Monitor for Disaster Strategic Action Plans (MDSA) is a web based, centralized system for logging and monitoring projects being operated around the nation that deliver against the National Disaster Risk Reduction Strategic Action Plan 2018-2030. It also links with the BIPAD system for crosslinking information with disasters. Social Welfare Council, Government of Nepal has directed I/NGOs working in Nepal, to prioritize updating the approved programs and plan mandatorily in the MDSA system.

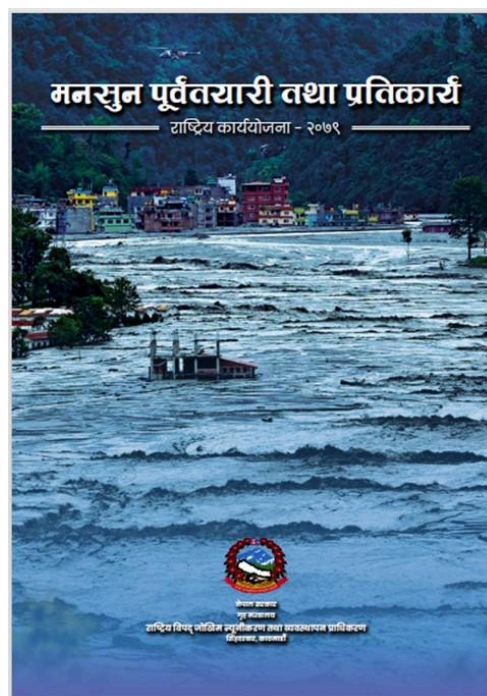

KEY HIGHLIGHTS

- i) Monsoon Preparedness and Response National Action Plan 2079 was approved by 13th Executive Committee Meeting of NDRRMA
- ii) Scaling up of Monitor for Disaster Strategic Action Plans (MDSA) were discussed
- iii) NDRRMA will work out to develop disaster related reference and resource materials for stressing education on disasters
- iv) Twenty deep water divers were well trained through five week-long intensive training
- v) Continuation of Orientation on tranche disbursement inspection form and RMIS of housing reconstruction by NDRRMA
- vi) Meeting of National Shelter Cluster and Camp Coordination and Camp Management held in Kathmandu
- vii) Know disaster vulnerability of your area through BIPAD Portal

NATIONAL UPDATES

Monsoon Preparedness and Response National Action Plan 2079 was approved by 13th Executive Committee Meeting of NDRRMA

The 13th Executive Committee Meeting of NDRRMA was organized in the presence of Minister for Home Affairs (MoHA) and Chairperson of Executive Committee, Mr. Bal Krishna Khand, on 13 June 2022 at MoHA, Singhdurbar. The 13th Executive Committee Meeting has approved 'Monsoon Preparedness and Response National Action Plan 2079'. Minister Khand also instructed the concerned ministries, thematic and co-thematic bodies and security agencies to be serious in preparing and responding to minimize the loss of life and property due to monsoon-induced disasters. The meeting has discussed in detail the agenda including Monsoon Preparedness and Response National Action Plan 2079. Chief Secretary of Nepal Government, Mr. Shankar Das Bairagi

stressed on the need for coordination among the bodies from bottom to top in rescue and relief and provision of adequate equipment in strategic places. Access detail news: [13th Executive Committee Meeting of NDRRMA](#)

Scaling up of Monitor for Disaster Strategic Action Plans (MDSA) were discussed

Two-day workshop on upgrading the information management and database system of activities and programs of Partner Organizations (POs) into the MDSA was conducted by NDRRMA, 17-18 June 2022. Integrating data related to disaster related projects/activities has been an integral part of the MDSA system. Social Welfare Council (SWC) of Nepal has been urging the entire I/NGOs working in the field of DRRM to support the GoN by prioritizing the programs and plans in coordination and collaboration with NDRRMA. Therefore MDSA as a top priority to track development program interventions, NDRRMA shared the information that the entry of programs and activities by POs during the implementation of 'Disaster Risk Minimization National Strategic Action Plan, 2075-2019' will also be included in MDSA along with the progress details. Detailed discussion on how to make the MDSA system user friendly, handy to enter data, search and track integrated data on disaster management was also the key highlight of the workshop. Integration with similar systems of other government bodies also directed the discussions. Along with key representatives from NDRRMA, the workshop was also participated by invited personnels from MoHA, MoFAGA and some representatives from POs. For more information, contact: Mr. Arun Poudel, IT Specialist: email: it.ndrrma@gmail.com and access: <https://mdsa.bipad.gov.np/>

NDRRMA will work out to develop disaster related reference and resource materials for stressing education on disasters

NDRRMA has organized a discussion program in Kathmandu dated 24 June 2022 regarding the need of equipping educational curriculum with disaster-related courses. The programme was attended by the officials from the MoHA, MoFE, National Examinations Board and local level representatives from the Kathmandu Valley. Chief Executive of NDRRMA, Mr. Anil Pokhrel stressed that educating school going students about disasters and taking them to the disaster affected site visit to track out the mitigation measures allows them to develop understandings towards disaster vulnerability of particular areas in their further education too. Officials associated with curriculum development informed

that school curriculum has information on disasters and its safety measures in textbooks through different subjects and topics from primary to secondary level. Officials from Curriculum Development Centre stressed that due to lack of effective teaching modality, students have not been able to grasp the matter and has disallowed teachers to provide education on disasters effectively too. Experts discussed that people were being more active in gaining knowledge on disasters and climate change nowadays as they have become well aware about their dire consequences, so this has also emphasized disaster education from an early age. Joint Secretary of NDRRMA, Ms. Anita Niraula informed the program that NDRRMA will form a task force committee to work out on developing proper disaster reference and resource materials that would add value to the existing disaster curriculum from their textbooks.

Twenty deep water divers were well trained in five week-long intensive training

Deep Water Diving Training which was conducted by NDRRMA in cooperation with Armed Police Force, Nepal Disaster Management Training School, Kurintar from 9 May 2022, was concluded by Home Minister Mr. Balkrishna Khand during a program organized at Kurintar, Chitwan dated 11 June 2022. Under a five week-long training, 20 responders were well trained in Koshi river, Fewa lake and at Kulekhani river by 10 experienced instructors. In the closing ceremony, Home Minister Mr. Khand expressed the opinion that basic training on safeguarding against disaster risk should be imparted to concerned government officers of relevant ministries. He insisted on constructing structures including roads, buildings in view of potential disaster risk. On the occasion, NDRRMA handed over rescue and search materials worth one hundred thousand rupees to the Chief of Armed Police Force. The freshly graduated deep water divers demonstrated in Trishuli River on how to rescue drowned people, how to search for missing people while fishing, how to rescue injured people and provide primary health care. They will be deployed across all seven provinces

as an instrumental force during flood related disaster rescue works. Access: [35 days long deep water diving training completed](#)

Second round of Orientation on Monsoon and Fire-induced Private Housing Reconstruction Guideline and NDRRMA Reconstruction MIS system that focused on Inspection of Private housing has been completed in 12 districts.

Technical team of NDRRMA in technical coordination with HRRP has been providing virtual orientations on inspection forms of private housing reconstruction of beneficiaries affected by monsoon/fire-induced disasters. The

orientation has also instilled know-hows on using KOBO Collect Mobile App and Reconstruction MIS System (reconstruction.ndrrma.gov.np) for tracking information updates of private housing reconstruction. Focal Section Officers from NDRRMA along with Technical and Information Management Team are involved in instilling the knowledge on using inspection forms and RMIS tools as well as in lending support to solve issues

and queries that occur during the operation of the system by the oriented district's officials. In the first round of orientation, 68 districts have taken the orientation and till end of June 2022, the second round of orientation has been provided to 12 districts which were attended mainly by municipal level, district level technical personnel and focal persons along with administration officials from municipal and districts. For more information contact: Mr. Bhim Raj Basnet, Section Officer- NDRRMA, 9851149648, rajand1974@gmail.com. Access detailed video on [working procedures of KOBO Mobile App and Reconstruction MIS](#).

Meeting of National Shelter Cluster and Camp Coordination and Camp Management held in Kathmandu

The meeting of Shelter Cluster and Camp Coordination and Camp Management (CCCM) was held on 23 June 2022 at Kathmandu in the presence of Director General, Department of Urban Development and Building Construction (DUDBC), Mr. Ram Chandra Dangal. The

meeting was attended by the member POs. The agenda of the CCCM meeting included mainly discussion over the Monsoon Preparedness and Response Plan 2079 and activities updates of Shelter Cluster and CCCM Cluster, led by MoUD-DUDBC. A copy of 'Shelter Cluster Nepal Contingency Plan for the Coordination of Shelter Preparedness and Response in Nepal-2018' was shared with member organizations for the review and feedback. Nepal Red Cross Society provided an overview of preparation status of the Environmental Country Profile and Shelter Response Profile. IOM Nepal provided information about the Displacement Tracking Matrix (DTM) tool that gathers and analyzes data during disaster events. The compiled data in the DTM tool disseminates the critical multi-layered information on the mobility, vulnerabilities, and needs of displaced and mobile populations which further enables decision makers and responders to provide these populations with better context specific assistance. For detailed information, contact: Mr. Manish Timsina, Shelter Coordination Officer, NRCS, manishtimsina1@gmail.com

Know disaster vulnerability of your area through BIPAD Portal

BIPAD Portal has managed to develop disaster data/information management systems by pooling all credible digital and spatial data that are available within different government bodies, non-governmental organizations, academic institutions and research organizations on a single platform. The Portal targets to provide crucial information on the capacity and resources, such as on health institutions, financial institutions, schools, banks, stockpiles, road network, inventories, NGOs, government agencies, etc. in relation to the incidents. The focus of the system is on a bottom-up approach of data collection, targeting the Provincial and Municipal governments to engage in verifying and collecting data. BIPAD Portal is targeted for Emergency

Operation Centers at National, Provincial and Municipal tiers of the government, and Nepal Police, who is the first responder to disaster. Other users of this system are the line ministries at National and Provincial tiers working in disaster management divisions and departments, Nepal Army, Armed Police Force, non-governmental organizations, research institutions

and the general public. The features in BIPAD inform the users about the details of an incident for both natural and non-natural hazards for response and for historical analysis of loss and damage. The system integrates an electronic version of the incident reporting form used in collecting incident information by Nepal Police. The system incorporates hazard maps and vulnerability indicators that can be used for risk sensitive land use planning and DRR inclusive development activities. Learn more on tracking the disaster

vulnerability of your area through BIPAD Portal. Access: [Browse BIPAD Portal to learn disaster vulnerability of your area](#)

PARTNERS' UPDATES

Training for newly elected local authorities on DRM Localization Manual launched

Training for newly elected local level authorities on disaster risk reduction and management has been launched by USAID/Nepal on 17 June 2022 in Kathmandu. The training, which will be conducted at all 753 municipalities, will assist municipal councils to draft targeted DRRM laws, policies, and strategic plans of action. Collectively, this training remains as the basis of strengthened capacity for reducing disaster risk and enhancing community and government capability

to respond to disasters as well as in identifying pressing DRRM issues and paves. In the next five months, USAID in partnership with IOM will train approximately 18,000 elected local level representatives and government officials based on [DRM Localization Manual: An Operational Training Manual for DRM Capacity Building of Local Governments](#), in coordination with MoFAGA. The training covers key essentials on strengthening the legal framework and capacity of local levels for effective and efficient disaster prevention, preparedness, response, and recovery activities. These trainings will be organized by the project implementing partner consortium, led by the NSET in partnership with Practical Action Consulting and Lutheran World Federation. For more information, contact Ms. Ruchi Thapa, IOM Nepal, ruthapa@iom.int

Development of a web-based anticipatory tool about spatial and temporal scenario of heat and cold waves

CARE Nepal has organized an 'Inception Meeting on Anticipatory Action on Heat and Cold Waves in Nepal' on 14 June 2022 with a purpose to share the project components and collect feedback and suggestions for shaping the designing of anticipatory action tools. The meeting was attended

by 34 participants from different government bodies such as NDRRMA, MoHA, Ministry of Forest and Environment including POs. Development of a web-based anticipatory tool about spatial and temporal scenario of heat and cold waves is in target to plan that will help to forecast and carry out early/anticipatory actions to address the possible impacts of heat and cold waves. The key interventions planned under the project includes -sharing workshops, developing web-based model, vulnerability and capacity assessment of community to get the community perception, developing SoPs, model review by peer organizations/experts, finalization of model and dissemination. Similarly, proposed methodology and technical approaches on web based anticipatory tools and cold waves was shared by Institute of Himalayan Risk Reduction (IHRR) team, the technical partner for this project. For more information, contact Mr. Nilkantha Pandey, Coordinator-DRR & Gender in Emergency, CARE Nepal, nilkantha.pandey@care.org

National Building Code Training Manual and Curricula is being prepared

A “Sharing and Validation Workshop on National Building Code (NBC) Training Manual and Curricula” was held in Lalitpur on 16 June, 2022. With a view to collect the feedback on the NBC Training manual and curricula, the workshop was jointly organized by DUDBC and USAID’s Tayar Nepal project. Relevant feedback will be incorporated into the manual. NSET is providing technical support to prepare the training manual and curricula.

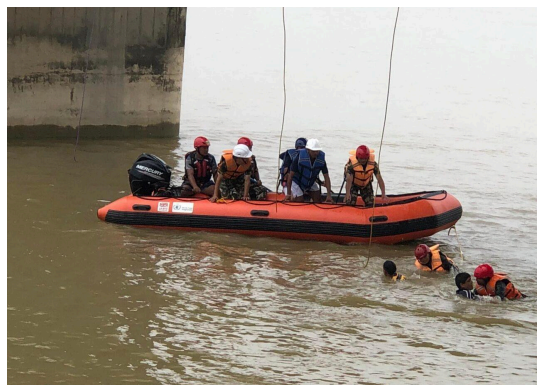

Orientation program organized to reinforce importance of disaster vulnerability

An orientation programme related to planning formulation on Disaster and Climate Adaptation Mainstreaming has been organized on 7 June 2022 by DanChurchAid (DCA) and its local partner, Nepal National Social Welfare Association (NNSWA) in collaboration with Dodhara Chadani Municipality, Province no 7. The orientation was organized mainly for newly elected municipal representatives. The orientation targeted to reinforce the importance of mainstreaming disaster risk reduction and climate change adaptation into the local development planning process. This event was part of the DCA’s SUDHRID Project to make the new leaders aware of risk informed sustainable development.

Simulation exercises were conducted in various districts to timely prepare and inform communities from potential disasters

To create awareness among the communities and to check the preparedness status of the district units on how to effectively respond in the event of disasters such as landslide, flood, fire outbreak etc, mock drill and simulation exercises were conducted in several districts in the month of June 2022. These mock drill exercises were mainly facilitated by the District Disaster Management Committee (DDMC) in collaboration with District Administrative Office (DAO), District Nepal Red Cross Chapter and with support from concerned POs. The mock exercises were conducted simulating a multi-disaster scenario such as fire outbreak by gas leaks, landslide, flood, earthquake etc. The drill was facilitated by trained instructors while district security forces provided support in conducting simulation on rescue works during landslide and flood aftermaths. These simulation exercises have found significance in imparting key messages on building their knowledge in responding to disasters.

Two Community Disaster Management Committees (CDMC) in Bardiya have prepared social maps by using participatory vulnerability analysis tools

Teuni community disaster management committee (CDMC) and Sonpur CDMC, from Rajapur Municipality, Bardiya district have organized two events in their respective places for identifying the disaster risk reduction and resilience building measures. The whole process was started from the discussion of major hazards of the local communities, led by CDMCs in presence of community members. They observed their communities together to find out major hazards in their communities and have developed two social maps of two communities using participatory vulnerability analysis tools. They have also identified four small level risks such as lack of Hume pipe and culvert. Based on the identified risks, the whole community members are working on it to make their community resilient and disaster risk reduction with community contribution with the support of ActionAid International Nepal and Kamaiya Mahila Jagaran Samaj (KMJS). Similarly, Sonpur and Teuni CDMCs have facilitated interaction programs among youths hailing from Nangapur community, Ward no. 3 and Sonpur community, Ward no.1 of Rajapur Municipality. This

type of interaction meetings have been fruitful to exchange knowledge on disaster risk management, various mitigation tools, initiatives of local early warning systems and also reflected on the existing humanitarian mechanisms at wards and community level.

PROVINCIAL UPDATES - GANDAKI

Baglung, Gorkha, Myagdi, Parbat, Syangja, Tanahun: Through technical coordination by HRRP Gandaki Provincial team, physical orientation on NDRRMA MIS system, inspection form for housing reconstruction and KOBO Mobile App was provided to technical staff, DRR Focal Person and to IT Officer of entire palikas of Baglung, Gorkha, Myagdi, Parbat, Syangja and Tanahun districts. Same orientation was conducted in Pokhara Lekhnath Metropolitan City and concerned officials from the District Administrative Office (DAO) Kaski. These orientations have reached more than 100 participants across various palikas and districts. The orientation has covered technical know-how on sharing the building design catalog and other minimum requirements as per NBC for reconstruction. Overview of housing reconstruction affected by monsoon-fire induced disaster directed the discussions. Similarly, the thorough discussion were carried out on the enrollment process of monsoon affected beneficiaries by verifying and approving procedure in NDRRMA MIS system. Demonstration was carried out by online login through local level user ID and approved data. Overall, due to effect of orientations conducted physically, within a month 350 beneficiaries were verified from NDRRMA. Coordination between palika technical staff and IT officers was recommended for effectiveness in approval of housing reconstruction data from the field.

PROVINCIAL UPDATES - LUMBINI

Rupandehi: Gandaki Province-level interaction and orientation program on disaster risk reduction and management was conducted by NDRRMA in coordination with HRRP on 19 June 2022 at Butwal, Rupandehi district. The representatives including from NDRRMA,

Province Office of Chief Minister and Council of Ministers, Ministry of Internal Affairs and Justice, DAO, other government line agencies and POs were actively involved in interactions. Emphasis on everybody's common cooperation to mitigate the risk of disaster was the central to the discussions in the provincial disaster

consultation program. The orientation also discussed thoroughly on identifying the key actors that are involved in the process of localization of DRRM, the post-disaster housing and settlement recovery process, bridging the gaps between actors and bringing them together, and map out their relationships to identify strengths gaps and successes. The joint affirmative actions by concerned actions will be influential to implement the DRRM Act 2017 and in achieving the mandate of DRRM Strategic Plan of Action 2030.

Bardiya: Three days training on advocacy and campaign for strengthening local DRR and humanitarian mechanisms were conducted by KMJS, supported by ActionAid International Nepal from 6-8 June 2022. The training was attended by 23 participants from Sonpur and Teuni CDMCs including youths, women, and newly elected representatives of Rajapur Municipality. The training provided the skills to participants about problem identification, stakeholder mapping and advocacy plan development with the ideas of advocacy plan execution. As a result, together with local bodies representatives, they have developed 3 advocacy plans related to strengthening local disaster risk reduction and humanitarian mechanisms and executing the advocacy plan in collaboration with different actors.

PROVINCIAL UPDATES - BAGMATI

Makwanpur: Ministry of Infrastructure and Development, Bagmati Province Government, lead agency of Bagmati Shelter Cluster has organized the provincial level shelter cluster meeting on 20 June 2022 in Hetauda, in coordination with HRRP. The meeting was organized to discuss mainly on taking critical inputs for preparation of Bagmati Province Shelter Cluster Contingency Plan and to form the working group for drafting contingency plan (as a part of disaster management) along with setting up a timeline to prepare terms of reference of the working group. The meeting was attended by concerned stakeholders such as the Ministry of Internal Affairs and Law, Ministry of Social Development, Nepal Red Cross Society-Makwanpur, Nepal Red Cross Society Bagmati Province and partner organizations. As part of localization of contingency plans at provincial level projects, HRRP has been supporting the preparation of Shelter Cluster Bagmati Province Contingency Plan. The support also includes drafting of contingency plans, organizing sphere standard training, conducting consultation meetings, forming working groups and overall coordination. The meeting has decided to form a nine-members working group under the lead of Makwanpur district Housing, Build and Urban Development Division Office for the drafting of Bagmati Province Shelter Cluster Contingency Plan. The working group will submit the first draft of the Contingency Plan by August 1st week which will be consulted during the next Shelter Cluster Meeting for upcoming engagements thereafter. Access: [Minute of Bagmati Shelter Cluster Meeting](#)

Makwanpur: Through technical support of Bagmati Provincial team of HRRP, orientation programs were conducted on monsoon induced disaster affected private housing reconstruction procedure and MIS of NDRRMA to Rural Municipalities namely Indrasarowar, Raksirang and Manhari of Makwanpur district. The orientations were physically attended by DRR Focal Person, technical staff and IT officers. The program has shared technical know- hows to conduct affected household surveys by KOBO Mobile App, how to

handle the MIS system at local level and sensitize on the guideline of monsoon affected private housing reconstruction. The provincial team also has supported the Ministry of Internal Affairs and Law to document datas and report part of Bagmati Provincial level Monsoon Preparedness and Response Plan 2079.
