Clusters

The United Nations (UN) has initiated the Central Emergency Response Fund (CERF) Anticipatory Action for Eastern Nepal to facilitate aid distribution. Humanitarian clusters have convened to streamline response efforts, with the Nepal Red Cross Society leading search and rescue missions, evacuations, and relief distributions, reaching approximately 1,500 affected individuals with essential non-food items. The protection cluster has prepositioned dignity, *kishori*, and children's kits and is operating child helplines and shelters for affected children. Several shelter cluster members, Nepal Red Cross and including the International Non-Governmental Organizations (INGOs), have provided emergency shelter resources to flood affected households across Lalitpur, Bhaktapur, Kathmandu, and other districts. These coordinated efforts ensured that affected populations receive immediate support while comprehensive recovery plans take shape.

The START Fund Nepal has provided GBP 400,000 to the Consortia organizations, while the International Federation of Red Cross and Red Crescent Societies (IFRC), along with the Nepal Red Cross Society mobilized over 520,000 Swiss francs to aid 20,000 people. Emergency relief items from prepositioned Red Cross stocks have also already reached nearly 5,000 individuals. Source: [Nepal Monsoon Flooding-update 4_UN Office of the Resident Coordinator](#)

Flood affected community assets are being rehabilitated in Kavre

The rehabilitation of drinking water and irrigation schemes are ongoing through the RELIEF project led by the CRS Nepal's consortia. The Cash for Work (CfW) program commenced in several locations of Panauti Municipality and Roshi Rural Municipality (Kavre district) with enthusiastic members of water and irrigation user committees participating. The community members are eager and pleased to contribute to clearance of the debris left behind by the 2024 September 26th-29th Flooding. In response to the government's decision to assist with the September 2024 floods across Nepal, CRS-led consortia have supported a total of 240 flood and landslide-affected households with unconditional cash in Panauti Municipality and Roshi Rural

Municipality. Affected households have been verified by the respective local governments in coordination with District Administration Office Kavre and NDRRMA. The project moved to the Cash for Work (CfW) program where members from flood-affected households actively engaged with resilient community spirits in restoring vital community assets such as cleaning of flood accumulated debris in Ward offices, in public schools, birthing centers and RELIEF project & CRS's Feedbacks, Complaints and Response Mechanisms (FCRM) also provided to CfW participants. Similarly, CfW communities were handed over with pipes/pipes fitting materials for the varying needs of rehabilitation & restoration.

As part of UK in Nepal and Start Network - funded "REstoring Local assets and Infrastructure through Emergency Financing (RELIEF)" project, CRS Nepal led consortia with Shanti Jana Adarsh Sewa Kendra (SJASK) and NHSRP is supporting 800 affected households in Panauti and Roshi of Kavrepalanchowk district. Initiating discussions on formulating the Local Disaster and Climate Resilience Framework for Barekot Municipality

Through the Joint Recovery Action Plan (JRAP) project, and with technical guidance and facilitation by NHSRP organized a two-day workshop on October 27th-28th to initiate discussions on developing the Local Disaster and Climate Resilience Framework (LDCRF) for Barekot Rural Municipality in Jajarkot district.

The objective behind conducting LDCRF workshop was:

- to localize the Sendai Framework for Disaster Risk Reduction (2015-2030), the Sustainable Development Goals (2015-2030), and the Paris Agreement (2015) for effective implementation of disaster risk reduction, management and climate change issues,
- To prepare an integrated and coordinated document to mainstream disaster risk reduction, management, and climate change issues into local development plans.

This workshop brought together local officials and key stakeholders and discussed collecting essential municipal data on historical, geographic & socio-environmental context, status of disaster, biodiversity, land-use, environmental services,, along with water, forest, other publics & made-made resources. The local data collection is the critical component for shaping the framework. Key steps in the workshop included identifying and engaging local stakeholders in mapping vulnerabilities, data collection needs, assessing local disaster and climate risks, and planning initial actions for framework implementation. Initiative on Strengthening Disaster Risk Management Systems for Resilience in Southern Nepal

A province-level workshop for the "Strengthening Disaster Risk Management Systems for Resilience in Southern Nepal" (UTTHAN) program was held in Janakpur, Madhesh Province, on

National Housing and Settlements Resilience Platform, Nepal

October 28th, 2024. The main objective was to introduce project team members and establish work modalities and coordination mechanisms with provincial stakeholders involved in Disaster Risk Reduction and Management. This program aimed to foster collaboration between provincial stakeholders and the project team.

NSET, in collaboration with Koshi Victim Society (KVS), is implementing the UTTHAN program in four municipalities: Rajbiraj Municipality, Saptakoshi Municipality, Bhagwanpur Rural Municipality, and Aaurahi Municipality in Madhesh Province, under the guidance of the NDRRMA and with financial support from USAID's Bureau for Humanitarian Assistance (USAID/BHA).

The workshop brought together various stakeholders, including Ministers of Madhesh Province, government employees, representatives from security agencies, community members, and representatives from NSET and KVS. The event was chaired by Mr. Rajkumar Lekhi, Minister for Home, Internal Affairs, and Communication of Madhesh Province.

Three-days engineers training on resilient housing and on application of lime stabilized soil technology

CRS Nepal in collaboration with Caritas Nepal successfully conducted a 3-day Engineer's Training on Resilient Housing in Nepalgunj from 25th -27th August, 2024. The training focused on enhancing the understanding and application of Lime Stabilized Soil Technology for flood-resilient construction, updating participants on Nepal's national building codes, and empowering local engineers to utilize natural building materials effectively. The program included theory sessions, practical demonstrations, a field visit, and interaction with local masons and communities. Training was also supported by the Department of Urban Development and Building Construction (DUDBC) Banke. Engineers from nine municipalities in Banke and Bardiya district of Lumbini province participated, gaining critical skills to build durable, sustainable homes in flood-prone regions.

NHSRP's PROVINCIAL ENGAGEMENTS

UPDATES FROM SUDURPASCHIM

Technical support continued to the Ministry of Internal Affairs and Law (MoIAL), and provided technical support across various disaster risk reduction and management initiatives. This includes addressing housing-related queries within the NDRRMA reconstruction and resettlement procedural guidelines, extending assistance to municipal bodies throughout Sudurpaschim Province. Key responsibilities encompass the creation of user IDs, verification and approval of incident data, enrollment of local government bodies, district-level inspection of reconstructed homes, and overseeing tranche release

processes. Additionally, the team regularly supports the compilation of disaster data and information for inclusion in the Provincial Emergency Operation Center's (PEOC) disaster bulletin for Sudurpaschim.

For more information: sabin.shrestha@hrrpnepal.org

UPDATES FROM KARNALI

Workshop on reconstruction and recovery action plan completed at Banphikot Rural Municipality and Chaurjahari Municipalities of Rukum West district on October 25th and 27th respectively. The purpose of the action plan workshop was to discuss the pertinent issues at local level to initiate the reconstruction of damaged households due to the Jajarkot Earthquake 2023. This initiative, the first of its kind in these local bodies, marks a significant step in drafting the municipality's comprehensive Reconstruction and Recovery Action Plan.

A workshop on municipal data collection and reconstruction and recovery action plan was held in Nalgad Municipality and Kushe Rural Municipality of Jajarkot district on October 25th & 28th respectively focusing on the local initiatives to rebuild homes damaged by the 2023 Jajarkot Earthquake. This event was a milestone for both areas in advancing data-driven recovery planning.

Supported by the Joint Recovery Action Plan (JRAP) project and guided by NHSRP's technical team, the workshop aimed to streamline efforts toward a robust Reconstruction and Recovery Action Plan. Municipal staff, elected ward representatives, and key stakeholders of these local governments gathered to align on recovery strategies and strengthen collective commitment. The workshop also involved collecting data on housing reconstruction needs, local resources, workforce availability, and disaster risk management frameworks—essential steps toward a resilient recovery for Jajarkot!

Supported financially by the UK's Foreign, Commonwealth and Development Office (FCDO), this joint programme is being implemented by four UN agencies —UNICEF, IOM, UNFPA, and WFP—under the leadership of the UN Resident Coordinator's Office.

UPDATES FROM LUMBINI

Capacity building assistance in the enrollment of beneficiaries and the subsequent release of reconstruction tranches were forwarded in local government bodies of Lumbini province. Furthermore, technical support continued to DRR focal person of Ministry of Internal Affairs and Law (MoIAL) Lumbini province on Bipad Portal and RMIS tool. The NHSRP province team has consistently provided extensive technical support to the provincial ministry, ensuring effective assistance throughout the process.

For more information: prakash.basnet@hrrpnepal.org

UPDATES FROM GANDAKI

The NHSRP province team meticulously coordinated with the DRR focal person and technical personnels of local governments in several districts to document beneficiary information comprehensively mainly for release of second and third tranche of monsoon affected disaster housing reconstruction. Furthermore, technical support continued in disaster affected beneficiaries' information entry to the DRR focal person of Office of Chief Minister and the Council of Ministers (OCMCM, Gandaki Province) on Bipad Portal and RMIS tool.

For more information: rajesh.sunuwar@hrrpnepal.org

UPDATES FROM BAGMATI

Continuous technical support extended to various districts in the Bagmati province, including Dolakha, Makawanpur, Sindhupalchowk, Dhading, Rasuwa, and Nuwakot through virtual medium on NDRRMA Reconstruction MIS (RMIS) to several local bodies (Rural/Municipalities). The virtual support sounds effective in capacity enhancement of local levels such as DRR focal person and technical staff for data collection on disaster affected beneficiaries. User Id creation of the respective local governments for inspection process of reconstructed houses and tranche release process were also prioritized during the virtual interface. The assistance primarily involves creating User IDs, incident data verification, approval and enrollment of the respective local government units, as well as district and inspection processes of reconstructed houses and tranche release processes.

For more information: laxmiprasad.bhatta@hrrpnepal.org

UPDATES FROM KOSHI

An in-person orientation session held on the Reconstruction MIS (RMIS), survey procedures, tranche disbursement, and technical inspection was held for the Disaster Risk Reduction (DRR) focal person of Diktel Rupakot Majhuwagadhi Municipality and the IT personnel from the District Administration Office (DAO) Khotang. The orientation provided detailed guidance on the steps

required to conduct surveys, enrollment process, carry out inspections, and manage tranche disbursements for families affected by recent landslides, as well as those impacted by previous landslide and fire incidents. The training was designed to streamline processes and enhance support for affected families as part of ongoing disaster recovery efforts.

Coordination meeting held with the CDO and the DRR focal person of the District Administration Office (DAO) Okhaldhunga to discuss the current reconstruction status in Okhaldhunga. The discussion focused on the challenges and the way forward in reconstruction efforts, including survey processes, the use of the RMIS (Reconstruction Management Information System), and procedures for tranche disbursement. It was noted that, to date, no families have received any installments.
