Field Visit /Joint Field Monitoring Visit Reports

Date:	Location:	Participants from HRRP and stakeholders
July 18, 2018	ShivaPuri Rural Municipality Ward no 5, Mahakali	• Badri Pyakurel • Buddhasing Thakuri • Pravuram Pokhrel, M&E DLPIU • Rajendra Chilwal, DSE Nuwakot

		• Prakash Baral, DSE Nuwakot • Kalpana Neupane, CSRC, DC	
Objective(s)	• Objective1: Highlighting the issues, challenges and construction rate • Objective2: Understanding the Geo-hazard prone area beneficiaries • Objective3: Monitoring the non-compliances houses in Mahakali along with DSE		
Summary	In shivapuri Gaupalika – ward 05 (Mahakali), There are 928 beneficiaries and 417 got second tranche. There are 27 houses in risk prone area of geo hazard in which beneficiaries have already made houses and third tranche. HRRP and CSRC team took brief information and noted their view regarding relocation that they did not want to move from that place. There are two big landslides near living village which are also noted and will be presented in the coordination meeting at district level. The road access and lack of masons are the major problems whereas tentatively 80% of the houses are made up of local materials though labors are brought from other districts. In Mahakali, 46 houses are already made from 53 houses which fall in geo hazard prone area. Durable solutions are working on it to sort out issues. Key finding of the visit is that 27 hh of Kalleri has more life threat than Mulabari 14 HH. So there should be take immediate action to minimize the risk.		
Challenges / Issues Identified	Action Required	Responsible	Timeframe
Transportation of reconstruction Materials	promote to use locally available materials	POs, Ward offices	Regular
Quality of reconstruction materials	Quality assurance to local supplier	DCC, Rural Municipality	Regular

House Owner: Shiva Bahadur Adhikari Nuwakot, Shivapuri, Ward no 5, Mulabari, BMC, 3rd Tranche This house is made on geo-hazard prone area, though got third tranche and Durable solution is working to sort out issues.		House Owner: Sunita Darnal Nuwakot, Shivapuri, Ward no 5, Mahakali, DPC Level has received 2nd tranche. The construction has been halted due to monsoon, the owner has used for farming in DPC level room.	

Housing Typology Report

House Owner: Bimali Pariwar
Nuwakot, Shivapuri, Ward no 5, Mahakali, BMC, 2nd tranche Tranche and approved for third tranche.

House Owner:
Nuwakot, Shivapuri, Ward no 5, SMC and Mix structure
Has Received 3rd Tranche

Questions Collected

Question	Who Asked the Question?	Response Provided (By Whom)
What will happen to the beneficiaries who took 50k but did not made house?	Prem Bahadur Thapa, Beneficiary	Our Response is that contact to GMALI
Why real EQ victim name missing in the grievance publish list?	Achyut Aryal, Beneficiary	Our Response is that contact to GMALI
What will do to beneficiaries who do not want to relocate though that place is identified as Geo-hazard risk area?	Achyut Aryal, Beneficiary	Our Response is that contact to GMALI
Will government extend the deadline of 2nd tranche?	Pram Bahadur Thapa, Beneficiary	Our Response is that contact to GMALI

Challenges and Way Forward

Challenge	Way Forward
Lack of technical assistance in the field. NRA engineers are not in regular monitoring to the house. When they visited for the inspection, they only commented for non-compliance.	MOUD-DLPIU should monitor the engineer and instruction for regular visit.
Delay in addressing the grievance. Real victim from the earthquake has not addressed as beneficiaries. They have applied for grievance many times but not addressed.	NRAs should address as soon as possible by the help of local elected persons, Like ward chair and other members.
When will retrofit start? People don't have trained manpower for the retrofit, they are waiting the response from NRA side.	Training and other technical issue with proper communication to the common people should be done before monsoon starts.

Case Study

"It's good to be back home"

"I barely escaped from the disaster. I was on the first floor when I felt the tremor, as the quake got bigger and bigger, I jumped and ran away as fast as possible", Toppen Tamang shared his experience. Tamang have been living in a temporary shelter for more than two years with his family, after the devastating earthquake brought his house down to rubble. The family consists of 8 members including Toppen, his wife, his son and daughter in law and their children. Agriculture was the main source of income of the Tamang family for running their livelihood.

"It was quite difficult to run the day to day life for us as 5 members in the house are differently able among 8 i.e. my wife has been paralyzed for 6 years, son is slow witted as well as can't take decision on time, daughter in law along with grandchildren are too differently able, says Tamang." We took her to hospital and even to the witchcraft to nearby villages and other places but it didn't work out. Even the grandchildren were expelled from school as teacher stated that we can't teach them as they couldn't talk and show appropriate response as per the requirement.

Ongoing construction of the OJT Building

Toppen Tamang

"I was in great dilemma about how could I build a house, especially when I had little resources to support my family and, building a house was beyond my budget. I was seeking help, and then this organization helped me more than I had imagined", said Tamang. After the intervention of the program in the field area household to be constructed were selected in co-ordination with the ward office and further work was started as per the recommendation by its need assessment and verification. Voucher support of amount 50,000 was provided to the beneficiary which included of material and labor support. It too assisted in the easy access of the aid provided by NRA without any delay for further completion of the work. "The previous house was made of mud and stone alone, now it also includes tie bands and reinforcements. I feel safer in this house, I love this house and I am really happy that you guys are supporting me build the house." Tamang too stated that the program has trained them to make walls, binding wires and rods, cement and concrete works. The workers involved in construction are very hard-working and comes to work every day among 12 workers 5 are female and they are equally working with full spirit of learning by doing. Tamang expressed his gratefulness to KCDC implementing partner of OXFAMGB for supporting in the construction of house by stating "I barely survived the previous earthquake. With these additional tie beams and partition walls, I am more confident that we will survive the next earthquake. At least I don't have to run carelessly."

In nutshell providing support to the people like Tamang by the involvement of the local people in the construction, following learning

by doing methodology along with their involvement helps in the sustainability as well as develop feeling of ownership by providing relief to certain extent.
