Issue and Challenges

1. The main problem in Gumba and Golche is there is no any means of communication. No mobile network and no other means of communication.
2. DUDBC team of each VDC and Tuki team should have a meeting on each of every month to share views and to over come problem of field.
3. Beneficiary with old age, physical disabilities and death have-not got 1st tranche of cash till now. So, as I have visited bank but bank told the red agreement book nominee list should be changed so they can get the first tranche of cash a.s.a.p.
4. In places like Gumba and Golche people refuse to use wooden band for DPC, as they say the wooden band will rot.

Issue And Challenges

5. Difficult to transport construction material as there is no any road connected in Golche VDC and in Higher part of Gumba VDC.
6. Community Development Mandatory Regulation and Road bylaws to be enforced is bringing problem in community level in Sangachowk and Phulpingdada.
7. Non-availability of construction materials and lack of skilled workmanship for construction work brings forward great challenge in completing shelter construction work in given timeframe.
8. Government Engineer/ Technician presence is not found in the field (specially in Gumba,Golche and in case of sangachok and phulpingdada Technician recruit is not sufficient to access Every HHs in short time period.)

Issue and challenges

9. Those house that has already been completed before agreement has not been feasibly been constructed and Have-not included earthquake resistance component 100% how to dealt with those house.

10. How to dealt with and how to renovate those house who have their plinth area slightly larger than in NBC/MRT.

11. How to resolve those house who have completed their house without DPC band. Without vertical band or lets Say without one component missing

12. On 40 days vocational training CTEVT has refused to put the name of organization that complete the event in its certificate.
