HRRP BULLETIN

11 June 2018

[WATCH: 'Women in Charge - Livelihood Recovery after Nepal Earthquake'](#), a video produced by JICA on the impact of support to women and women's cooperatives in Barpak, Gorkha as part of earthquake recovery. The video features in the June 2018 JICA Nepal newsletter.

Highlights

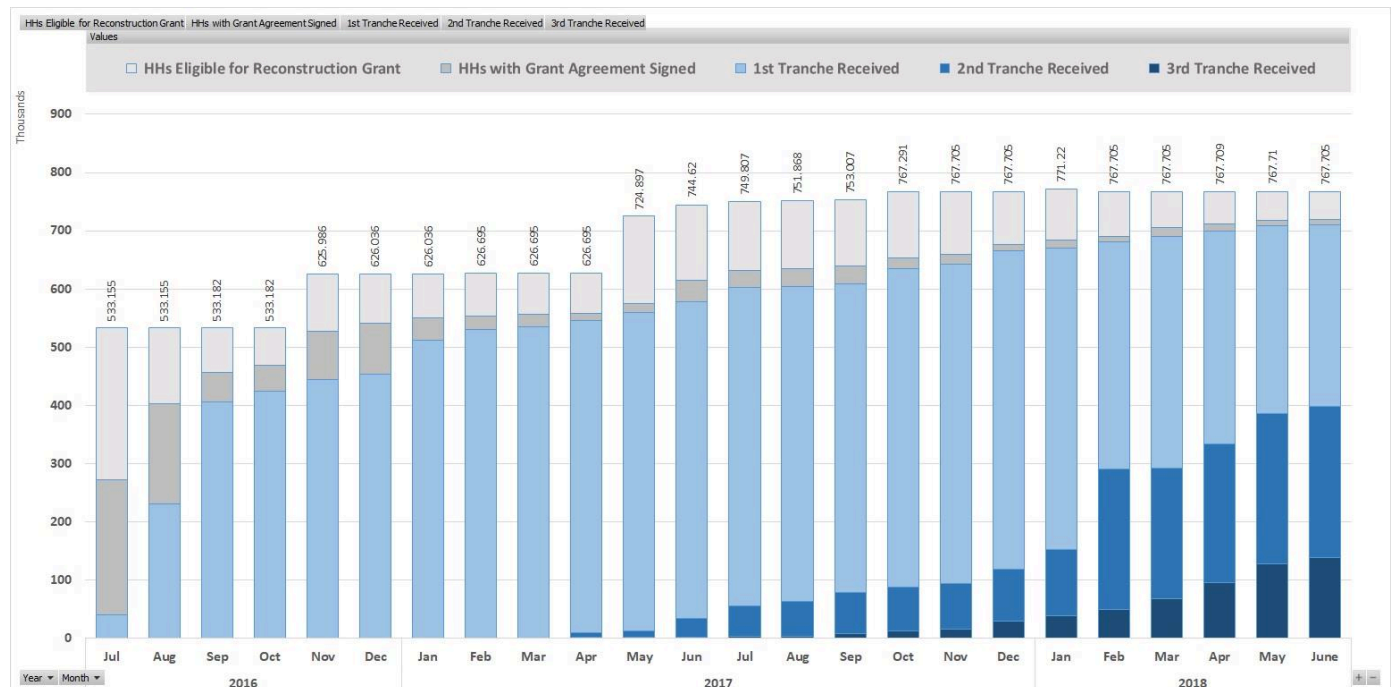

- [Inter-Agency Common Feedback Project, Community Perception Report, Reconstruction, Food Security & Livelihood, and Protection, May 2018](#) – the report recommends investing in door-to-door technical assistance as “this is the only way to make the reconstruction programme a true success”.
- [HRRP Women in Reconstruction Research Report](#)
- [The Path to Housing Recovery, Nepal Earthquake 2015, Housing Reconstruction Three Years On, Version 2](#)
- Summary of NRA information session on support to vulnerable households which took place on 8 June
- Requesting support from Partner Organisations (POs) for new technical working group on Hollow Concrete Blocks (HCBs) – those interested to participate are requested to contact Kuber Bogati National Technical Coordination Officer, techofficer1.national@hrrpnepal.org, by Wednesday 13 June
- [Invitation, Durable Solutions Information Session, 13 June, 3pm, HRRP Office](#)
- [Invitation, Partner Sharing Session, 14 June, 3pm, NRA](#)
- [Risk2Resilience Conference, 18-21 June, Radisson Hotel](#) - international conference on experience of EQ risk management, preparedness, and reconstruction in Nepal organised by MoHA, NRA, NAST, and NSET.
- [International Women in Engineering Day 2018, Celebrating Women Engineers of Nepal, 23 June](#) – requesting women in engineering in Nepal to share their stories through this link: <https://tinyurl.com/yayo3mov>. The event will take place at the NEA building ([location](#)) and will start at 11am.
- [Humanitarian Country Team \(HCT\), Contingency Plan, Nepal, Monsoon Flooding, June 2018](#)

UPDATES & REQUESTS

National

NRA, GMALI CLPIU, and Building CLPIU Grant Disbursement Data, as of 10 June:

	11 May	27 May	10 June
Total No. Eligible HHs	767,710	767,710	775,149
HHs Enrolled	713,580	718,325	718,986
HHs Received 1st Tranche	702,373	709,031	710,329
HHs Applied for 2nd Tranche	340,398	430,885	449,802
HHs Received 2nd Tranche	351,506	385,449	406,546
HHs Applied for 3rd Tranche	106,502	163,837	189,408
HHs Received 3rd Tranche	107,968	127,734	138,324

Housing reconstruction progress based on MoFALD CLPIU enrolment data from July 2016 to 10 June 2018.

Assessing Access to and Application of Knowledge on Safer Building Practices in EQ Affected Districts, 6 June:

many thanks to everyone that attended. The session included debates and brainstorming sessions to come up with solutions and it was great to have lots of interaction between participants. The full summary will be shared soon.

NRA Information Session on Submission of Proposals for Support to Vulnerable Households, 8 June: the session was led by NRA Executive Committee Member, Dr. Chandra Shrestha. During the meeting, the NRA spokesperson, Krishna Dawadi, indicated that there will be further consultation on the list of vulnerable HHs and the NRA will address addition of vulnerable HHs to the list on a case by case basis. Dr. Chandra Shrestha requested interested POs to comply with the deadline (14 June) for submission of proposals. POs may submit either a full-fledged or indicative proposal. Dr. Shrestha suggested to comply with the formal grievance procedures for incorporation of additional households into the vulnerable list and informed that POs own vulnerability criteria will not be endorsed by the NRA. Programmes / activities that support HHs not on the NRA's vulnerable list will be considered general housing support and not support for vulnerable HHs. Dr. Shrestha requested POs to address gaps when selecting working areas. The Poverty Alleviation Fund (PAF) informed that, with funding from the World Bank, they are planning to provide support through mobile technical assistance teams across the 11 districts. POs were requested

to inform the NRA if there are any delays in support to vulnerable HHs and prompt action will be taken. Dr. Shrestha stressed to POs that support of more than 350,000 NPRs per house is strictly prohibited. He suggested that there is a possibility that Community Reconstruction Committees will be revived (a recent report from HRRP on CRCs is available [here](#)).

Humanitarian Country Team (HCT), Contingency Plan, Nepal, Monsoon Flooding, June 2018

Districts & Municipalities

HRRP District and Municipal Coordination Meetings, 29 May – 11 June: during this period district coordination meetings took place in Ramechhap (29 May), Kavrepalanchok (31 May), Nuwakot (31 May), Rasuwa (31 May), and Okhaldhunga (8 June). Municipal level meetings took place in Likhu Rural Municipality, Okhaldhunga (30 May) and Panauti Municipality, Kavrepalanchok (31 May). Some of the highlights from these meetings include:

- In **Ramechhap**, the GMALI DLPIU Chief highlighted the importance of having regular meetings between NRA and different Partner Organisations and requested all POs to provide information to, and coordinate with, NRA and related Government agencies. The GMALI Chief also informed that discussions have been held with relevant organisations to give authorisation for heavy vehicles to carry up to 16 tonnes. The District Support Engineer (DLPIU) informed that 76% of non-compliances (765 out of 1,002 cases) have been corrected and most non-compliances relate to stone and mud mortar houses, two storey houses, and houses with timber bands.
- In **Kavrepalanchok**, the main issue raised was the frequent transfer of technical field staff with Kavre having the highest rate of transfer among the 14 most affected districts. Many technical field staff have been seeking transfer because of the pressure they are under at local level. Joint monitoring visits conducted by HRRP and Building CLPIU M&E consultants as well as municipal level coordination meetings have improved coordination between local level and technical field staff but more support is required from GMALI DLPIU and DCC is required to instruct local officials to create an enabling environment for technical field staff. Some of the decisions taken during the meeting were:
 - HRRP to coordinate with Samaritan's Purse, Rotary International, and SJASK to collect details of households they supported with material assistance/house construction and support inspection to bring these households into the NRA MIS.
 - DUDBC/DLPIU to send official letter to every municipality regarding management of inspection files before forwarding to DUDBC/DLPIU due to some fraudulent cases received by GMALI.
 - GMALI to conduct third quarterly review meeting in Asadh 2075.
 - POs planning to provide financial assistance to households but are unable to do so because the households have not rebuilt and will not rebuild within the programme timeframe are requested to look for other options to support vulnerable HHs within their project area or as per recommendations from GMALI.
- In **Nuwakot**, the GMALI Chief provided an update on the disbursement of the GoN housing reconstruction grant and requested POs to update their training database on time so that duplication can be avoided. He requested POs to support training to cover gaps. He responded to partners' issues on reconstruction highlighting that Kispang and Meghang Rural Municipalities have a higher reconstruction rate compared to Belkotgadhi Rural Municipality where there have been issues with approval of building design of some individual houses. All partners were requested to report in a timely manner to GMALI as per the system and format prescribed by GMALI.
- In **Rasuwa**, the discussion focused on the resettlement and relocation process for displaced households. 268 out of 844 displaced households have received a land certificate from the Government. POs were requested to work closely with GMALI and submit the monthly progress report to GMALI on time. Concerns regarding the inspection process for retrofitted houses were raised during the meeting. 117 houses are eligible for the retrofitting grant (100,000 NPRs) in the district. There are also some non-

compliant houses that must be corrected using retrofitting techniques. Technical field staff are motivating the community to use local materials and local man power for reconstruction of the houses. Further, it was discussed that short mason training has not been very effective at field level.

- In **Okhaldhunga**, POs were requested to manage their working areas and activities so that duplication with other POs is avoided. POs were requested to attend the coordination meeting during the third week of each month. HRRP will coordinate and facilitate these meetings. Joint monitoring to be held with partners and NRA representatives for more effective reconstruction process.
- In **Likhu RM, Okhaldhunga**, the discussion focused on training / orientation for technical field staff. 15 technical field staff in the RM did not receive training / orientation before starting and are struggling to conduct inspections. The RM Chairperson requested MoUD CLPIU and HRRP to organise retrofitting training in the RM. He also clarified local bodies are not there just to verify the attendance of the technical field staff but are capable of handling all the reconstruction activities and requested the national government to give them authority to handle all reconstruction activities at local level.
- In **Panauli Municipality, Kavrepalanchok** wards have been provided authority to issue permits for stone and brick masonry as per the DUDBC Design catalogue. The municipality will reissue a letter to GMALI requesting for resurvey and reverification of the remaining two wards. The municipality will provide office space to technical field staff from each ward on a rotation basis so that they can visit the required district offices for inspection file submission and necessary follow up.

[HRRP District Coordination Team Okhaldhunga, Weekly District Report, 25 May – 7 June 2018](#)

Ward No. 3, Likhu Rural Municipality, Okhaldhunga: a two-roomed, stone and mud mortar masonry house with RCC bands. The homeowner has received all three tranches of the Government housing reconstruction grant. The total cost of construction of the house was approximately 500,000 NPRs.

[HRRP District Coordination Team Rasuwa, Weekly District Report, 25 May – 7 June 2018](#)

Ward No. 5, Ama Chhodingmo Rural Municipality, Rasuwa: a timber house under construction. The home owner has received the first tranche of the GoN housing reconstruction grant and has been recommended for the second tranche.

[HRRP District Coordination Team Sindhuli, Weekly District Report, 25 May – 7 June 2018](#)

Ward No. 9, Dudhauri Municipality, Sindhuli: L-shaped, timber frame house. The house was built very soon after the 2015 EQ. The home owner has received the second tranche of the GoN housing reconstruction grant. The home owner has been advised to make corrections to be eligible for the third tranche.

HRRP District Coordination Team Dhading, Weekly District Report, 25 May – 7 June 2018

Ward No. 1, Tipling, Rubi Valley Rural Municipality, Dhading: a one room, stone and mud mortar masonry house with CGI and timber roof. The home owner has received the second tranche of the GoN housing reconstruction grant and has been approved for the third tranche.

Requests for Partner Support

Hollow Concrete Block Technical Working Group: during the meeting of the NRA technical committee on Thursday 7 June, the committee members endorsed the [HRRP report on production and use of Hollow Concrete Blocks \(HCBs\)](#), including the next steps. The HRRP technical coordination team are now planning to launch a technical working group to support with the development of guidelines for HCB producers, inspection checklists and minimum requirements for HCB construction, and options for corrections for non-compliant HCB construction. The first meeting of the TWG is expected to take place this week, so those interested to participate are requested to contact Kuber Bogati National Technical Coordination Officer, techofficer1.national@hrrpnepal.org, by Wednesday 13 June.

Invitation, Durable Solutions Information Session, 13 June, 3pm, HRRP Office

Invitation, Partner Sharing Session, 14 June, 3pm, NRA: to facilitate entry to Singha Durbar, please RSVP to Rashmi Lama, admin@hrrpnepal.org, by COB 13 June. The space for presentations for this event has already been allocated, but there will be more events like this coming up and any Partner Organisations (POs) interested to present should contact info@hrrpnepal.org. N.B. this session will use the Pecha Kucha, 20 X 20 style of presentation. Each presentation will have 20 slides with 20 seconds allowed per slide, totaling 6 minutes and 40 seconds. The presentation is automated and therefore no additional time is possible.

Mason Training ToTs for Inspection Engineers: the Building CLPIU are seeking support from POs for implementation of 25 mason training ToTs for newly hired inspection engineers across the 32 districts. The estimated cost per training is 500,000 NPRs, however there are ways in which this can be potentially reduced, including HRRP providing trainers if required. POs that are interested to support are requested to contact Kuber Bogati, HRRP National Technical Coordination Officer, techofficer1.national@hrrpnepal.org, by Friday 15 June at the latest.

Risk2Resilience Conference, 18-21 June, Radisson Hotel: this international conference on experience of earthquake risk management, preparedness, and reconstruction in Nepal is being organised by the Ministry of Home Affairs (MoHA), the National Reconstruction Authority (NRA), the Nepal Academy of Science and Technology (NAST), and the National Society for Earthquake Technology-Nepal (NSET). Anyone interested to participate, can register to attend here: <https://tinyurl.com/yagdbl48>.

Consultancy Opportunity, Transition & Recovery Consultant, IOM Nepal, closing date 18 June

International Women in Engineering Day 2018, Celebrating Women Engineers of Nepal, 23 June: Nepal Engineers' Association (NEA) are hosting an event on 23 June to mark International Women in Engineering Day and celebrate the women engineers of Nepal. In order to showcase women engineers and their accomplishments, experiences, and aspirations, all those interested are requested to complete this form <https://tinyurl.com/yayo3mov>. The form contains 3 sections and takes 10-15 minutes to complete. The event on 23 June will be held at the NEA building ([location](#)) from 11am, and will include a discussion panel on women in engineering, with a strong focus on how to improve networking and peer support for women engineers. There will also be stalls for organisations to advertise what they're doing to promote women in engineering. This will be a family friendly event which will include some fun stalls for children.

NRA Newsletter, May 2018

NRA and Practical Action, 'Cutting through Conformity': Chewang Gyalmo Ghale lives in the remote hilly area of Goljung in Rasuwa. She and her husband are subsistence farmers and also take temporary labour work where and when they can. They struggle to make ends meet and reconstructing their home seemed an insurmountable challenge. However, during an awareness raising session conducted by Practical Action, Chewang learnt of an opportunity to invest in a stone cutting machine to support the housing reconstruction in the area. Having moved ahead with buying the machine, Chewang found that cutting stones was easy but dealing with neighbours and relatives that felt this was a man's job and not for her was the real challenge.

Chewang Gyalmo Ghale, stands with the stone cutting machine she operates. She has been receiving requests from villagers to cut stone for them and she is now building her own house with stones she has cut herself.

HRRP

[Tool to Support Selection of Working Areas:](#) the HRRP IM team prepared this tool which provides details of the no. of HHs that have signed the Partnership Agreement (PA) with the Government of Nepal (GoN), the no. of vulnerable HHs identified by NRA, and the coverage of Socio-Technical Assistance (STA) as reported by Partner Organisations (POs) to the HRRP 4W. It is hoped that this tool will be useful for understanding the level of STA coverage in relation to the overall needs in these areas, including the level of vulnerability. This tool can support selection of working areas for projects providing support to vulnerable households.

[Women in Reconstruction Research Report:](#) this report presents findings from HRRP research conducted at community level, district level, and national level to document women's experience in reconstruction. Quantitative data was collected from 679 respondents; 304 respondents who are going through, or have completed, the reconstruction of their house, 226 respondents that have taken part in mason training, and 150 respondents that were both going through, or have completed, the reconstruction of their house and had taken part in mason training. Qualitative data was collected through interviews with women at district level (15 women in each district) and with 10 women at national level. The next steps recommended in the report include:

- Launch efforts to ensure that women receive equal pay for equal work
- Continue to document women's experiences of reconstruction and create platform for exchange between women involved in the reconstruction
- [Socio-Technical Assistance \(STA\)](#) needs to be adapted and improved to meet women's information needs
- Offer mason training opportunities for women in women led, women only, trainings which run for a longer duration with shorter days allowing women to better manage competing priorities and tasks.

[The Path to Housing Recovery, Nepal Earthquake 2015, Housing Reconstruction Three Years On, Version 2:](#) updated version of the timeline document prepared to mark the third anniversary of the 2015 earthquake.

[Housing Reconstruction Progress Maps:](#) based on MoUD CLPIU inspection data as of 5 June.

[Inter-Agency Common Feedback Project, Community Perception Report, Reconstruction, Food Security & Livelihood, and Protection, May 2018:](#) the report highlights some worrying issues that communities are facing, including engineers only recommending households to build a two-room house, circulation of harmful rumours around being deprived of government documents and services in the future if homeowners do not advance through the grant process, the level of debt homeowners are incurring to construct their homes (55% of respondents reported having taken a loan to finance their reconstruction, increasing to 68% as building progresses and homeowners receive the second and third tranches), and increasing costs of construction. The report recommends the following to address this:

- Put an end to harmful rumours that are leading homeowners to build a house that is insufficient for their family's needs through mass media campaigns, with a focus on radio, and local radios in local languages.
- Enable access to reasonable finance for homeowners to rebuild without long-term economic consequences.
- Extend deadlines for building until there are reasonable finance mechanisms in place. If construction is to be mandated it should be fair to homeowners. They should not have to borrow at harmful interest rates in order to build on an externally imposed timeframe.

- Clearly and broadly communicate that two-room structures are not a requirement through mass media, with an emphasis on radios, in local languages.
- Invest in door-to-door technical assistance to support households in understanding how to build a structure that will meet their family's needs and reduce their vulnerability to future hazards. This is the only way to make the reconstruction programme a true success.
- In line with the commitment to 'leaving no one behind' there is a need to invest in assisting those who have been left behind by a blanket approach to reconstruction targeting them with appropriate support to catch up.

[JICA Nepal Office, Quarterly Newsletter, June 2018](#): page 5 of the newsletter includes a very interesting summary of the community mobilisation programme that JICA have rolled out in their working areas in Gorkha and Sindhupalchowk.

[Citizen Insider, Issue No. 14 \(Nepali\)](#): the 'Citizen Insider' bulletins are based on questions received through Citizen Helpdesks (run by groups of volunteers known as Community Frontline Associates (CFAs)) which gather and disseminate information on critical issues affecting Nepali citizens to eliminate information gaps between the government, the media, donor organisations, and communities with the objective of improving collective decision-making. It is concerning to see that the widespread rumours of the government 'blacklist' has escalated with earthquake affected households now concerned that their social security benefits will be affected. It is unfortunate to see these rumours being supported by the NRA Deputy Spokesperson who is quoted as saying "if the family refuses to build their house or return the tranche, the government will recover an equal amount by terminating the public services they can receive. This includes social security".

[Milijuli Nepali, BBC Media Action, Episode 970](#): this episode includes stories from Makwanpur and Ramechhap. The programme begins with the presenter introducing Pabitra Tamang whom she is interviewing for the third time. The episode also features a couple from Ramechhap where a wife supports her husband in building the house. Another story from Ramechhap focuses on building houses using trained masons.

[Baliyo Ghar TV Programme, Episode No. 107](#): this week's episode is focused on reconstruction progress and challenges in urban areas including, Basantapur and Jhose in Kathmandu. The programme includes an interview with Mr. Raju Man Manandhar, Joint Secretary, NRA, on the plan for urban reconstruction and the progress to date.

The banner for the Baliyo Ghar TV Programme, Episode No. 107, features the title "राजधानीका मित्री बस्तीहरुको पुनर्निर्माण कथा" (The Story of Reconstruction of Friendships in the Capital) and the episode number "भाग - १०७". It includes three images: a construction site, an interview, and a damaged building. The banner also displays the logos of the supporting organizations: USAID and NSET, and the media partner: ABC.
