

Meeting Notes

Technical Working Group Meeting for Technical Training

Date: 25 May 2016, Tuesday

Time: 3 - 5 pm

Location: HRRP Office, Jwagal

Focal Point: Arjun Koirala

Participant Organizations:

NRA, Build Change, Handicap International, NRCS/ British Red Cross, Red R, HRRP

Agenda

1. Update regarding TWG activities
2. Update from NRA on Training related activities
3. Possible areas and approaches to support NRA regarding the training activities for housing reconstruction
4. Potential ways to have a better linkage between the NRA Training Section and the HRRP Training TWG.
5. AOB

Discussion and decision

1. Update regarding TWG activities

- Mr. Arjun Koirala, Technical Training Specialist at HRRP, provided updates regarding the TWG activities to NRA
 - o Compilation of the recommendations by the TWG members is in progress, the document would be shared among the members for review by June 3, 2016. The recommendations would ultimately be handed to NRA as a supporting document for the preparation of NRA Training Framework
 - o Draft formats for the following documents, for review, have already been shared on the Google drive for HRRP Training TWG:
 - Participants' Selection Criteria
 - Pre and post training skill test (Content)
 - Training Evaluation Form
 - Roster of Trained Mason
 - Training Reporting Format
- As discussed during the previous meetings, HRRP has cordially invited the officials from NRA, Mr. Ram Datta Pandey, Under Secretary, NRA Training Section and Mr. Vivek Rawal, Training Advisor at NRA to discuss more on the possible areas and approaches to support NRA regarding Training activities

2. Update from NRA on Training related activities

Update by Mr. Ram Datta Pandey, Under Secretary, NRA Training Section

- NRA has prepared a roster of Training Providing agencies, includes 40 agencies
- NRA Training Management Guideline is in the approval process
 - o The overall content of the guideline has been kept broad and open to maintain flexibility to regulate and manage training related activities

- A Curriculum approval committee has been proposed, which would be chaired by the NRA Executive Committee member
- Partner Agencies can conduct trainings as per the approval of NRA or related Government Agencies

3. Possible areas and approaches to support NRA regarding the training activities for housing reconstruction

4. Potential ways to have a better linkage between the NRA Training Section and the HRRP Training TWG
[Agenda 3 & 4 combined]

- More input is expected from POs regarding approach for different Technical Training activities that are not covered in DUDBC modules, these may include but not be limited to:
 - Training on repair and retrofitting
 - Training on usage of alternative building materials and construction technologies
 - Training for material production as per the National Building Code guideline – need for development of such modules
 - Short Trainings for skill enhancement of craftsmen in context of Earthquake resistant construction
- DUDBC/ CTEVT curriculum does not include information about the potential cost for construction/ repair of an average house, which is very essential in context of post disaster housing construction, Training TWG could provide critical recommendation in this regard
- HRRP TWG should play an integral role to help monitor and assess on going trainings
 - Provide quick assessment report to strengthen training programs and aspects
- Orientation to owners regarding Owner Driven Reconstruction should be focused more
- Training activities should follow the fund disbursement process
- Standardization process for trainings should also consider the technological innovations
- Develop calendar for training to track the training activities by different POs
- While rate of housing construction would be down during monsoon period, the time could be taken up and utilized for training activities

Comments:

- Regarding the 7 days Skill enhancement training of Earthquake resistant building construction for mason
 - There is a need to classify Training types according to mandatory and complimentary requirements
 - In order to utilize the available resources and time, even within the 7 days training, 5 days could be for mandatory training requirements while the rest 2 days could be for complimentary activities (eg. RC frame construction mainly targeted for urban areas)
 - The curriculum includes block making as well which specifies a clear need for distinction between mason and material producer– mason should not be involved in production
 - The past experiences of Kashmir was referred to highlight that the 5 days training would have been sufficient, considering the need to expedite the housing reconstruction activities, the extra 2 days could have been utilized to expedite the housing construction process
 - Feedback from POs currently using the training material would be an asset to suggest improvement in the curriculum

5. AOB
Action Points

HRRP Training TWG:

- o Share the compiled recommendations from POs within the 3 sub-thematic areas of Training activities: Training curriculum review, Training Needs assessment & delivery strategy, Quality Assurance- to be submitted to NRA Training Section to support the development of NRA Training Framework
- o Share VDC wise & Training Type wise mapping of Training related activities by POs (Planned and Target)
- o Share information regarding Training curriculum developed by Government agencies and Partner Organizations
- o Identify resource agencies who can take lead in training for alternative technology

NRA:

- o Facilitate the amendment process of any training curriculum from POs that needs to be amended

Next Meeting and Agenda

- Date and agenda to be shared later

Meeting Participants List/Attendance Sheet

Organization	Name	Designation	Contact No.	Email
NRA	Ram Datta Pandey	Under Secretary	9841554121	Pandey_111@yahoo.com
