NEPAL

- The overall objective of the REAP project is to “improve living conditions of earthquake affected people in selected Village Development Committees and municipalities in Sindhupalchok district through reconstruction of risk resilient infrastructures” .

This will be achieved through the reconstruction of 1000 earthquake resilient permanent houses and sanitation facilities including toilets;

Shelter Construction

1.1. Objectives:

To construct earthquake resilient shelter considering “Build Back Better” principles.

To train local craftspeople and beneficiaries on earthquake resilient construction techniques.

1.2. Approach:

Owner driven construction:
Beneficiaries will be a part of a greater construction and training team with locally available material (stone and wood).

1.3 House Models:

Five different models according to Family size.

- ✓ 1A,2A :- Up to 3 persons
- ✓ 1B,2B : Up to 7 persons
- ✓ 4R : Above 8 persons

- 448 beneficiaries had been paid first installment according to NRA Guide Line.
- Till Date 76 houses had been constructed.
- 61 houses are on going.

ISSUES & CHALLENGES
