The 7th session of GPDRR 2022 has been concluded from 23-28 May 2022 in Bali, Indonesia. **A Bali Agenda of "Think Resilience"** approach to all investments and decision making, integrating disaster risk reduction with the whole of government and the whole of society has been recommended, which will be carried through to COP27, the G20 and the Midterm Review of the Sendai Framework".

KEY HIGHLIGHTS

- i) Government of Nepal announces budget of FY 2022/023; plans to install early warning system to forecast multi-hazard disasters**
- ii) Government of Nepal presents Policy and Programs of FY 2022/023; decides to construct evacuation parks in big cities of all 7 provinces to ensure effective disaster management**
- iii) MoUD Minister Jhakri emphasized on building resilient and sustainable cities through remarks in High Level Meeting on New Urban Agenda**
- iv) Nepal's presence in GPDRR 2022; Nepal adopts green, resilience and inclusive development approaches as strategic vision in disaster management**
- v) A meeting conducted to formulate Monsoon Preparedness and Response Plan 2079 (2022)**
- vi) Government-MoUD is revising a Urban Policy 2007 to suit country's long term needs of urbanization formulating a long term urban policy**
- vii) Nepal to receive above normal rainfall this monsoon season, calls for better preparedness**
- viii) Orientation on tranche disbursement inspection form and RMIS of housing reconstruction for monsoon and fire-induced disaster kicked off**

NATIONAL UPDATES

Budget speech by Government for FY 2022/023; plans to install early warning system to forecast multi-hazard disasters

GoN-Minister of Finance, Mr. Janardan Sharma presented the annual budget plan for the next fiscal year 2022/023 (FY 2079/080 BS) dated 29 May. The budget plan has a total size of Rs 1.793 trillion and has covered many important and fundamental work streams such as health, education, agriculture, infrastructures, urban, employment, livelihoods, social security etc. In the urban development sector, the budget mentioned constructing four evacuation parks in Kathmandu valley for effective disaster response and management along with, taking forward house pooling programs to manage old settlements in Kathmandu. Similarly, the budget speech mentions Rs 9.44 billion set aside for remaining post-earthquake reconstruction. GoN has set aside Rs 1.61 billion for the National Disaster

Risk Reduction and Management Authority (NDRRMA) in targeted programs such as multi-hazard disaster forecasting and installing early-warning systems in all feasible locations. All mechanisms/agencies will be kept alert and be operationalized for disaster preparedness, search, rescue, relief and rehabilitation. The plans mentioned in the budget speech also addresses the volunteer's mobilization to effectively channelize human resources capacity in disaster preparedness, search, rescue, relief and recovery works.

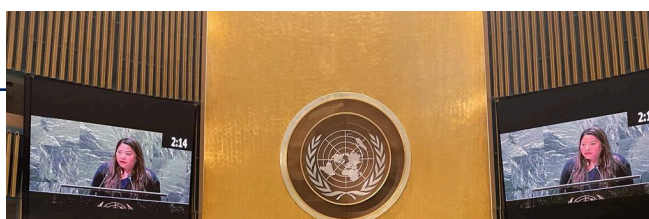

Government of Nepal present Policy and Programs of FY 2022/023; decides to construct Evacuation Parks in big cities of all 7 provinces to ensure effective disaster management

On May 24, 2022, Right Honorable President, Mrs. Bidhya Devi Bhandari presented the Government of Nepal's upcoming FY 2079/080 (2022/023) Policy and Program paper in the presence of the joint session of both houses of the federal parliament. The Government of Nepal has presented notable highlights of plans and programs in various development work streams such as health, education, disaster management, water, agriculture, export, industries etc. Of notable highlights to address effective disaster management, the policy and plan presented by President Bhandari has decided to construct Evacuation Parks in four locations of Kathmandu Valley as well as in big cities of entire Provinces to ensure effective DRRM, the government's plans have mentioned mobilizing volunteers in all three tiers of government in order to safeguard disaster affected citizens through programs of response, relief, emergency settlement and medical treatments. Similarly, the policy and programs are also mentioned to revitalize and strengthen the several mechanisms of disaster preparedness, pre-information sharing via early warning systems, response, reconstruction and rehabilitation in order to safeguard the citizens from natural hazards as well as the disasters likely from manmade action and from geological hazards. Government has plans to implement a Disaster Risk Reduction Financial Strategy to address impacts of disaster management in the country. The policy and programs have also been mentioned to include conduction of relevant capacity building training in disaster management in integrated ways. MoUD Minister Jhakri emphasized on building resilient and sustainable cities through remarks in High Level Meeting on New Urban Agenda

GoN- Minister for Urban Development, Ms. Ram Kumari Jhakri has expressed Nepal's commitment to working with the international community for the effective implementation of the New Urban Agenda by building resilient and sustainable cities as enablers for achieving Sustainable Development Goals as well as climate goals.

The one-day High-Level Meeting, organized by the President of the UN General Assembly, featured several ministers and other high-level speakers dated 28 April 2022. Addressing the High-level Meeting on New York,

Minister Jhakri underlined that well-planned urbanization guided by the spirit of sustainability and equitability brings decent jobs, economic growth and investment opportunities in cities.

Minister Jhakri underscored that, in line with the New Urban Agenda, Nepal has implemented national strategies and guidelines setting out national standards for urbanization, enacted Rights to Housing Act 2018 and constructed over 3,000 houses and handed them over to the families living in unsafe conditions under the 'Safe Citizenship Housing Program'. As Nepal is located in an earthquake-prone area and hit by high-magnitude earthquakes in the past, she further emphasized reinforcing the old urban areas by retrofitting the existing buildings to endure future shocks. Similarly, the Minister called on the development partners, including the UN system, to ensure a scaled-up financial and technical cooperation to bridge the financial gap for the implementation of the New Urban Agenda regarding making of resilient, inclusive and sustainable cities in Nepal.

Nepal's presence in GPDRR 2022; Nepal adopts green, resilience and inclusive development approaches as strategic vision in disaster management

Chief Executive of NDRRMA, Mr. Anil Pokhrel as a speaker, through his participation in Global Platform of Disaster Risk Reduction 2022 (GPDRR) has shared that Government of Nepal has adopted

strategic vision of green, resilience and inclusive development approaches in disaster management, in a plenary session named Social, Infrastructural, and Economic Recovery from Disasters: An Opportunity to Reset the Development Pathway Towards a Greener and More Resilient Future. The seventh session of GPDRR 2022 has been scheduled from 23-28 May 2022 in Bali, Indonesia. Noted representatives from Nepal have marked presence in GPDRR 2022 including from MoHA-GoN, NDRRMA and POs working in the disaster management programming sector.

Mr. Pokhrel further elaborated that adoption of green, resilience and inclusive approach in Nepal's earthquake reconstruction would remain as exemplary initiatives among the international communities, the validity of which were proven through several researches and through the on-the-spot model houses construction. Mr. Pokhrel added that Nepal is

ready to forward these green initiatives through international cooperation and collaboration. The sharing from Nepal in the panel session has mentioned several initiatives such as risk informed communications and about building code, disaster financing, social security, involvement of three tiers of government, innovative approaches and overall build back approaches throughout in inclusive nature. Click to news sources: [Nepal adopts green, resilience and inclusive strategic visions-DRRM GPDRR2022](#)

A meeting conducted to formulate Monsoon Preparedness and Response Plan 2022

A meeting was coordinated by NDRRMA on 18 May 2022 in cooperation with lead agency (GoN-Ministries and Departments) and co-lead agencies (POs involved in DRRM and Emergency Humanitarian programmings) to formulate Monsoon Preparedness and Response Plan 2079 BS. Spokesperson and Undersecretary of NDRRMA, Dr. Dijan Bhattarai shared key highlights about the outlook on Impact of Monsoon 2021, caseloads, learnings, best practices of Monsoon response coordination, issues, challenges and way forward. Disaster Management Expert-UNDP, Mr. Tibendra Raj Banskota shared the detailed template of Monsoon Preparedness and Response Plan 2079, that includes listing of planned activities, budget allocation, timeline and contact person.

Joint Secretary of MoHA, Mr. Pradip Koirala addressed the lead and co-lead agencies that upon reviewing the Monsoon response activities in 2078 B.S., this years' preparedness plan should include exact and proper information so that duplications in response and relief activities can be eradicated in timely manner.

Chief Executive of NDRRMA Mr. Anil Pokhrel requested the entire lead and co-agencies for as fast as possible submission of preparedness and response plan. Participants raised the concerns of quarterly update of the contact numbers of involved personnels from lead agencies mainly as staff transfer is common. Participants also provided feedbacks that the response plan should be doable, easy to adopt local level stakeholders, should have one-door channel and more importantly to make sure that the vulnerable group (including people with disability, children, pregnant women and senior citizens) are more vulnerable to disaster and their needs are prioritized in monsoon preparedness plan.

Mr. Pokhrel further shared that, NDRRMA will notify remaining districts to conduct preparedness simulation exercises for which the budget will be released to them. On top of this, NDRRMA has largely emphasized to actively involve local governments in disaster risk

reduction and management, therefore, to make them responsible, NDRRMA has been coordinating to formulate a local level monsoon preparedness plan. Click to news source: [NDRRMA collecting monsoon preparedness and response plan](#)

Government-MoUD is revising a urban policy 2007 to suit country's long term needs of urbanization formulating a long term urban policy

GoN-Minister of Urban Development, Ms. Ram Kumari Jhakri has said that the urban policy of 2064 BS (2007) will be revised to suit the country's long-term needs, as per spirit of federalism and policy will meet the needs of all including after the revision. Addressing a program on National Urban Policy and Priorities for Green, Resilient and Inclusive Development organized by the MoUD in Kathmandu on 20 May, Minister Jhakri said that the revised draft of the urban policy has reached the final stage.

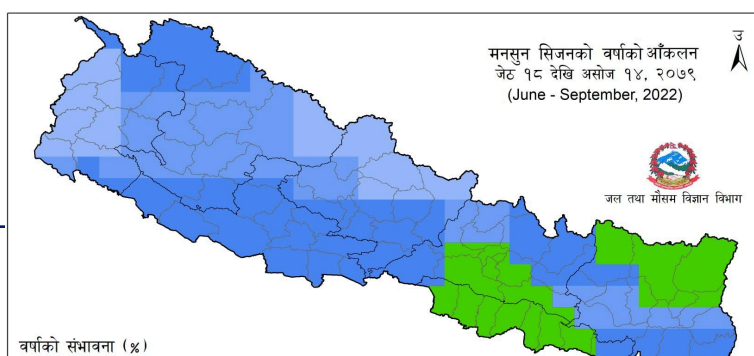

Secretary of MoUD, Dr. Ramesh Singh said that migration has become a challenge for increasing urbanization, so therefore, the issues of good governance and security would be given prominence in the revised urban policy. Mr. Singh stressed on the need to distribute the rights at the local level in order to implement federalism.

Member of National Planning Commission, Dr Pushpa Raman Wagle said that the issue of clean, tidy and identity-based cities should be included in the revised policy, for which the cooperation and sound coordination between three tiers of government and concerned ministers is essential for urban development.

Nepal to receive above normal rainfall this monsoon season, calls for better preparedness

The upcoming monsoon season will most likely bring above normal rain in most parts of the country as per forecasted by the Department of Hydrology and Meteorology. The department released a long-range forecast on 6th May 2022 which put together its observations made on the basis of the study

from World Meteorological Organization, the department's own technology and study from South Asian Climate Outlook Forum. DHM predicted that this year, it is estimated that some 1.7 million people will be directly affected by monsoon induced hazards. According to the most recent prediction, there is a 35-45 % probability that northern parts of Province 1, most parts of Madhesh Province and southern part of Bagmati Province will receive normal rainfall during this season. Meanwhile, remaining areas have 35-65 % probability to witness above-normal rainfall. The maximum temperature in northern parts of the country and in most of Madhesh Province is predicted to be normal by 35-55 %, while it will likely be lower than normal in the rest of the country.

Orientation on tranche disbursement inspection form and RMIS of housing reconstruction for monsoon and fire-induced disaster kicked off

Technical team of NDRRMA in coordination with NHRP has started organizing virtual orientation on inspection forms of housing reconstruction of beneficiaries affected by monsoon/fire-induced disasters.

The orientation has also instilled know-how on using RMIS system for tracking information updates of housing reconstruction. Till May end 2022, orientation has been provided to Municipal level and district level technical personnel and focal persons of Bajura, Bajhang, Myagdi, Gulmi, Rukum-West and Sindhupalchowk districts. Orientation to other affected Municipal and districts will be conducted regularly on the need basis. Contact: Mr. Bhim Raj Basnet, Section Officer- NDRRMA 9851149648, rajand1974@gmail.com for any monsoon and fire related private housing grant disbursement from NDRRMA.

PARTNERS' UPDATES

Orientation for implementing partner on DRM Localization Manual

IOM Nepal with support from USAID has conducted orientation to implementing partners - Lutheran World Federation - LWF Nepal, National Society for Earthquake Technology - Nepal (NSET) and Practical Action Nepal- on Disaster Risk

Management Localization Manual dated 9-10 May 2022. The implementing partners will be conducting DRRM capacity building training on the same in all 753 local levels once the newly elected local heads get proper placement, in coordination with the Ministry of Federal Affairs and General Administration (MoFAGA).

VisRisk launched at GPDRR 2022 by Youth Innovation Lab

Using the interactive arena like GPDRR 2022 at Bali, Indonesia, Youth Innovation Lab (YI-Lab) has launched VisRisk, which is an interactive risk communication tool for effective disaster risk reduction and management through data-informed decision-making. Chief Executive of NDRRMA, Mr. Anil Pokhrel has launched the VisRisk platform at the GPDRR being held in Bali, Indonesia on May 25, 2022. Many dignitaries at GPDRR Innovation Platform have visited YI-Lab's booth and showed interest in the VisRisk tool.

VisRisk translates the complex and scientific disaster related datasets (hazard, exposure, vulnerability) into simple visual format (charts and infographics) to help decision makers understand risk information and act based on it. VisRisk has been developed for eleven municipalities of Nepal and can be used by any development agencies in Nepal for risk communication, DRRM planning and informed decision making. The tool can be helpful to reduce the impact of disaster and equally can complement the risk informed local planning, risk sensitive land use plans/ and in multi hazard risk planning. For more info, please contact Mr. Pradip Khatiwada, Executive Director, YI-Lab, pradip@youthinnovationlab.org

Scaled up capacities of local communities to prepare for flood as monsoon approaches

Kutiyakabar community, located in Dodhara Chadani Municipality from Province 7, is prone to flood induced disasters. Poor preparedness to this hazard and consequent loss pushes the community further towards poverty. Mercy Corps through

Zurich Flood Resilience Alliance (ZFRA) is conducting Flood Resilience Measurement for Communities (FRMC) study in this community. Practical Action has supported Mercy Corps and together with local civil society organization- National Environment and Equity Development (NEEDS Nepal) to complete a baseline survey using the FRMC tool in this community. In total, 44 household surveys, 19 key informant interviews and 4 FGDs were conducted in this community.

In the Kutiyakabar community, the results of the FRMC exercise were graded by the community people. NEEDS Nepal and Mercy Corps discussed with the community members and identified various interventions that would help build community resilience as per the FRMC framework.

The communities have identified interventions to improve the community-led Flood Early warning system (FEWS) so that they have early information for crisis preparedness and improved lead time to take early preparatory action. Similarly, the newly formed Community Disaster Management Committee (CDMC), have formed various task forces- for early warning dissemination, first aid, search and rescue and volunteer task forces. These task force groups become active as soon as a flood early warning is received and are provided with extensive training on basic first aid, search and rescue, and other relevant training; that will help them carry on their duty before and when a flood occurs. FRMC exercise and the project has scaled up the capacities of communities and enabled them to get prepared for floods and work to mitigate risks associated with floods. Read detail blog: [Community prepares to combat flood induced disasters](#). To know more about the detailed local program, please contact: Mr. Kishan Khadka, Project Coordinator, NEEDS Nepal, kishankhadka567@gmail.com.

Youth leadership refresher training on DRR and humanitarian action were organized by ActionAid

To create an awareness and increase the leadership capacity of youth volunteers on DRR and Humanitarian Action, ActionAid and its partner Nepal Mahila Ekata Samaj (NMES) has organized a refresher training – “Youth Leadership on Humanitarian Action” for 3 days in Kathmandu which were attended by total of 25 participants. The program is running from 29-31 May 2022. The training covers the most important topics of DRR and humanitarian action such as vulnerability and capacity analysis, sphere standard, volunteerism, SHEA and safeguarding, disaster management cycle, budget formulation process at ward level etc. Altogether, 25 participants participated in the training.

Cash and voucher support provided to the flood affected families by ActionAid in Bardiya

Through cash and voucher assistance (CVA) programme in Rajapur Municipality of Bardiya district under the “Women and Youth Leadership for Community Resilience and Humanitarian Action” project, ActionAid Nepal, and its local partner KMJS Nepal has facilitated value voucher of total worth of Rs. 3,500 per household to 641 households for agricultural input, which covers agricultural seeds, agricultural equipment, and agricultural manures from the local vendors. It targeted fully flood affected households who have 3 kattha to 10 kattha and partially affected households who have 5 kattha to 10 kattha of their own land. Altogether, the voucher programming has benefited 3,570 household members which was led by trained women and youth volunteers. They were engaged in the overall process of need assessment, trader and beneficiaries’ selection and finalization and voucher distribution and beneficiaries’ orientation process.

A case study on anticipatory actions taken against October 2021 floods in Karnali river through partners’ joint efforts

Nepal Red Cross Society (NRCS) with financial support from the EU Civil Protection and Humanitarian Aid Operations, and technical support from Danish Red Cross, Red Cross Red Crescent Climate Center (RCCC) and Handicap International (HI) started working on Forecast based Action (FbA) and Shock Responsive Social Protection (SRSP) for flood and cold waves in 2020. The FbA mechanism comprises impact thresholds, vulnerability indicators and Early Action Matrix (EAM) which was jointly developed with the NDRRMA, DHM, and the local government authorities in July 2021. The mechanism was developed for five high-risk municipalities along the Karnali and Babai river basins, in Kailali and Bardiya districts. Access the case study: [Case study-Anticipatory action against October 2021 disaster](#)

PROVINCIAL UPDATES - GANDAKI

Kaski, Tanahun, Lamjung: Through Resilient Communities through Vulnerable Earthquake Recovery (ReCoVER) project, being implemented in 8 municipalities of Kaski, Tanahun and Lamjung district by CRS Nepal, has planned to support 1,097 earthquake affected project participants by July 2022 through top-up support and customized assistance support along with socio-technical support from locally hired masons and social mobilizers. Project is also planning to support 150 project participants with a fully reconstructed house after approval from Central Level Project Implementation Unit (CLPIU), Building. This fully constructed house will be prioritized beyond August. Along with the support in shelter, the project will support livelihood input. Project participants will receive support specific and financial literacy training. In the working municipalities project will also construct/rehabilitate 28 water schemes to support the livelihoods of project

participants.

PROVINCIAL UPDATES - LUMBINI

Rupandehi: Municipal Association of Nepal conducted a consultation interaction program related to DRRM in Butwal dated 27 May. The newly elected local heads of Butwal Sub Metropolitan City and of Sainamaina Municipality were also present in the interaction. The

program focused on a number of local policies including of DRRM Act and interacted over building understanding and knowledge sharing of newly elected local heads on need to develop risk-sensitive land use plans that increases disaster resilience. The consultation program was organized under the Tayar Project, supported by USAID.

Bardiya: Under the project “Women and Youth Leadership for Community Resilience and Humanitarian Action” implemented by Kamaiya Mahila Jagaran Samaj (KMJS) Nepal, supported by ActionAid International in Rajapur Municipality of Bardiya district, a four-days training on Search and Rescue training was conducted with the objectives of strengthening capacity of community disaster management committee of Sonpur and Teuni village of Rajapur Municipality. The training from 29 April -3 May 2022 conducted in Bardiya, has covered the practical and theoretical sessions on basic search and rescue, first aid and triage, dead body management, basic life support, water and fire emergency and securing family and preparing for response and incident command system. Altogether 23 participants participated in the training.

PROVINCIAL UPDATES - BAGMATI

Sindhupalchowk: An interaction program based on taking learnings and feedbacks over Impact Based Forecasting System conducted in Sindhupalchowk dated 25 May. Impact

based forecasting system was launched in four palikas of Sindhupalchowk district- Bhotekoshi, Barhabise, Jugal and Panchpokhari Thangpal since last year. An interaction was held jointly by NDRRMA and the Department of Hydrology and Meteorology to understand the effectiveness of this system. The system was found very useful and effective by the participating palikas for disaster response. The program was attended by district level security agencies and representatives of sectoral agencies.

Sindhupalchowk: The progress and review meeting on DRRM has been successfully completed at Chautara, Sindhupalchowk that was organized by the Ministry of Internal Affairs and Law Bagmati Province and coordination with the District Administration Office- Sindhupalchowk. Secretary Ministry of Internal Affairs and Law, Mr. Rudra Singh Tamang informed the meeting that the provincial government has been expanding its cooperation and exploring the potential with the district and local levels in the field of DRRM and also stressed on inter-level coordination. On the same occasion, some of the materials related to DRRM preparedness were also handed over to Sindhupalchowk District Emergency Operations Center (DEOC) by the Bagmati Province Government in presence of Chief District Officer of Sindhupalchowk.

****Call for a Climate Smart Entrepreneurs in Madhesh Province****

Do you care about the environment or have a sustainable and innovative idea that can address Social, Environmental, and Climate challenges? Here's a golden opportunity! Submit your climate-friendly business idea, and get a platform for Incubation, Mentorship, Networking, and an innovation grant of NPR 1, 25,000 Youths of Madhesh Province aged 15-29 are eligible to participate To apply: Visit:

Funded by the European Union

Do you have any idea/enterprise that addresses Social, Environmental, and Climate challenges?

Awards:

- 20 shortlisted enterprises will receive mentorship for six months
- Six best enterprises will receive Rs 1,25,000 as an innovation grant and
- Many other benefits

Youth from Madhesh province, aged between 15 to 29 are eligible to apply.

Deadline: 14th June 2022
