CASE STORIES ON TEMPORARY SHELTER CONSTRUCTION**Rebuilding Hope: The Resilience of Sitali Pun in the aftermath of the Jajarkot Earthquake**

Sitali Pun, a 65-year-old resident of Nalgad Municipality, Ward No. 1, Kalpath village, Jajarkot district faced challenging times in the aftermath of the Jajarkot earthquake that severely damaged her home. Fortunately, Sitali along with her son, daughter-in-law and two grandsons managed to escape with only a few injuries. In the aftermath of the disaster, Sitali and her family found themselves seeking refuge jointly with neighbors on open land for many days who were similarly affected.

In a collective effort, they constructed makeshift shelters using CGI sheets and wood salvaged from their damaged

house. Sitali's son resumed daily labour work which is the means of support for the family. The family received essential aid, including food, clothing and daily necessities, which were found quite helpful. These humanitarian efforts of local governments, and the partner organizations played a vital role in stabilizing their situation during those hard times.

After NDRRMA announces the grant disbursement for transitional shelter construction for earthquake affected beneficiaries, she was enrolled as the beneficiary by the Ward office after her family's name was enlisted as the earthquake affected households. Soon she was enrolled as a Temporary Shelter Construction Beneficiary by the Palika office and successfully accessed the first tranche amount from the Government for construction of temporary shelter. She joined her fellow neighbours who were also enrolled as temporary shelters, to procure new CGI sheets from the nearby market, fresh lots of wood sourced from nearby forest area, while rest of the materials and timber for construction was salvaged from the damaged house. Currently, the family of Sitali resides in the temporary shelter and is hopeful in the future to receive a similar housing grant from the government in which she plans to construct a more resilient and earthquake-resistant house. Sitali found the Government's grant support not only provided hope for a better future but also underscores the resilience and determination of individuals like Sitali to rebuild their lives after facing adversity.

Building a Safer Future: Nepal's Earthquake Safety Day focuses on local resources and technology

Nepal observed the 26th National Earthquake Safety Day (ESD), an annual event held on 16 January 2024 (2nd Magh 2080) to heighten social awareness about constructing secure housing and mitigating potential earthquake risks. This year's central theme highlighted the 'Use Local Resources and Technology, Build an Earthquake-resistant Structure.' The formal ceremony of 26th ESD was organized in Chandragiri Municipality (Kathmandu district), which was inaugurated by Rt. Honorable Prime

Minister Pushpa Kamal Dahal “Prachanda”. The event was jointly organized by DUDBC, NDRRMA, Chandragiri Municipality and NSET.

Addressing the formal ceremony, PM Dahal mentioned that building quake-resilient structures is the responsibility, not desire.

PM Dahal pointed out the need of mandatory adherence to following the building code measures while constructing earthquake resilient infrastructure and systematic structures. Similarly, PM Dahal stressed on conducting the activities rampantly related to risk assessment, reduction, preparedness

and early warning system along with capacity enhancement of local levels to strengthen their resilience to deal with devastating disaster considering the recent Jajarkot and Bajhang earthquakes as the early sign of risk. Speaking at the program, Deputy Prime Minister and Home Minister, Mr. Narayan Kaji Shrestha, who leads the ESD National Organizing Committee as the Chairperson, urged for collaborative efforts in disaster reduction and local resilience. Rebuilding Resilience: Strategies and recommendations for West Nepal Earthquake reconstruction and recovery

On 3 January 2024 (18 Poush 2080), a joint interaction took place to discuss on the synthesized report on the housing reconstruction, recovery and disaster resilience focussing the damages caused by West Nepal Earthquake (Doti, Bajhang & Jajarkot). The interaction was attended by involving some local representatives including the Province specific and national level representatives and stakeholders. The main synthesis of the interaction on the West Nepal Earthquake were to embolden NDRRMA by placing it under the Prime Minister’s Office by forming the executive committee and making necessary amendments to the Disaster Risk Reduction and National Disaster Management Act 2074. Finance Minister Dr Prakash Sharan Mahat said human settlements should not be

constructed in a way to ruin employment and production opportunities while reconstructing the earthquake-ravaged areas. Speaking on the occasion, former Minister and lawmaker Mr. Janardan Sharma stressed the need for coordination and collaboration among all three tiers of governments to revitalize livelihood and rebound employment and skills. Detailed information: [Synthesis report on West Earthquake Recovery & Reconstruction. Reconstruction without losing employment and production](#)

Collaborative task force for proceeding multi-hazard recovery and reconstruction inclusively

The Government of Nepal has established a task force, led by NDRRMA and involving national-level ministries, to address the ongoing recovery and reconstruction needs arising from earthquakes, monsoons, fires, and

other hazards. This task force is actively developing procedures for the disbursement of funds aimed at retrofitting, reconstructing, and resettlement of disaster-affected private housing. According to the NDRRMA report, approximately 110,000 households in Nepal have been impacted by various hazards, including earthquakes, monsoons, and fires. To aid in the reconstruction efforts, a draft of the procedures has been formulated with the goal of providing subsidies to affected homes and communities. The objective is to support reconstruction, retrofitting, and resettlement by offering grants to the affected population. These procedures also emphasize promoting the use of local building culture and technology. Additionally, the procedures prioritize providing extra assistance to the most vulnerable individuals facing challenges in reconstructing their homes due to various vulnerabilities. A collaborative approach with development partners is being undertaken to enhance

the effectiveness of these efforts. The task force held a meeting on January 31st to discuss the draft procedures, following an internal working session on January 29th at NDRRMA, with technical support from NHSRP. NHSRP has actively advocated for the development of multi-hazard procedures over a two-year collaboration, emphasizing the importance of government-approved mechanisms in responding to disasters. NDRRMA in technical support from NHSRP has also led efforts to enhance the Reconstruction Management Information System (RMIS) to address multi-hazard disasters. The updated RMIS aims for a collaborative funding approach involving all government tiers, with the local level taking the lead in the funding disbursement mechanism. A consultation meeting on the Terms of Reference (ToR) for the upgraded RMIS with NDRRMA internally was held on 26 January. Contact: rijan.gajurel@hrrpnepal.org

Insights from the provincial and district-level interaction on post-earthquake response

A provincial-level discussion along with district level interaction program and joint visit by officials of Ministry of Home Affairs, NDRRMA and stakeholders was held in response to post-earthquake reconstruction of Jajarkot earthquake, in Jajarkot and Rukum West districts from 20-22 January 2024. The provincial level interaction program at Surkhet was part of the provincial level 26th Earthquake Safety Day

Commemoration program. Constructive feedback was discussed during a meeting of the District Disaster Risk Reduction and Management Committee (DDMC) held in Jajarkot and Rukum West. Gaps and challenges of constructing the temporary shelters were discussed in the interaction meetings. During the provincial level inauguration program, Chief Minister Rajkumar Sharma of Karnali Province expressed the opinion that reconstruction should proceed with a readiness to take responsibility in accordance with the clarified work sector procedures. During the meetings, Chief Executive of NDRRMA, Anil Pokhrel emphasized on the importance of adopting a campaign approach to promote the use of local resource materials and technology in the rebuilding process. Comprehensive overview of the Urban Preparedness Initiatives in Western Region

Joint team from the Ministry of Home Affairs, NDRRMA and UNICEF recently visited Nepalgunj Sub-Metropolitan City to observe interventions under the SUPER Project – a collaboration of UNDP, UNICEF and UN Women being undertaken in partnership with the European Union. Through support from the SUPER project, the Nepalgunj City is enhancing disaster readiness, extending preparedness upto reach of Karnali and Lumbini province through empowering locals and building community resilience.

The team visited the LEOC, discussing its functions and the operationalization of the BIPAD portal. They also examined disaster risk reduction activities in a local school and a community well conservation project for disaster preparedness in one of the wards. Additionally, the team engaged with 13 Community Emergency Response Team (CERT) volunteers, part of a group of 402 community members trained in firefighting, basic first aid, and search and rescue operations. Very High Frequency (VHF) sets were handed over to the Nepalgunj City by the Chief Executive of NDRRMA, reinforcing the commitment to interlink and strengthen cooperation among all government tiers for effective emergency preparedness and response.

PARTNERS' UPDATES

Research on winterization of temporary shelter construction

In the context of the current harsh winter with lowered temperatures, the people and communities affected by earthquakes in the Karnali region have faced adverse effects on their health and well-being. [ArchSolar Designs](#) researched to construct a temporary shelter design with improvised, low-cost insulation from readily available local materials (such as agricultural, and fabric waste), that is suitable for winterization of earthquake-affected people in Western Nepal to keep cold out (or heat in summer too). The size of the shelter in research measures 3m X 6m (10ft X 19ft) based on international practices, meant for 5 people with 3.5m² per person as per international transitional shelter guidelines.

Field observation visit by development professionals and stakeholders to the demo site located at National Innovation Center in Kirtipur, underwent during January 2024. The field interactions were made relevant to the current constructions of temporary shelters ongoing in earthquake affected districts of West Nepal. For detailed information: [Research profile of winterized temporary shelter](#) Email: archsolar designs@gmail.com

Handover of flood resilient demo-community house to Rapti Sonari Rural Municipality

Under the CRS Homes and Communities (H&C) Project/Flood Resilient Housing Solutions Pilot, 2 demo community houses completed its construction in December 2023; Rapti Sonari has timber-frame using lath & plaster technique; Duduwa has bamboo frame. A total of 14 local masons of Duduwa and Rapti Sonari RMs (Banke district) were trained under on-the-job training (OJT) on lime stabilization of soil. The H&C program and Caritas Nepal have successfully handed over flood resilient demo-community house to Rapti Sonari Rural Municipality (Banke district). The features of the demo-community house includes: raised plinth; lime stabilized soil technology for walls and floors; improved metal and wood joinery; earthquake resistant design; use of local natural building materials. Rapti Sonari RM has appreciated CRS and Caritas Nepal pilot initiative to construct a demo-community house in flood-prone area. Rural Municipality's elected leaders and officials would like to further engage in capacity building training programs; and policies related flood resilient housing solutions. Contact: rupesh.shrestha@crs.org

Flood affected housing project by Caritas Nepal

A collaborative effort between Gulariya Municipality (Bardiya district) and Caritas Nepal resulted in rebuilding of 31 shelters in Ward no. 4 and 8, which was handed over to the respective flood affected families on 28 January. These homes were inaugurated by Mayor Muktinath Yadav, who expressed immense joy at providing secure housing to families enduring hardships. The project initiative by Caritas Nepal committed to rebuild disaster-resistant homes for those affected by the floods of 2013 and 2017. Detail news [Homes handover to flood affectees](#)

Disable friendly inclusive temporary shelters construction in Jajarkot

Under the START Fund supported Inclusive Humanitarian Response to Earthquake Affected population in Jajarkot; Handicap International, along with consortium partners People in Need and KIRDARC, supported in the construction of 10 inclusive transitional demo-shelter with a toilet facility for Person with Disability (PWDs) in Barekot Rural Municipality (Jajarkot district). The shelters and toilets were constructed based on the universal design and accessibility guidelines of Nepal. The accessibility features included a non-slippery ramp, handrails on both sides, color contrast, standard height and width of doors and windows, landing space on the ramp, a toilet chair, and a mobility device (wheelchair) as per the guidelines. The intention is for infleucing the local government, individual households, and other partners to replicate this model while constructing public and private buildings in the future. **Formation of Community of Practice on cultivating discussions in Nature-based Solutions**

NHSRP Bulletin

National Housing and Settlements Resilience Platform, Nepal

A one-day national-level conference focused on Nature-Based Solutions (NbS) was organized in Lalitpur on 19 January to discuss the prioritization of Nature-Based Solutions as integral measures for climate change adaptation and climate induced disaster risk reduction. The conference informed key stakeholders, in both government and non-government sectors, about best practices and learnings on NbS and the need for policy prioritization. The conference ended with the discussions on formation of Community of Practice (CoP) to address the issues on NbS. The participants expressed their interests to be part of the NbS focused CoP and also shared their suggestions on how to make the CoP more effective. DCA Nepal together with IUCN Nepal and KVDA Urban EbA project will take forward the learnings and key takeaways of the conference through the CoP formation. This national conference was organized by DCA Nepal together with technical support from IUCN Nepal, and Urban Ecosystem-based Adaptation (EbA) for climate-resilient development in the Kathmandu Valley (Kathmandu Valley Development Authority). Detail news: [NbS has to be mainstreamed across all sectors](#). Contact: digu@dca.dk

Empowering communities in multi-hazard preparedness and response

A Training of Trainers on Multi-Hazard Preparedness and Response was successfully conducted in Surkhet from 17 - 20 January through the SIKAI project of IOM Nepal. The primary objective of the TOT was to enhance disaster preparedness efforts at the local level, establishing mechanisms for community preparedness and responses, backed by advocacy towards prioritized policies at ward level. Participants included elected representatives, municipal council members, ward members, individuals with disabilities from Gurbhakot Municipality (Surkhet district) and Mahabu Rural Municipality (Dailekh district), as well as the

Karnali Province Training Academy. Aligned with the Local Levels' Action Plan, the TOT delved into the essentials of DRRM, damage assessment, community-level search and rescue, pre-hospital treatment, and conducted simulations to establish a robust network of skilled first responders at the local level. Contact: rthapa@iom.int

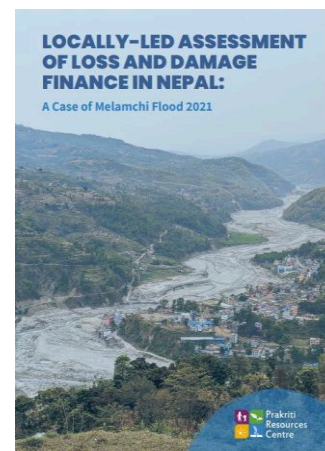

Social-technical assistance and distribution of winterization support in quake affected areas

Several partner organizations along with private sectors and welfare based institutions in collaboration with local governments, local partners and respective District Disaster Management Committees (DDMC) have provided winterization support to people and communities affected by the Jajarkot earthquake, with onset of harsh winters in the region. Families living in makeshift shelters and newly built temporary shelters received essential winter supplies through these partner organizations. The most vulnerable, including the elderly, women with children, and persons with disabilities, were prioritized during the distribution efforts in the harsh winter conditions. Along with this, some partners also extended social-technical assistance as well as materials support for construction of temporary shelters, as an enduring commitment to emergency responses and rebuilding lives.

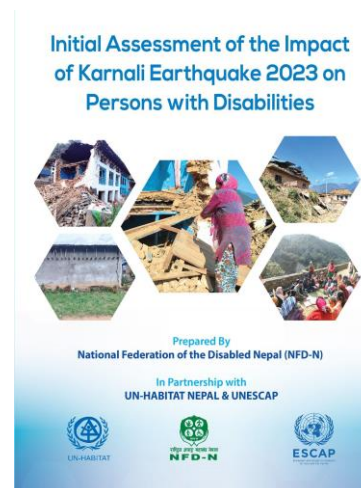

Unveiling the Aftermath: Assessing Loss and Damage from the Melamchi Flood 2021 in Nepal

Latest collaborative study, titled 'Locally-led Assessment of Loss and Damage Finance in Nepal: A Case of Melamchi Flood 2021,' conducted in partnership with the Stockholm Environment Institute (SEI) and Prakriti Resources Center (PRC), sheds insights into substantial losses and damages incurred during the June 2021 flood in the Melamchi Valley. The research captures the experiences of the affected communities, provides economic valuation and suggests resilience measures as the communities still struggle to recover from the impacts, there is an urgent need of external support. Access [Full Report](#)

Report on Initial Assessment of Impact of Karnali Earthquake on Persons with Disabilities

In partnership with the National Federation of the Disabled Nepal (NFD-N), UNESCAP and UN-HABITAT Nepal, through a collaborative effort under “Mainstreaming Leaving No-One Behind in Urban Policies & Programs in South Asia Project” have prepared a report based on the “Initial Assessment of the Impact of the Karnali Earthquake in 2023 on Persons with Disabilities”. The assessment gathered quantitative and qualitative data on the impact of the Karnali earthquake on persons with disabilities and their access to basic services. This report provides evidence to ensure inclusive policies, particularly in disaster response, relief, temporary shelter, livelihood, and strengthening disaster resilience, with particular focus on housing reconstruction. [Download the Report.](#)

Unveiling vulnerabilities: Research insights into Nepal's social protection program

The latest research publication is released on "Hazards and System Disruption in Nepal's Social Protection Programs" prepared under EU Civil Protection & Humanitarian Aid funded Pratibaddha II project together with consortium of People in Need, Community Self Reliance Center (CSRC), Save the Children with support from Centre for Climate and Environment Research. This study delves into the

intricate dynamics of Nepal's social protection landscape, focusing on the implementation of key programs like the Social Security Allowance (SSA) and Prime Minister Employment Program (PMEP). The study explores how different hazards disrupt the implementation (the business processes) of major social protection programs and provides possible solutions for the business continuity of social protection programs during and after the shocks. NHSRP's PROVINCIAL ENGAGEMENTS

UPDATES FROM BAGMATI

Virtual assistance added value in capacity building of frontliners in local level

NHSRP Bagmati team continued the technical assistance through virtual medium on NDRRMA Reconstruction MIS (RMIS) to several local bodies (Rural/Municipalities) in different districts of the province, specifically Dolakha, Makawanpur, Nuwakot, Ramechhap, Sindhupalchok districts. The virtual support sounds effective in capacity enhancement of local levels such as DRR focal person and technical staff for data collection on disaster affected beneficiaries. User Id creation of the respective Palikas for inspection process of reconstructed houses and tranche release process were also prioritized during the virtual interface. The team supported MoIAL Bagmati for the enrollment of 1352 beneficiaries in January 2024.

UPDATES FROM GANDAKI

Enhancing capacities and network building in disaster housing recovery initiatives

Continuous technical support in information management was extended by NHSRP Gandaki team to Continuous technical support provided to Palikas on disaster affected housing through the Reconstruction MIS procedures, by NHSRP Gandaki Province. Coordination meeting on database management regarding the Janata Awas (People's Home Program) and Surakshit Nagarik Awas (Safer Citizens Housing Program) was carried out with the Ministry of Physical Infrastructure, Urban Development and Transport Management (MoPID), Gandaki province.

UPDATES FROM LUMBINI

Comprehensive technical assistance in disaster management initiatives

The NHSRP Lumbini team laid technical support to conduct virtual orientation on NDRRMA RMIS and Reconstruction Guidelines procedures to frontliner staff of DAO Pyuthan and local levels of Pyuthan. Similarly, RMIS related information management support was extended to IT personnel of DAO Gulmi and Pyuthan throughout the month. Coordination meetings were held in MoHA Lumbini for deciding the plan on GEDSI workshop, while technical inputs were provided on selection criteria of pilot local levels for the workshop.

UPDATES FROM KOSHI

Fostering dialogues for disaster preparedness

In commemoration of 26th ESD, MoIAL Koshi Province hosted a dynamic interaction program involving officials from the security forces, representatives from diverse sectoral ministries, and development partners, including the UN agencies and I/NGOs working in DRRM sector of Koshi province. The program served as a platform for fostering dialogue, delving into a retrospective analysis of past earthquake impacts and other hazards. It facilitated discussions on crucial actions that the province must prioritize to ensure the development of earthquake-resistant and multi hazard-resilient infrastructures. The emphasis was placed on leveraging local resources and technology to fortify the region against potential threats.

UPDATES FROM MADHESH

Empowering local stakeholders on housing reconstruction procedures

The NHSRP Madhesh team actively supported and organized an RMIS orientation session in Sarlahi district on 2nd January in coordination with the District Administration Office. The program was attended by influencing local officials and frontline technical staff. The session covered important topics from NDRRMA's Monsoon/Fire-Induced Disaster-affected Private Housing Reconstruction and Rehabilitation Grant Disbursement Guideline, Reconstruction MIS, and the BIPAD Apps survey tool. A significant decision was made during the DDMC meeting, wherein training for IT Officers and DRR Focal persons at all local levels in Sarlahi district on the mentioned guidelines and tools will be organized in coordination with the NDRRMA and the District Coordination Committee.

UPDATES FROM SUDURPASCHIM

Capacity enhancement in reconstruction procedures and information management

NHSRP Sudurpaschim team provided the technical support for training facilitation NDRRMA's Reconstruction Guidelines and Reconstruction MIS tool to the Focal Person of DEOCs, LEOC including BIPAD focal point and technical staff of all thirteen Palikas of Kailali district on 4 January. The program was organized by DEOC Kailali where discussions were carried out on information management along with uniformity in data collection from the LEOCs.

Geohazard assessment conducted to identify relocation sites

Geohazard assessment of Ward no 1, 6 and 7 of Aalital Rural Municipality (Dadeldhura district) were conducted from 17-19th January by the NHSRP Sudurpaschim team including Geologist for the technical insights. The studied ward areas were affected by severe landslides of August 2020 that displaced 84 households. The study was coordinated with NDRRMA and DAO Dadeldhura to relocate the affected households to much safer areas. The field assessment study was accompanied by local officials of wards and municipal level.

UPDATES FROM KARNALI

Sensitization on DRRM focused Volunteer Management System

A dedicated stall was undertaken by the NHSRP Karnali province team, while marking 26th Earthquake Safety Commemorative Event in Karnali Province on 22nd January. The team thoroughly promoted awareness about the significance of NDRRMA's Volunteer Management System (VMS) in times of disasters. Additionally, online registration on VMS was carried out by the team by engaging the interested youths <https://vms.ndrrma.gov.np/> (Register here to become Volunteer)

Extended technical assistance of NHSRP in post-earthquake phase in Karnali province

Karnali province team put continuous efforts to establish coordination with provincial government agencies (Ministries, PEOCs), district and Palika's focal person, mainly regarding technical support and ensured follow-up for temporary shelter-related data collection, focusing on enrollment status and grant received status. The key supports included preparation of monthly IM products including maps, one-pagers, and updates to the RMIS contact list, collection of 5W data from cluster co-leads and development of [5 W Dashboard](#) along with its cross-sharing in several provincial forums for taking feedbacks. The team regularly followed up with partner organizations and government agencies for gathering the details on geohazard assessment of locations affected by disasters.

The team also visited Nalagad Municipality and Barekot RM (Jajarkot district) and Musikot & Aathbiskot Municipality (Rukum West district) from 8-12 January, to track the status of temporary shelter construction and interacted with the government stakeholders, local officials, and earthquake affected households for identifying the gaps and issues. The team also collected case stories of temporary shelter construction. The team emphasized the importance of geohazard assessment to the visited Palikas in Jajarkot and also distributed the [geohazard preliminary survey forms](#) for tracking the information on assessment needs. NHSRP is scheduled to plan for a comprehensive geohazard assessment in Karnali province in coordination with the national NHSRP team.

The team has identified the utmost need of training in Temporary Shelter Construction Guidelines, grant distribution processes along with data management to the technical teams in all earthquake-affected Palikas across the three districts.

Additionally, help desks with deployment of technical personnel in all affected Palikas were seen from the visit to facilitate data management and provide assistance in transitional shelter construction.
