

Mr. Jagat Bdr Chettri signing agreement for housing reconstruction assistance of Nepal government

In service of disaster affected people in Nepal for the past 26 years!

Enrollment supported

Singati – 6 Volunteers (only 28% enrolled) -- 13 March to 29 March

Raviopi – 8 Volunteers, office space and drinking water (about 50% enrolled) – 10 April till date

Review meeting with volunteers in Raviopi

Positive aspects

1. People feel Engineering survey was done well and most are satisfied with the list and being listed / presence of list is guide to enrollment
2. People are interested to enroll and they are coming as guided with necessary papers (flow rate 50 people or more in Raviopi per day)
3. Landowners who cannot come have given *Manjurinama* (letter of consent) and this includes people such as sick , disabled ,spouse ,elders .
4. Bank account opening services going on okay in Raviopi but there was more challenges in regards to this in Singati (lack of trained staff / volunteers). Tablet use for bank account opening in Raviopi was useful
5. DUDBC designs were displayed and organization such as NSET or Build change doing the awareness raising in enrollment camp
6. VDC secretaries working hard, no problem in Raviopi

Some Concerns of People :

1. Family members could not get NISSA or CHIT because they were not at home / working
2. HH has been living in AILANI / Not registered land
3. HH is not able to find necessary papers and so need to re-obtain the same
4. HH are selecting the “other” design given they are not knowledgeable of or confident to follow DUDBC design /costs related to it
5. Family are asking if they can build on other land etc
6. The name list of CBS has two names in one row (or in one serial number) while these people have two chits

Recommendations

1. Orientation was done well in Singati but only very short one in Raviopi, need to standardize it.
2. Orientation should be given to VDC secretaries and expected benefits as discusses / provided
3. VDC level enrollment center is necessary and should be continued
4. There was confusion in regards to papers and number of photos at one stage and this should be clearly informed earlier on
5. Decision on how to deal with citizens with Ailani land has to taken
6. Volunteers need to be kept at Malpot (land revenue) office to help out
7. Information how branchless banking could reach them should be finalized and citizens informed
8. Support to most vulnerable individuals / HH may be needed to bring them to the enrollment station
9. Awareness Engineering designs with local alternatives and tentative costs to be done
10. Post enrollment information should be provided
