Agendas

1. Welcome, attendance and introduction
2. Brief work update from partner organizations
3. A few words from NRA
4. Way forward

1. Welcome, attendance and Introduction

The meeting was facilitated by Kathmandu valley HRRP coordinator Mr. Rupak Risal. Representatives of eleven partner organizations, and NRA officials attended the meeting. The purpose of the meeting was to restart the coordination and build rapport between partner organizations and NRA officials that had stopped for a while.

2. Brief work update from partner organizations

- Rotary:ERRRP (Earthquake Relief Rehabilitation and Reconstruction Program) was established after the earthquake. Fifty five households are in plan for reconstruction with Rotary's assistance in the district out of which, forty nine are already reconstructed. Technical and material assistances are also being provided. All houses were made following the earthquake safety standards, including drainage systems. There are many Rotary clubs in the district, which has also been involved in community infrastructure reconstructions. Rotary wants to discuss further about future projects with NRA.
- NSET: has been providing TOT to engineers for reconstructions. Currently NSET doesn't have any ongoing activity in the district, but can work on need basis.
- SOH: was involved in reconstruction activities in Karyabinayak, Godawari and Bajrabarahi municipalities. Sixty three houses have already been constructed in above mentioned municipalities; they are not formally handed over but beneficiaries have already started living in. Construction of those houses started before NRA was established.

SOH has created a construction group, which includes a house owner, an engineer etc. SOH and Shangri-La Development Association, both work in coordination with other, president of the latter, Jay Shankar Upadhyay is a product of SOH.

- ICDO: Started reconstruction and rehabilitation program in partnership with LWF in three VDCs of the district, for which a sixteen months program is ongoing. Psychosocial support for over two thousand earthquake victims and shelter support to be provided for one hundred and twenty households. Tripartite agreement is done with DDC, the Bank and ICDA for cash grant. Thirty masons are being trained for reconstruction. Gimdi (ward 4, 5) and Bhattedada (ward 8) are being covered for mason trainings. Reconstruction to start after one social mobilizer, one overseer and one engineer for assistance in the field are available and after the mason training is over. Eighty households in these two VDCs have already received the first installment.
- NRCS: RC is involved in livelihood, health, wash and shelter sector in the district. With assistance from BRC, four municipalities' sixteen communities including Bhardev, Nallu and Chaughare VDCs are being covered. No hardware reconstruction activity is going on at the moment. Debris clearance is going on with maximum of 20,000 wage per household for their work. However, target is not being achieved, as only 273 out of 600 households have been covered so far. Two hundred and forty one individuals have benefitted from the short term (7 day) trainings provided by RC so far. Twenty six hundred families are to be covered for livelihood activities in the district. Vocational training is also being provided to three hundred and thirty five youths in the district, based on demands from trainees themselves. RC is eagerly working on health sector and looking for vulnerable locality.
- EWDE-DKH: Working in Nepal after the earthquake in partnership with LUMANTI till November of 2017.
- LUMANTI: With approval from NRA, three reconstruction activities are going on. In Dalchoki VDC, two hundred and fifty houses are under reconstruction. On the Job Training is being provided to masons while constructing six model houses. Technical support team of engineers and social mobilizers are in the field. Their reconstruction work is being monitored by other organizations as well. In Bajrabarahi and Mahalaxmi municipalities, one hundred and fifteen households are being covered for cash grant. Technical support also will be provided including map drawings to those beneficiaries. House designs are approved from NRA but is not similar to already released ones from NRA. First grant will be distributed after tripartite agreement. However seventeen of those families have already started reconstruction in both municipalities. SOLVE Nepal: One hundred and twenty houses are under construction in Ghusel VDC, for which first installment of cash grant has just been transferred. Mason training completed to thirty one attendees. All technical assistances are also to be provided.

Solve Nepal is also involved in psychosocial support program in the area.

3. A few words from NRA

Currently all attention is focused in Karyabinayak municipality but it seems the reconstruction is still very slow there.

Partner organizations need to report their work progress report in monthly basis so district NRA office can also know about reconstruction activities in the district. NRA is also interested in monitoring partner organizations' work in the field. NRA is happy to assist all actors in the reconstruction process as much as it can.

4. Way forward

There were a few challenges that were raised in the meeting which are as follows:

- According to NRCS, an organization is interested to reconstruct houses for five hundred families as Dhurmus Suntali Foundation did but couldn't get approval from NRA. NRCS is still interested in bringing in the agency for reconstruction.
- Older settlements are in dilemma as new land rules and building bylaws prevent them from following the reconstruction process.
- Stone and mud houses in rural areas are not suitable for 2nd floor construction, but they need that 2nd floor in their houses for storage activities. So beneficiaries are looking for a way out to this issue. (A solution was proposed: create your own design and get approval from NRA, then 2nd floor can be reconstructed).
- Houses reconstructed by Rotary club before the establishment of NRA, are now applying for cash grant from NRA, which will be duplication.
- HRRP has been requested to urge partner organizations to focus primarily on trainings and technical assistance activities rather than providing housing grants to beneficiaries directly.
