

# Supporting DURABLE SOLUTIONS

A consortium of Oxfam, PIN, Lumanti and CSRC

**OXFAM**

# Project Summary

- Project Title: Supporting Durable Solutions
- Implementing Organisations: OXFAM, PEOPLE IN NEED, LUMANTI and CSRC
- Funding Organisation: DFID Nepal UKAID
- Project period : 1 year starting from January 2017 to December 2017
- Project area: Sindhupalchowk, Kathmandu, Lalitpur, Bhaktapur, Dhading, Nuwakot, Rasuwa and Gorakha
- Project Area : Solukhumbu, Okhaldhunga, Ramechhap, Sindhuli, Makawanpur, Kavre, Lamjung, Dolakha

# Objectives

The objective of this project is to assist displaced households and the government in developing and implementing participatory and ethical durable solutions and mitigate the immediate risks displaced households are experiencing throughout the course of the intervention.

This process can be broken down into three outputs:

- **Displacement sites** are categorized with respect to the **severity of their displacement and mitigation steps** are taken wherever necessary.

*Most severe sites in Rasuwa, Engineering assessment of the most vulnerable sites*

- **Displaced households are profiled** with respect to their vulnerability, intent to return, resettle or integrate, and the cause of their displacement.

*13,594 IDPs of 3063 HH covered*

*Detail Information : <http://durable-solutions.azurewebsites.net/Reports/household>*

- Displaced households are **empowered to advocate for durable solutions** and the government is supported in developing the necessary processes to implement durable solutions

*Guidelines for the displaced people, interaction programmes*

- Support NRA to address the displaced community

*IEC materials*

**OXFAM**

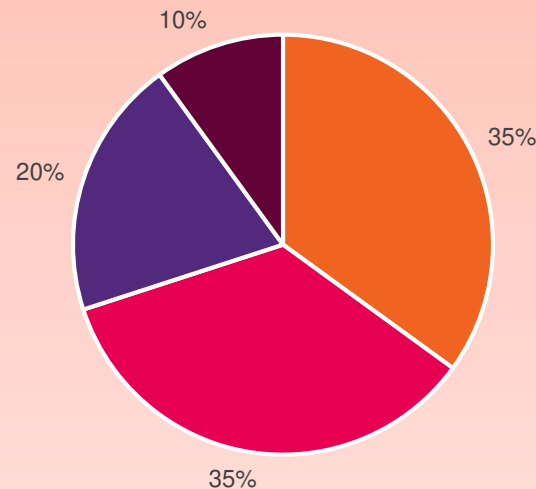

# Severity Profiling Methodology

Between January and February of 2017, 166 focus group discussions facilitated by PIN (rural districts – 66 discussions) and Lumanti (urban districts – 100 discussions)

- 2-4 per FGDs site, depending on site population: men, women, minority group (if applicable), mixed gender (if enough people); 10-20 people per discussion
- Sites where people had already moved back to place of origin were skipped or omitted from the analysis
- Open ended questions funneled into closed responses for scoring
- Each section has space for narrative to capture qualitative information
- Some questions recorded for data that do not factor into scoring

## Four Metrics & Weighting

- **Displacement Level:** The difficulty of the displacement and how easy or difficult it is to resolve (i.e. geohazard vs. housing reconstruction needs) (35%)
- **Displacement Distance:** Distance population was displaced from place of origin and original set of services (school, livelihood, government, health) (35%)
- **Population Vulnerability:** Exposure of population to risks that may cause long-term harm (20%)
- **Site conditions:** The status of the site and its compliance with guidelines (10%)

■ Displacement Level ■ Displacement Distance ■ Population Vulnerability ■ Site Conditions

# Results: Lowest and Highest Site Severity Scores

## 5 Least Severe Sites

| District  | VDC          | Camp                   | Displacement Level | Displacement Distance | Vulnerability | Conditions | Severity |
|-----------|--------------|------------------------|--------------------|-----------------------|---------------|------------|----------|
| Bhaktapur | Bhaktapur    | Tripura Sundari        | 3%                 | 0%                    | 30%           | 36%        | 11%      |
| Lalitpur  | Karyabinayik | Kantangal              | 3%                 | 0%                    | 26%           | 46%        | 11%      |
| Bhaktapur | Bhaktapur    | Garud - Kundal         | 3%                 | 0%                    | 32%           | 35%        | 11%      |
| Bhaktapur | Bhaktapur    | Bramhayani Peeth 2     | 3%                 | 0%                    | 34%           | 34%        | 11%      |
| Bhaktapur | Bhaktapur    | Brahmayanipeeth Chokha | 3%                 | 0%                    | 35%           | 36%        | 12%      |

## 5 Most Severe Sites

| District | VDC          | Camp        | Displacement Level | Displacement Distance | Vulnerability | Conditions | Severity |
|----------|--------------|-------------|--------------------|-----------------------|---------------|------------|----------|
| Nuwakot  | Manakamana   | Shantibazar | 100%               | 76%                   | 46%           | 53%        | 76%      |
| Rasuwa   | Laharewpauwa | Bogatetar   | 100%               | 80%                   | 43%           | 47%        | 76%      |
| Rasuwa   | Laharewpauwa | Syaubari    | 100%               | 86%                   | 43%           | 49%        | 79%      |
| Rasuwa   | Laharewpauwa | Naubise     | 99%                | 87%                   | 54%           | 50%        | 81%      |
| Rasuwa   | Laharewpauwa | Bogatetar 2 | 100%               | 85%                   | 57%           | 55%        | 81%      |

# Categories from the geo-hazard survey

## Carried out by NRA

- **CAT 1**

Safer communities/villages where reconstruction can be started any time.

- **CAT 2**

Communities/villages under the risk of managing geo-hazards. Reconstruction can be started only after applying the suitable counter measures.

- **CAT 3**

Unsafe communities/villages due to the existing state of geo-hazard which is extremely difficult to control technically or too expensive. Reconstruction is not recommended

- Number of households categorized in the three severity classes of the geo-hazard assessment.
- **Some additional areas have been identified that will require Geo-hazard assessment.**

# Geo-hazard assessment: recommendation

| Districts            | VDC         | Wards   |
|----------------------|-------------|---------|
| <b>Dhading</b>       | Lapa        | 1, 2    |
|                      | Tipling     | 9       |
| <b>Gorkha</b>        | Barpak      | 2, 3, 5 |
| <b>Lalitpur</b>      | Bungmati    | 6       |
|                      | Khokana     | 7       |
|                      | Lalitpur MP | 21, 22  |
| <b>Nuwakot</b>       | Betini      | 7, 8, 9 |
| <b>Sindhupalchok</b> | Attarpur    | 8       |
|                      | Batase      | 5       |
|                      | Jethal      | 4, 5    |
|                      | Listikot    | 2, 6    |
|                      | Nawalpur    | 9       |
|                      | Sipalkavre  | 2       |
|                      | Tatopani    | 9       |
|                      | Tauthali    | 3       |

Specific areas requiring geo-feasibility assessment in the eight districts. Wards with  $\geq 10$  affected households was the criteria set for this table
