6. Gap Identification/Urban Issue Discussion
7. Concerns / limitations for Recovery and Reconstruction implementation
8. Action Points
5. AOB

1. Round Table Introduction

2. HRRP Overview and Update

The Municipality Level HRRP Coordination meeting held at Thimi Municipality office at Thimi Bhaktapur. The Housing Recovery and Reconstruction Platform Bhaktapur, District coordinator Shailesh Acharya Presented about working structure, objectives, role and responsibilities of HRRP. The main Objective of the meeting was introducing us as a HRRP, close coordination with Partner working in the respective district and discussion about urban issues on Reconstruction process. The main aim is to share plans and projects, share challenges, avoid duplication by finding overlaps and gaps in the working area of various POs.

3. Key Discussion

Executive Officer Bhupendra Sapkota presented organizations upcoming planning for their municipality in the recovery and reconstruction sector. Moreover, he even highlighted the main issues to focus during the phase of reconstruction and recovery. He highlighted the urban issue on recovery and reconstruction process especially in core area. Most challenging part is Land ownership certificate and small land for housing and recent urban development policy. As per the Executive officer of Thimi municipality Project should be planned and implemented in Close coordination with Municipality and local community and need to follow the instruction by NRA. After the earthquake core areas (Traditional Settlements) community are more affected than newly planned settlement. No presence of I/NGO for recovery and reconstruction till date. Different ward secretary raise the issues and challenge for recovery and reconstruction process which will be mention below. Different organizations representative and community people have curiosity about the upcoming CBS data collection process, modality and time frame. However public has started to rebuilding their houses instead of waiting for NRA policy.

Urban Issues/Challenges

- Many people do not have land ownership/Rights documents, although they are using that Land since long time.
- Same building by-laws for the core and outskirts are creating confusion for issues like setback in core areas. For example minimum width of the road should be 10 feet, but existing roads in core areas are very narrow resulting in un-habitable spaces and lost total land joining with the road. As per information from Municipality who has Earthquake victim Red card they will not be eligible for any compensation for the land.
- As per Municipality the FACADE treatment of the building in the historically important place should resemble the traditionally architecture, for the same purpose may be wood carving manpower will be not enough and price will be high. How it will be overcome?
- A single house is used by the multiple families and people are expecting the grant as per the number of families living in a house. How the CBS data will be collect? Will be as a single house or multiple Families?
- How to solve the issues of rented house family?
- Local Festival (Bisket/ SindurJatra) is coming soon which will run for many days, on the way of jatra people are living with temporary shelter , how to solve the problem?
- Difficulty to follow the by-laws to build the individual house due to small land.
- Lack of space to store the construction material during the Individual Housing reconstruction phase.
- Difficulties on Demolished the individual House. Some people are still living in the partially damaged houses, if nearby house owner start to demolish his house they will be in trouble because of row housing.
- People were uncertain about the CBS data Collection and process of grant distribution whether the grant would be distributed by the government or the I/NGO.
- People are using Scaffolding to save their houses, is it necessary to keep the Scaffolding? Who will initiate to remove the scaffolding?
- Public have started re-building houses instead of waiting for new policy and rules.
- Technical support is need for revision of Core area building by-laws.
- Need for Social/Community Awareness on how to build back safer.

- Community awareness program should implement on High Priority and on immediate basis.
- Confusion on building design, Can public build concrete multi story houses with the grant money? Is the grant money only for stone masonry/ brick masonry houses given on the DUDBC design Catalogue?
- Are RCC building owners eligible for 25 Lakhs loan from the government? What will be the criteria for them?
- Land areas in core areas are very small like 1 Anna, 3 Paisa, which creates restriction during building permit process in case the household has to increase the setback from the existing road.
- Similarly, building new house on existing land are creating issues related to immediate neighbor complain on building height, window size, window location.

4. Action Points

1. Scaffolding issue within the core area will be resolved very soon in initiation by Thimi Municipality which will be lead by Executive Officer. He is planning to arrange the community level meetings along with the help of the community group and Technical team.

Meeting Participants List/Attendance Sheet

Name	Organization	Phone	Email
