

Housing Recovery and Reconstruction Platform

Results from HRRP Partner Satisfaction Survey Round 4

Jan-Feb 2019

Introduction

Survey Objectives:

- To assess how the HRRP is working with, and perceived by, the stakeholder groups involved in the platform
- To understand if the platform has improved in relation to previous rounds of satisfaction survey results
- To gather feedback on which HRRP activities are working, and which aren't, and enable partners to suggest improvements.

Previous Rounds Results

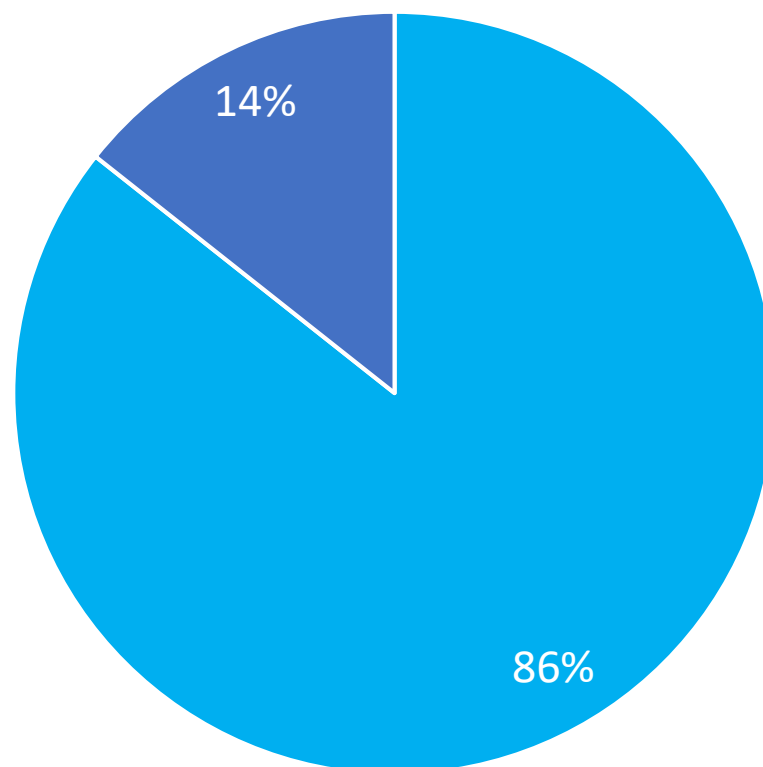

- [First round results](#)
- [Second round results](#)
- [Third round results](#)

Changes made by HRRP based on previous survey results

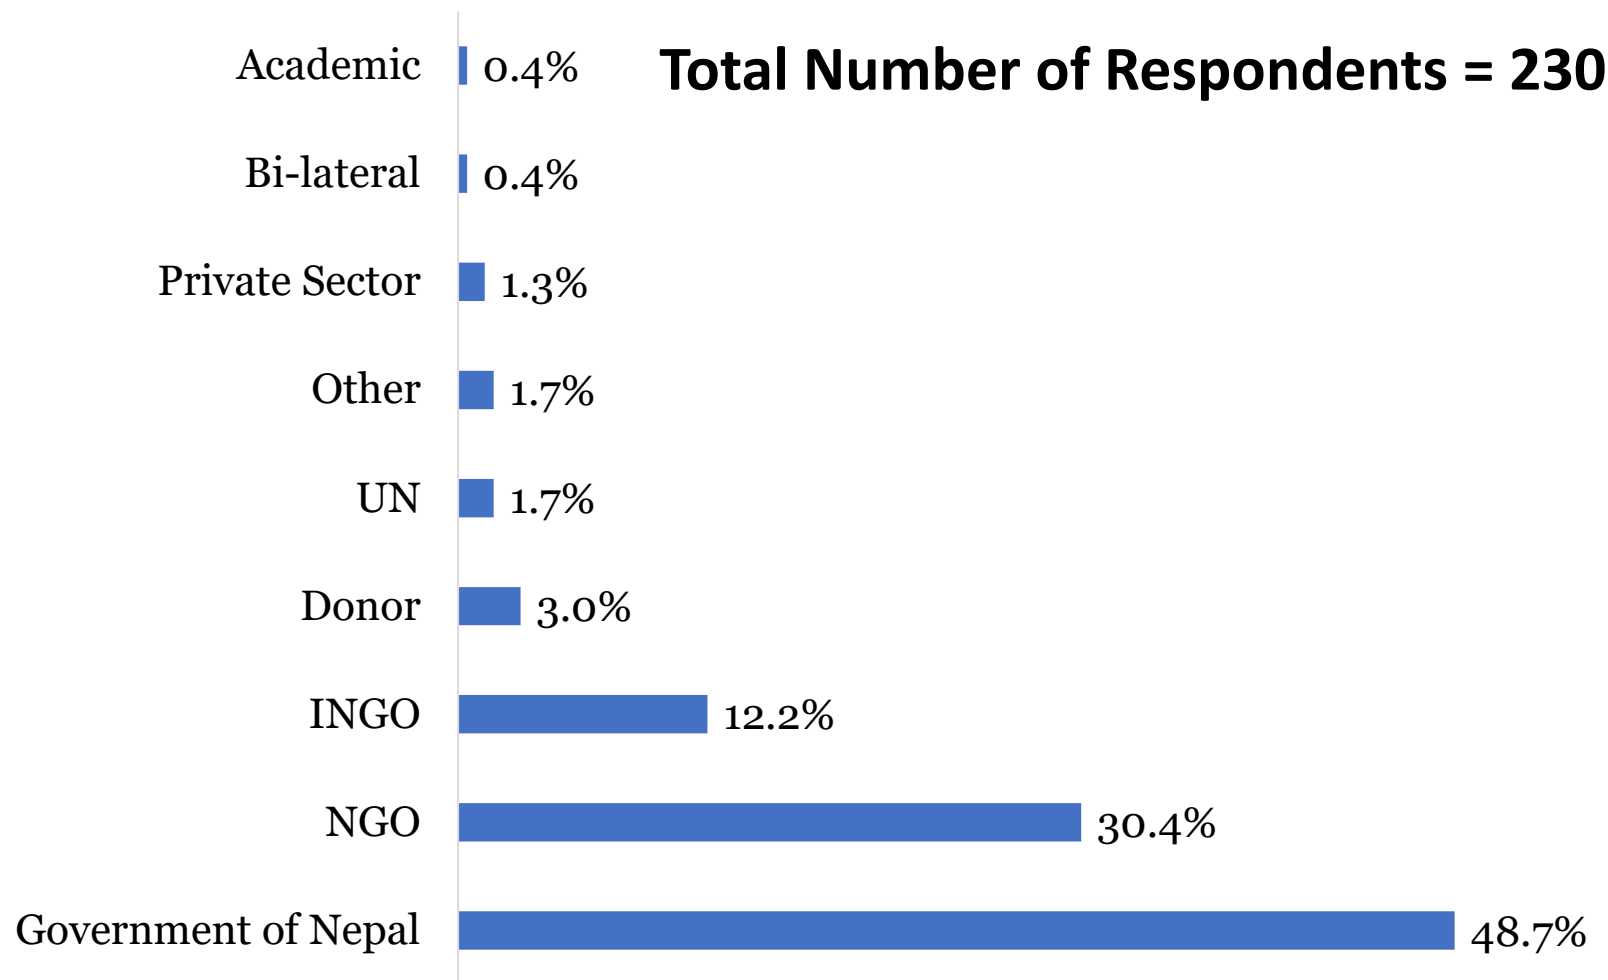

- Increased coordination and capacity strengthening support to local government
- Reduced frequency of the HRRP bulletin from weekly to fortnightly
- Incorporated feedback on website in website redesign
- Increased support to the 18 moderately affected districts as much as possible within the financial limitations of HRRP3
- Scaled up support for urban housing reconstruction, including urban technical session and publication of status paper

Response by Language

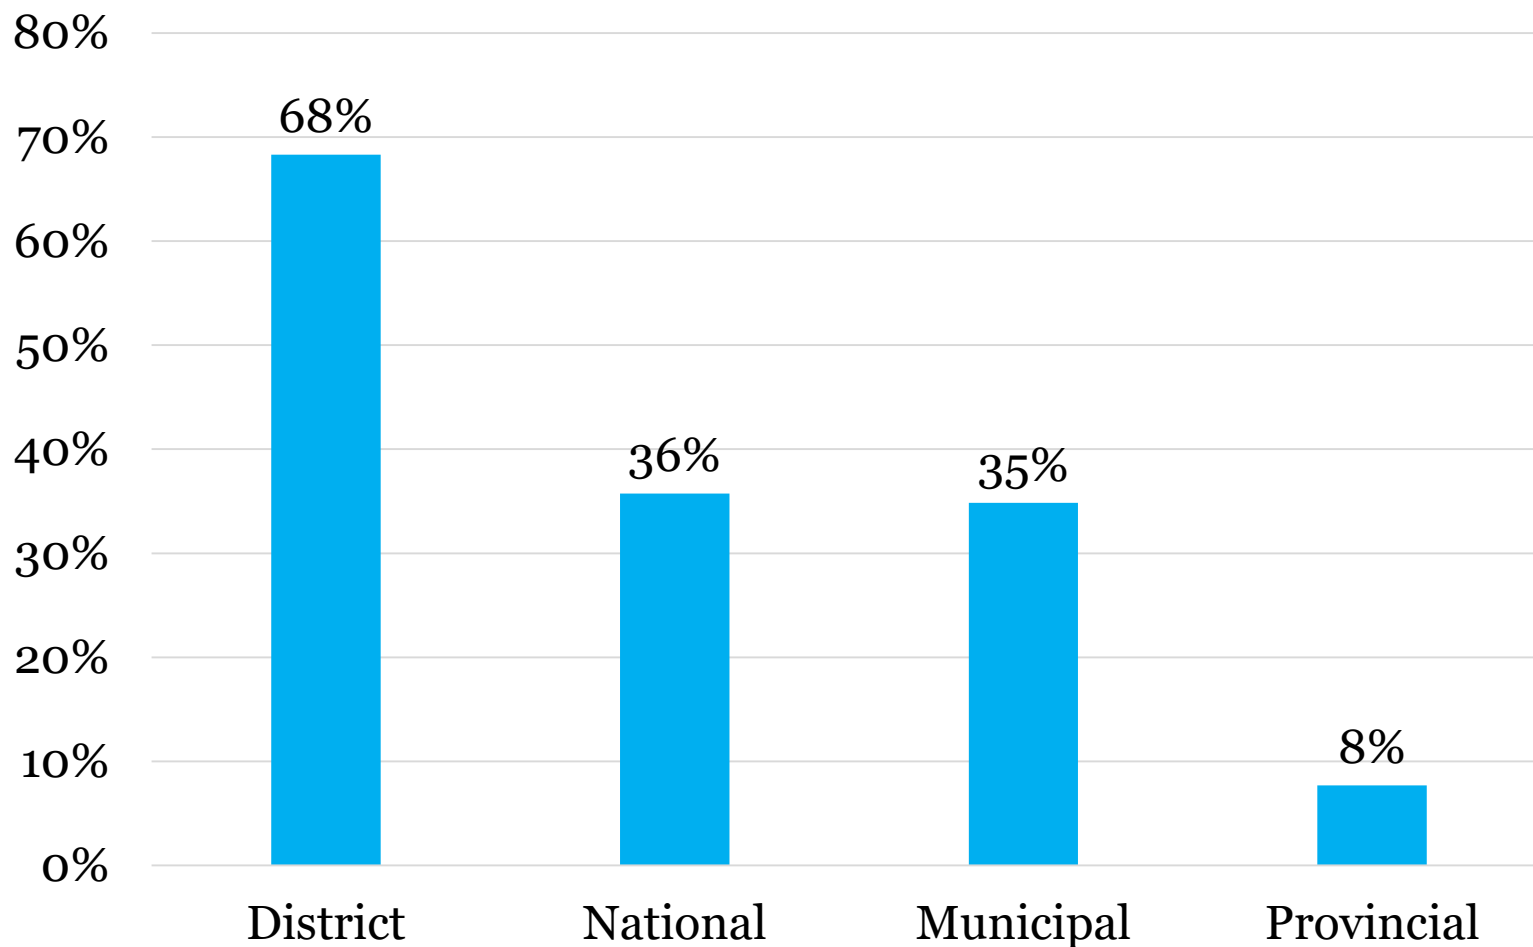

■ English ■ Nepali

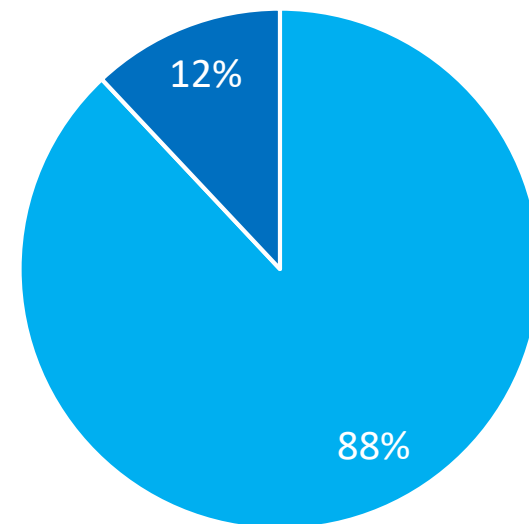

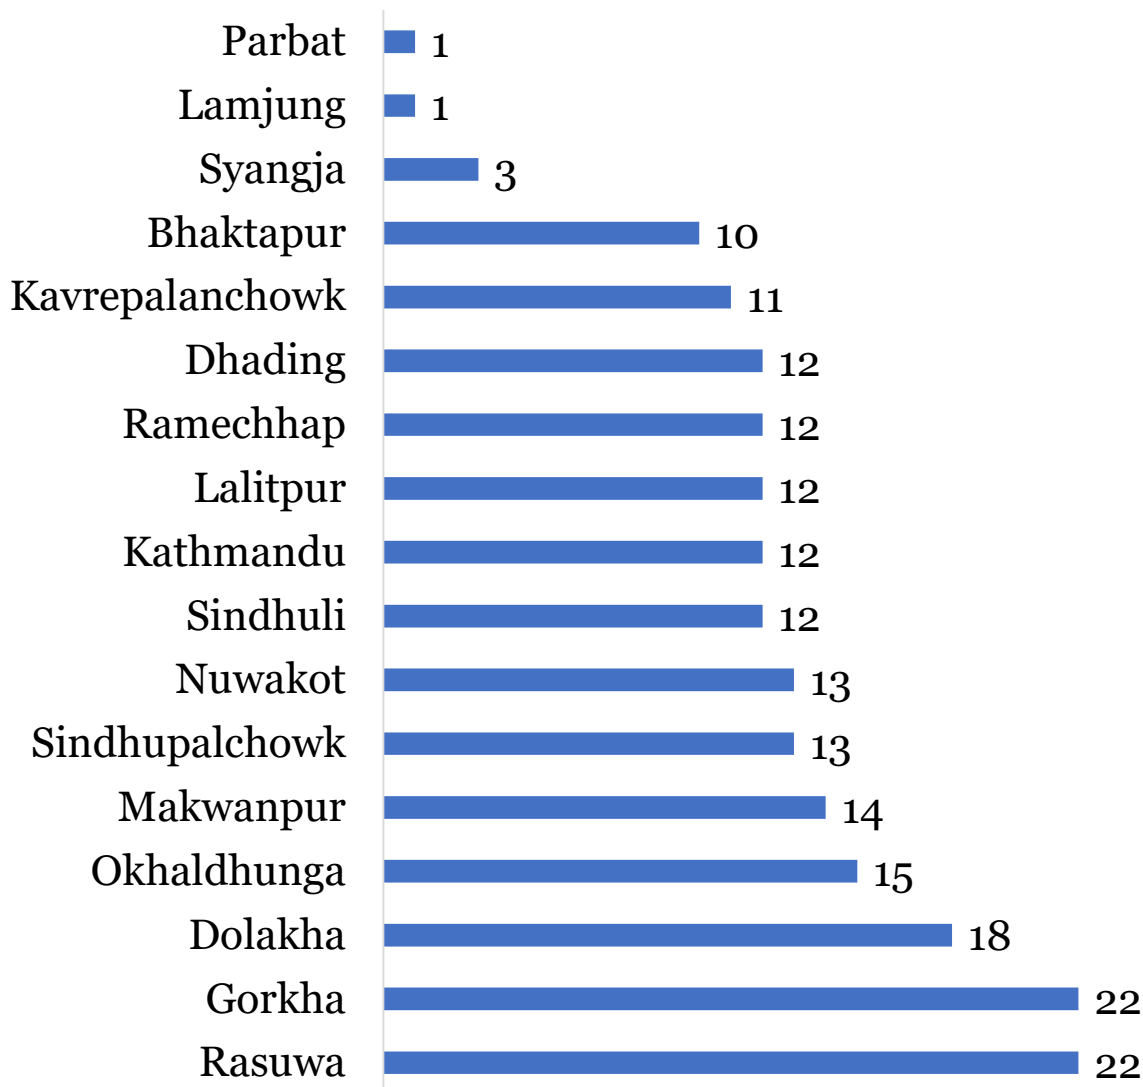

Respondents by type of organisation

Respondents level of intervention (multiple selection allowed)

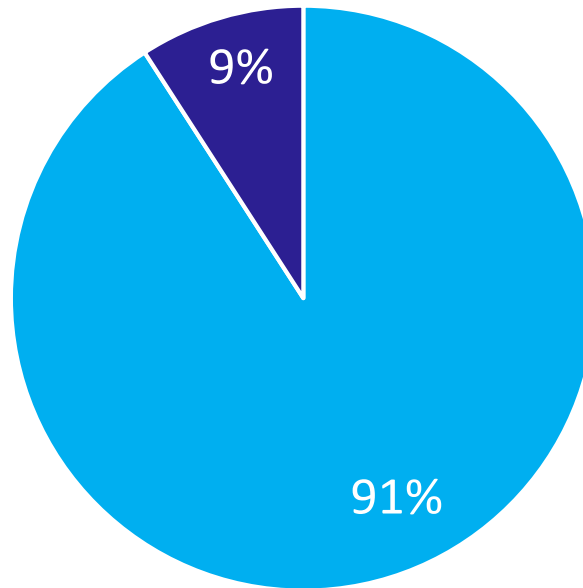

Respondents by Working Location

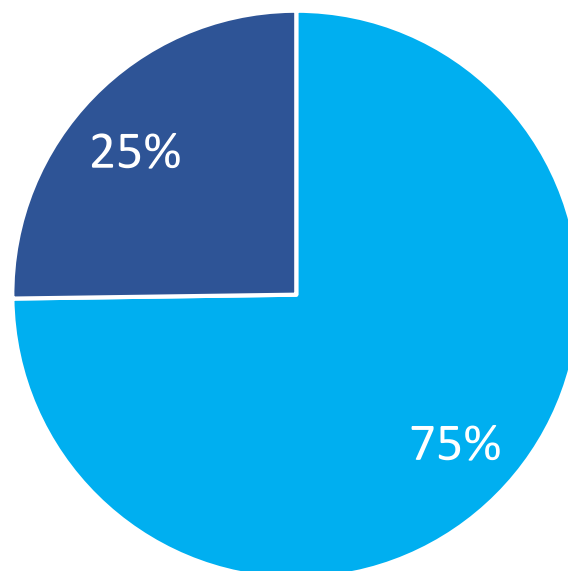

■ District ■ National

Respondents receive the district HRRP emails from districts they or their organization work in

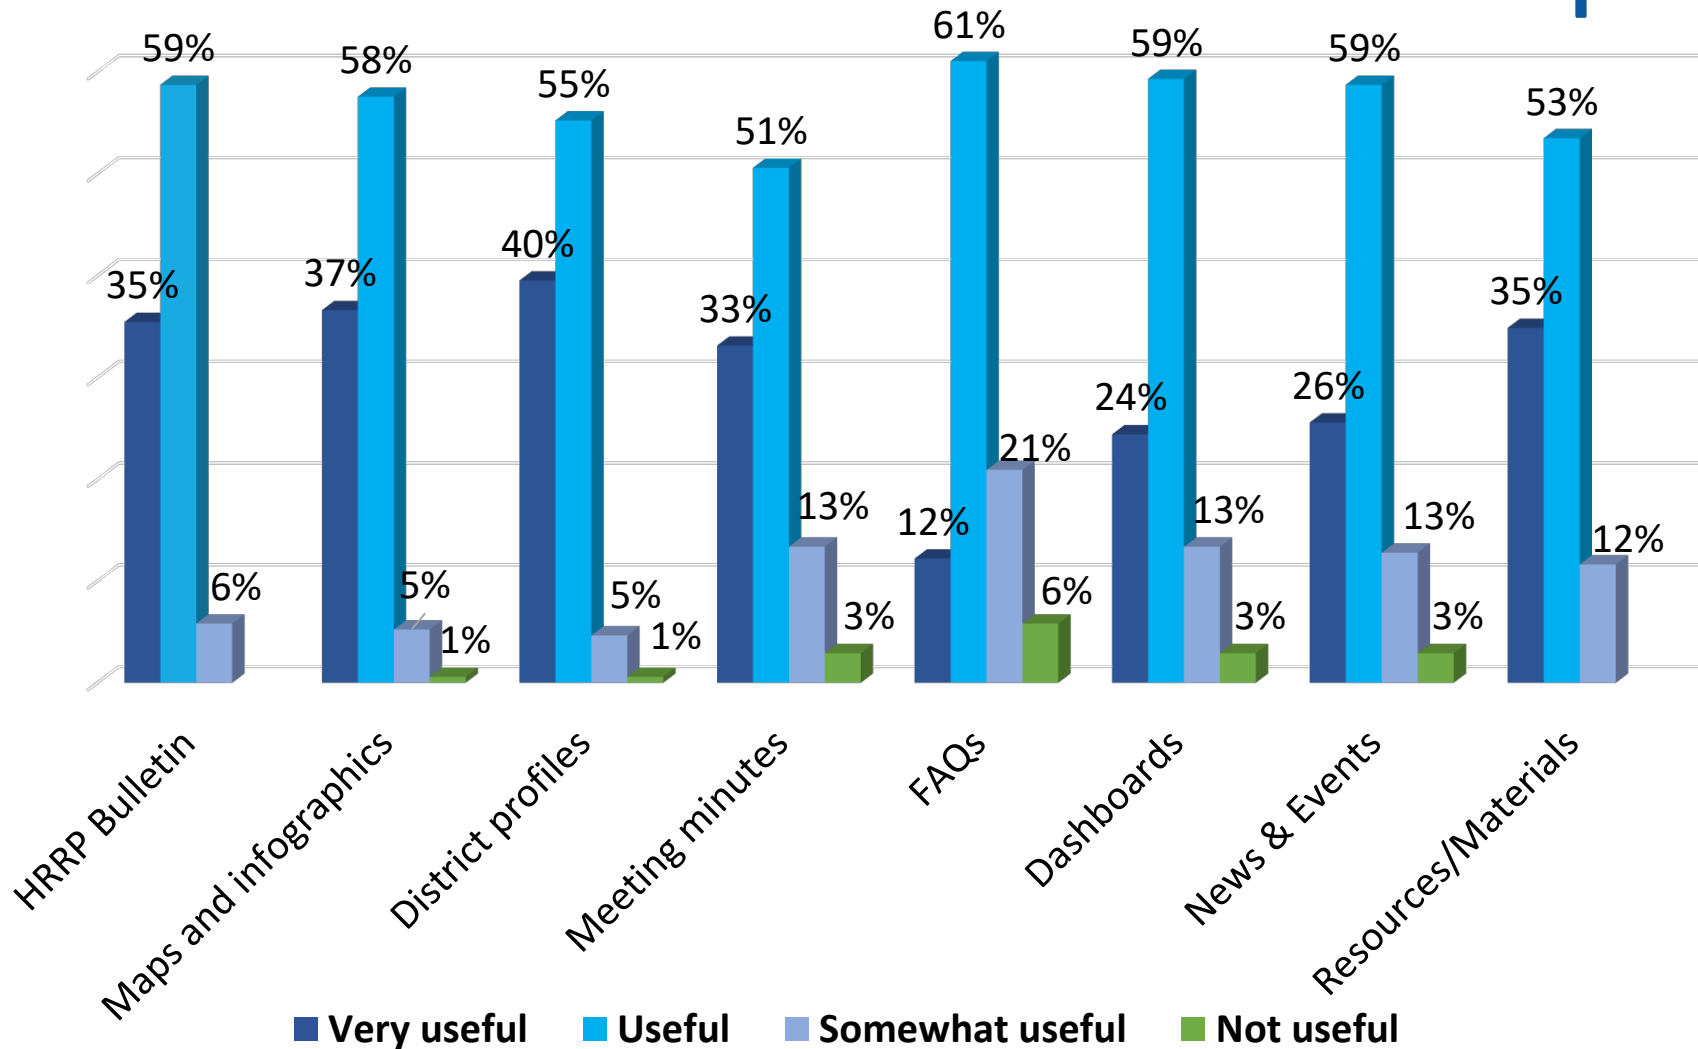

■ Yes ■ No

Respondents used any HRRP products or website resources at least once in the past 4 months

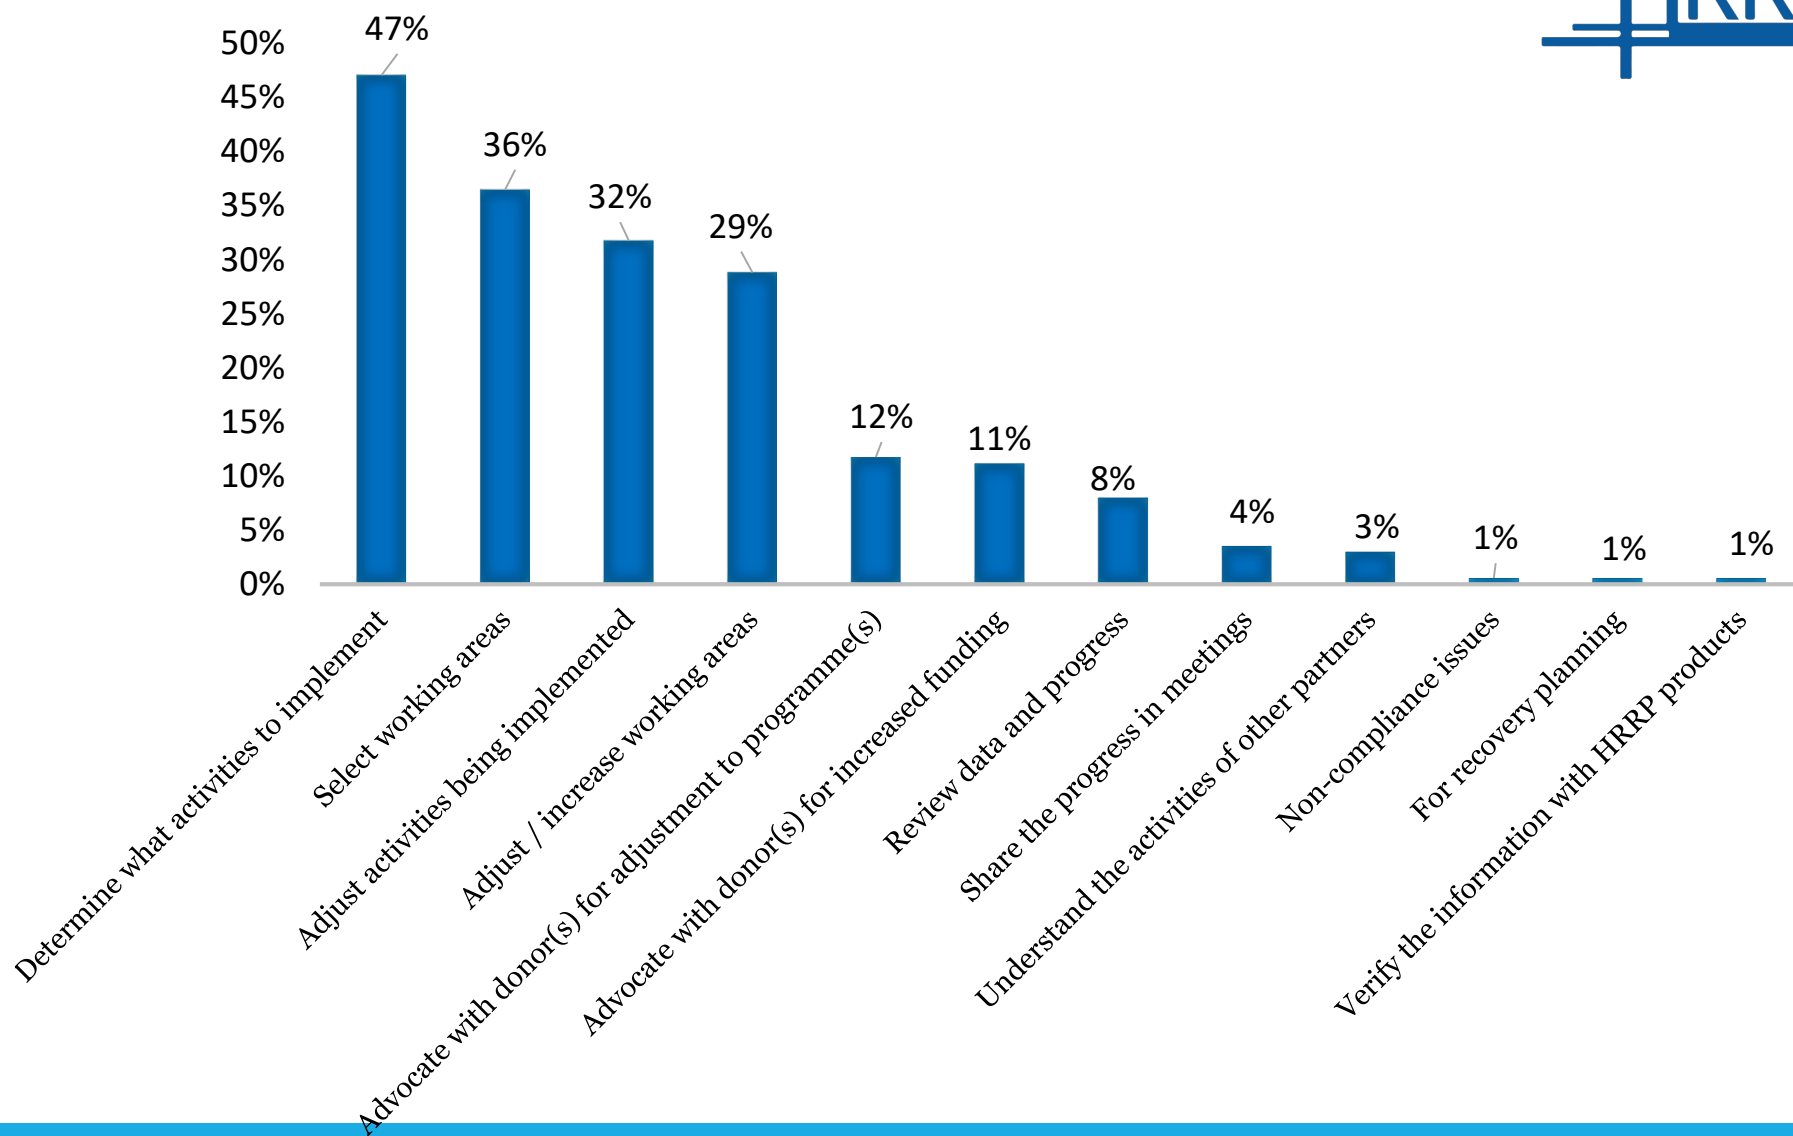

■ Yes ■ No

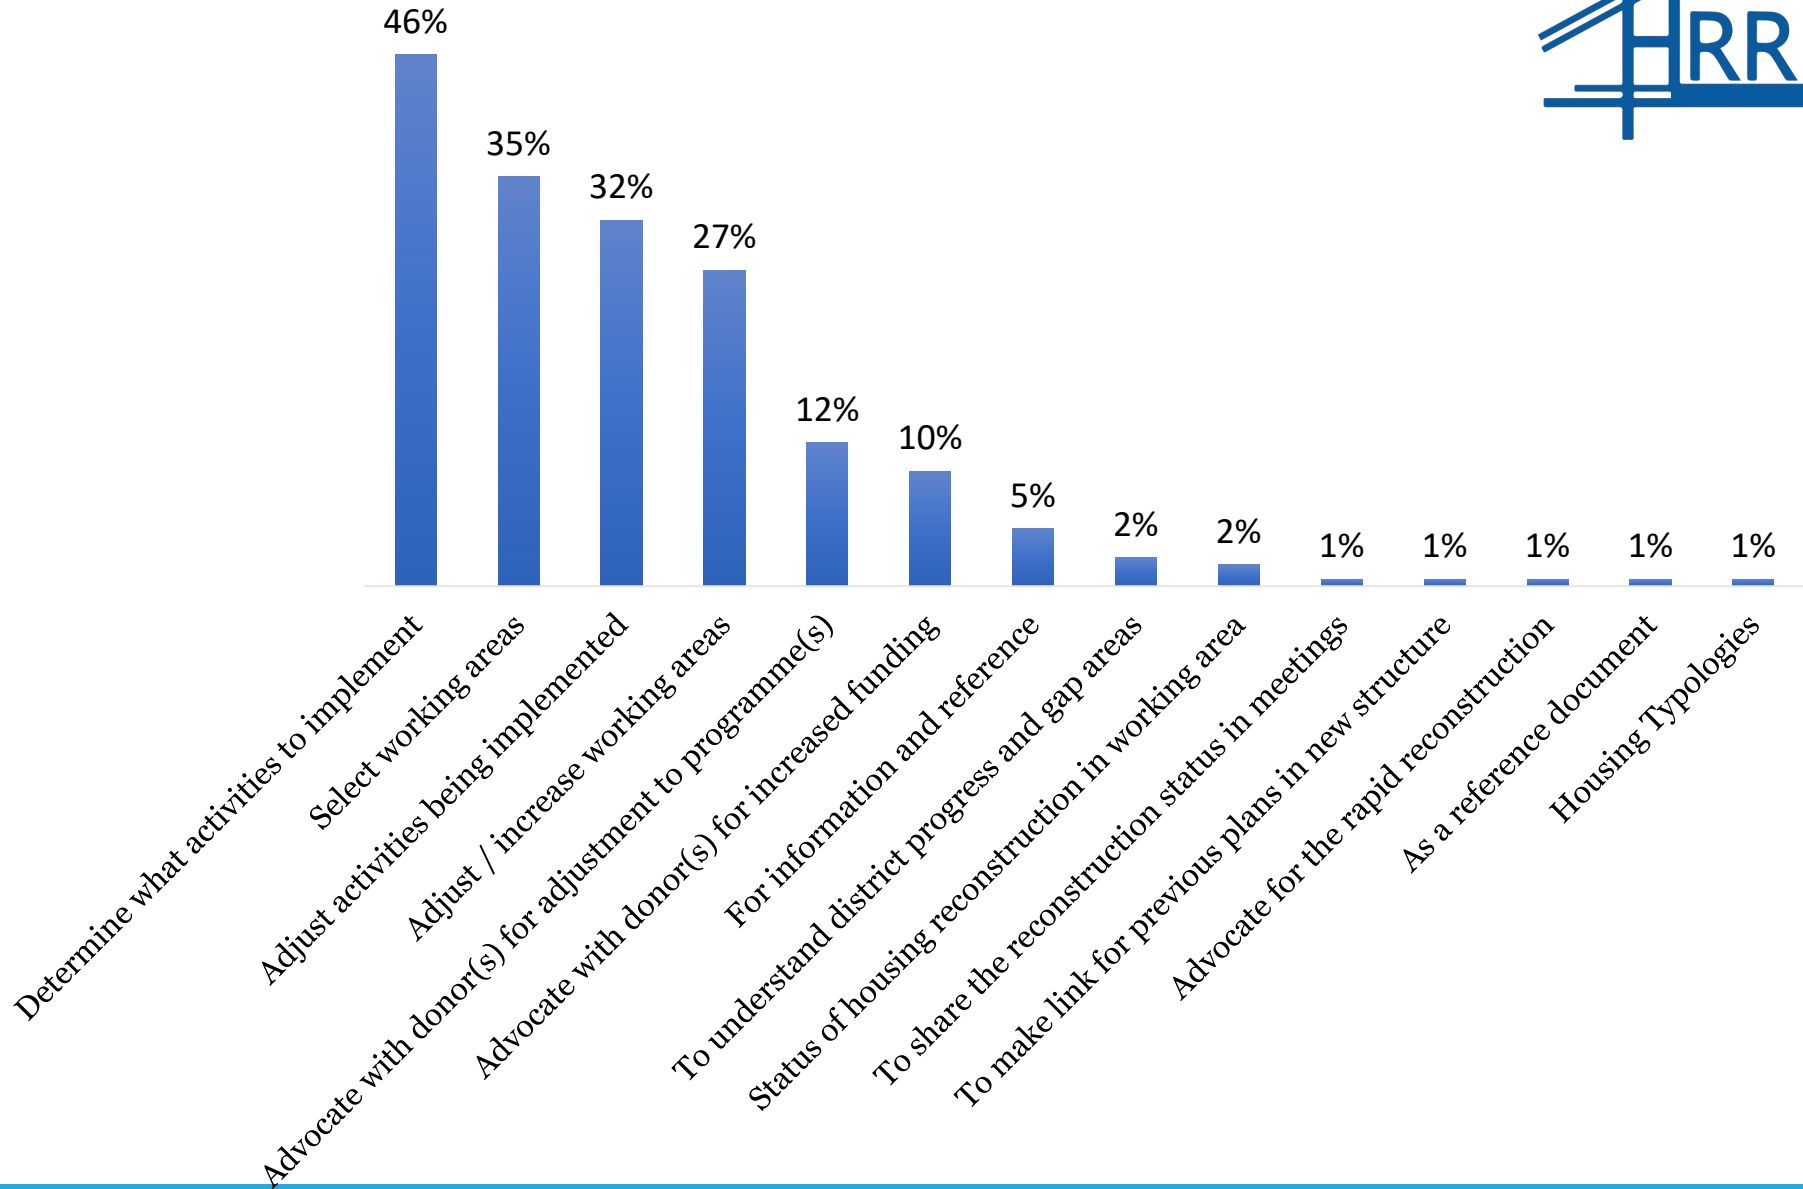

Respondents' ranking on usefulness of HRRP products and website sections

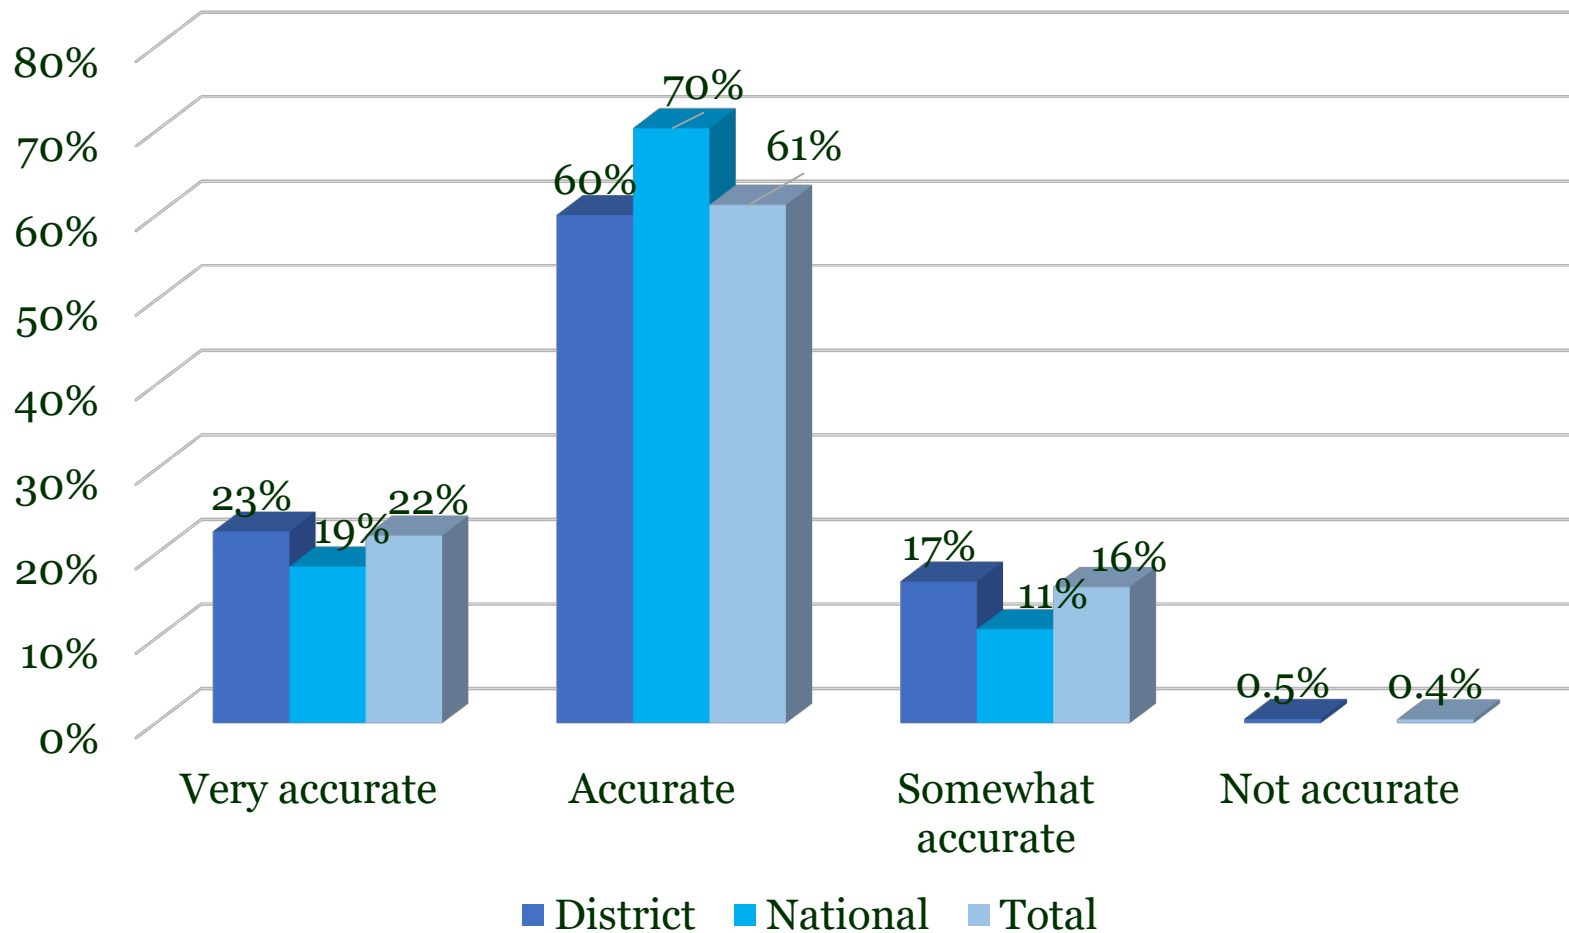

Purpose of HRRP district profile use

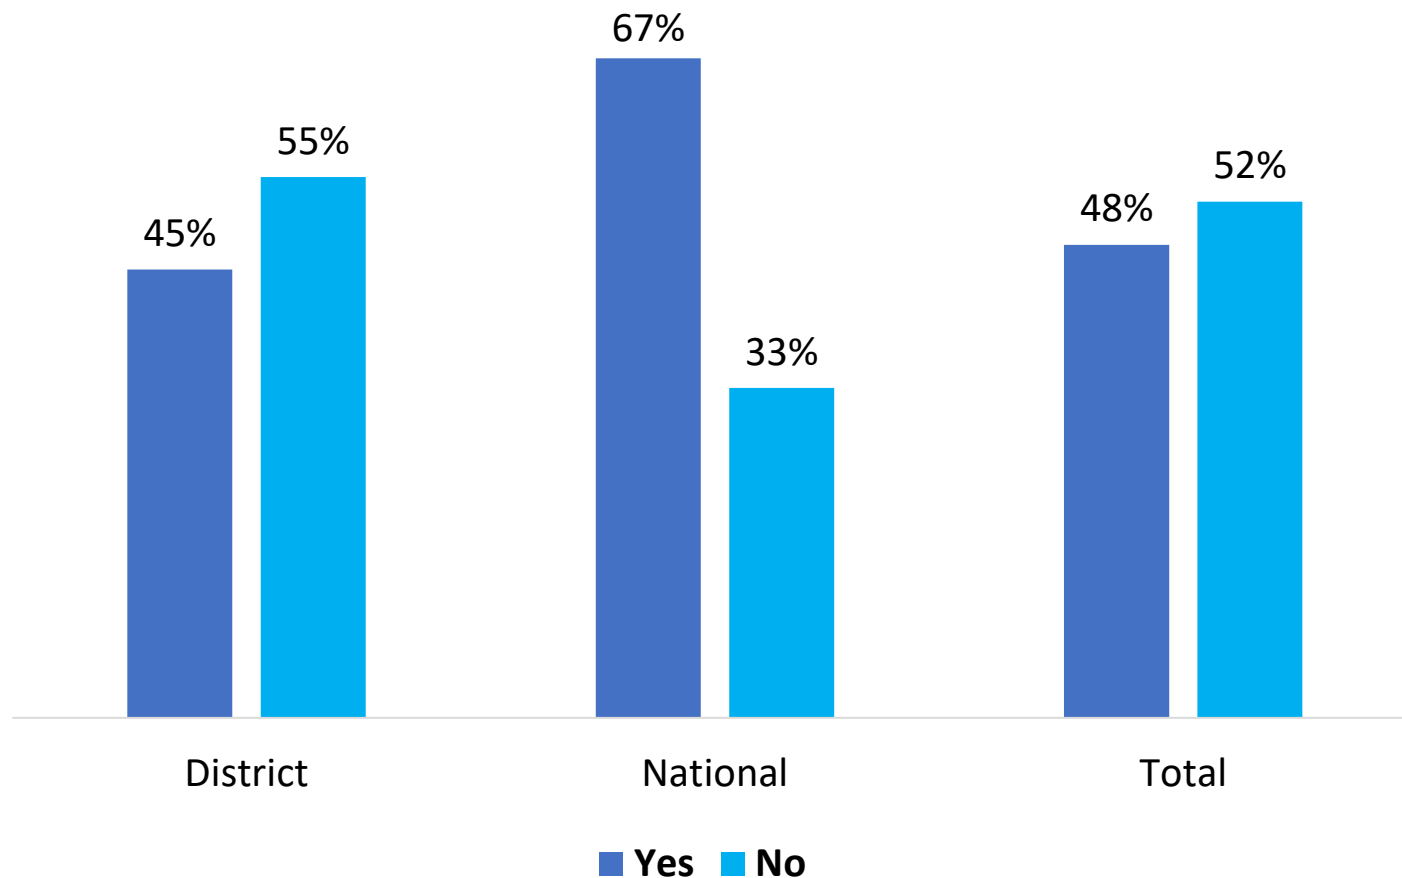

Purpose of HRRP maps use

Respondents' rate on the accuracy of HRRP updates on reconstruction efforts

HRRP research used by respondents or their organization for any purpose

Purpose of HRRP research use

- Presentation for training and workshop and meetings
 - Project design and reports
 - Housing progress status of districts
 - Source of information
 - Understanding situation of working area and partners' activity and concentration
 - Reference to verify the data and minimize the duplication of program activities
 - Share and update key reconstruction issues, challenges and best practices
 - Identify the community status and determine the present need of the community including vulnerable HHs
- Find out the vulnerable community of Okhaldhunga district to implement the program
 - Update the changes based on the research information
 - Check status of cross cutting sectors of reconstruction initiatives
 - Influence participation of women in reconstruction
 - Research, survey and data collection
 - Background information for future planning
 - Used for resettlement planning and re-location of houses in Nuwakot

Purpose of HRRP research use cont...

- Supervision and monitoring
- Non-compliance issues
- Understand status of temporary shelters and planning for the people living in temporary shelters
- Rate and coverage of shelter reconstruction
- New housing typologies
- Comparing debt status of beneficiaries
- Using the available data and maps for the proposals, project development and EOI bidding
- Understand the status of female beneficiaries, women in reconstruction and minimum requirements
- Coordination and collaboration among local level stakeholder for landless issue
- 18 districts situation analysis and reconstruction challenges
- Coordinating different partners/agencies
- Locating NGOs' coverage
- Mason training updates
- Portrait the beneficiary selection and identification

Suggested research topics* for future research works

- Role, contribution and capacity of local government in reconstruction and in response of future disaster management
 - Integration of reconstruction works into municipal disaster preparedness plans
 - How to facilitate local government in reconstruction process
 - Shelter reconstruction in remote areas
 - Research on different housing design and structure
 - Detail retrofitting with analysis data for RC frame structure
 - Status of beneficiaries who want to retrofit their houses
 - Causes of not following minimum requirements of national building code
 - Non-compliance houses not covered by correction and exceptional manual.
 - One room house data, its usage and impact on livelihoods
 - Technical aspects and alternative options of construction materials
 - Disaster preparedness and recovery capacity for future disasters
 - Conservation of Tamang cultural heritages
 - Social and cultural change post reconstruction
 - Traditional model houses reconstruction
 - Role of I/NGOs, media, academics and other stakeholders in recovery and reconstruction
 - Comparative study of areas with or without partner support
- * clustered into different topics based on responses*

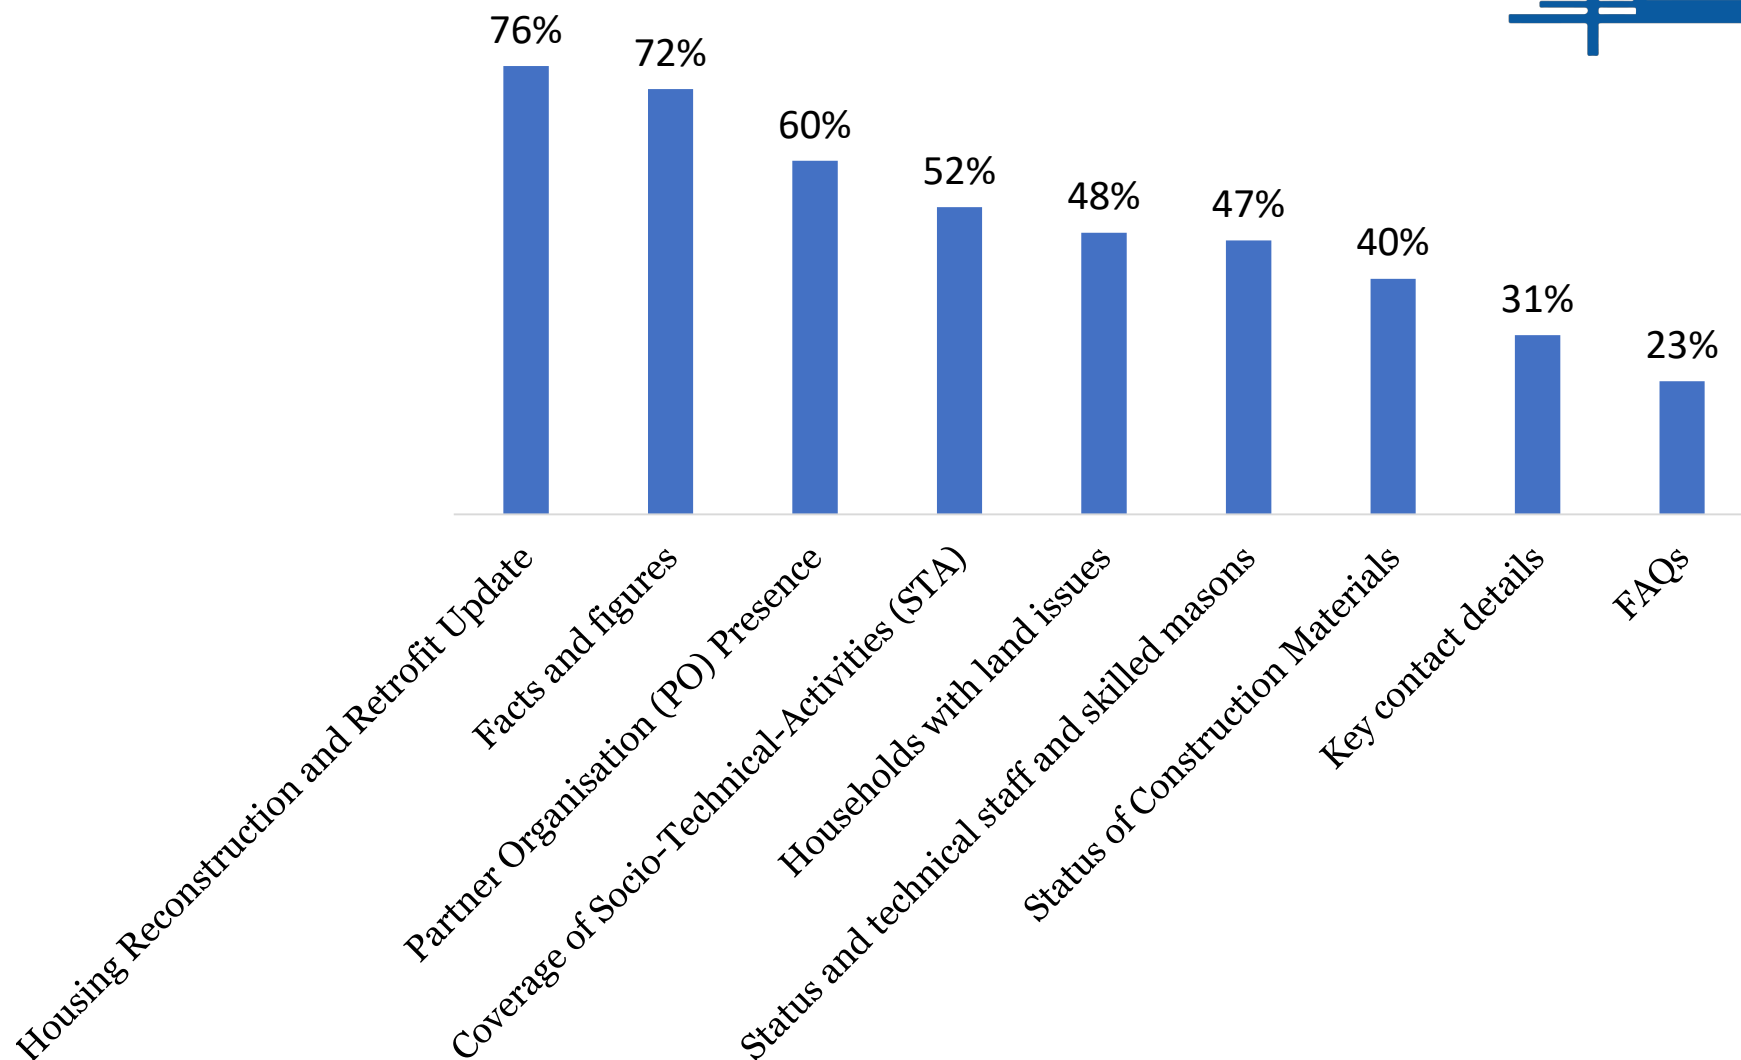

Suggested research topics* for future research works cont.....

- Gender Equality and Social Inclusion in reconstruction
- Status of Vulnerable HHs before and after house reconstruction
- Status of landless, displaced and relocated HHs
- Potentiality and challenges to handover land ownership certificate to landless beneficiaries
- Status of households who are still left behind including who are living in Temporary shelter
- Contribution of Technical staff and social mobilizers in reconstruction
- Issues and challenges faced by field staffs
- Multisectoral recovery and integrated settlement plan
- Reason behind the slow reconstruction
- Achievement and lesson Learnt of build back better
- Effectiveness of loan provision and housing grant
- Research on eco-friendly reconstruction technologies Modern and economic method of house construction
- Effect of STA in reconstruction
- Cost spent in the reconstruction
- About fake beneficiaries
- Community Reconstruction Committee
- Socio-economic and environmental impacts of reconstruction efforts

* clustered into different topics based on responses

Most useful part of Municipal profile according to respondents

Additional information suggested to include in Municipal profiles

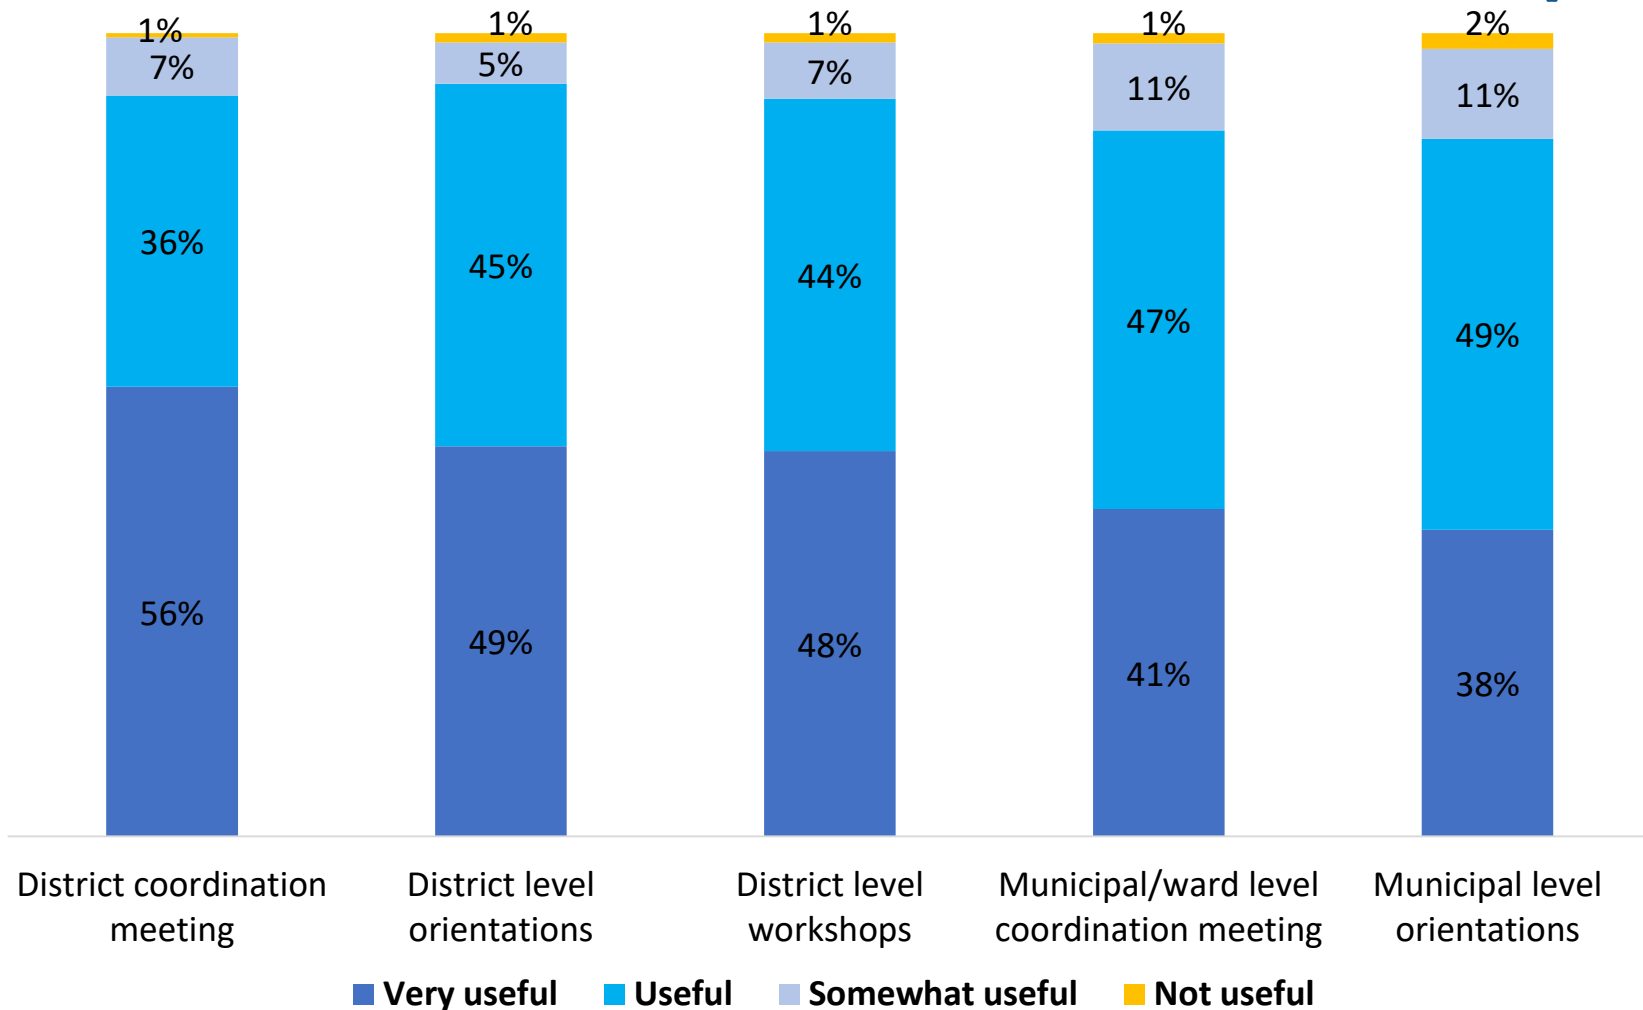

- Include introduction and summary of Palika including socio-economic profile, municipal master plan and municipal resources
- Municipal news and update
- Ranking with respect to others municipal
- Partner presence along with their name and sector
- Information on integrated settlements, relocation, landless HHs, land issues including Right of Way
- Housing typology pictures
- Overall progress including sector wise and cross cutting areas
- Municipal and NRA focal person contact list and district level stakeholders' information
- Information about engineers working there
- Profile of trained mason and their working station
- Status of poor and vulnerable beneficiaries including most vulnerable
- Status of NRA vulnerable who have rebuilt vs those that are in the process; status of grievances

Additional information suggested to include in Municipal profiles cont...

- Issues of house owners and reconstruction problems
 - Hazard maps
 - Update of mason training for retrofitting
 - Information about retrofitting models, techniques and its progress and status
 - Status of 5 W including cross cutting initiatives
 - WASH Situation and WASH points
 - Include the success stories of communities as the result of TA provided by partner NGOs
- HRRP should include other sectors-not only housing
 - Number of beneficiaries returning tranche and receiving bank loan
 - Livelihoods and Wealth ranking status
 - Technical Assistance coverage
 - Monitoring and supervision
 - Non-compliance details

Respondents perception on relevancy and usefulness of HRRP events that they had attended

Adjustments or additions made by respondents' organization because of HRRP district level events

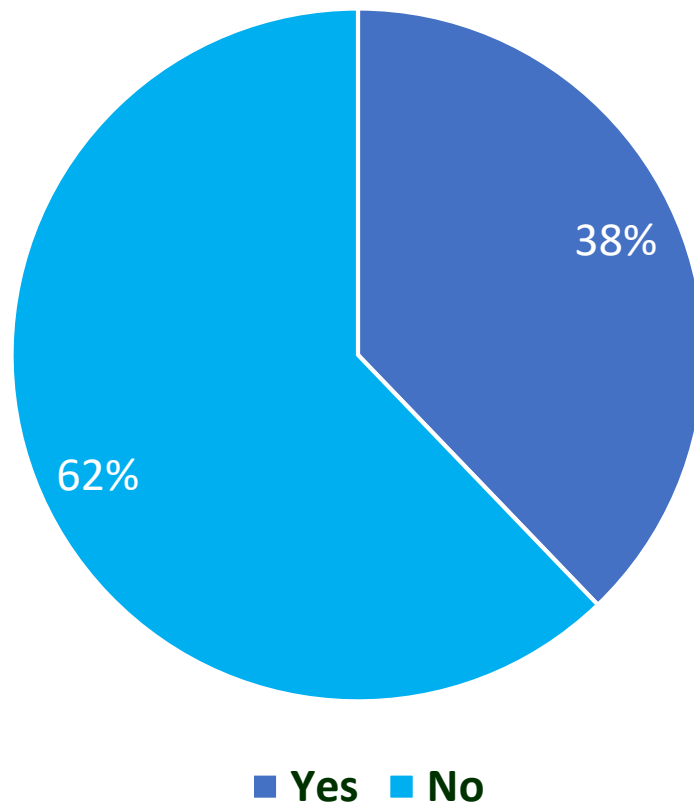

- Improved technical and social support to HHs to construct their house
- Submission of report and information to NRA
- Organized public hearing program
- Started to update 4W format
- Changed the target for retrofitting training and its implementation
- Changed the format to collect information about beneficiaries returning first tranche
- Adjustment in monitoring & evaluation works
- Joint monitoring & coordination meetings with POs
- Partner mobilization and monitoring of partners activities
- Helped NRA engineers to be involved in reconstruction housing projects
- Technical support to vulnerable beneficiaries
- Targeted Vulnerable support projects
- Delivery of technical assistance
- Determine the activities to be implemented
- Discussed non-compliance and technical issues with HRRP team and DSE and resolved them

Adjustments or additions made by respondents' organization because of HRRP district level events cont.

- Integration and internalization of HRRP researched finding
- Organized Mason training and carpentry training
- Mason training at municipal level
- Conducted retrofitting training
- Organized community sensitization event on Earthquake Safety Day
- Planned to provide transportation facility to preserve black village
- POs exit strategy focused coordination meeting were planned
- Conducted exit strategy meeting with government
- Record keeping of 5w summary and presentations info packs
- Selection of working area
- social mobilization.
- Timely updates of reconstruction
- Updated project implementation approach
- Reprioritization of re-settlement planning
- Updated the POs about the land acquisition status and challenges about in-accessibility to land site and other associated concerns

Changes to the activities or programme(s) made by respondents' organization based on information shared or discussed at HRRP municipal/ward level events

Adjustments or additions made by respondents' organization because of HRRP municipal/ward level events

- Delivery of technical assistance
- Prepared list of beneficiaries who have taken first tranche but didn't build the house
- Construction of vulnerable beneficiaries' houses
- Constructed a few houses with new technology discussed in an orientation
- Changes in monitoring part-NRA engineers to be involved in reconstruction projects
- Awareness message dissemination
- Working modality
- Conducted project reflections meeting and exit strategy meetings
- Conducted ward level/municipal coordination meetings
- Increase coordination with Municipal Level stakeholder
- Orientations, trainings and meetings for/with staff and beneficiaries
- Management of reporting systems
- Adjustment on working approach Socio technical assistance

Adjustments or additions made by respondents' organization because of HRRP municipal/ward level events cont..

- Selected working area
- Discussion of technical issues at ward level
- Adjustment of working area and human resources (Engineers) in their working ward
- Extended the livelihood program in gap wards
- Partner mobilization
- Field monitoring
- Provision of revolving fund
- Finds out of gaps and duplication in partners as well as GoN works
- Houses conditions for 3rd tranche??
- Keeping records of the HHs level issues of working wards
- Advocating the specific issues of municipalities at national NRA
- Landless updates
- Mason training at ward level
- Mass Meetings

Respondents' suggested focus for HRRP at municipal level

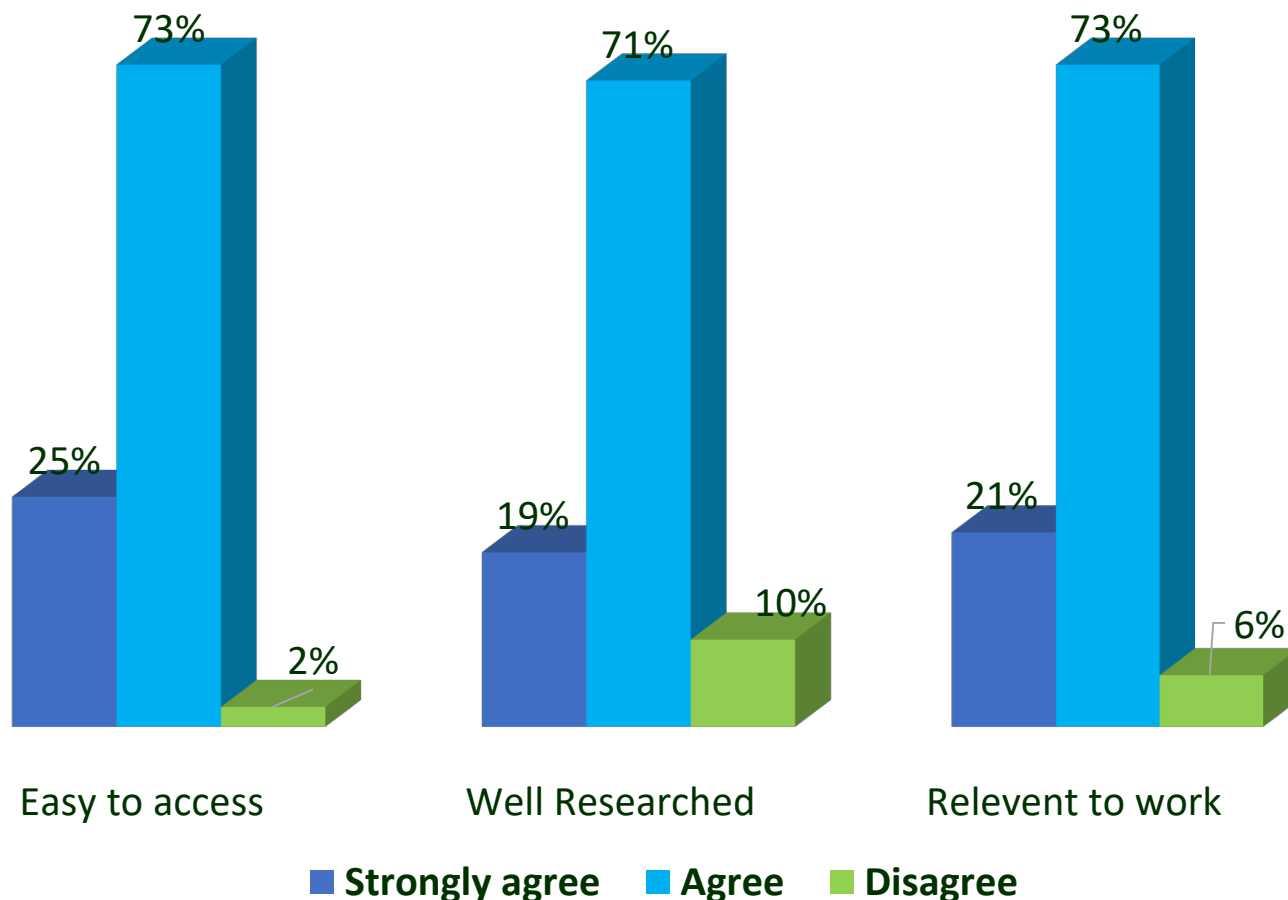

- Build capacity of local government officials and staff on reconstruction process, disaster response capacity and database management
- Clear delivery of the new reconstruction policies and directives
- Close coordination with municipal & ward officials and partners
- Support to develop Integrated Municipal Development Plan
- Conduct municipal level meeting with all NGOs, INGOs and municipal officials at once in three months
- Bridging the local government with I/NGO
- Strengthening coordination mechanism and data information sharing mechanism
- Develop the apps reporting system
- Work with beneficiaries who wants to do retrofitting
- Encourage people to return 1st tranche (if they are not building house)
- Planning and participatory discussion
- Support local government to track reconstruction information
- Find reasons why people have not started constructing their houses
- Support partner organizations for better implementation
- Frequent monitoring
- Technical training and orientation
- Retrofitting training
- Collection of best practices

Respondents' suggested focus for HRRP at municipal level cont...

- Establish Help Desk at municipal level to collect and share the information
- Reach to ward level and work with them (ward officials) who are real change makers
- TOT for field engineer, sub engineer and assistance sub engineer and training for masons
- Housing construction practice
- Working directly with community
- Study on socio-technical, socio-economic impacts & usefulness of socio-technical assistance
- About Final Inspections and completions certificate
- Build houses for marginalized, poor and vulnerable people
- Non-compliance issues
- Share guidelines/documents about light structure
- Reverification of beneficiaries
- Status of WASH points
- Use local media to share profile information
- Inspection
- Work for vulnerable groups to increase their access on public infrastructure, reconstruction information and financial institutions
- Make the local authority more accountable in reconstruction
- Increase municipal coordination by increasing number of staff- should have social mobilizers

HRRP technical information and guidance is easy to access, well researched and relevant to the work

Respondents' suggestion for additional GoN technical guidance documents that they feel are required to support the reconstruction

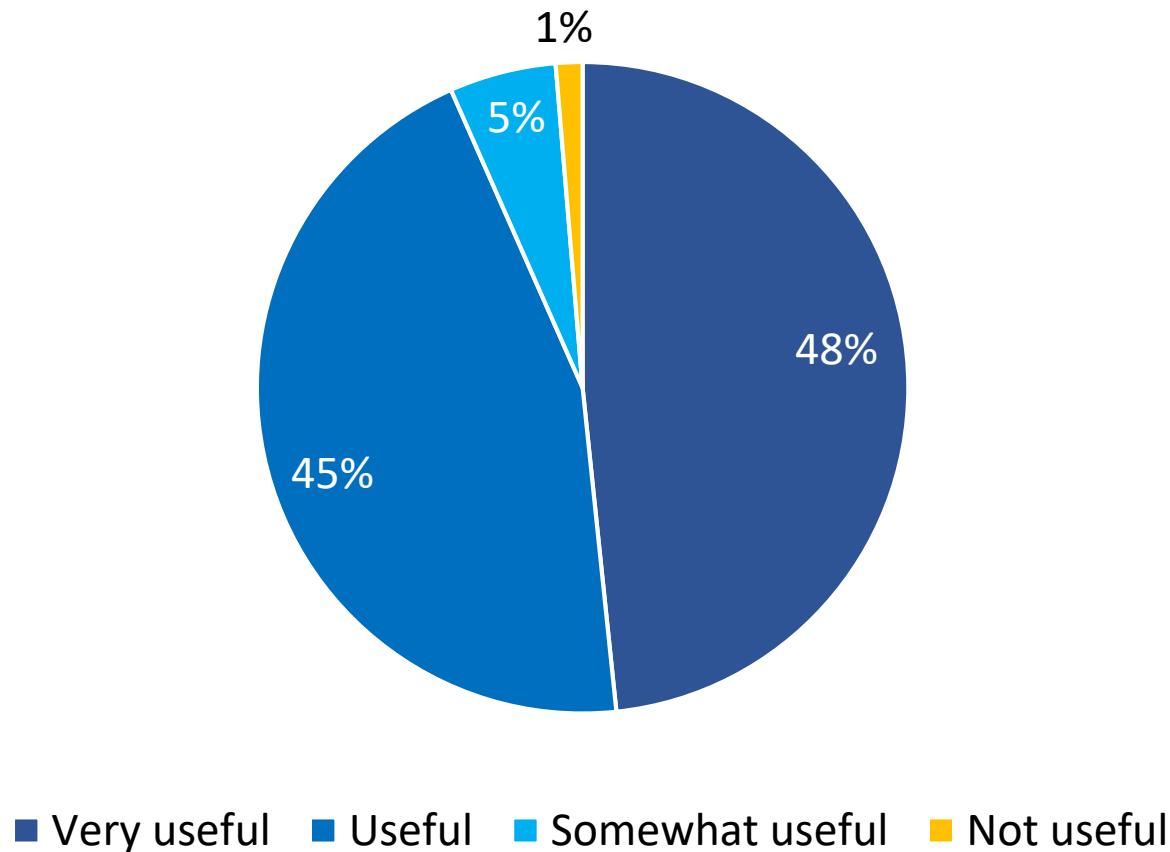

- Repair and Retrofitting Manual/guideline *
- Retrofitting Guidelines should be more relevant to disseminate at local level
- Hollow concrete block manual *
- Repair grant management guidelines
- Correction manual*
- Practical examples of typical non-compliances and corrections adopted
- Status of socio-economic & socio-environmental documents
- Guideline for landless beneficiaries' housing reconstruction **
- Update/share latest NRA meeting minutes
- Guidelines for integrating recovery and rehabilitation into periodic plans
- Build back better guidelines for shelter **
- Publication Housing typology of different location *
- Low cost housing manuals
- Translation of documents **
- Case study about who have not received tranches
- Hyperlink to NRA website to access updated information on reconstruction status

* *already produced documents*

** *addressed by existing documents/practice*

Respondents' perception on relevancy and usefulness of HRRP technical sessions that they had attended

Adjustment and addition made by respondents' organization because of National HRRP technical session

- Corrections on non-compliance buildings
- Made suitable planning for vulnerable house reconstruction
- Organized an additional TOT in Okhaldhunga for technical personnel from Solukhumbu, Okhaldhunga and Khotang
- Supervision of houses under construction
- Utilization of gained knowledge in working field
- Coordination in reconstruction updates
- Shared update to engineers about guidelines and technical knowledge
- Develop the reporting systems in mobile apps
- Engineers were found to have updated and freshen up with knowledge, skills, knowhow but should have follow up on use of knowledge
- Monitoring & Evaluation

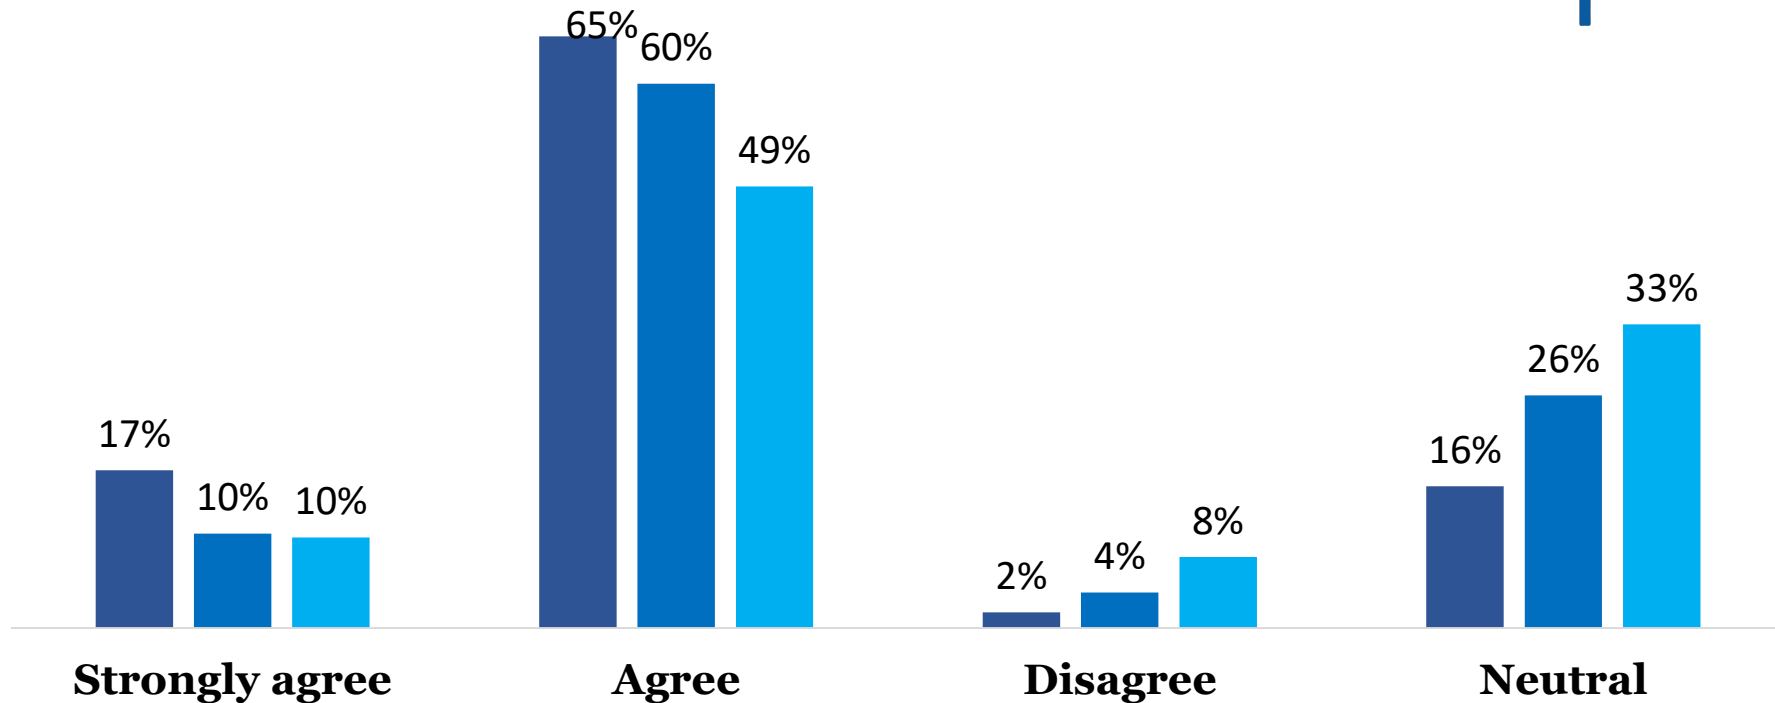

Please list any topics that you would like to propose for future technical sessions:

- Retrofitting *
- Session on all frameworks, documents, publications relevant to reconstruction *
- Reasons for not constructing individual houses and possible province level intervention
- Integrated settlement and hazard maps
- Dry stone housing
- Ecofriendly construction
- Build back better
- Masons should be trained on how to keep lintel band, sill band, vertical & horizontal reinforcement
- How do we make GESI work for the vulnerable groups?
- Retrofitting training for masons
- Monthly session on reconstruction technical and field problems with practical session/discussion
- Coordinate for relocated settlement site for better planning and better utilizing the Site Development Funds from Government
- Certification criteria for constructed houses
- Training on Retrofitting Inspection Guidelines
- Joint Monitoring
- Mechanical aspects of reconstruction
- Field level awareness programs for HHs
- WASH schemes support

** already conducted session on that topic*

Respondents' agreement on the following statements:

- HRRP has contributed to reducing gaps and preventing duplication in reconstruction efforts
- HRRP has supported strengthening of emergency preparedness and response
- HRRP has promoted and mainstreamed Gender Equality and Social Inclusion (GESI) in reconstruction work

Respondents' suggestion for HRRP to mainstream Gender Equality and Social Inclusion (GESI) in reconstruction work

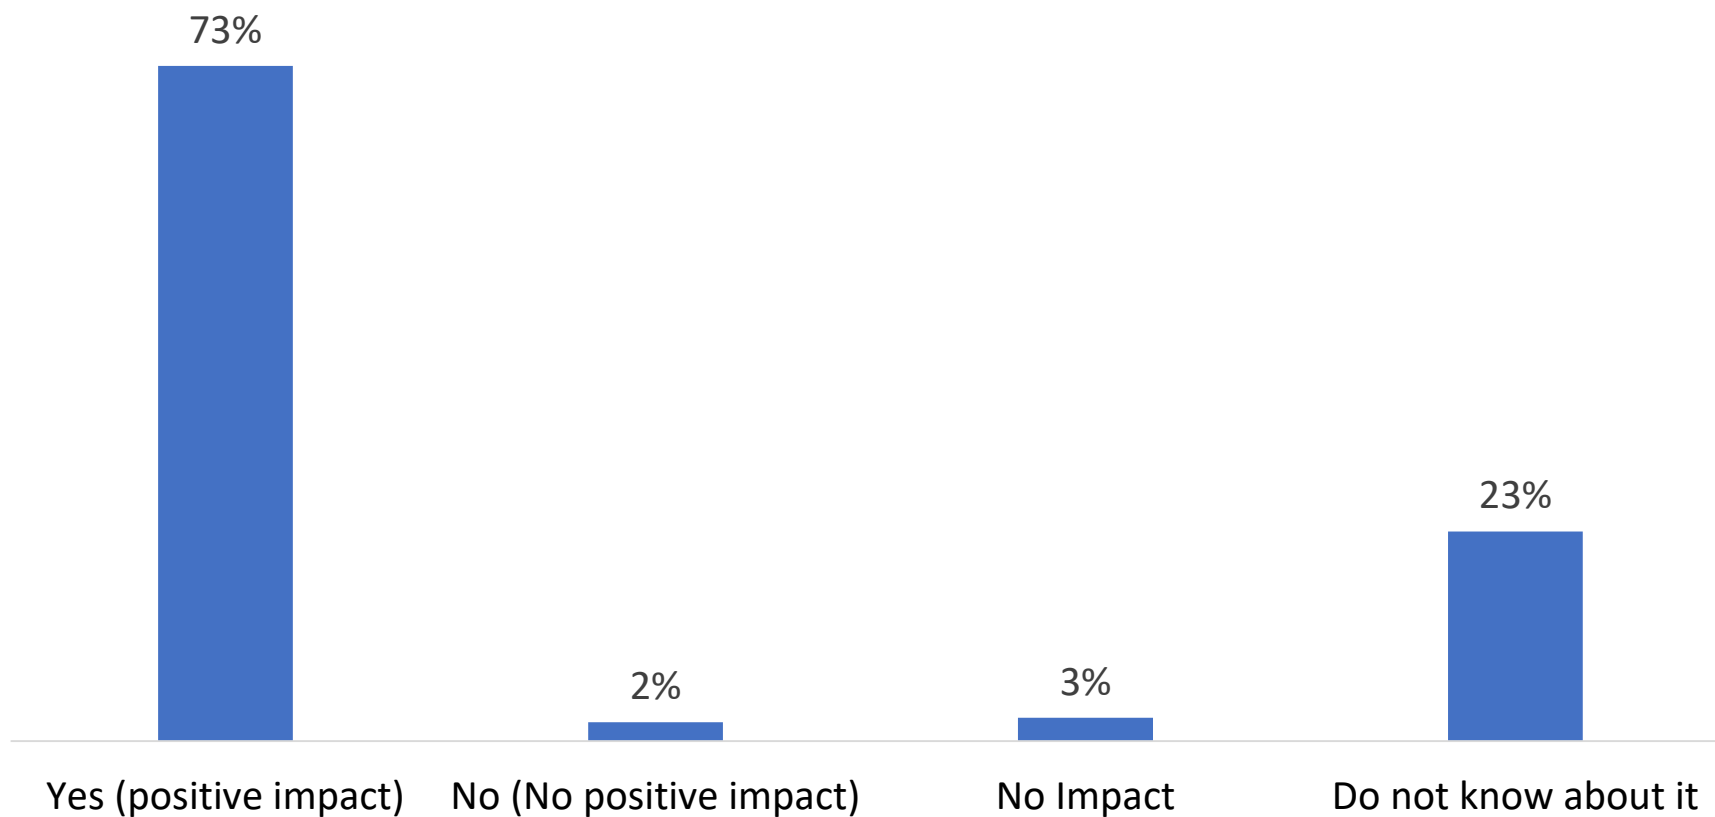

- Involve more women in field monitoring, communication and meetings to increase their engagement in reconstruction
- Trainings for women members and women beneficiaries
- Work with local elected bodies level with a position to provide more technical inputs rather than remain at surface level
- Check the comparative status of gender
- Conduct programs to make the unheard raise their voice
- Female technical staff working in municipalities should be consulted about their contribution in reconstruction
- More focus on GESI components and bring experts
- Focus on woman and disability in reconstruction
- Gender equity should be balanced in each activity
- Involve female engineer of Kathmandu valley in HRRP activities
- GESI issues should be covered by HRRP bulletin and dashboards
- Advocate to hire more female engineers
- GESI should be included for planning, monitoring and evaluation process
- GESI works should be improved in district level
- Community level programme
- Look into mason

Respondents' suggestion for HRRP to mainstream GESI in reconstruction work cont...

- Get the GESI concerned Interest groups on board as meaningful participants in processes and decisions affecting their lives
- Promote female and marginalized mason and labor
- Promote gender friendly house and schools
- Should align with three layers of government
- Single male should be included
- Research on socio-economic, socio-environmental impacts of reconstruction including GESI components
- HRRP should collect data of female headed and single women households those who really need support and assistance in shelter reconstruction
- support & encourage female engineers to showcase their works in its publications and activities
- Socio-economic empowerment related program for the people who are left behind
- Involve in more strategic and holistic ways of coordination
- Implement program for women and People with Disability (PWD)
- HRRP doesn't focus on GESI in designing phase because the private houses are not gender, PWD old age and child friendly structure.
- I do not see any such relevancy of GESI's work. HRRP's work is only limited to coordination, so through coordination works, nothing concrete in GESI is achieved.

Respondents' perception about joint monitoring visits conducted by HRRP and Building CLPIU

Respondents' explanation about positive or negative impact of joint monitoring visits:

- Improved coordination
- Field issues of engineers has been identified
- Increased presence and coverage of the DLPIU technical staffs at field
- Beneficiaries received information about deadlines and minimum requirements
- Feedback for improvement
- Beneficiaries received technical input and applied them accordingly and motivated to construction earthquake resilience house
- Government stakeholders are aware about the field scenario e.g. one room house, housing typologies
- Supervised field staff work, and staffs are encouraged to give their best
- Has helped to reduce the gap and duplication
- Engineers could directly share their concern related to their salary and benefits
- Non-compliance issues are being solved
- Presence of DLPIU field engineer in field as the result reconstruction work quality was improved
- Speeding up reconstruction work
- Regular visit and meeting at municipal and ward level to discuss on progress and issues
- Many issues sorted out immediately through discussion among visit team
- Increased access on information about NRA guidelines
- Integration of findings in various sectors
- **Cannot say anything as this has not been shared.**

Thank you
