The meeting focused on sharing the challenges faced during the economic impact survey and to meet the target within the first week of April in all the municipalities of Kathmandu district. The major issues were to contact the people listed under non-beneficiary. Most of such people were not very responsive to the survey. Engineers expressed their concern as people listed under non-beneficiary had already signed Partnership agreement for the grant or even received reconstruction tranches.

Finally, the meeting was concluded by thanking all the technical person involved in the survey and requesting everyone for their support in making it a success.
