

Meeting Minutes

Helpdesk/Resource center technical discussion

Date: 27th Jan, 2017

Time: 2:00 PM

Location: HRRP Office, Hotel Gorkha Inn

Participants: CARE, CRS, SDSC, JICA, Oxfam, UNDP, UNRCO, HRRP

Agendas

1. Introduction
2. POs sharing and discussion on their modality of Helpdesk/Resource center
3. One day Gorkha Technical workshop on “Technical Assistance in Reconstruction and Recovery Process”

1. Introduction

HRRP Gorkha facilitated Technical discussion meeting to discuss about current modality of helpdesk and resource center in Gorkha district with POs working in shelter sector. POs shared their strategy regarding Helpdesk and Resource center with each other, backed up with suggestions based on their field experience.

HRRP requested POs to participate and facilitate upcoming one day Gorkha Technical workshop as it is a joint sharing and learning platform for everyone. HRRP also requested POs to take roles and responsibility to present whole package of technical assistance and prepare presentation to share modality, challenges and lesson learned from their field experiences.

2. Helpdesk/Resource center

CRS

- CRS presented their Helpdesk approach where CRS is designing and working on **Construction Cost Calculator** for Low Strength masonry buildings and will complete it by mid of February. CRS hired international consultant to support designing and use it through **ICT4D** (Information Communication Technology for Development) to develop android app where community can estimate and organized money and resources for reconstruction of their house.
- People can also feed up some relevant information that is type of house they want to construct, available salvage materials etc. as there will be 15 sets of questions which will be asked to people and after that full BOQ (Bill of quantity) ledger will be printed and provided to house owner. Objective of this activity is to provide people estimation and tentative detailed cost of their house based on their choice.
- CRS also briefed about their door to door assistance as there will be team of one trained mason and one social person within the community who will receive training on inspection guideline and minimum requirements. Those teams will be supported and supervised by an engineer as higher level to provide any type of support needed.

- Mobile team will be visiting households at 5 different levels i.e. 1. Site clearance and Layout 2. Excavation 3. Foundation 4. Wall and 5. Roof but will provide extra support to people and mason whenever is needed. Mason will also receive assistance anytime by calling on toll free no. and that helpline no. can be used by any community members to request technical support and to ask technical questions.
- HRRP also suggested to coordinate and collaborate with DLPIU and VDC office for Door to Door assistance and helpline as there is one form in **Annex-5 of Inspection Guideline** which needs to be filled up by House owner to request for technical support. POs and government will be providing technical support whenever is needed and communication and common recording management should be worked out.
- CRS shared challenges that they are facing in municipality is most of the RCC skilled manpower are from Terai region and now they are taking one trained mason from community to work with them and those groups are taking contract to reconstruct RCC buildings.
- Representative from UNRCO also shared their project details about collecting community feedback in multi sectoral reconstruction collected through FGDs and also requested POs to study it and get some information regarding people changing needs.

CARE

- Care Nepal briefed whole process of their strategy of 3 stage of technical assistance as follows:
1st Stage- There will be awareness program to mason and community and masons are trained based on DUDBC's 7 days' curriculum and those trained mason will then provide layers of training to community.
 - 9-11-member committee will be formed which includes female, political leaders, mason etc. and they will provide orientation and support reconstruction process to community.**2nd Stage** – Potential House owner training where those trained committee members will be able to train other potential house owners. This will be a day training and will be conducted at community level targeting households of the community.
3rd Stage- This involved trained mason and a mobile team to provide door to door assistance to people and this team will be composed of 1 technical person, 1 mason, 1 Social Mobilizer and 1 outreach volunteer.
 - They will provide technical support to community and also get support from Ward level committee.
- Care explained about their **information center/Resource center** concept where they are going to rent hall in Gankhu, Harmi, Gumda and Kerauja VDCs. Television, Laptop, speaker and solar backup will be setup in that information center and that information center will provide support in awareness and information and also with printings of forms needed for inspection process.

JICA

- JICA updated that DDC (LDO) requested JICA's support to form CRC (Community based reconstruction committee) according to NRA guideline in JICA's working VDC. JICA also mentioned that they have found similar type of structure already formed in some of their VDC which is common with other POs.
- HRRP updated that HRRP already coordinated with NRA and DDC regarding CRC and verbally discussed about formalization of committee formed by organization with coordination with VDC

secretary and Ward coordinators and formation of new CRC in all VDCs and municipalities with joint effort from POs and government. HRRP committed to organize meeting regarding CRC which will be chaired by DDC regarding all these issues.

- JICA's mobile team consist of 1 engineer and 1 social mobilizer deployed for 2 VDCs. Mobile team will initially support in public awareness campaign and orient community on inspection process and minimum requirements.
- JICA's technical support team will work closely with Community Based reconstruction committee and provide technical assistance. They will also support for formation of drawings and CRC will also be involve in awareness campaign.
- Construction of **resource center** is going on in Bungkot and Barpak VDCs and JICA explained that it will be handed over to VDC office and can be used by any other organizations in coordination with VDC office.
- JICA answered that Partners staff can also work with VDC staff in that center for reconstruction and recovery activities.

OXFAM

- Oxfam briefed about their technical assistance which will be provided in three phase as follows;
 - **1st Phase** will be Build Back Safer awareness program
 - **2nd Phase** will be construction of demo house and orientation of community in different level of construction as people will be guided directly through observation of construction of house and at the same level when inspection is done.
 - Oxfam **constructed information center** where there is no **VDC office** and **VDC office is functioned through that information center**. Information center provided **space for VDC engineer** to work and also Oxfam staff will be working and providing support from same information center.
 - **3rd Phase**- 2 technical person move around the VDC to provide technical assistance and VDC engineer is deployed in VDC office to do his daily job and to provide support and to supervise those technical staff.
- Oxfam explained about their planning to construct 13 demo house and 7 information center.
- Oxfam also briefed about **OJT (On the Job Training)** conducted by Oxfam with reference from Helvetas vocational training manual. OXFAM selected stone masonry with cement mortar design from 17 designs and deployed 15 semi-skilled labor in demo construction with rotating responsibilities so that everyone can learn everything. Sub overseer will supervise each training.
- Oxfam also shared their cost of construction materials as 8 lakh rupees and 6.5 lakh as cost of training. Rs 580 was provided as incentives to participants for 50 days.

3. One day Gorkha technical workshop on “Technical assistance in Reconstruction and Recovery Process”

- HRRP elaborated concept of one-day technical workshop where all POs, government, private sector etc. working in housing sector will come together to discuss and present about technical assistance, Technical challenges that they are facing in field, challenge in designs and work out together to find solutions and some advocacy messages.
- HRRP also updated that DUDBC/DLPIU and other relevant government authorities will lead this workshop and HRRP also committed to request DUDBC to present POs role's in inspection process and overall reconstruction and recovery process.

- POs decided to fix this **workshop on 2nd week of February, 2017** and requested HRRP to follow up with DUDBC and other POs to fix specific date.
- HRRP requested POs to prepare on different topics based on activities of technical assistance and share their strategy, concept, challenges and lesson learned for that particular activity in field.
